**ASSMANG Ltd – Manganese Division** requires the services of the following individual at their Black Rock Mine Operations, situated 80km northwest of Kuruman in the Northern Cape:

## FOREMAN MECHANIC (C5 Paterson Grading)

**Main tasks and responsibilities:**

- Ensure equipment availability and reliability through application of maintenance management systems and resources to achieve production targets
- Monitor progress and evaluate the results of jobs
- Comply with quality standards and deliver in a manner that support and meet operational quality standards
- Manage team performance
- Resolve conflict
- Participate in planning process for the section
- Execute plans within standard
- Implement team operational plans to ensure defined objectives are met through supporting and being supported by other teams within and linked to the department
- Supervise and inspect subordinates' daily activities, offer coaching and on-the-job training to ensure maintenance according to organisational standards
- Coordinate maintenance as well as statutory inspections and audits by internal and external service providers
- Ensure the execution of scheduled and non-scheduled mechanical repairs, inspections and installation work as required.

**Minimum requirements (essential unless otherwise indicated):**

- Grade 12/M3
- Certificate Trade Test Artisan – Mechanic
- 3 years' relevant post-qualification experience in a mining environment
- 2 years' supervisory experience
- Valid Code B/EB driver's licence
- Computer literacy (Microsoft Office).

The candidate will be appointed on the condition of being certified medically fit as per the Mine Health and Safety Act, 29/1996. Preference will be given to applicants from previously disadvantaged groups to support the company's employment equity plan.

**Remuneration:** Remuneration will be based on a competitive all-inclusive flexible package. The successful candidate that conforms to all said requirements and experience will be appointed on this grading. A candidate that does not conform to all set requirements and experience will be considered only if a suitable candidate that does comply cannot be selected and only if the requirements of the position support a developmental appointment according to policy.

**Interested applicants are requested to submit their CVs with certified copies of qualifications to Ncwaka Maseko at fax: 086 572 7977 or e-mail: recruitment7@brmo.co.za**

Please be advised that short-listed candidates will be required to authenticate information provided in CVs.

**Applications close on 2 February 2016**

Late applications will not be entertained.

If you have not been contacted within 21 days of the closing date, please consider your application to be unsuccessful. Correspondence will only be limited to short-listed candidates.

*Assmang Limited reserves the right not to appoint.*

## labour

Department:  
Labour  
REPUBLIC OF SOUTH AFRICA

## INVITATION TO TENDER: SECURITY SERVICES

The Department of Labour: Northern Cape invites service providers for the provision of security guards for day and night shifts (24 hours) during weekdays, weekends and public holidays at access control points and patrolling of premises. The contract period is 24 months.

A compulsory briefing session will be held on 29 January 2016 at 11:00 in the boardroom, Laboria House, cor. Compound and Pniel Roads, Kimberley.

Prospective bidders who do not attend the meeting will be disqualified in the adjudication of the bid. Bid documents will only be available at the briefing session. Local service providers are encouraged to bid.

Bids can be deposited in the tender box at the Department of Labour, Laboria House, cor. of Pniel and Compound Roads, Kimberley or posted to Private Bag X5012, Kimberley 8300.

Closing date for bids will be at 11:00 on 19 February 2016.

Please note: The Department will not take responsibility for bids that are late due to postal services.

### INVITATION FOR COMMENT ON DRAFT EIAR AND EMPr

**NOTICE OF AN ENVIRONMENTAL AUTHORISATION, MINING RIGHT APPLICATION AND WATER USE LICENCE FOR THE PROPOSED GAMOHAAN QUARRY NEAR KURUMAN, NORTHERN CAPE**

DMR REF NO: NC 30/51/2/2/10093 EM

Notice is hereby given for a mining right in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 as amended by Section 18 of Act 49 of 2008 and Regulation 41(2) read with Section 24J of the National Environmental Management Act (NEMA), 1998 (Act No. 107 of 1998) and the Environmental Impact Assessment Regulations of 2014. Afrimat Aggregates Trading (Pty) Ltd applied for a mining right on the farm Gamohaam. The material which will be mined is dolomite which is best suited for lower aggregates such as sub-base and base gravel road wearing roads.

In terms of Sections 24(2) and 24D of the National Environmental Management Act (Act No. 107 of 1998), as amended, and as read on Listing Notices 1 and 2 (Government Notices R. 983 and 984 in Government Gazette 38282 of 4 Dec. 2014) a scoping and EIA is required for the project as per the following listed activities:

**GN R 984: 2014 (Listing Notice 2) Activity 15, 17 and 21**

**Listed activity:**

15. The clearance of an area of 20 ha or more of indigenous vegetation, excluding where such clearance of indigenous vegetation is required for:

- The undertaking of linear activity or
- Maintenance purposes undertaken in accordance with a maintenance management plan

**GN R 984: 2014 (Listing Notice 2) Activity 17 and 21**

**Listed activities:**

17. Any activity including the operation of that activity which requires a mining right as contemplated in Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002), including associated infrastructure, structures and earthworks, directly related to the extraction of a mineral resource, including activities for which an exemption has been issued in terms of Section 106 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002)

21. Any activity including the operation of that activity associated with the primary processing of a mineral resource including winning, reduction, extraction, classifying, concentrating, crushing, screening and washing but excluding the smelting, beneficiation, refining, calcining or gasification of the mineral resource in which case activity 6 in this notice applies

The proposed quarry is situated 30 km outside of Kuruman town. The quarry is located ± 1 km off the R31 road on Portion 1 of the farm Gamohaam 438, with Maheane Village to the north of the R31. The site falls within the jurisdiction of Kuruman Magisterial District in the Northern Cape province. The size of the proposed site is 24,5 ha.

In terms of the **National Water Act No. 36 of 1998**, a Water Use Licence is required as per the following listed activities:

Section 21 (a): Taking water from a water resource  
Section 21 (b): Storing water  
Section 21 (j): Removing, discharging or disposing of water found underground if it is necessary for the efficient continuation of an activity or for the safety of people

The Draft EIA and EMPr is available for viewing at Kuruman Library and the Batharos Tribal Office in Batharos Village for a period of 30 days from 25 January 2016 to 25 February 2016. Please note the draft report is also available on request. Interested and/or affected parties who wish to participate by contributing comments, or who would like to obtain more information, should please contact **Ntsanko Ndlovu** on details indicated below. The comments must please reach us by **Thursday, 25 February 2016**.

## PROPOSED CONSTRUCTION OF THE NEW KLIPKOP-LEHATING 132 KV DOUBLE CIRCUIT CHICKADEE POWERLINE (±14KM IN LENGTH) BETWEEN THE NEW LEHATING SUBSTATION AND THE EXISTING KLIPKOP SUBSTATION, NORTHERN CAPE PROVINCE ENVIRONMENTAL AUTHORISATION PROCESS

(J&G REF NO: 3909)

**NOTICE:** Notice is hereby given in terms of the following legislation for the above mentioned project:

Relevant Act	Relevant Regulation or Section in terms of the Act	Activities in terms of the Act of Regulation which will be triggered	Competent Authority to whom the Application for Authorisation will be made
National Environmental Management Act (NEMA) (Act 107 of 1998); and the Environmental Impact Assessment Regulations, 2014, promulgated in terms of Section 24(5) and 44 of NEMA.	Government Notice No. R 983	Activities 11 and 19	Department of Environmental Affairs (DEA)
National Water Act (Act 36 of 1998)	Section 21	Activities 21(c) and (i)	Department of Water Affairs

**PROJECT DETAILS:** It is the intention of Eskom Distributions, Northern Cape Operating to construct the new Klipkop-Lehating 132 kV Double Circuit Chickadee powerline (±14km in length) between the new Lehating Substation and the existing Klipkop Substation, Northern Cape Province. The Klipkop substation is situated 12km North West of Hotazel, and the Lehating Substation will be situated approximately 14km north of the existing Klipkop Substation. In addition the new Klipkop-Lehating Line will loop in and out of the existing Wessels Substation. These loop-in and loop-out lines also form part of this proposed project. Three powerline route alternatives will be assessed as part of this Environmental Authorisation Process.

**Project need and desirability:**

Lehating Mining (Pty) Ltd appointed SLR Consulting to undertake an Environmental Authorisation process for the establishment of the Lehating Mine on Portion 1 of the Farm Lehating 741. The Northern Cape Department of Environment and Nature Conservation granted authorisation for the establishment of the mine on the 22nd of September 2014 (Ref No: NC/EIA/JIC/JOE/LEH2/2012). The construction of the Lehating Substation formed part of the application which was undertaken by SLR Consulting and authorisation was therefore obtained for the construction of the substation. Lehating Mining (Pty) Ltd approached Eskom Distributions, Northern Cape Operating Unit to assist with the supply of electricity to the new substation. The Klipkop Substation is ideally situated to provide electricity supply to the Lehating Substation.

**ENVIRONMENTAL ASSESSMENT PRACTITIONER:**

Jeffares and Green (Pty) Ltd Engineering and Environmental Consultants have been appointed by Eskom Distributions Northern Cape Operating Unit, as the independent Environmental Assessment Practitioner to undertake the Environmental Basic Assessment and Water Use License Application processes for this project.

**RELEVANT CONTACT PERSON:**

Company	Environmental Assessment Practitioner	Postal Address	Contact Details
Jeffares & Green (Pty) Ltd	Sonja van der Merwe	PO Box 1109, Sunninghill, 2157.	Tel No: 011 231 2200 Fax No: 011 807 1607 E-mail: <a href="mailto:vandermerwes@jgi.co.za">vandermerwes@jgi.co.za</a>

**OBTAIN MORE INFORMATION ON THE PROJECT:** A Background Information Document (BID) providing details on the proposed project, legislation and proposed processes to be followed can be obtained from the consultant detailed above. A locality map showing the location of the project is included in the BID.

**OPPORTUNITY TO PARTICIPATE:** Interested and Affected Parties are invited to provide written comments together with the above reference number, their name, email address, and contact details to the contact person indicated above by no later than the 29th of February 2016.

**REVIEW OF DRAFT REPORT:** The Draft Basic Assessment will be made available for public review for a 30 day review period. Registered Interested and Affected Parties will be notified in writing of the dates during which this Report will be made available for Public Review, as well as the venue where this Report can be reviewed. The Draft Report will also be available for review on the Jeffares & Green (Pty) Ltd website ([www.jgi.co.za](http://www.jgi.co.za)).

**SOEK, KOOP, VERKOOP**

## NOTIFICATION OF AN ENVIRONMENTAL AUTHORISATION PROCESS

**PROPOSED CONSTRUCTION OF THE NEW KLIPKOP-LEHATING 132 KV DOUBLE CIRCUIT CHICKADEE POWERLINE (±14KM IN LENGTH) BETWEEN THE NEW LEHATING SUBSTATION AND THE EXISTING KLIPKOP SUBSTATION, NORTHERN CAPE PROVINCE**

(J&G Project Reference Number: 3909)

### BACKGROUND INFORMATION DOCUMENT (BID)

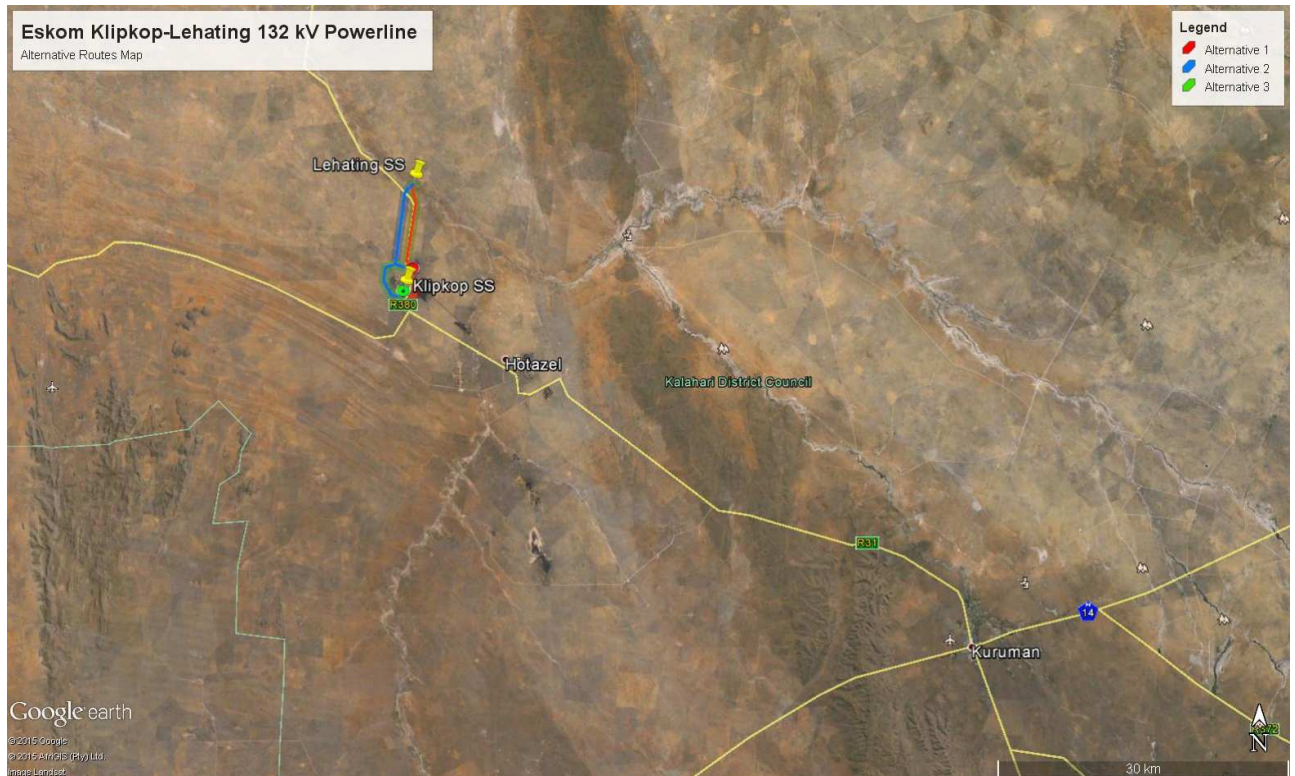

**1. Proponent and Project Overview:**

It is the intention of Eskom Distributions, Northern Cape Operating to construct the new Klipkop-Lehating 132 kV Double Circuit Chickadee powerline (±14km in length) between the new Lehating Substation and the existing Klipkop Substation, Northern Cape Province. The Klipkop substation is situated 12km North West of Hotazel, and the Lehating Substation will be situated approximately 14km north of the existing Klipkop Substation. In addition the new Klipkop-Lehating Line will loop in and out of the existing Wessels Substation. These loop-in and loop-out lines also forms part of this proposed project. A locality map showing the location of the project is attached to this BID. Three powerline route alternatives will be assessed as part of this Environmental Authorisation Process.

**2. Project Location:**

The Lehating Substation will be situated on Portion 1 of the Farm Lehating 741, and the existing Klipkop Substation is situated on Portion 9 of the Farm N'Chwaning 267.

Substation Coordinates		
Existing Klipkop Substation:	27° 8'10.77"S	22°50'39.62"E
New Lehating Substation	27° 2'19.22"S	22°51'16.00"E

**Figure 1: Proposed Study Area**

**3. Project need and Desirability:**

Lehating Mining (Pty) Ltd appointed SLR Consulting to undertake an Environmental Authorisation process for the establishment of the Lehating Mine on Portion 1 of the Farm Lehating 741. The Northern Cape Department of Environment and Nature Conservation granted authorisation for the establishment of the mine on the 22nd of September 2014 (Ref No: NC/EIA/JIC/JOE/LEH2/2012). The construction of the Lehating Substation formed part of the application which was undertaken by SLR Consulting and authorisation was therefore obtained for the construction of the substation. Lehating Mining (Pty) Ltd approached Eskom Distributions, Northern Cape Operating Unit to assist with the supply of electricity to the new substation. The Klipkop Substation is ideally situated to provide electricity supply to the Lehating Substation.

**4. Project Environmental Consultant:**

Jeffares and Green (Pty) Ltd Engineering and Environmental Consultants have been appointed by Eskom Distributions Northern Cape Operating Unit, as the independent Environmental Assessment Practitioner to undertake the Environmental Basic Assessment and Water Use License Application processes for this project.

**5. Proposed Alternatives:**

Three powerline route alternatives between the Klipkop and Lehating Substation was identified. Each route alternative has a 1km wide study area which will be investigated during the EA Process

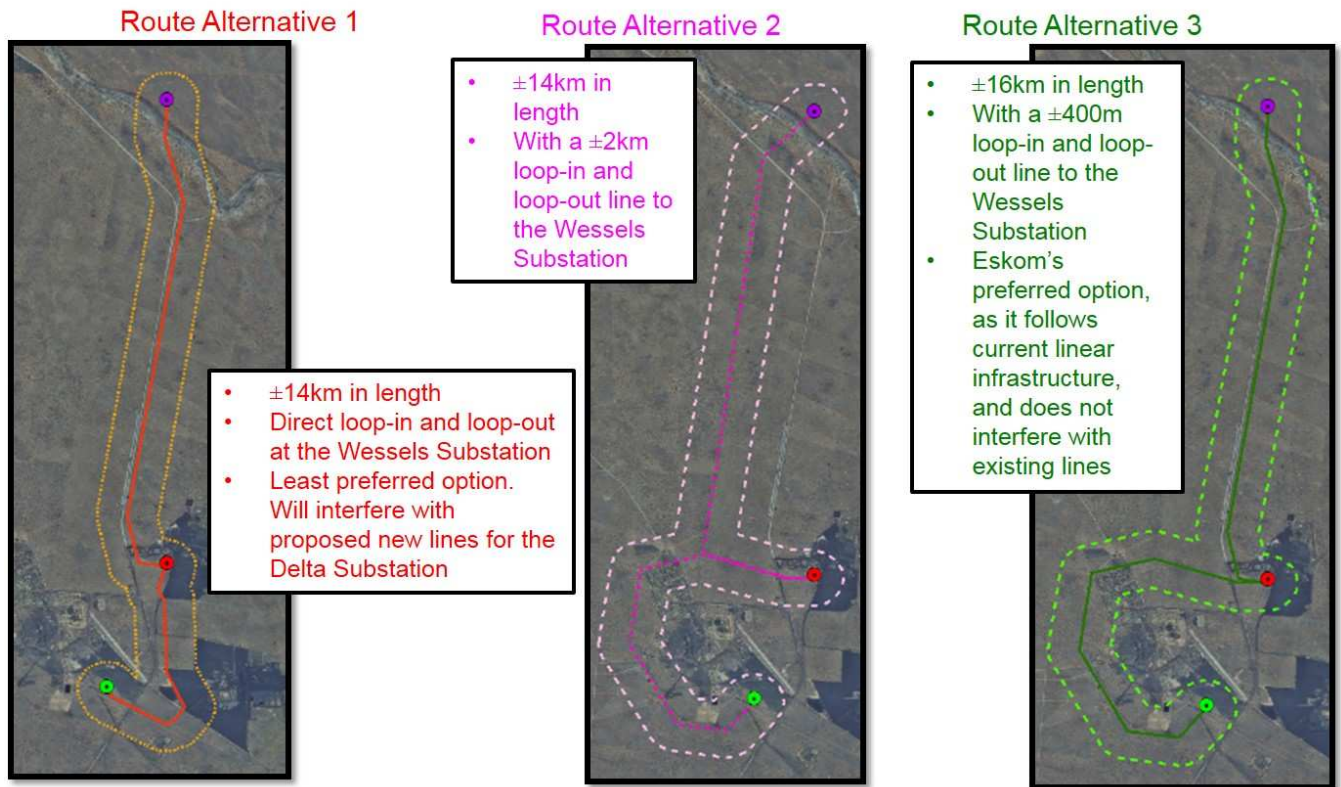

Figure 2: Proposed Alternatives

A list of all the potentially affected farm portions are provided in the table below.

## 6. Environmental Authorisation Process:

New Environmental Impact Assessment (EIA) Regulations were promulgated in December 2014 in terms of Section 24(5) and Section 44 of the National Environmental Management Act (NEMA), Act 107 of 1998 consists of the following:

- Regulation 982 provide details on the processes and procedures to be followed when undertaking an Environmental Authorisation process;
- Listing Notice 1 (Regulation 983) define activities which will trigger the need for a Basic Assessment process;
- Listing Notice 2 (Regulation 984) define activities which trigger an Environmental Impact Assessment (EIA) process. If activities from both R 983 and R 984 are triggered, then an EIA process will be required.
- Listing Notice 3 (Regulations 985) define certain additional listed activities for which a Basic Assessment process would be required within identified geographical areas.

In terms of the above regulations, a Basic Environmental Authorisation Process is required as this project triggers the following listed activities:

Listed activity as described in GN R. 983, GN R. 984 and GN R.985	Description of project activity that may trigger the listed activity
<p><b>GN R 983 – Item 11</b> The development of facilities or infrastructure for the transmission and distribution of electricity –</p> <ol style="list-style-type: none"> <li>Outside urban areas or industrial complexes with a capacity of more than 33 but less than 275 kilovolts; or</li> <li>Inside urban areas or industrial complexes with a capacity of 275 kilovolts or more.</li> </ol>	This project involves the construction of a new 132kV Powerline of 14km in length outside of an urban area.
<p><b>GN R 983 – Item 19</b> The infilling or depositing of any material of more than 5 cubic metres into, or the dredging, excavation, removal or moving of soil, sand, shells, shell grit, pebbles or rock of more than 5 cubic metres from-</p> <ol style="list-style-type: none"> <li>a watercourse;</li> </ol> <p>but excluding where such infilling, depositing, dredging, excavation, removal or moving-</p> <ol style="list-style-type: none"> <li>will occur behind a development setback;</li> <li>is for maintenance purposes undertaken in accordance with a maintenance management plan; or</li> </ol>	The proposed powerline will traverse the Kuruman River. The exact location of infrastructure is not yet know, and therefore the applicability of this activity will only be known at a later stage.

<b>Listed activity as described in GN R. 983, GN R. 984 and GN R.985</b>	<b>Description of project activity that may trigger the listed activity</b>
(c) falls within the ambit of activity 21 in this Notice, in which case that activity applies.	

**7. Water Use Authorisation Process:**

Section 21 of the National Water Act (Act 36 of 1998) defines a list of activities which require a Water Use Authorisation. Listed activities in terms of Section 21 include the following:

- 21(a) taking water from a water resource;
- 21(b) storing water;
- 21(c) impeding or diverting the flow of water in a watercourse;
- 21(d) engaging in a stream flow reduction activity contemplated in Section 36 of the Act;
- 21(e) engaging in a controlled activity identified as such in section 37(1) or declared under section 38(1);
- 21(f) discharging waste or water containing waste into a water resource through a pipe, canal, sewer, sea outfall or other conduit;
- 21(g) disposing of waste in a manner which may detrimentally impact on a water resource;
- 21(h) disposing in any manner of water which contains waste from, or which has been heated in, any industrial or power generation process;
- 21(i) altering the bed, banks, course or characteristics of a watercourse;
- 21(j) removing, discharging or disposing of water found underground if it is necessary for the efficient continuation of an activity or for the safety of people; and
- 21(k) using water for recreational purposes.

The proposed powerline will traverse the Lehating River, and therefore activities 21(c) and (i) are triggered. This project would therefore require a Water Use Authorisation.

**8. Relevant Authorities that will be involved in this project:**

- a) Decision Making Authority:  
The Decision making Authority on this project will be the Department of Environmental Affairs (DEA).
- b) Commentary Authorities:
  - a) The Northern Cape Department of Environment and Nature Conservation;
  - b) Department of Water and Sanitation, Northern Cape Regional Office;
  - c) Department of Mineral Resources;
  - d) Department of Agriculture, Forestry and Fisheries;
  - e) Northern Cape Department of Roads and Public Works
  - f) Joe Morolong Local Municipality;
  - g) John Taolo Gaetsewe District Municipality; and
  - h) Northern Cape Provincial Heritage Resources Authority
- c) Key Stakeholders:
  - a) All the various mining companies;
  - b) Civil Aviation;
  - c) Lehating Farmers Union;
  - d) WESSA (Wildlife and Environment Society of South Africa); and
  - e) Bird Life Africa.

**9. Summary of Authorisation and Licensing Process:**

A summary of the processes followed during the undertaking of an Environmental Impact Assessment process is provided below.

Application Process	General Steps involved in Application Process
Basic Environmental Assessment (BA) for Environmental Authorisation	<ul style="list-style-type: none"> <li>• Project Inception Phase;</li> <li>• Affected Landowner Identification and Notification;</li> <li>• Sensitivity Mapping and confirmation of specialist assessments required;</li> <li>• Determination of additional alternatives required if necessary;</li> <li>• Compilation and Submission of the BA Application Forms;</li> <li>• Specialist appointment and briefing;</li> <li>• Stakeholder Engagement Period;</li> </ul>

Application Process	General Steps involved in Application Process
	<ul style="list-style-type: none"> <li>• Receive and Review Specialist Reports;</li> <li>• Draft Basic Assessment Report &amp; Environmental Management Plan compilation (EMP);</li> <li>• Client Review of Draft Reports;</li> <li>• Public and Commentary Authority Review of Draft Reports;</li> <li>• Public Meeting (if Required);</li> <li>• Compilation of Final Reports;</li> <li>• Submission of Final Reports to the Competent Authority for review and decision making;</li> <li>• Receive decision from Competent Authority; and</li> <li>• Stakeholder Notification and Appeal Period.</li> </ul>
Water Use Authorisation Process	<ul style="list-style-type: none"> <li>• A pre-consultation meeting with the Department of Water and Sanitation (DWS) will be required. In order to be assigned the correct DWS official, Jeffares &amp; Green needs to determine in which Water Management Area (WMA) the proposed activity will take place;</li> <li>• A site visit will then be conducted and information gathered;</li> <li>• A public consultation process will have to be followed as is stipulated in the NWA. This process will form part of the Public Participation Process for Environmental Authorisation, and a separate process for Water Use Authorisation will not be undertaken;</li> <li>• Specialists will be appointed to undertake the necessary specialist studies;</li> <li>• Once all the information has been gathered, Jeffares &amp; Green will complete the relevant WULA Application Forms. Multiple application forms may be required depending on the number of landowners involved;</li> <li>• A Water Use License Technical Report will be compiled using all information gathered as mentioned above as well as the relevant specialist study information. The Draft Water Use License Technical Report will be made available for Public Review prior to submission of the Final Report with the application Forms attached to DWS.</li> </ul>

#### 10. **Specialist Studies Required as Part of the Authorisation and Licensing Process:**

- Ecological Assessment (Faunal, Floral and Avifaunal) by Mr Mathew Ross from Enviross;
- Heritage Impact Assessment by Dr Johnny van Schalkwyk;
- Aquatic and Wetland Assessment by Dr Martin Ferreira, Jeffares & Green;
- Visual Impact Assessment by Jeffares & Green; and
- Floodline Delineation Study by Jeffares & Green.

#### 11. **Public Review and Commentary Authority Review of the Draft Basic Assessment Reports:**

The Draft Basic Assessment will be made available for public and commentary authority review for a 30 day review period. Registered Interested and Affected Parties will be notified in writing of the dates during which this Report will be made available for Public Review, as well as the venues on where this Report can be reviewed. The Draft Report will also be available for review on the Jeffares & Green (Pty) Ltd website ([www.jgi.co.za](http://www.jgi.co.za)).

#### 12. **Becoming Involved in the BA Process:**

The initial public notification period will end on the 29<sup>th</sup> of February 2016. All parties wishing to provide their comments regarding the proposed project are kindly requested to register as Interested and Affected Parties (I&AP's) by completing the attached Registration Form. All written comments regarding this proposed project should be forwarded to the Environmental Consultant, by no later than the 29<sup>th</sup> of February 2016.

**PROPOSED CONSTRUCTION OF THE NEW KLIPKOP-LEHATING 132 KV DOUBLE CIRCUIT CHICKADEE POWERLINE (±14KM IN LENGTH) BETWEEN THE NEW LEHATING SUBSTATION AND THE EXISTING KLIPKOP SUBSTATION, NORTHERN CAPE PROVINCE**

**ENVIRONMENTAL AUTHORISATION PROCESS**

(J&G REF NO: 3909)

**NOTICE:** Notice is hereby given in terms of the following legislation for the above mentioned project:

Relevant Act	Relevant Regulation or Section in terms of the Act	Activities in terms of the Act of Regulation which will be triggered	Competent Authority to whom the Application for Authorisation will be made
National Environmental Management Act (NEMA) (Act 107 of 1998); and the Environmental Impact Assessment Regulations, 2014, promulgated in terms of Section 24(5) and 44 of National NEMA.	Government Notice No. R 983	Activities 11 and 19	Department of Environmental Affairs (DEA)
National Water Act (Act 36 of 1998)	Section 21	Activities 21(c) and (i)	Department of Water Affairs

**PROJECT DETAILS:** It is the intention of Eskom Distributions, Northern Cape Operating to construct the new Klipkop-Lehating 132 kV Double Circuit Chickadee powerline (±14km in length) between the new Lehating Substation and the existing Klipkop Substation, Northern Cape Province. The Klipkop substation is situated 12km North West of Hotazel, and the Lehating Substation will be situated approximately 14km north of the existing Klipkop Substation. In addition the new Klipkop-Lehating Line will loop in and out of the existing Wessels Substation. These loop-in and loop-out lines also forms part of this proposed project. A locality map showing the location of the project is attached to this notice. Three powerline route alternatives will be assessed as part of this Environmental Authorisation Process.

**Project need and Desirability:** Lehating Mining (Pty) Ltd appointed SLR Consulting to undertake an Environmental Authorisation process for the establishment of the Lehating Mine on Portion 1 of the Farm Lehating 741. The Northern Cape Department of Environment and Nature Conservation granted authorisation for the establishment of the mine on the 22<sup>nd</sup> of September 2014 (Ref No: NC/EIA/JIC/JOE/LEH2/2012). The construction of the Lehating Substation formed part of the application which was undertaken by SLR Consulting and authorisation was therefore obtained for the construction of the substation. Lehating Mining (Pty) Ltd approached Eskom Distributions, Northern Cape Operating Unit to assist with the supply of electricity to the new substation. The Klipkop Substation is ideally situated to provide electricity supply to the Lehating Substation.

**ENVIRONMENTAL ASSESSMENT PRACTITIONER:** Jeffares and Green (Pty) Ltd Engineering and Environmental Consultants have been appointed by Eskom Distributions Northern Cape Operating Unit, as the independent Environmental Assessment Practitioner to undertake the Environmental Basic Assessment and Water Use License Application processes for this project.

**RELEVANT CONTACT PERSON:**

Company	Environmental Assessment Practitioner	Postal Address	Contact Details
Jeffares & Green (Pty) Ltd	Sonja van der Merwe	PO Box 1109 SUNNINGHILL 2157	Tel No: 011231 2200 Fax No: 011 807 1607 E-mail: <a href="mailto:vandermerwes@jgi.co.za">vandermerwes@jgi.co.za</a>

**OBTAIN MORE INFORMATION ON THE PROJECT:** A Background Information Document (BID) providing details on the proposed project, legislation and proposed processes to be followed can be obtained from the consultant detailed above. A locality map showing the location of the project is included in the BID.

**OPPORTUNITY TO PARTICIPATE:** Interested and Affected Parties are invited to provide written comments together with the above reference number, their name, email address, and contact details to the contact person indicated above by no later than the 29<sup>th</sup> of February 2016.

**REVIEW OF DRAFT REPORT:** The Draft Basic Assessment will be made available for public review for a 30 day review period. Registered Interested and Affected Parties will be notified in writing of the dates during which this Report will be made available for Public Review, as well as the venue where this Report can be reviewed. The Draft Report will also be available for review on the Jeffares & Green (Pty) Ltd website ([www.jgi.co.za](http://www.jgi.co.za)).

**Subject:** PROPOSED NEW ESKOM KLIPKOP – LEHATING 132KV POWERLINE NORTHERN CAPE

Dear Stakeholders,

**RE:PUBLIC AND COMMENTARY REVIEW PERIOD OF THE DRAFT BASIC ASSESSMENT REPORT FOR THE PROPOSED NEW ESKOM KLIPKOP – LEHATING 132KV POWERLINE NORTHERN CAPE: JG REFERENCE NUMBER: 3909**

The Draft Basic Assessment Report for the above project will be available for Public and Commentary Authority review from the 10<sup>th</sup> of May 2016 until the 10<sup>th</sup> of June 2016. The Report is available for review at the Hotazel Post office, which is situated on Boardman Road, Hotazel . The Report will also be available for review on the JG Afrika (Pty) Ltd website ([www.jgi.co.za](http://www.jgi.co.za))

Should you wish to provide any comments on the Draft Report, or raise any issues or concerns regarding the proposed project, please submit your comments in writing by no later than the 10<sup>th</sup> of June 2016. Your comments should be submitted to:

**RELEVANT CONTACT PERSON:**

**To:** jpleader@intekom.co.za  
**Cc:** Andrea Van Gensen; Nondwe Nongauza  
**Subject:** FW: Klipkop-Lehating Kraglyn

Dear Jeff,

Eskom mentioned that we could have a meeting, or that you could perhaps just send us a map which shows the extent of you current and future mining areas in order for Eskom to determine a route where impact to your mining areas could be avoided.

I have sent you a map via our sendit.jgi website to download. The map shows the three alternative 1km study corridors and a centre line for each corridor. Please just note that the powerline could be situated anywhere within the study corridor. Study area Alternative 3 is Eskom's preferred alternative as the powerline within this corridor could follow existing linear infrastructure.

Please let me know whether I must arrange a meeting, or whether you will be indicating on the map which areas the powerline should avoid, of where the powerline could be situated.

You will receive a link to download the map. I have also copied the link below:

*Upload Completed!*

*This download will be stored in our servers until 2016/03/23 07:58:46*

*Your download link :*

<http://sendit.jgi.co.za/?fs=5117-abf7b49a1a36>

*Use this link to share the download to this file.*

Please contact me should you have any queries.

Kind Regards,

---

Good day,

Your enquiry regarding comments from the SACAA with regard to power lines refers.

There is a SACAA process whereby permission is applied for with regards to obstacles which could pose an aviation hazard. More information can be obtained at <http://www.caa.co.za>. Click on 'Obstacles' on the LHS. For administrative processing complete the application for obstacle approval on the SACAA website, links: information for the industry; obstacle; forms: Application Part 139-27. Complete and submit on the form itself, it drops into our obstacle e-mail address, for the admin to provide you with an pro forma invoice, the payment will initiate the process.

- Kindly provide a **.kml (Google Earth) file reflecting the proposed overhead electric power line route(s)**.
- Also indicate the **highest** structure of the project.
- *Please always use the proposed power line project name in the Subject box when corresponding via email with this office and indicate the name & address which should appear on the CAA approval/decline letter.*

Kind regards

Baie dankie vir jou vriendelike hulp.

Aangeheg is 'n dokument wat inligting bevat i.v.m die projek soos telefonies bespreek. Daar is 'n bestaande landingstrook wat ek vermoed deur die myne in die omgewing gebruik was. Volgens die mense in die omgewing

word die landingstrook nie tans gebruik nie. Een van die kraglyn roetes wat Eskom oorweeg loop naby aan die landingstrook.

Stuur asb vir my die nodige inligting om 'n aansoek by julle in te dien.

Groete,

**Sonja van der Merwe**

**Subject:** Klipkop-Lehating Kraglyn

Dear Stakeholders / Potentially Affected Landowners,

### **RE: PROPOSED CONSTRUCTION OF THE NEW KLIPKOP-LEHATING 132 KV DOUBLE CIRCUIT CHICKADEE POWERLINE (±14KM IN LENGTH) BETWEEN THE NEW LEHATING SUBSTATION AND THE EXISTING KLIPKOP SUBSTATION, NORTHERN CAPE PROVINCE**

It is the intention of Eskom Distributions, Northern Cape Operating to construct the new Klipkop-Lehating 132 kV Double Circuit Chickadee powerline (±14km in length) between the new Lehating Substation and the existing Klipkop Substation, Northern Cape Province. The Klipkop substation is situated 12km North West of Hotazel, and the Lehating Substation will be situated approximately 14km north of the existing Klipkop Substation. In addition the new Klipkop-Lehating Line will loop in and out of the existing Wessels Substation. These loop-in and loop-out lines also forms part of this proposed project. A locality map showing the location of the project is attached, as well as a copy of the Background Information Document. Three powerline route alternatives will be assessed as part of this Environmental Authorisation Process.

Attached is also a list of all the properties which may be impacted by the proposed powerline, as well as contact details of the landowners. Could you kindly please inform me should any data on the list be incorrect. Could you kindly please also assist with the provision of contact details of your neighbours should their property be affected and their contact information not be available at this stage.

We kindly request all affected landowners and other Interested and Affected Parties to make contact with us regarding the project and the Environmental Assessment Process.

A meeting with landowners and other Interested and Affected parties will be held should such a meeting be requested by these parties. The Draft Basic Assessment Report will be made available to all landowners and stakeholders for a 30 day review period.

Please contact me should you have any queries, or should you require any further information.

Kind Regards,

**Sonja van der Merwe**

Dear Sonja

We have looked at the proposed routes for the 132kV line over the farm Wessels.

None of the proposed routes are really acceptable to Ntsimbintle Mining (Pty) Ltd or Tshipi é Ntle Manganese Mining (Pty) Ltd. The routes can potentially sterilise our mineral rights. We are aware of the existing 11kV line and servitude.

I would recommend that we meet to examine further possible alternatives.

Regards  
Jeff

Dear Lizell,

Thank you very much for the information.

The pole positions are not yet available. We are undertaking and Environmental Impact Assessment for three powerline corridors which are 1km in width. The Impact Assessment and specialist studies undertaken determines the preferred corridor, and Environmental Authorisation is then required for the preferred corridor before Eskom surveys the powerline route.

I will not be able to complete the application yet, but I need guidance from SACAA to ensure that the powerline will not pose an aviation hazard. Will I obtain guidelines and specifications on your website under “Obstacles” or will SACAA provide me with some guidelines and specifications?

Regards,

**Subject:** RE: Voorgestelde Eskom Kraglyn - Blackrock Area, Noord Kaap

Good day,

Your enquiry regarding comments from the SACAA with regard to power lines refers.

There is a SACAA process whereby permission is applied for with regards to obstacles which could pose an aviation hazard. More information can be obtained at <http://www.caa.co.za>. Click on 'Obstacles' on the LHS. For administrative processing complete the application for obstacle approval on the SACAA website, links: information for the industry; obstacle; forms: Application Part 139-27. Complete and submit on the form itself, it drops into our obstacle e-mail address, for the admin to provide you with an pro forma invoice, the payment will initiate the process.

- Kindly provide a **.kml (Google Earth) file reflecting the proposed overhead electric power line route(s)**.
- Also indicate the **highest** structure of the project.
- *Please always use the proposed power line project name in the Subject box when corresponding via email with this office and indicate the name & address which should appear on the CAA approval/decline letter.*

Kind regards

Hi Lizell,

**RE: PROPOSED CONSTRUCTION OF THE NEW KLIPKOP-LEHATING 132 KV DOUBLE CIRCUIT CHICKADEE POWERLINE (±14KM IN LENGTH) BETWEEN THE NEW LEHATING SUBSTATION AND THE EXISTING KLIPKOP SUBSTATION, NORTHERN CAPE PROVINCE**

Baie dankie vir jou vriendelike hulp.

Aangeheg is 'n dokument wat inligting bevat i.v.m die projek soos telefonies bespreek. Daar is 'n bestaande landingstrook wat ek vermoed deur die myne in die omgewing gebruik was. Volgens die mense in die omgewing word die landingstrook nie tans gebruik nie. Een van die kraglyn roetes wat Eskom oorweeg loop naby aan die landingstrook.

Stuur asb vir my die nodige inligting om 'n aansoek by julle in te dien.

Groete,

**Sonja van der Merwe**

**Subject:** Klipkop-Lehating Kraglyn

Dear Stakeholders / Potentially Affected Landowners,

**RE: PROPOSED CONSTRUCTION OF THE NEW KLIPKOP-LEHATING 132 KV DOUBLE CIRCUIT CHICKADEE POWERLINE (±14KM IN LENGTH) BETWEEN THE NEW LEHATING SUBSTATION AND THE EXISTING KLIPKOP SUBSTATION, NORTHERN CAPE PROVINCE**

It is the intention of Eskom Distributions, Northern Cape Operating to construct the new Klipkop-Lehating 132 kV Double Circuit Chickadee powerline (±14km in length) between the new Lehating Substation and the existing Klipkop Substation, Northern Cape Province. The Klipkop substation is situated 12km North West of Hotazel, and the Lehating Substation will be situated approximately 14km north of the existing Klipkop Substation. In addition the new Klipkop-Lehating Line will loop in and out of the existing Wessels Substation. These loop-in and loop-out lines also forms part of this proposed project. A locality map showing the location of the project is attached, as well as a copy of the Background Information Document. Three powerline route alternatives will be assessed as part of this Environmental Authorisation Process.

Attached is also a list of all the properties which may be impacted by the proposed powerline, as well as contact details of the landowners. Could you kindly please inform me should any data on the list be incorrect. Could you kindly please also assist with the provision of contact details of your neighbours should their property be affected and their contact information not be available at this stage.

We kindly request all affected landowners and other Interested and Affected Parties to make contact with us regarding the project and the Environmental Assessment Process.

A meeting with landowners and other Interested and Affected parties will be held should such a meeting be requested by these parties. The Draft Basic Assessment Report will be made available to all landowners and stakeholders for a 30 day review period.

Please contact me should you have any queries, or should you require any further information.

Kind Regards,

**Sonja van der Merwe**

Dear SIR

**RE: NOTIFICATION OF THE DRAFT BASIC ASSESSMENT REPORT FOR THE PROPOSED NEW ESKOM KLIPKOP-LEHATING 132KV POWERLINE, NORTHERN CAPE**

The Draft Basic Assessment Report will be available for Public Review from the 10th of May 2016, until the 10th of June 2016. Please find attached one (1) hard copy of this Draft Basic Assessment Report. This Report should be kept at your premises for the duration of the Public Review Period in order to allow the Public access to review this document. This document may not be removed from your premises by any member of the Public or any other party.

**Project Details**

It is the intention of Eskom Distribution, Northern Cape Operating, to construct the new Klipkop-Lehating 132 kV Double Circuit Chickadee powerline ( $\pm 14$ km in length) between the new Lehating Substation and the existing Klipkop Substation, Northern Cape Province. The new Lehating Substation is not part of this project and approval has already been obtained for this (see paragraph 4 below). The existing Klipkop Substation is situated 12km North West of Hotazel, and the Lehating Substation will be situated approximately 14km north of the existing Klipkop Substation. In addition, the new Klipkop-Lehating Line will loop in and out of the existing Wessels Substation. These loop-in and loop-out lines also form part of the proposed project

JG Afrika (Pty) Ltd (formerly known as Jeffares & Green (Pty) Ltd have been appointed by Eskom Distribution Northern Cape Operating Unit as the independent Environmental Assessment Practitioner to undertake the Basic Environmental Assessment Application process for the proposed project.

Please find attached one (1) hard copy of the main body of the Draft Basic Assessment Report and maps, and one (1) electronic copy of the full Report and all Appendices. for review and comment by your Department as Commentary Authority. Kindly please provide us with your written comment by no later than the 10 of June 2016

Should you have any queries please do not hesitate to contact the undersigned.

**ATTENTION: MS DAWN LE FLEUR**

Dear Mam

**RE: SUBMISSION OF THE DRAFT BASIC ASSESSMENT REPORT FOR THE PROPOSED NEW ESKOM KLIPKOP-LEHATING 132KV POWERLINE, NORTHERN CAPE**

It is the intention of Eskom Distribution, Northern Cape Operating, to construct the new Klipkop-Lehating 132 kV Double Circuit Chickadee powerline ( $\pm 14$ km in length) between the new Lehating Substation and the existing Klipkop Substation, Northern Cape Province. The new Lehating Substation is not part of this project and approval has already been obtained for this (see paragraph 4 below). The existing Klipkop Substation is situated 12km North West of Hotazel, and the Lehating Substation will be situated approximately 14km north of the existing Klipkop Substation. In addition, the new Klipkop-Lehating Line will loop in and out of the existing Wessels Substation. These loop-in and loop-out lines also form part of the proposed project

JG Afrika (Pty) Ltd (formerly known as Jeffares & Green (Pty) Ltd have been appointed by Eskom Distribution Northern Cape Operating Unit as the independent Environmental Assessment Practitioner to undertake the Basic Environmental Assessment Application process for the proposed project.

Please find attached one (1) hard copy of the main body of the Draft Basic Assessment Report and maps, and one (1) electronic copy of the full Report and all Appendices. for review and comment by your Department as Commentary Authority. Kindly please provide us with your written comment by no later than the 10<sup>th</sup> of June 2016.

Should you have any queries please do not hesitate to contact the undersigned.

Yours faithfully

Dear Jacoline,

Thank you very much for your response. It is not often that we receive such a quick response from the Authorities.

I am busy finalising the Draft Basic Assessment Report and I will include all the comments made by the Department into the Draft Basic Assessment Report.

Would you like to review a copy of the Draft Basic Assessment Report. I was going to submit a copy to you, but as you have already commented I just want to confirm whether I should submit a copy.

Kind Regards,

**Sonja van der Merwe**

**RE: COMMENTS ON BACKGROUND INFORMATION DOCUMENT FOR THE PROPOSED CONSTRUCTION OF THE NEW KLIPKOP-LEHATING 132 KV DOUBLE CIRCUIT CHICKADEE POWERLINE (± 14 KM IN LENGTH) BETWEEN THE NEW LEHATING SUBSTATION AND THE EXISTING KLIPKOP SUBSTATION, NORTHERN CAPE (DENC REF: NOT SUPPLIED)**

## 1. DEPARTMENTAL MANDATE

The Directorate: Forestry Management (Other Regions) in the National Department of Agriculture, Forestry and Fisheries (DAFF) is responsible for implementation of the **National Forests Act, Act 84 of 1998 (NFA) and the National Veld and Forest Fires Act, Act 101 of 1998** as amended. The developer must take note of the following sections of the NFA:

- 1.1 Section 12(1): "The Minister may declare-
- (a) a particular tree,
  - (b) a particular group of trees,
  - (c) a particular woodland; or
  - (d) trees belonging to a particular species, to be a protected tree, group of trees, woodland or species.
- 1.2 Section 15(1): "No person may-
- (a) Cut, disturb, damage or destroy any protected tree; or
  - (b) Possess, collect, remove, transport, export, purchase, sell, donate or in any other manner acquire or dispose of any protected tree, or any forest product derived from a protected tree, except-
    - (i) under a license granted by the Minister; or
    - (ii) in terms of an exemption from the provision of this subsection published by the Minister in the Gazette on the advice of the Council."
- 1.3 Section 62(2)(c): "Any person who contravenes the prohibition on-

- (i) The cutting, disturbance, damage or destruction of temporarily protected trees or groups of trees referred to in section 14(2) or protected trees referred to in section 15(1)(a); or
  - (ii) The possession, collection, removal, transport, export, purchase or sale of temporarily protected trees or groups of trees referred to in section 14(2) or protected trees referred to in section 15(1)(b), or any forest product derived from a temporarily protected tree, group of trees or protected tree, is guilty of a first category offence.
- 1.4 Section 58 (1): "Any person who is guilty of a first category offence referred to in sections 62 and 63 may be sentenced to a fine or imprisonment for a period of up to three years, or to both a fine and such imprisonment."
- 1.5 The list of protected tree species under section 12(1) (d) of the National Forests Act, 1998 (Act No. 84 of 1998) was published in GN1161 of 20 November 2015.

## 2. COMMENTS ON BACKGROUND INFORMATION DOCUMENT

- 2.1 The study site is known to contain protected tree species such as *Acacia (Vachellia) erioloba* and *Acacia (Vachellia) haematoxylon*. If any protected trees would be impacted on, the developer must apply and obtain a valid Forest Act License prior to construction of the powerline, but only after obtaining the Environmental Authorisation and shortly prior to construction.
- 2.2 The developer must note that the Department would not grant a license for clearing of the whole servitude width. Usually a license allows for clearance of the vegetation directly under the powerline and up to 4m on either side. Where possible, slow growing protected trees should be avoided by deviating the line or going underground in the sections with high density protected trees.
- 2.3 The report mentioned that the Kuruman River might be crossed and that the Lehating River will be crossed. If so, extra care should be taken at the river crossings, because of the higher density protected trees usually associated with ephemeral drainage lines.
- 2.4 The developer may also need a Flora Permit from the provincial Department of Environment and Nature Conservation (DENC) should any natural indigenous, protected or specially protected plant species (under the Northern Cape Nature Conservation Act, Act 9 of 2009) be impacted on. The same applies to TOPS listed or CITES listed plant species under the NEMBA.
- 2.5 Protected trees such as large Camel thorns with Sociable Weaver *Philetairus socius* nests may not be disturbed without a valid Fauna Permit from the DENC.

## 3. RECOMMENDATION

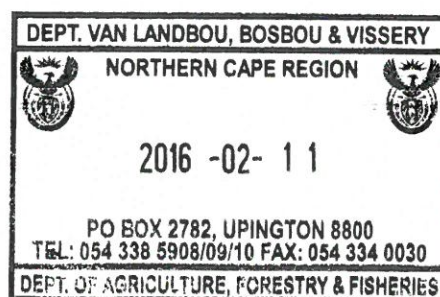

- 3.1 If the project is authorised, this Department would recommend that it be for the route option that would have the least impact on slow growing protected trees. Three 1km wide corridors alternatives will be assessed; hence it should be possible to avoid areas of high density protected trees.

Thank you for allowing the Department of Agriculture, Forestry and Fisheries to provide inputs.

Kind Regards,

  
Jacoline Mans

Dear Jacoline,

The Ecological Assessment Report is already available. The Report is 8MB in size, so I have sent it to you via our sendit.jgi website. You will receive a link to download the file. I have also copied the download link below.

I have also sent the Aquatic Assessment Report which also makes reference to vegetation.

Please note that although Environmental Authorisation was already obtained for the Lehating Substation, that the Specialists included the footprint of the substation into their assessments in order to obtain a holistic view of proposed impacts.

**Subject:** Klipkop-Lehating Powerline

Dear Authorities,

**RE: PROPOSED CONSTRUCTION OF THE NEW KLIPKOP-LEHATING 132 KV DOUBLE CIRCUIT CHICKADEE POWERLINE (±14KM IN LENGTH) BETWEEN THE NEW LEHATING SUBSTATION AND THE EXISTING KLIPKOP SUBSTATION, NORTHERN CAPE PROVINCE**

It is the intention of Eskom Distributions, Northern Cape Operating to construct the new Klipkop-Lehating 132 kV Double Circuit Chickadee powerline (±14km in length) between the new Lehating Substation and the existing Klipkop Substation, Northern Cape Province. The Klipkop substation is situated 12km North West of Hotazel, and the Lehating Substation will be situated approximately 14km north of the existing Klipkop Substation. In addition the new Klipkop-Lehating Line will loop in and out of the existing Wessels Substation. These loop-in and loop-out lines also forms part of this proposed project. A locality map showing the location of the project is attached, as well as a copy of the Background Information Document. Three powerline route alternatives will be assessed as part of this Environmental Authorisation Process.

A copy of the Draft Basic Assessment Report will be submitted to all relevant Commentary Authorities for review and comment for a 30 day review period.

Please contact me should you have any queries, or should you require any further information.

Kind Regards,

Dear Jacoline,

Thank you very much for your response. It is not often that we receive such a quick response from the Authorities.

I am busy finalising the Draft Basic Assessment Report and I will include all the comments made by the Department into the Draft Basic Assessment Report.

Would you like to review a copy of the Draft Basic Assessment Report. I was going to submit a copy to you, but as you have already commented I just want to confirm whether I should submit a copy.

Kind Regards,
