DMR Ref No: NC0043-MR/102 and NC0044-MR/102

Background

This communique is presented, subsequent to a notice, which was given to interested and affected parties (IAPs), regarding the above mentioned project on 11 March, 2016. This said notice was given in terms of the National Environmental Management Act (No. 107 of 1998) (NEMA): Environmental Impact Assessment (EIA) Regulations, 2014 R982 (2014 EIA Regulations), Section 41 (2) (a) (b) (c) (d) (e) and (3) published in Government Notices No. R982, under Sections 24 (5) and 44 of NEMA. It was a notice informing the stakeholders of West Coast Resources' (WCR) intention to re-visit and mine certain areas of on the Namaqualand Coast. WCR are re-establishing diamond mining operations in the existing mining rights areas on the Namaqualand coast, previously mined by De Beers and under the existing mining rights of July 2012, i.e. Koingnaas Mining Right (522MRC) and Samsons Bak Mining Right (525MRC). As part of their operations, WCR intend to mine deposits that are located on land, as well as on the beach and extend seaward, potentially for several hundred meters.

WCR wants to continue with mining on the areas covered by these rights i.e. areas within the existing mining rights authorization, with immediate target being the Langklip and Koingnaas Complex. The immediate targeted areas, are those that will not trigger new listed activities in terms of NEMA.

Application for environmental authorisation

The notice mentioned above, also alerted the stakeholders that an application for environmental authorisation was submitted to the Department of Mineral Resources (DMR), in terms of NEMA and National Environmental Management Waste Act (No. 59 of 2008) (NEM: WA), in respect of listed activities that have been triggered by applications lodged by WCR in terms of the Mineral and Petroleum Resources Development Act (No. 28 of 2002) (MPRDA). The applications that were submitted in terms of the MPRDA are an amendment of the mining right in terms of Section 102 of MPRDA.

Therefore, scoping and EIA report procedures are being applied to this application. As a reminder, a map showing the locality of the mining area, with respect to the proposed project, is included as Appendix 3 of the EIA report (See details below, regarding availability of the EIA report) and included as Attachment 1, of this letter. In addition, to provide a memory trail regarding this project journey, the EIA project milestones are outlined as Attachment 2 of this letter.

Scoping Report and EIA report Review

Myezo Environmental Management Services Pty Ltd (Myezo), has thus been appointed by WCR as an environmental assessment Practitioner (EAP), to undertake EIA for the activities that would require environmental authorization.

The project finished scoping stage, and a notice for the review of such scoping report was advertised on the Namakwalander Newspaper, on 04 April 2016. All comments on the scoping report or issues that had to be covered on the succeeding EIA stage were due for submission to the EAP by 18 April 2016.

Consequently, please be advised that this notice serves to invite registered IAPs to now participate in the EIA report review stage. A copy of the EIA report can be viewed at Koingnaas Mine offices (30° 12' 38.64"S, 17° 16' 25.34"E), Springbok Library (04 Namakwa Street, Springbok, Northern Cape, 8240) and at West Coast Resources head office at (405 Voortrekker Road, Parrow, 7500).

To submit your comments on the EIA report, kindly contact Myezo using the details shown below. The submissions must all be done formally and in writing by either email or fax and should be submitted by 29 October 2016, which signifies the end of the commenting period. In the submissions of comments, the IAPs, must disclose any direct business, financial, personal or other interest which they have in the approval or refusal of the application.

Document Name: WKSCE-PI-EIA report notific Letter

Date: 27 September 2016

Myezo Ref No: WKSCE/2015/02/NL

DMR Ref No: NC0043-MR/102 and NC0044-MR/102

Background

This communique is presented, subsequent to a notice, which was given to interested and affected parties (IAPs), regarding the above mentioned project on 11 March, 2016. This said notice was given in terms of the National Environmental Management Act (No. 107 of 1998) (NEMA): Environmental Impact Assessment (EIA) Regulations, 2014 R982 (2014 EIA Regulations), Section 41 (2) (a) (b) (c) (d) (e) and (3) published in Government Notices No. R982, under Sections 24 (5) and 44 of NEMA. It was a notice informing the stakeholders of West Coast Resources' (WCR) intention to re-visit and mine certain areas of on the Namaqualand Coast. WCR are re-establishing diamond mining operations in the existing mining rights areas on the Namaqualand coast, previously mined by De Beers and under the existing mining rights of July 2012, i.e. Koingnaas Mining Right (522MRC) and Samsons Bak Mining Right (525MRC). As part of their operations, WCR intend to mine deposits that are located on land, as well as on the beach and extend seaward, potentially for several hundred meters.

WCR wants to continue with mining on the areas covered by these rights i.e. areas within the existing mining rights authorization, with immediate target being the Langklip and Koingnaas Complex. The immediate targeted areas, are those that will not trigger new listed activities in terms of NEMA.

Application for environmental authorisation

The notice mentioned above, also alerted the stakeholders that an application for environmental authorisation was submitted to the Department of Mineral Resources (DMR), in terms of NEMA and National Environmental Management Waste Act (No. 59 of 2008) (NEM:WA), in respect of listed activities that have been triggered by applications lodged by WCR in terms of the Mineral and Petroleum Resources Development Act (No. 28 of 2002) (MPRDA). The applications that were submitted in terms of the MPRDA are an amendment of the mining right in terms of Section 102 of MPRDA.

Therefore, scoping and EIA report procedures are being applied to this application. As a reminder, a map showing the locality of the mining area, with respect to the proposed project, is included as Appendix 3 of the EIA report (See details below, regarding availability of the EIA report) and included as Attachment 1 of this letter. In addition, to provide a memory trail regarding this project journey, the EIA project milestones are outlined as Attachment 2 of this letter.

Scoping Report and EIA report Review

Myezo Environmental Management Services Pty Ltd (Myezo), has thus been appointed by WCR as an environmental assessment Practitioner (EAP), to undertake EIA for the activities that would require environmental authorization.

The project finished scoping stage, and a notice for the review of such scoping report was advertised on the Namakwalander Newspaper, on 04 April 2016. All comments on the scoping report or issues that had to be covered on the succeeding EIA stage were due for submission to the EAP by 18 April 2016.

Consequently, please be advised that this notice serves to invite registered IAPs to now participate in the EIA report review stage. A copy of the EIA report can be viewed at Koingnaas Mine offices (30° 12' 38.64"S, 17° 16'25.34E), Springbok Library (04 Namakwa Street, Springbok, Northern Cape, 8240) and at West Coast Resources head office at (405 Voortrekker Road, Parrow, 7500).

To submit your comments on the EIA report, kindly contact Myezo using the details shown below. The submissions must all be done formally and in writing by either email or fax and should be submitted by 29 October 2016, which signifies the end of the commenting period. In the submissions of comments, the IAPs, must disclose any direct business, financial, personal or other interest which they have in the approval or refusal of the application.
