

BACKGROUND INFORMATION DOCUMENT

PROSPECTING RIGHT AND ENVIRONMENTAL AUTHORIZATION APPLICATION FOR THE PURPOSE OF PROSPECTING FOR COAL, LEAD, NICKEL ORE, COPPER, IRON ORE, RARE EARTHS, AND MANGANESE ORE ON THE FARM GROENBERG 237 AND OGRABIE EAST 234 WITHIN THE ADMINISTRATIVE DISTRICT OF CALVINIA, NORTHERN CAPE PROVINCE.

Prepared by:

Prepared for:
Mashinini Mining (Pty) Ltd

INTRODUCTION AND THE PURPOSE OF THIS DOCUMENT

Singo Consulting (Pty) Ltd has been appointed as an independent Environmental Consultant by **Mashinini Mining (Pty) Ltd** to conduct Environmental Impact Assessment (EIA), Compile Basic Assessment Report (BAR) & Environmental Management Programme report (EMPr) and to undertake Public Participation Process (PPP). This is done for processes of acquiring Environmental Authorization for the proposed Prospecting Right application **Coal, Lead, Nickel Ore, Iron Ore, Rare Earths, Copper, and Manganese Ore on the farm Groenberg 237 and Ograbie East 234 within the Administrative District of Calvinia, Northern Cape Province.** with **DMRE Ref: NC 30/5/1/2/2/12993 PR.**

The Purpose of this Background Information Document (BID) is to provide a perfunctory description of the project and outline EIA processes through BAR & EMPr to be followed and contributions from Stakeholders, Interested and Affected Parties (I&APs) on the issues related to the project in question, allowing comments and concerns to be raised.

Results of the EIA (BAR & EMPr), both negative and positive will be submitted and made available to the relevant Departments such as the Department of Mineral Resources & Energy and if requested, Environmental Affairs, Water and Sanitation, Landowners, and other interested stakeholders.

This Background Information Document therefore requests and invite I&APs to comment on the environmental, physical, social, and economic impacts associated with the proposed Prospecting Activities. Be assured that your comments are of great value as they ensure that relevant issues are taken into consideration.

Attached at the end of this document is a registration form, kindly complete it and send it back to **Mr Daniel Tshinavhe** through given means of communication also attached there.

PROJECT DESCRIPTION

The project is located approximately 18.68 km East of the town of Brandvlei, 15.48 km north of Blaauboskom and 60.74 km northeastern side of Loeriesfontein. The proposed project can be accessed from the R357 road. This project situated within the magisterial district of Namakwa (Calvinia) in the Hantam Local Municipalities within the Namakwa District Municipality, in Northern Cape Province, in the Republic of South Africa.

Prospecting activities will be undertaken over a period of five (5) years and are designed in phases, each phase conditional on the success of the previous phase. Both invasive and non-invasive methods will be implemented. Invasive are those activities which have footprint or cause harm (if not mitigated or managed properly) or those that have a physical impact on the environment, while non-invasive do not cause any harm or effects on the environment.

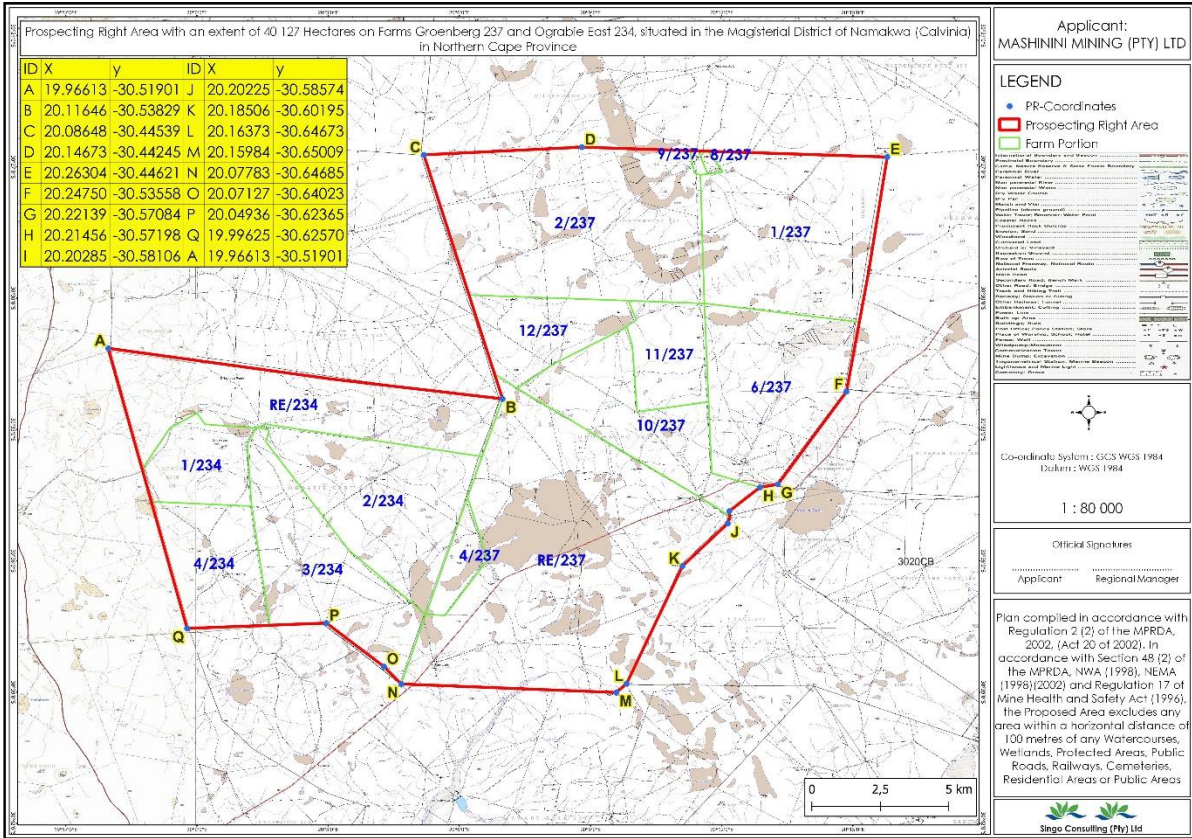

Figure 1: Regulation 2(2) Map with coordinates of the Proposed Project Area.

Non-invasive: Desktop study of the area has commenced, and this incorporates desktop geographical and geological mapping. This will be followed by detailed geochemical and geotechnical surveys. In turn, this is followed by detailed geophysical studies.

Invasive: A detailed drilling, sampling, assaying and mineralogical study will be carried out. Diamond drilling method will be utilised to prospect in situ of Coal, Lead, Cooper, Nickel Ore, Iron Ore, Rare Earths, and Manganese Ore. To ensure or minimise impacts on the receiving environment, All the activities will be guided by the project's BAR & EMPr.

REGULATORY FRAMEWORK

Therefore, EIA (BAR & EMPr) process to be undertaken will be conducted in accordance with the National Environmental Management Act (Act 107 of 1998) and Environmental Impact Assessment regulations as amended (April 2017).

The activity is to prospect the existence and occurrence of Coal therefore, this will be conducted in accordance with Mineral and Petroleum Resources Development Act, (Act 28 of 2002). Other regulatory guidelines to be followed include National Water Act, 1998 (Act 36 of 1998), National Air Quality Standards (GN 1210: 2009) and National Dust Control Regulations (GN 36974: 2013).

These all will accurately be followed to ensure that identified impacts are assessed and mitigated according to their significance so that the protection of the receiving environment and populations is met.

BASIC AND ENVIRONMENTAL IMPACT ASSESSMENT PROCESSES

These are planning and decision-making tools used in identifying potential environmental, economic, and social consequences of a proposed activity prior the commencement of the activity. These together with the public issues and concerns are to be identified sufficiently early so that they can be assessed and incorporated into the final reports when/if necessary.

These tools are regarded crucial because they are utilized to demonstrate to the relevant stakeholders about the potential impacts, which in turn leads to the Mining application process being a success or declined.

PUBLIC PARTICIPATION PROCESS

Public Participation remains a cornerstone of the Environmental Impact Assessment process. It ensures provision of relevant and enough information with openness and transparency. Public Participation process presents to I&APs, an opportunity to understand what the project is about, and affords them an opportunity to make valuable contributions towards the EIA (BAR & EMPr) process.

I&AP can be any person, group of persons or organization interested in or affected by the proposed activity, and any organ of state that may have jurisdiction over any aspect of the activity. The key objective of PPP is to afford the I&APs with an opportunity to comment and provide valuable inputs during the planning phase of the project.

For this specific proposed project, IAPs will be given a period of 30 days to comment and raise issues/concerns with regards to the proposed project.

Kindly keep the following dates:

- ❖ Stakeholder engagement and consultation: **On-going throughout the process of compiling the BAR & EMPr**
- ❖ Review of draft Basic Assessment Report (BAR) and Environmental Management Programme report (EMPr): **Monday the 22nd of August 2022 until Monday the 20th of September 2022.**

The Draft BAR & EMPr will be available at Brandvlei Public Library, (Latitude: -30.454500 Longitude: 20.486583)) and a soft copy upon request from Singo Consulting (Pty) Ltd using the detailed EAP's contact's below, via emails; Dropbox link; Google drive; WeTransfer, etc.

Furthermore, the report will be available upon request, via email from the respective EAP.
