BACKGROUND INFORMATION DOCUMENT

Prepared by:

Application:

Mining Permit for Coal on portion of portion 34 of the Farm Klippoortje 32 IS Local Municipality: eMalahleni

Singo Consulting (Pty) Ltd has been appointed as an independent Environmental Consultant by Legare Mining Services (Pty) Ltd to conduct Environmental Impact Assessment (EIA), compile Basic Assessment Report (BAR) & Environmental Management Programme report (EMPr) and undertake Public Participation Process (PPP). This is done for processes of acquiring Environmental Authorization for the proposed Mining Permit Application within portion of portion 34 of the farm Klippoortje 32 IS, situated under Local Municipality of eMalahleni, under Nkangala District Municipality in Mpumalanga Province with DMRE Ref: MP 30/5/1/1/3/ (13680) MP.

The Purpose of this Background Information Document (BID) is to provide a perfunctory description of the project and outline EIA processes to be followed and contributions from Interested and Affected Parties (I&APs) on the issues related to the project in question, allowing comments and concerns to be raised.

Results of the EIA (BAR & EMPr), both negative and positive, will be submitted and made available to the relevant Departments such as the Department of Mineral Resources and Energy if requested, Department of Agriculture, Rural Development, Land & Environmental Affairs (DARDLEA), Department of Water and Sanitation, Landowners, and other interested stakeholders.

This Background Information Document therefore requests and invite I&APs to comment on the environmental, physical, social, and economic impacts associated with the proposed Mining Activities. Be assured that your comments are of great value as they ensure that relevant issues are taken into consideration. Attached at the end of this document is a registration from, kindly complete it and send it back to **Ms Masindi Nefale** through given means of communication also attached there.

PROJECT DESCRIPTION

Singo Consulting (Pty) Ltd

Mining Permit Application has been submitted for the extraction of **Coal** on the property mentioned above. This Mining Permit Area, as seen in figure 1 & 2 below, is situated approximately 17 km south-east of Kendal, approximately 4 km south-west of Saaiwater and approximately 15 km north-west of Kriel.

Prepared for:

EGAR

INING

Mining activities will be undertaken over a period of two (2) years. This project will entail an open cast method of excavation. The mine design will be developed according to the dimension of the applied mineral deposit within the project area, but overall mining activities will be limited to an area of 5 Ha as per mining permit requirements. The topsoil will be stockpiled in the form of a berm alongside the boundary of the mine and will be used during rehabilitation period. Once a box cut has been made, the overburden and mineral resources where necessary will be loosened by blasting. The loosened material will then be loaded onto trucks by excavators. A haul road will be situated at the side of the pit, forming a ramp up which trucks can drive, carrying ore and waste rock. Waste rock will be piled up at the surface, near the edge of the open pit (waste dump). The waste dump will be tiered and stepped, to minimize degradation. All the activities will be guided by the project's EMPr such that the project does not impact the environment negatively.

REGULATORY FRAMEWORK

Therefore, EIA process through BAR & EMPr to be undertaken will be conducted in accordance with the National Environmental Management Act (Act 107 of 1998) and Environmental Impact Assessment Regulations as amended (April 2017).

The activity is to extract the existence and occurrence of the applied mineral; therefore, this will be conducted in accordance with Mineral and Petroleum Resources Development Act, (Act 28 of 2002). Other regulatory guidelines to be followed include National Water Act, 1998 (Act 36 of 1998), National Air Quality Standards (GN 1210: 2009) and National Dust Control Regulations (GN 827: 2013).

These all will accurately be followed to ensure that identified impacts are assessed and mitigated according to their significance so that the protection of the receiving environment and populations is met.

BASIC AND ENVIRONMENTAL IMPACT ASSESSMENT PROCESSES

These are planning and decision-making tools used in identifying potential environmental, economic, and social consequences of a proposed activity prior the commencement of the activity.

These together with the public issues and concerns are to be identified sufficiently early so that they can be assessed and incorporated into the final reports when/if necessary.

These tools are regarded crucial because they are utilized in order to demonstrate to the relevant stakeholders about the potential impacts, which in turn leads to the Mining Application process being a success or declined.

PUBLIC PARTICIPATION PROCESS

Public Participation remains a cornerstone of the Environmental Impact Assessment process. It ensures provision of relevant and enough information with openness and transparency. Public Participation Process presents to I&APs, an opportunity to understand what the project is about, and affords them an opportunity to make valuable contributions towards the EIA process (BAR & EMPr). I&AP can be any person, group of persons or organization interested in or affected by the proposed activity, and any organ of state that may have jurisdiction over any aspect of the activity.

The key objective of PPP during the EIA process is to afford the I&APs with an opportunity to comment and provide valuable inputs during the planning phase of the project.

Kindly keep the following dates:

- Stakeholder engagement and consultation: Ongoing throughout the process of compiling the BAR & EMPr
- Review of draft BAR & EMPr: <u>Monday the 14th of</u> <u>November 2022 – Tuesday the 13th of December</u> <u>2022 (excluding public holiday).</u>

Comments on the BAR and EMPr must be submitted to Ms Masindi Nefale no later than <u>Tuesday the 13th</u> of December 2022

For comments or concerns about the proposed project, please contact Singo Consulting (Pty) Ltd, using the contact details of the Environmental Assessment Practitioner (EAP) Dr Kenneth Singo and Environmental Technician (Envir. Tech.) Miss Masindi Nefale below.
