I the undersigned, Frederik Johannes Nel, the registered owner of the property Farm 426 Skuitdrift, hereby grants permission to Scuitdrift Solar Project (Pty) Ltd to divert the road AP3256 running east from the Eskom Schuitdrift Substation in order to develop the 10MW solar energy facility on the proposed development site.

The exact layout of the proposed deviation will be confirmed.

Ernie Aylward,

Your mail of 13 April 2012 has reference.

Skuitdrift Substation Access Road, Farm 426, Kenhardt.

Eskom has no objection to the proposed deviation of the existing access road to our Substation.

Should a formal application be submitted, Eskom would assess the situation according to its merit.

In principle Eskom would not have a problem with the change in the access road should a viable alternative be provided. The cost of the road will be for the developer/applicants account.

From the layout (Drawing name: Skuitdrift 10 MW Preferred layout) provided that the alternative seems to be acceptable. You are welcome to submit a formal application once your proposal reaches the relevant point in time.

The bends in the road should make provision for an "abnormal load" truck to access the substation site.

Kind Regards

Magda Le Roux
