Attention : Cathy Avierinos**

Dear Sirs,

**RE. VRYBURG MALL GEOTECHNICAL STUDY - ERF 11883, A PORTION OF ERF 506, VRYBURG**

We confirm that we are the structural engineers on the above-mentioned new project and that the geotechnical report undertaken by Soil Kraft cc and issued in February 2013 is still relevant. We are aware of the borrow pits on the site and these have been taken into account in our foundation design. Any filling of pits will be done with engineered fill to our specification and will be monitored by us on site.

Should you wish to discuss any of the above-mentioned, please do not hesitate to contact the undersigned.

Yours faithfully,

**B.G. McLINTOCK (PR.ENG)**
