### DEVELOPMENT DETAILS

Project Title: **Proposed gravel mining on a portion of Portion 0 (Remaining Extent) of Lot 23 Umfolozi No 13734, Mbonambi District, KwaZulu-Natal Province.**

Project Description:

**Aeterno Investments 215 (Pty) Ltd will apply for authorisation for a mining permit from the Department of Mineral Resources for the mining of gravel on the property.**

**The mining method proposed involves opencast extraction of gravel from an area previously used for crop farming over a footprint of 2.89 ha. The gravel will be extracted through mechanical excavation by means of an excavator that will load the gravel onto trucks that will transport the material to clients. The proposed project can be operated as a borrow pit and will not need any blasting, crushing or screening to be done. All activities will be contained within the boundaries of the mining site. The existing farm road to the mining area will be used to gain access to the site.**

**During the site establishment phase the applicant will have to clear the topsoil and overburden (if any) from the expansion area to open the gravel for removal. Upon stripping, the topsoil and overburden will be stockpiled along the boundaries of the mining area to be used during the rehabilitation phase. No signs of culturally or historically significant elements are present on the proposed expansion area. The applicant previously ploughed the area for crop production. The immediate surrounding areas to the north-east, north, north-west and south-west is used for agricultural purposes with an existing mining area bordering the proposed site to the west. Plantations border the proposed mining area to the east and south-east. The Mfolozi River forms the north, north-western boundary of the property.**

Extent of Development Footprint (in m<sup>2</sup>):

**2.89 ha**
