What is a BA?

South African Special Forces Heritage Foundation (The Applicant) to commence with the proposed development, the applicant must conduct a Basic Assessment process and submit a Basic Assessment Report (BAR) to the regulatory authorities in support of an application for environmental authorisation to proceed with the project. A Basic Assessment process is a well-defined and regulated process, in terms of the National Environmental Management Act, Government Notice Regulations 982, 983, 984, and 985 (GN Reg 982, 983, 984, and 985), involving public participation and technical studies, to identify issues of concern and to evaluate the environmental and socio-economic impacts of a proposed project.

BAs are used by planning authorities to obtain an objective view of the potential environmental and social impacts that could arise during the construction and operation of the proposed development. This information must provide a sound basis for decision-making by the authorities.

The end-product of a basic assessment process is a Basic Assessment Report, which must:

- Identify the potential impacts of the proposed activities;
- Outline the public participation process undertaken; Illustrate the issues, concerns and suggestions raised by Interested & Affected Parties; and
- Outline the environmental management and mitigation measures that must be taken to avoid or reduce negative impacts and enhance positive impacts.
