C. SIGNIFICANCE:

1. Original date of construction/plan approval: 1933
2. Historical Significance:
The original dwelling was constructed in 1933 for A.R Ellis Esq. and was constructed as a three-bedroom dwelling with a which accommodated a native's room, washroom and single garage. In 1981, Additions and Alterations were undertaken to the existing buildings for Mr E.C Horsfield as follows: - The house appears to have been mirrored when it was constructed in 1933 as the plan from 1981 indicates such. There are no records of plans after 1933 till 1981 confirming this so it can only be assumed that the house was constructed in this way. - A laundry was added adjacent to the kitchen - The existing bedroom in the middle was extended - A new shower was added - A new bedroom was added - Outbuilding – Washroom converted to a bedroom - Outbuilding – Natives room converted to a new WC and bathroom - An enclosed carport structure was proposed, but this does not exist at present so it can only be assumed that this was never constructed. THERE HAS BEEN A DEMOLITION PERMIT WHICH WAS APPROVED FOR THIS PROPERTY UNDER A DIFFERENT ENTITY.

3. Architectural Significance:
The house was built as a rectangular plan single-storey dwelling with a front verandah flanked on each side with a bay window. It was built in the Edwardian period in 1933. The house was built as a mirror of the what the original plan from 1933 indicates. The layout of the existing house consisted of 3 bedrooms all sharing a common bathroom. A separated kitchen and common dining and lounge area. The front verandah consists of circular columns which support a timber roof structure of a composite roof, which is made up of timber boards with malthoid waterproofing. Windows facing the street and driveway edges consist of lead light panes with some top panels containing stained glass. In 1981 a plan was submitted for additions and alterations to the rear end of the dwelling. This plan reveals the actual built form of the house and it was from this plan we can identify that the house was built mirrored to the original plan. The additions undertaken in 1981 were done in an ad hoc manner and little care was taken into the roof design and practically of the junctions and details. The current roof design consists of Marseille roof tiles laid onto a double pitch roof with gable ends towards the road. All other areas have hipped roof ends. The addition undertaken in 1981 resulted in the roof being extended at a reduced pitch with has also resulted in an awkward ceiling height in those areas of the house. The outbuilding was constructed at the same time as the main dwelling and subsequently altered in 1981. The outbuilding bears no sign of any architectural significant elements. The interior of the house has painted oregon pine suspended floors. Internal details consist of picture rails, timber doors with architraves and windows with lead light panes. Old timber floors, doors and frames as well as trussed shows signs of borer. All bathrooms have been revamped to a modern finish.

See Annexure 2 for photographic analysis of the existing house.

4. Urban Setting & Adjoining Properties:
The site is located on Caister Crescent which is a two-way road and is off two main roads, Musgrave Road and Stephen Dlamini Road. The immediate urban setting consists of single dwelling houses of which are double and single storey. Multi-Storey apartment buildings, dwellings that have been converted to offices and a retirement home. Most houses in Caister Crescent have been modified over time.
