Re: Peer review of the Social Impact Specialists Report for the Proposed Metals Industrial Cluster near Kuruman, Northern Cape Province

Having reviewed the above report I find that in essence it provides a description of the project and the social environment within which the project will unfold. It also provides an indication of the social impacts that are likely to arise as a result of the proposed project and suggests appropriate optimisation and mitigation measure. The review was concluded on 30 October, 2016 and the following comments are made.

1. The terms of reference are acceptable;
2. The methodology is clearly explained and acceptable;
3. The findings are based on acceptable evidence;
4. The mitigation measures and recommendations are with appropriate recommendation being suggested;
5. No apparent shortcomings are identified;
6. The reference literature is appropriate;
7. No site-inspection was carried out as part of this peer review;
8. The article is well-written and easy to understand. Certain structural changes were suggested in this respect.

It can be concluded in considering the SIA scoping report that that the process and assessment followed was adequate providing a fair indication of the social impacts likely to arise as a result of the project. Attached is a schedule, in accordance with Appendix 6 of the National Environmental Management Act, 1998 (ACT NO. 107 OF 1998). Environmental Impact Assessment Regulations, 2014, indicating the level of compliance of the report in respect of this regulation.
