

Aquapol – Established since 1985

Solving **Rising Damp** Permanently

# THE BIOLOGICAL EFFECTS OF THE AQUAPOL SYSTEM

## AQUAPOL SOUTH AFRICA (PTY) LTD

Aquapol South Africa (Pty) Ltd is a company that resolves rising damp permanently without the use of chemicals, wall-cutting or electricity.

### MISSION STATEMENT

Aquapol has, as its goal and purpose, to bring about a healthy living and working environment through the permanent eradication of rising damp, thus eliminating one of the major factors that create sick buildings.

We provide an honest assessment of building humidity, determining the actual source of moisture, be it rising damp or other causes. We offer a permanent solution to the problem of rising damp and propose resolutions for other sources of humidity to bring about a dry building.

The following provides excerpts from comprehensive research material with regards to the Biological effects of the Aquapol Device.

### Domestic Architecture Research – An Independent Study

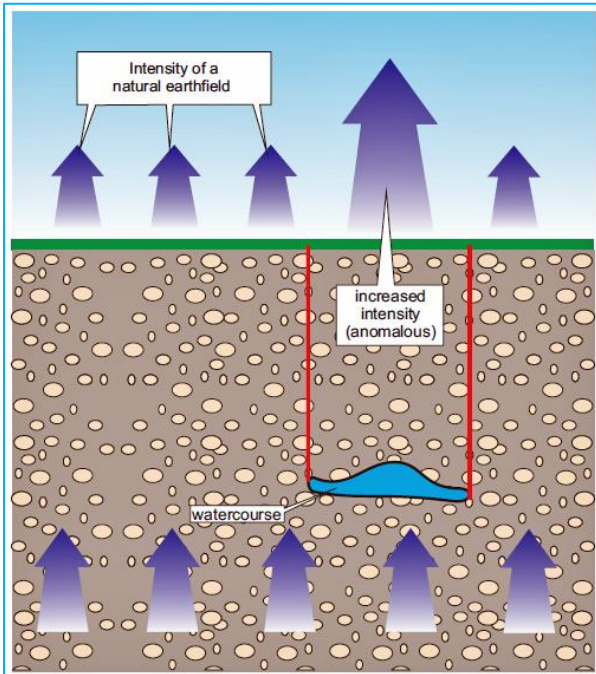

In 1990 a unique study was commissioned in Austria, this being financed by the “Domestic Architecture Research”.

6943 tests were carried out on 985 participants employing 24 different methods of measurement with the result of over 500,000 accumulated scientific data.

The result was astounding: Locational disturbance has an unequivocal negative effect on the regulation system of individuals. One of the most reliable methods of measurement was the one of body resistance.

Despite this large scale study no attention has been given the fact of locational disturbance in either domestic architecture or medicine.

## What is Earth Radiation?

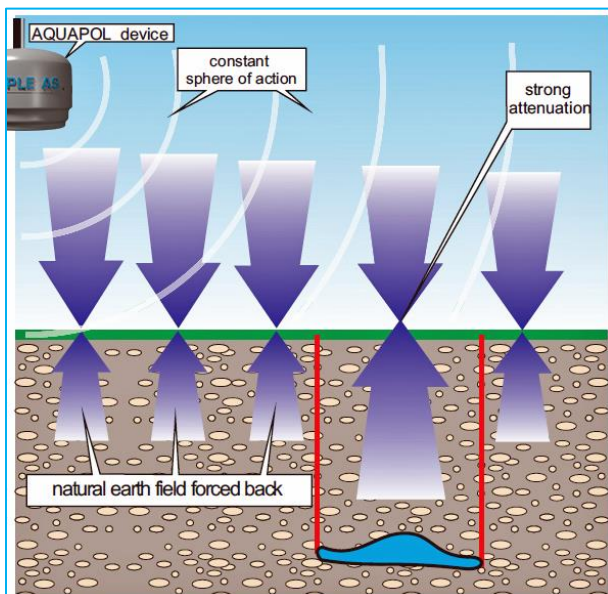

A water course or other geological factors influences the intensity of the natural earth field.

A watercourse acts like a lense on the earth field and amplifies its intensity.

The frequency of this earth field [of which not enough scientific research has been gathered] has a very strong effect on water or fluid type systems like human beings, animals or plants.

**Earth radiation is primarily an anomaly of the intensity of the natural earth field which, due to its frequency, has an especially strong influence on fluid type systems.**

The Aquapol Device builds up a relatively constant sphere of action which is directed towards the ground. It also attenuates the negative anomalies of the earth field which are harmful to organisms.

The “secret” of the Aquapol Device is that it works with this earth field (soil energy) respectively with the amplified space energy.

**The sphere of action of the Aquapol Device has the same nature as the natural earth field. It suppresses respectively attenuates the intensity anomaly and creates a proportionate natural and biologically positive radius of action.**

## Research in Austria

A 6 month test was conducted on several participants suffering from the effects of earth rays. The mitigating effects of the Aquapol Device were also examined and the outcome was satisfactory without exception.

The readings with high body resistance, a symptom of earth ray pollution, reduced to bearable levels.

The red graph shows the high body resistance of the participant caused by the geologically disturbed areas.

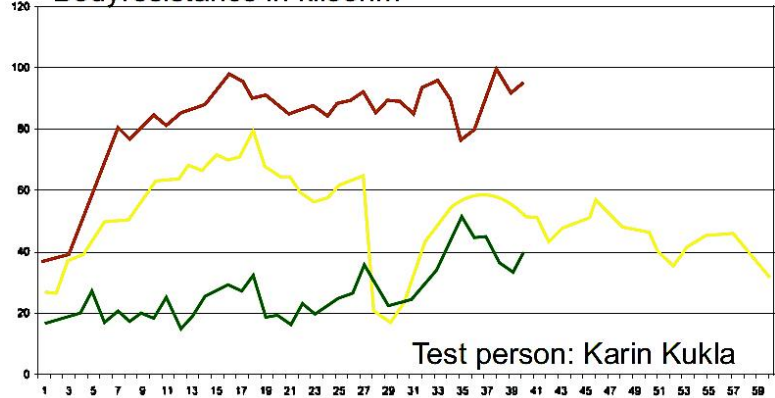

The green graph shows the body resistance of the person the same day. He stayed in undisturbed areas where he felt fine.

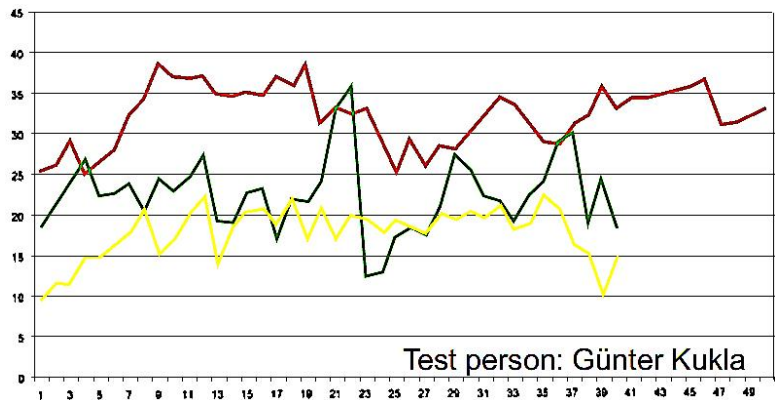

The yellow graph shows the unequivocal effect of the Aquapol Device on the participant and the attenuating effect on the earth rays. The longer the tests the more satisfactory the results became.

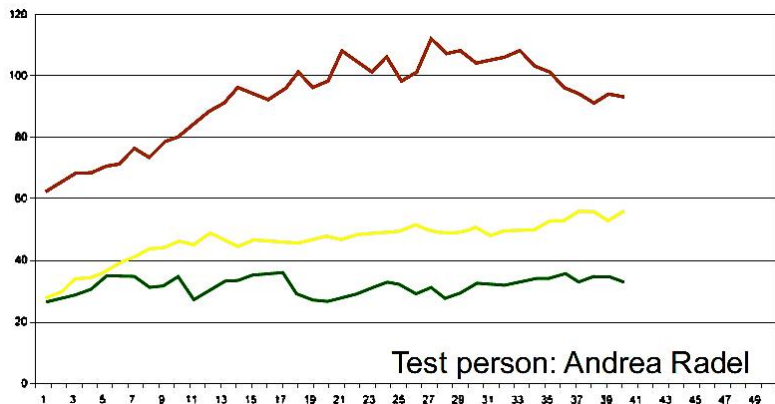

Bodyresistance in kilohm

Test person: Karin Kukla

Test person: Günter Kukla

Test person: Andrea Radel

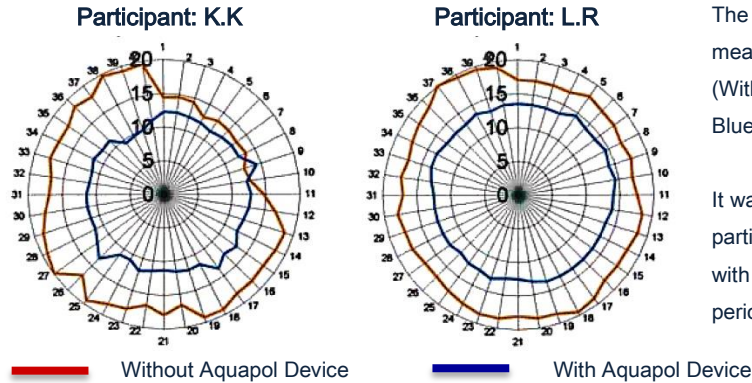

**Proven conclusively the Aquapol Device has won the fight against earth rays for the betterment of Mankind.**

## Circle for Geobiology Research

A scientific test headed by Dr. Hartmann from the Research Circle for Geology, Germany, proved the geological attenuating effect of the Aquapol Device by means of electrical body resistance.

Had the test been extended in duration with more participants then the attenuating effect on geological disturbances would have been visibly verified.

**A scientific test conducted by the Research Circle for Geobiology confirms the geological attenuating effect of the Aquapol Device.**

The test was carried out by an electrical method of measuring body resistance to a watercourse crossing. (With and without the use of the Aquapol Device. Blue and red lines)

It was conducted for 40 minutes unbeknown to the participants. The geopathogenic pollution disappeared with the use of the Aquapol Device within the test period.

**Body resistance measurement is the simplest yet reliable method for establishing the overcoming effects of earth rays and is both economical in time and cost**

## H.A.K 2001 Research

Federal Institute for Higher Technical Education and Research

<p>The vast majority [83%] of Aquapol customers also profited in a biological respect. For the remaining 17% other stress factors were more dominant causes of illness than this earth radiation.</p>	<p>Approximately 8% of the Aquapol customers originally experienced disturbed sleep patterns between 12am and 3am. During this period earth radiation is at its peak strength and has a negative biological effect on individual's sleep pattern.</p>

\*ions: positive or negative charged particle

## Extended Scientific Research

### Influence on the ion-balance

How do you feel near a waterfall?

Due to the dispersion of water negative air ions increase; they have an air cleansing, refreshing, activating effect and raise the quality of life.

With the Aquapol Device installed, tests were conducted using a 2 Channel Ion Meter to determine the quantity of negative and positive ions\* in the air. The test had been done both short and long term.

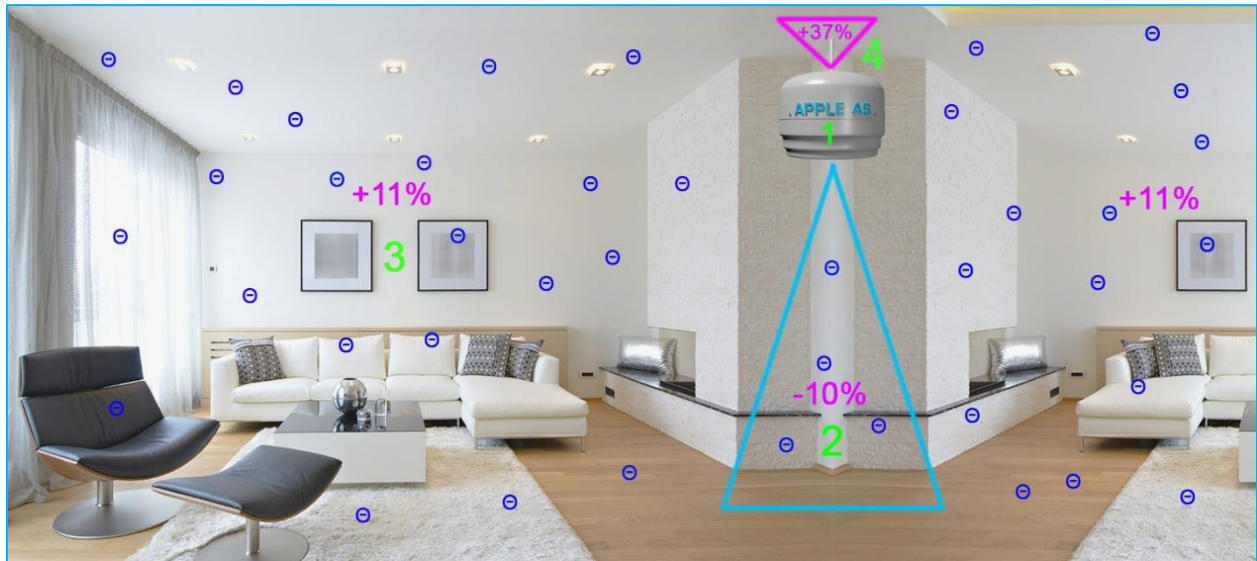

The results revealed significant increases of ions in the air within the “Radius of Action” and “Space Energy Receiving Area” of the Aquapol Device, specifically an increase of negative ions which, scientifically, is known to be extremely favorable to the well beingness of living organisms i.e. individuals, plants and animals.

The “Space Energy Receiving Area” of the Aquapol Device can be described as the “Place of Power”, where dramatic increases of negative ions occur.

⊖ = negative ions

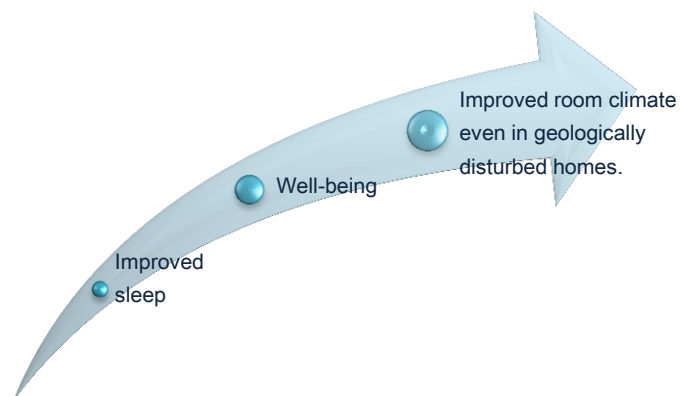

The number of negative air ions changed as following:

- 10% reduction in the “Energy Receiving Area”
- 11% increase in the “Radius of Action”
- 37% increase in the “Space Energy Receiving Area” [extremely favorable]

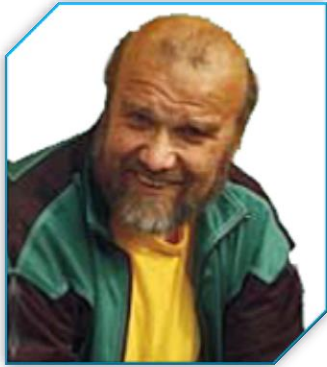

1. Aquapol Device
2. Energy Receiving Area
3. Radius of Action [ideal for living rooms]
4. Space Energy Receiving Area [ideal for an offices or a study]

Interviews with individuals who had an Aquapol Device installed in their property, revealed the following biological effects:

## Feedback from Experts

### A Doctor's experience

In the 1960s Doctor Ebeleseder moved into his home and very soon after started experiencing vast health problems; allergy from "house dust mites", disturbed sleep, and the children contracted tonsillitis and flu. Eventually over the course of time the whole family suffered from these symptoms. Dr. Ebeleseder, himself a radiesthetic\*, knew how this indisposition was caused; geopathogenic disturbance zones. However for the longest time he remained helpless with regards these problems. Then in 1988 he fortuitously discovered Aquapol. In the beginning he was skeptical but after 2-3 weeks, of installing the System, the condition of his family visibly improved.

The allergy from which Dr. Ebeleseder suffered amazingly vanished; all symptoms of illness that the family had experienced were gone.

Today their home is livable without any problems and Dr. Ebeleseder is absolutely convinced of the Aquapol Device's efficacy.

Günther Ebeleseder

Doctor

Schärding, Austria

\* radiesthetic: from radiesthesia: a study of sensory perception or feeling of radiation.

### A Scientist's experience

During the period between November 1986 and February 1987 I conducted research on the Aquapol Device with a series of tests with regards its "block-off-effect" towards geopathogenic\* disturbance fields.

We did several mental tests. These were done with adherence to a special method. A method that I taught in Germany at the Baden Educational Institution which was successfully applied by the course participants.

We discovered that the influences of geopathogenic disturbance-zones, which were caused by an underground watercourse through several displaced rock layers, had been reduced due to our Aquapol Device including the general magnetic field concentrations. Repeatedly the positive health influence of a room increased from 61% to 94%!

J. Seiser

Professor Diploma Engineer.

Vienna, Austria

[Previously Specialists Board at TGM4]

\* geopathogenic: illness caused by earth

### Radiesthetic's experience

My neighbour's bedroom is above his cellar. His wife complains of disturbed sleep, the cause of which was unknown. Through mensuration I found the existence of general earth radiation. [especially the so called "Hartmann-rays", "Curry-rays", rays from an underground watercourse, and a so called "thundergrid"]

Solution to the problem: Mr. Moser installed an Aquapol Device on 17 August 1989.

Results: The rays were no longer noticeable!

In later tests the rays were immediately detectable when the device was removed and disappeared again the moment the Aquapol Device was re-installed.

Hans Gumpert

Dipl. Engineer

Independent Radiesthetic

Timmersdorf-Traboch, Austria

## Feedback from Customers

Mr. Stiny an Austrian engineer suffered primarily from acute insomnia, migraine and phlebitis\*.

After radiesthetic investigations [finding radiation deriving from the earth] it was clear that the house was built on a geological disturbance zone. Despite moving from the affected room the problems returned, especially while watching TV. Even their dog showed signs of discomfort in all areas of the house. Disturbance field problems existed also in his offices in Vienna derived from watercourses. After several futile attempts with other methods Mr. Stiny found an article in the magazine "Space + Time" and was enlightened by the effectiveness of the Aquapol System.

The first system was installed in Vienna and it proved an immediate success. Subsequently Mr. Stiny had an Aquapol Device installed in his Klosterneuburg home. Here, as in Vienna, there was the temporary intensification of the problems but after a week all unwanted conditions had disappeared completely. Even their dog registered the benefits!

Stiny

Engineer

Klosterneuburg, Lower-Austria

\* phlebitis: inflammation of a vein

Mrs. Wiesinger explained that she suffered from major sleeping disorders. After seeking a permanent solution and following several unsuccessful attempts to remove the problem, Mrs. Wiesinger was apprised of Aquapol through an advertisement.

After having had her home assessed for earth radiation by a radiesthetic practitioner and installing an Aquapol Device, Mrs. Wiesinger experienced a gradual but significant improvement.

Today Mrs. Wiesinger is very satisfied and can, without any doubt, recommend the Aquapol Device.

Mrs. Wiesinger

Wiesen, Burgenland

As the photo shows, the blossom points in two directions. Before the Aquapol Device was installed the blossoms always directed themselves toward the window, in the direction of light. After the installation the new blossom pointed towards the room! However there are no windows in this direction only the Aquapol Device is hanging there. We are enthusiastic about these effects since it is obvious that the new blossoms are more attracted to the energy of the Aquapol Device than to the light. Furthermore, previously, only one or two blossoms occurred every few months but now we are blessed with constant blossoms!

All our plants now appear full of life and are simply happy.

A phenomenon!

Thomas Claus Ziegler

Munich, Germany
