**2. Motivation for proposed work** (Summarise below and expand on a separate sheet if necessary)

The Owner has decided to convert the offices into a restaurant to compliment the night club.
There is a need for an indoor/outdoor area for dining and patrons are continuously looking for a late night restaurant which is safe and within walking distance . The courtyard will create a common area between the two buildings.
As the area is a high risk area and crime is rife it is important to secure the perimeter with high walls and have an adjustable awning over the open areas so that when not in use criminals cannot scale the walls and jump into the open areas to access the buildings.
The awnings will be louvered so can be opened in the day or night when in use.
The owners no longer need such big offices as most of the staff are working from home since Covid.

**3. Detail the alterations/additions/restorations proposed** (Briefly outline the proposal)

The internal areas of the building will be reconfigured to incorporate a bigger kitchen, serving area, cold room, scullery and a dining area which opens out into the courtyard with folding stacking doors.
All windows on the perimeter walls will be removed (security issues)
New public ablutions will be added male and female. A new enclosed area as part of the Courtyard will be added to create a bigger outside dining area. High perimeter walls will be added. Retractable louvered awnings will be added to have the flexibility of having these areas completely open, partly open or completely closed.
