The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial statements. This includes not only sales and purchases but also expenses and income. The document provides a detailed list of items that should be tracked, such as inventory levels, accounts payable, and accounts receivable.

In the second section, the author outlines the various methods used to collect and analyze data. This includes the use of spreadsheets, databases, and specialized software. The document explains how these tools can be used to identify trends, track performance over time, and generate reports that are easy to understand. It also discusses the importance of data security and how to protect sensitive information from unauthorized access.

The third part of the document focuses on the practical application of the data. It provides examples of how the information can be used to make informed decisions about business operations. For instance, the document shows how analyzing sales data can help a company identify its most profitable products and markets. It also discusses how financial data can be used to assess the company's overall health and to plan for the future.

Finally, the document concludes with a summary of the key points and a call to action. It encourages readers to take the time to review their records regularly and to use the data to their advantage. The author also provides contact information for further assistance and resources.

Subject: Proposed Development of a 25m high telecommunication mast on plot , Goodhouse Street, Concordia, Northern Cape

To whom it may concern

I am Mr Roberts, proud resident of Concordia. As a concerned resident of the beautiful town of Concordia, I have to object to the proposed construction and erecting of a 25m high telecommunication mast on plot 275 in Goodhouse Street, Concordia, Northern Cape.

I am concerned because the proposed tower that will be erected in the middle of the town.

The radiation that will be omitted by the communication mast poses a serious health risk to the residents of Concordia.

It poses a risk to the students who walk past plot 275 to school everyday.

The tower will lower the aesthetic value of Concordia.

Vandalism should not be excluded because of the close proximity.

As a concerned resident of Concordia I am deeply concerned about the danger of such a tower in close proximity to the residents and the health risks it poses.

I trust that you will take my concerns into consideration.

Yours sincerely,
Mr Ulric Roberts

Subject: Proposed development of a 25m high telecommunication mast on plot 275, Goodhouse Street Concordia, Northern Cape

To whom it may concern

I am Ms Cloete, resident of Concordia. As a concerned resident of our historical town of Concordia I object to the construction and erecting of a 25 meter high Telecommunication Mast on plot 275 in Goodhouse Street, Concordia, Northern Cape.

My reasons are as follow:

*Radiation omitted by the telecommunications mast poses a serious health risk to the residents of Concordia.

*Children walk that route to school everyday.

*The tower will be an eyesore in the middle of town.

*It will lower the property value of the town.

*Because it is proposed to be erected in the town among residence vandalism should not be excluded, opposed to the Tower being erected on one of the surrounding mountain tops, which would be a better location anyhow.

*As a resident of Concordia I am deeply concerned about the danger of such a tower in close proximity to the residents and the health risks it poses.

I trust that will take my concerns into consideration.

Yours faithfully,
Ms R Cloete

the 1990s, the number of people in the world who are illiterate has increased from 1.2 billion to 1.5 billion.

There are many reasons for this. One is that the population of the world is growing so fast that the number of people who are illiterate is increasing even though the percentage of illiterate people is decreasing.

Another reason is that the quality of education is poor in many countries. This means that many people who go to school do not learn enough to be able to read and write.

There are also many people who do not go to school at all. This is because of poverty, lack of access to schools, and other reasons.

It is important to reduce the number of illiterate people in the world. This is because illiterate people are often poor and have a hard time finding work.

There are many ways to reduce the number of illiterate people. One way is to improve the quality of education. This means that teachers should be trained and that schools should have good facilities.

Another way is to make sure that everyone has access to schools. This means that schools should be built in rural areas and that there should be no fees for school.

There are also many other ways to reduce the number of illiterate people. For example, we can teach people to read and write in their own homes.

Interim Comment

In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Enviroafrica CC

PO Box 5367
Heilderberg
7135

Proposed development of a 25m high telecommunication mast on Erf 275, Goodhouse Street, Concordia, Northern Cape

EnviroAfrica CC has been appointed to conduct an Environmental Authorisation (EA) application process for the proposed telecommunications mast on erf 275, Goodhouse Street, Concordia, Northern Cape. The proposed mast will be 25 m high.

CTS Heritage was appointed to provide a Heritage Impact Assessment as per section 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA) as part of the EA process

Lavin, J. 2018. Heritage Screening Assessment for the proposed construction of a 25m high telecommunication mast on Erf 275, Goodhouse Street, Concordia, Northern Cape.

The submitted document notes that no heritage resources will be impacted and that no further heritage studies are required.

Almond, J. 2018. Palaeontological Specialist Study: Letter of Exemption. Proposed telecommunications mast on erf 275, Concordia near Springbok, Namaqua District, Northern Cape.

The proposed development footprint is underlain by an area that is of very low sensitivity in terms of palaeontological resources, as the underlying bedrock (Precambrian gneiss) is completely unfossiliferous. The overlying sandy Late Caenozoic superficial sediments are of low palaeontological sensitivity. A Fossil Finds procedure has been submitted that details the steps to follow if fossils are uncovered.
