Dear Sir

The above matter has reference.

Please be advised as per the Heritage Consultants recommendation , please find below response.

The submission does not include a heritage statement i.e. background research and history of the building. Without confirmation that the structure is older than 60 years, we can not comment on the application. The National Heritage Resources Act (NHRAAct) states the trigger as 'a structure or part thereof older than 60 years'. To our knowledge these houses are not older than 60 years.

Kind Regards
