Dear Lorato

RE: Realignment of Paul Roux Sewer Layout (Outfall)

Please note that the results, impact statement and recommendations that were provided for the initial alignment in the Paleo Field Services report, dated 16 February 2020 (*Phase 1 Heritage Impact Assessment for proposed new 1.5 km-long underground sewerage pipeline in Paul Roux, Thabo Mofutsanyane District Municipality, Free State Province*), also applies to the new alignment. An additional Phase 1 assessment will therefore not be required for the new alignment.

Yours truly

A handwritten signature in black ink, appearing to read "L. Rossouw".
