Notice - BASIC ASSESSMENT PROCESS AND PUBLIC PARTICIPATION: PROPOSED CASTEEL DAM SAFETY REHABILITATION PROJECT (BUSHBUCKRIDGE)

Marissa Botha <botham@naledzi.co.za>

Tue 10/18/2022 10:11 AM

Dear Stakeholder,

The Department of Water and Sanitation, Directorate: Strategic Infrastructure Asset Management (SIAM) proposes to conduct scheduled rehabilitation works at Casteel Dam / Ga-Josefa Dam. Casteel Dam is located on the farm Kasteel 231-KU between Acornhoek and Bushbuckridge near Arthur's Seat within the jurisdiction of Bushbuckridge Local Municipality in the Ehlanzeni District of Mpumalanga Province.

Naledzi Environmental Consultants have been appointed as the independent environmental assessment practitioner (EAP) to submit the application for environmental authorisation and undertake the Basic Assessment (BA) and public participation process for the project.

This email serves as a notification of the project and we draw your attention to the following:

1. **An invitation to register as an Interested and Affected Party (I&AP)** - See enclosed letter; and
2. **The availability of a Background Information Document (BID) for public review and comment** - See enclosed BID.
3. **Two public meetings i.e. 25 October 2022 at Casteel Thusong Service Centre and 26 October 2022 at the Faith Mission Church in Dingley Dale.** - See enclosed letter

The BID provides details of the project including an overview of the BA process and invites I&APs to participate, register for the process and attend the scheduled public meetings. A period of 30 days from **17 October to 15 November 2022** is provided on the BID to register and submit comments/concerns regarding the application.

The attached documents (BID, Stakeholder letter) are available in English, Sesotho, Sepedi and Xitsonga from the Naledzi website www.naledzi.co.za/publicdocuments under 'Casteel Dam Rehabilitation Project'.

Please refer to the attached letter and BID for more details. You are welcome to contact our office if you have any inquiries.

Kind regards

Proposed Casteel Dam Safety Rehabilitation Project

1 read

CaseHeader	LocationInfo	Admin										
<p>ProposalDescription: Proposed Casteel Dam Safety Rehabilitation Project at Farm Kasteel 231-KU, south of Acornhoek, Bushbuckridge Local Municipality, Ehlanzeni District Municipality, Mpumalanga Province</p> <p>Expanded_Motivation: The Department of Water and Sanitation, Directorate: Strategic Infrastructure Asset Management (SIAM) proposes to conduct scheduled rehabilitation works at Casteel Dam, locally known as Ga-Josefa Dam. Casteel Dam is located on a tributary of the Tlulandziteka River North of Bushbuckridge within the jurisdiction of Bushbuckridge Local Municipality in the Ehlanzeni District of Mpumalanga Province. The DWS, Directorate: SIAM conducts Dam Safety Evaluations (DSE) every five (5) years in terms of the Dam Safety Regulation (GN R 139, 24 February 2012) at all departmental dams. Any safety risks identified at these dams are placed on the Dam Safety Rehabilitation Programme (DSRP) for repair. The latest DSE conducted at the dam identified several safety risks and have been placed on the DSRP for scheduled rehabilitation i.e. The slope on the downstream embankment is unstable; There is an eroded gully downstream in the spillway channel; The outlet works are non-functional; The dam is freely discharging from the spillway to the river; The spillway capacity is inadequate and requires the dam embankment to be raised. The DWS Chief Directorate: Construction Management proposes to undertake the necessary rehabilitation works at the original dam embankment over a twenty-four (24) month construction period. No expansion of the dam or construction of a new facility is proposed. The project scope of works would include three components i.e. 1) 28 500m² (2.85 Ha) rehabilitation works at the main dam embankment, spillway section and outlet works. 2) 0.9 Ha Site establishment area northeast of the dam. 3) Upgrading and realignment of the existing gravel access road from the R40 to the dam embankment. An existing access road through Casteel will be used to access the spillway section during the rehabilitation works. The DWS will remove all reeds and vegetation on the spill approach channel and upstream slope along the dam embankment as part of the rehabilitation works. It will promote the free flow of water, prevent spillway blockages and allow for the placement of slope protection material. The site establishment area comprises degraded shrubland that will also need to be cleared to accommodate the site offices.</p> <p>ApplicationDate: Monday, October 17, 2022 - 20:52</p> <p>CaseID: 19843</p> <p>Applicants: Department of Water and Sanitation - National</p> <p>Consultants/Experts: Marissa Botha</p> <p>OtherReferences:</p> <table border="1"> <thead> <tr> <th>Dept</th> <th>CaseReference</th> <th>DueDate</th> <th>FinalDecision</th> </tr> </thead> <tbody> <tr> <td>DFFE</td> <td>Pending</td> <td>15/11/2022</td> <td></td> </tr> </tbody> </table> <p>ReferenceList:</p>			Dept	CaseReference	DueDate	FinalDecision	DFFE	Pending	15/11/2022
