Dear Wanda Marius

## **PROPOSED INCINERATOR REPLACEMENT AT THE QUEENSTOWN STATE VETERINARY LABORATORY, EASTERN CAPE DRAFT BAR : COMMENTS FROM DEDEAT CHRIS HANI REGION**

With reference to the above mentioned project the department has reviewed the document submitted received on the 13 November 2017.

These are the comments:

- Kindly note that Queenstown (Enoch Mgijima LM) has a general waste landfill site, same as the whole Chris Hani District Municipality. The waste for the proposed development must be disposed of at a site registered for hazardous waste.
- The replaced incinerator waste must be decontaminated prior to disposal. On the Final BAR it must be clearly indicated where replaced the incinerator will be disposed.
- It has been noted that in the Drat BAR the waste is classified as Category A (6), however on the application it reflects Category A (7). Kindly rectify this in the Final BAR.
- In the draft BAR it is indicated that the AEL application will be submitted to CHDM, we need confirmation in the final BAR that the application has been submitted.

- Public Participation Process, was there no meeting held for the surrounding community members? There are no attendance registers for meetings that were held.
- APPENDIX E2: Proof of Onsite Poster, Newspaper Notice & BID; Advert of development is placed in Grahamstown whereas the development is for Queenstown veterinary clinic.
- The Department needs clarity in terms of Air Emission Licence application, the Section 22A/AEL application is supposed to be lodge to Chris Hani District Municipality as the competent authority.
- According to the Basic Assessment Report the application for S24G was submitted to the department. Which office was it submitted to?

For further clarity do not hesitate to contact the office on the abovementioned number.

Yours sincerely
