

BACKGROUND INFORMATION DOCUMENT

Prepared by:

**MINING PERMIT AND ENVIRONMENTAL AUTHORISATION
APPLICATION ON PORTION OF REMAINING EXTENT OF
PORTION 2 OF THE FARM ELANDSPRUIT 291 JS.
Magisterial District of Steve Tshwete: Mpumalanga**

Prepared for:

DMRE REF: MP 30/5/1/3/2/13516 MP.

INTRODUCTION AND THE PURPOSE OF THIS DOCUMENT

Singo Consulting (Pty) Ltd has been appointed as an independent Environmental Consultant by NOTRE COAL to conduct an Environmental Impact Assessment (EIA), compile a Basic Assessment Report and Environmental Management Programme report (EMPr) and undertake Public Participation Process (PPP). This is done for processes of acquiring Environmental Authorization for the proposed Mining Permit Application within portion of the remaining extent of Portion 2 of the Farm Elandspruit 291 JS in the Magisterial District of Steve Tshwete in Mpumalanga Province (DMRE REF: MP 30/5/1/3/2/13516 MP).

The Purpose of this Background Information Document (BID) is to provide a perfunctory description of the project and outline EIA processes to be followed and contributions from Interested and Affected Parties (I&APs) on the issues related to the project in question, allowing comments and concerns to be raised.

Results of the EIA process through BAR & EMPr, both negative and positive, will be submitted and made available to the relevant Departments such as the Department of Mineral Resources and Energy if requested, the Department of Forestry, Fisheries and the Environmental Affairs, Department of Water and Sanitation, Landowners and other interested stakeholders.

This Background Information Document therefore requests and invite I&APs to comment on the environmental, physical, social and economic impacts associated with the proposed mining activities. Be assured that your comments are of great value as they ensure that relevant issues are taken into consideration. Attached at the end of this document is a registration form, kindly complete it and send it back to **Mr Tsedzuliso Mundalamo** through given means of communication also attached there.

PROJECT DESCRIPTION

Mining Permit Application has been submitted for the mining of coal on the property mentioned above. This mining permit area, as seen in figure 1 below, is situated approximately 10 km North of Witbank and 15 km South of Middelburg. The project area is close proximity to the R555 road, approximately 600 m away from the R555.

Mining activities will be undertaken over a period of two (2) years. This project will entail an open cast method of excavation. The mine design will be developed according to the dimension of the applied mineral deposit within the project area, but overall mining activities will be limited to an area of 5 Ha (Figure 2) as per mining permit requirements. The topsoil will be stockpiled elsewhere on site preferably next to the farm boundary and will be used during rehabilitation period. Once a box cut has been made, the overburden and mineral resources where necessary will be loosened by blasting. The loosened material will then be loaded onto trucks by excavators. A haul road will be situated at the side of the pit, forming a ramp up which trucks can drive, carrying ore and waste rock. Waste rock will be piled up at the surface, near the edge of the open pit (waste dump). The waste dump will be tiered and stepped, to minimize degradation. All the activities will be guided by the project's EMPr such that the project does not impact the environment negatively.

REGULATORY FRAMEWORK

Therefore, EIA process to be undertaken will be conducted in accordance with the National Environmental Management Act (Act 107 of 1998) and Environmental Impact Assessment regulations as amended (April 2017).

The activity is to extract the existence and occurrence of the applied mineral; therefore, this will be conducted in accordance with Mineral and Petroleum Resources Development Act, (Act 28 of 2002). Other regulatory guidelines to be followed include: National Water Act, 1998 (Act 36 of 1998), National Air Quality Standards (GN 1210: 2009) and National Dust Control Regulations (GN 875: 2017).

These all will accurately be followed to ensure that identified impacts are assessed and mitigated according to their significance so that the protection of the receiving environment and populations is met.

BASIC AND ENVIRONMENTAL IMPACT ASSESSMENT

PROCESSES

These are planning and decision-making tools used in identifying potential environmental, economic and social consequences of a proposed activity prior the commencement of the activity.

These together with the public issues and concerns are to be identified sufficiently early so that they can be assessed and incorporated into the final reports when/if necessary.

These tools are regarded crucial because they are utilized in order to demonstrate to the relevant stakeholders about the potential impacts, which in turn leads to the Mining Permit Application process being a success or declined.

PUBLIC PARTICIPATION PROCESS

Public Participation remains a cornerstone of the Environmental Impact Assessment process. It ensures provision of relevant and enough information with openness and transparency. Public Participation process presents to I&APs, an opportunity to understand what the project is about, and affords them an opportunity to make valuable contributions towards the EIA process on this BAR & EMPr phase.

I&AP can be any person, group of persons or organization interested in or affected by the proposed activity, and any organ of state that may have jurisdiction over any aspect of the activity.

For this specific proposed project, I&APs will be given a period of 30 days to comment and raise issues/concerns with regards to this BAR & EMPr which will be available at **Gerard Sekoto Library (Wanderers Avenue, Middelburg, 1055)** and a soft copy(via email, dropbox, google drive, WeTransfer, etc) upon request from Singo Consulting (Pty) Ltd using EAP's contact details below.

Kindly keep the following dates:

- ❖ Stakeholder engagement and consultation: **On going throughout the project**
- ❖ Review of Draft BAR & EMPr: **05th September 2022 – 05th of October 2022 (Excluding Public Holidays)**
- ❖ Submission of the BAR & EMPr: **11th of October 2022**

Comments/Issues raised on the Draft BAR and EMPr must be submitted to **Mr Tsedzuliso Mundalamo** no later than the **05th of October 2022**.
