Results (both negative and positive) of the EIA process, will be submitted and made available to relevant Departments such as the Department of Mineral Resources & Energy (DMRE), and if requested, Department of Forestry, Fisheries and Environment, Department of Water and Sanitation, Landowners, and other interested stakeholders through the Basic Assessment Report (BAR) and Environmental Management Programme Report (EMPr).

BASIC AND ENVIRONMENTAL IMPACT ASSESSMENT PROCESSES

These are planning and decision-making tools used in identifying potential environmental, economic and social consequences of a proposed activity prior the commencement of the activity.

These together with the public issues and concerns are to be identified sufficiently early so that they can be assessed and incorporated into the final reports.

These tools are regarded crucial because they are utilized to demonstrate to the relevant stakeholders about the potential impacts, which in turn leads to the Mining Permit application process being a success or declined.

PUBLIC PARTICIPATION PROCESS

Public Participation remains a cornerstone of the Environmental Impact Assessment process. It ensures provision of relevant and enough information with openness and transparency. Public Participation process presents to I&APs, an opportunity to understand what the project is about, and affords them an opportunity to make valuable contributions towards the EIA process.

I&AP can be any person, group of persons or organization interested in or affected by the proposed activity, and any organ of state that may have jurisdiction over any aspect of the activity.

The key objective of PPP during the EIA process is to afford the I&APs with an opportunity to comment and provide valuable inputs during the planning phase of the project.
