

CIVIL AVIATION COMPLIANCE STATEMENT

TRANSALLOYS SOLAR PV ENERGY FACILITY ON PORTIONS 20 AND 24 OF THE FARM SCHOONGEZICHT 308JS AND PORTIONS 34 AND 35 OF THE FARM ELANDSFONTEIN 309JS WITHIN THE EMALAHLENI LOCAL MUNICIPALITY IN MPUMALANGA PROVINCE

This compliance statement has been prepared by an Environmental Assessment Practitioner.

This Compliance Statement is applicable to the Transalloys Solar PV Facility, which is located on Portions 34 and 35 of the Farm Elandsfontein 309JS and Portions 20 and 24 of the Farm Schoongezicht 308JS, adjacent to their smelter complex on Clewer Road 1034, Witbank now known as eMalahleni in the Emalahleni Local Municipality.

The sensitivity rating for the site is as follows:

Table 1: Identified sensitivity in terms of the national web-based screening tool for the development

Identified Assessment	Specialist	Identified Sensitivity		Comment
		By DFFE Screening Report	By EAP	
Civil Aviation Assessment		Low Sensitivity	Low Sensitivity	No major or other types of civil aviation aerodromes.

A low sensitivity rating has been indicated by the DFFE screening tool due to no major or other types of civil aviation aerodromes being in close proximity to the site. This has been confirmed through the EIA process undertaken for the project. The proposed development will not have an unacceptable impact on the airfield. Further assessment of the potential impacts is not required.

During the public participation for the EA Application, the South African Civil Aviation Authority (SACAA) was consulted and invited to attend key stakeholder workshops. No formal response has been provided by SACAA regarding the proposed project.

Drafted by EAP
