

Table: Comments and response report

Organisation	Raised by	Comment received	Response
Leads 2 Business	Ms. Melanie Miles	In an email dated 18 March 2016, Ms. Miles stated that our company was currently conducting an EIA for the Boitshoko Solar Power Plant and asked whether we could forward her the BID for the application and register her as an I&AP.	In an email on 26 April Ms. Marélie Griesel, the EAP notified Ms. Miles that she would be registered as an I&AP and forwarded her the BID document.
I&AP	Mrs. Stephanie Kasselmann	On a comments and response form Mrs. Kasselmann expressed concerns about the visual impacts on the indigenous veld. She also expressed her concerns about the clearing of large areas and the removal of topsoil and the creation of dust. She states that the area is reliant on farming activity and she is worried about the potential for soil erosion, especially by wind.	No response.
