Curriculum Vitae of Paul Lochner - Technical Advisor

Name of firm	CSIR
Name of staff	Paul Andrew Lochner
Profession	Environmental Assessment and Management
Position in firm	Project Leader in Environmental Assessment & Management
Date of birth	13 June 1969
Years with firm	21 years
Nationality	South African

Biographical sketch Paul Lochner commenced work at CSIR in 1992, after completing a degree in Civil Engineering and a Masters in Environmental Science, both at the University of Cape Town. His initial work at CSIR focused on sediment dynamics and soft engineering applications in the coastal zone, in particular, beach and dune management. He conducted several shoreline erosion analyses and prepared coastal zone management plans for beaches. He also prepared wetland management plans.

As the market for environmental assessment work grew, he led Environmental Impact Assessments (EIAs), in particular for coastal resort developments and large-scale industrial developments located on the coast; and Environmental Management Plans (EMPs), in particular for wetlands, estuaries and coastal developments. He has also been involved in researching and applying higher-level approaches to environmental assessment and management, such as Strategic Environmental Assessment (SEA). In 1998 and 1999, he coordinated the SEA research programme within the CSIR, and was a lead author of the Guideline Document for SEA in South Africa, published jointly by CSIR and the national Department of Environmental Affairs and Tourism in February 2000.

In 1999 and 2000, he was the project manager for the legal, institutional, policy, financial and socio-economic component of the Cape Action Plan for the Environment ("CAPE"), a large-scale multi-disciplinary study to ensure the sustainable conservation of the Cape Floral Kingdom. This was funded by the Global Environmental Fund (GEF) and prepared for WWF-South Africa. The study required extensive stakeholder interaction, in particular with government institutions, leading to the development of a Strategy and Action Plan for regional conservation.

In July 2003, he was certified as an Environmental Assessment Practitioner by the Interim Certification Board for Environmental Assessment Practitioners of South Africa. In 2004 he was lead author of the *Overview of IEM* document in the updated Integrated Environmental Management (IEM) Information Series published by national Department of Environmental Affairs and Tourism (DEAT). In 2004-2005 he was project manager for an Environmental and Social Impact

Assessment (ESIA) conducted for a bauxite mine and alumina refinery in the Komi Republic (Russia), prepared in accordance with World Bank and EU policies, guidelines and standards.

In 2004-2005, he was part of the CSIR team that coordinated the preparation of the series of *Guidelines for involving specialists in EIA processes* prepared for the Western Cape Department of Environmental Affairs and Development Planning (DEADP); and authored the *Guideline for Environmental Management Plans* published by the Western Cape government in 2005.

In 2009, he led the EIA for a desalination plant in Namibia, as well as several EIAs for wind energy facilities in South Africa.

Over the past 14 years has been closely involved with several environmental studies for industrial and port-related projects in Coega Industrial Development Zone (IDZ), near Port Elizabeth. This included the SEA for the establishment of the Coega IDZ in 1996/7, an EIA and EMP for a proposed aluminium smelter in 2002/3, and assistance with environmental permit applications for air, water and waste. At the Coega IDZ and port, he has also conducted environmental assessments for port development, LNG storage and a combined cycle gas turbine power plant, manganese export, rail development, and wind energy projects.

Curriculum Vitae of Surina Laurie - Project Reviewer

Name of firm	CSIR
Name of staff	Surina Laurie
Profession	Environmental Assessment Practitioner
Position in firm	Project Manager
Years' experience	4 years
Nationality	South African

Biographical sketch

Surina has 4 years' experience as an Environmental Assessment Practitioner (EAP). She completed both her BSc in Conservation Ecology and MPhil in Environmental Management (part-time) at the University of Stellenbosch. With her honours project, she worked closely with the Endangered Wildlife Trust Riverine Rabbit Working Group and was responsible for determining the conservation opportunity for the Riverine Rabbit in the Karoo. With this project, she gained valuable experience in how to interact and manage stakeholders in such a way that a project's objectives and conservation goals are met without the stakeholders not being included in the decision-making process. The management of stakeholders and the ability to incorporate their needs into the objectives of a project is seen as an essential component of an Environmental Impact Assessment (EIA) process.

With her Masters' thesis she researched and addressed why there is a need to undertake a Cost Benefit Analysis (CBA) as part of any EIA. The need for a CBA stems from the fact that losing environmental services will have an economic impact on a regional/national level in the long term but this is usually not considered during an EIA process. A CBA will look at both the economic benefits (profit) from a project and the economic losses because of loss of ecosystem services or rehabilitation costs. By including a CBA in an EIA, both the economic and environmental financial implications (not just the environmental significance of an impact) of a project will be considered by the decision making authority prior to the issuing of Environmental Authorisations or permits.

She has experience in undertaking Basic Assessments and Scoping and Environmental Impact Assessments for various sectors, including renewable energy, industry and tourism. She also has experience in undertaking environmental audits, due diligence assessments and the compilation of Environmental Management Programmes.

Curriculum Vitae of Surina Laurie - Traffic Impact Statement

Name of firm	CSIR
Name of staff	Surina Laurie
Profession	Environmental Assessment Practitioner
Position in firm	Project Manager
Years' experience	4 years
Nationality	South African

Biographical sketch

Surina has 4 years' experience as an Environmental Assessment Practitioner (EAP). She completed both her BSc in Conservation Ecology and MPhil in Environmental Management (part-time) at the University of Stellenbosch. With her honours project, she worked closely with the Endangered Wildlife Trust Riverine Rabbit Working Group and was responsible for determining the conservation opportunity for the Riverine Rabbit in the Karoo. With this project, she gained valuable experience in how to interact and manage stakeholders in such a way that a project's objectives and conservation goals are met without the stakeholders not being included in the decision-making process. The management of stakeholders and the ability to incorporate their needs into the objectives of a project is seen as an essential component of an Environmental Impact Assessment (EIA) process.

With her Masters' thesis she researched and addressed why there is a need to undertake a Cost Benefit Analysis (CBA) as part of any EIA. The need for a CBA stems from the fact that losing environmental services will have an economic impact on a regional/national level in the long term but this is usually not considered during an EIA process. A CBA will look at both the economic benefits (profit) from a project and the economic losses because of loss of ecosystem services or rehabilitation costs. By including a CBA in an EIA, both the economic and environmental financial implications (not just the environmental significance of an impact) of a project will be considered by the decision making authority prior to the issuing of Environmental Authorisations or permits.

She has experience in undertaking Basic Assessments and Scoping and Environmental Impact Assessments for various sectors, including renewable energy, industry and tourism. She also has experience in undertaking environmental audits, due diligence assessments and the compilation of Environmental Management Programmes.

Registered Professional Natural Scientist (Pr. Sci. Nat.) in Environmental Science (Reg. No: 400033/15) with the South African Council of Natural Scientific Professions.

Niël se nuwe boek by Kuierfees bekend gestel

GEMSBOK-UPINGTON: Niël Stemmet is 'n kosskrywer, fotojoernalis, wynplaas- en restaurant-konsultant en bekroonde ontwerper, wat in die ontwerp van restaurante spesialiseer.

Dit is ook met groot opgewondenheid dat hy sy nuutste boek, *Bitter+soet*, tydens die Kalahari Kuierfees op Woensdag, 23 September, gaan kom bekend stel.

Bitter+soet vertel die verhaal van Mietha Klaaste wat op die plaas Langverwacht, in die omgewing van Robertson grootgeword het, soos oorvertel deur Niël Stemmet.

Die lief en leed van Mietha en Daniël word op kleurvolle wyse vertel, met gedigte, rympties en liedjies toegelig, terwyl vergange dae se lekker resepte deel daarvan uitmaak.

Die Saterdagoggend gaan Niël 'n kosproduksie in die OWK Kuierent lewer. Vir verdere navrae skakel die feeskantoor by 054 332 1100.

Wen 'n Bitter +soet

Gemsboklesers kry ook kans een van Niël se boeke te wen. Stuur 'n outentieke resep na elsaj@gemsbok.co.za en staan 'n kans om een van die boeke te wen.

Uittreksel uit *Bitter+soet*

hoofstuk 17

Hoe verlang ek nie vanaand na my Daniël-kind, na die jongseunruik as ek sy borselkop vasdruk in myse nek.

Ek onthou hoe ek jou gebad het toe jy 'n klein baba was, jou oortjies gewas het, tussen jou toontjies waar dit so maklik suur kon ruik. Ek onthou hoe ek jou boudjies vol Johnson's se babapoer gegerooi het wanneer jy rooi uitslag had. Hoe ek jou winde uitgeveef het en jou duisende nappies gewas en drooggestryk het in die kou van die winter.

Ek onthou al die moeilik, dit bly om 'n ewe, mies Susan. Nag, baas Johan. "Nag, Mietha. Dankie, Mietha."

Ek onthou hoe ek jou stories vertel het van feetjies wat in die bos dans. Hoe ek jou leer knikkers uithaal het op die gras voor die huis. Hoe ek jou geleer het dat die gousblomme se toekoppies ook swiets kan wees om te kou. Hoe ek jou leer bossies blomme pluk het vir jou ma.

Ek onthou toe jy siek was en ek langs jou bed gesit het, hoe ek jou stroop gevoer het, jou voorkop afgespons het, alles

sou en wou doen om die koors in jou luf te breek.

Ek onthou soveel goed ... Jy, my kind, my grootmaakkind, my vashoukind, my liefmenskind.

Baa-baa swartskape

Het jy baie wol?

Ja oom, ja oom, drie sakke vol. Een vir die tannie en een vir die oom En een vir die dogtertjie

Van Wakkerstroom

Ek onthou hoe ek jou geabba het op my rug, om jou aan die slaap te sus, jou na droomland toe te stuur. Soms biddend as jy klaed was met al die huiswerk voor my, dat Klaasvatie net sand in jou ogies sal strooi, solat ek met my werk kan klaarmaak.

Dan werk ek deur die huis, die potte maak musiek op die stoof, ek vrywe die meubels in met rooi meubelolie, op my knieë polisie ek die vloere met Cobrapolish, ek was die vensters met ou Die Burger-koerante en pers spirits, ek was die kosynte af, bo-op die kaste, agter

die kaste terwyl ek jou hart se klop soos 'n nagwekker op my rug voel. Jou mondjie se kwyf maak nat op my rug, ek haal jou van my rug, maak jou doek skoon en soen jou oë.

Ek vee die jaart, trek die onkruid uit, gee die voëltjies broodkrummels uit die kombuis, was die wasgoed, jaag die muisoëls uit die vyeboom, maak my kamer skoon, haal die wasgoed van die draad, stryk en polisie die voorstoep mooi rooi blink.

Ek onthou die dag toe jy skool toe is – jy was skaars ses jare oud. Dit was warm, middel Januarie in 1968. Jou oupa het jou hare geskeer agter teen die nek op, om jou ore, jou sagte krulle het hy weggesny. Agter by jou haarlyn was een kroon en voor was twee kroone. Hulle kon jou hare wegsny, maar jouse blou oë, dié was myne.

Ek onthou hoe ek en jy die nag wat Neil Armstrong op die maan geloop het, buite op die lawn gesit het en die man in die maan probeer sien het. Jy het 'n hasie gesien en ek ook, tog het ons geglo die man op die maan, dié Neil-man, het ons raakgesien. "Kyk, Mietha, hy waai! Kyk!" "Ja, Daniël, hy waai vir jou en my." Saam het ek en jy van die lawn af vir die maan gewaai, ons arms uitwendig in die naglug.

Ek onthou hoe jy my vroeg in jou lewe aia Mietha geroep het. Aia en Outa, dit was respektie name doei-se-tyd. Geen kind het 'n ouer Kleurlingmens op sy naam aangespreek nie, nee, hy het jou geroep Aia of Outa. En ek, ek het gepraat van Nooi, Kleinnooi, en ook die vloekwoord Baas. Die vloekwoord wat alles kom deurmekaar duivel het.

Dear Interested and Affected Party

RE: RELEASE OF SCOPING REPORTS FOR THE PROPOSED DEVELOPMENT OF SEVEN SOLAR PHOTOVOLTAIC (PV) FACILITIES (REFERRED TO AS GEMSBOK SOLAR PV3, GEMSBOK SOLAR PV4, GEMSBOK SOLAR PV5 AND GEMSBOK SOLAR PV6; AS WELL AS BOVEN SOLAR PV2, BOVEN SOLAR PV3 AND BOVEN SOLAR PV4) ON PORTIONS 3 AND 8 OF GEMSBOK BULT FARM 120 AND THE REMAINING EXTENT OF BOVEN RUGZEER FARM 169, NORTH-EAST OF KENHARDT, NORTHERN CAPE PROVINCE (CSIR REFERENCE: EMS0102/SCATEC/2015)

As an Interested and Affected Party on our database, you are hereby notified of the release of the seven Scoping Reports for a 30-day commenting period ending on **24 November 2015** for the seven Solar PV Facilities and associated electrical infrastructure near Kenhardt in the Northern Cape (CSIR Reference Number: EMS0106/MULILO/2015).

Mulilo Renewable Project Developments (PTY) LTD (Mulilo) intends to develop seven Solar PV Facilities of 75 MW each and associated electrical infrastructure (132 kV transmission lines for each 75 MW facility) on Portions 3 and 8 of Gembok Bult Farm 120 and the Remaining Extent of Boven Ruzgeer Farm 169 near Kenhardt in the Northern Cape. The seven projects are indicated in Table 1.

Table1: Seven Preferred Solar PV Facilities proposed by Mulilo near Kenhardt in the Northern Cape

No.	Solar PV Project	Project Site
1.	Gembok Solar PV3	Portion 3 of Gembok Bult Farm 120
2.	Gembok Solar PV4	Portion 3 of Gembok Bult Farm 120
3.	Gembok Solar PV5	Portion 8 of Gembok Bult Farm 120
4.	Gembok Solar PV6	Portion 8 of Gembok Bult Farm 120
5.	Boven Solar PV2	Remaining Extent of Boven Ruzgeer Farm 169
6.	Boven Solar PV3	Remaining Extent of Boven Ruzgeer Farm 169
7.	Boven Solar PV4	Remaining Extent of Boven Ruzgeer Farm 169

In terms of the National Environmental Management Act (Act 107 of 1998, as amended) (NEMA) and the 2014 NEMA Environmental Impact Assessment (EIA) Regulations promulgated in Government Gazette 38282 and Government Notice (GN) R982, R983, R984 and R985 on 8 December 2014, a full Scoping and EIA Process is required for the construction of the seven Solar PV facilities. In line with Regulation 12 of the 2014 EIA Regulations, the Council for Scientific and Industrial Research (CSIR) has been appointed by the Project Applicant to undertake the separate Scoping and EIA Processes for the proposed projects.

Since the proposed 75 MW Solar PV facilities are located within the same geographical area and constitute the same type of activity, an integrated PPP will be undertaken for the proposed seven projects. However, separate Applications for EA are currently being lodged with the Competent Authority (i.e. the National Department of Environmental Affairs (DEA)) for each proposed Scoping and EIA project. Furthermore, separate reports (i.e. Scoping and EIA Reports) will be compiled for each project.

Kindly complete the enclosed Comment and Registration Form in order to submit any comments, issues or concerns you may have. Please submit the completed form to the CSIR Project Leader, Minnelise Levendal, at the contact details provided above by **24 November 2015**. Hard copies of the Scoping Reports are also available for public viewing at the Kenhardt Library (in Park Street) The Scoping Reports can also be downloaded from the project website: <http://www.csir.co.za/eia/MuliloSolar>

In terms of the way forward, the Scoping Reports will be finalised subsequent to the 30-day comment period, and submitted to the National DEA for decision-making in line with Regulation 22 of the 2014 EIA Regulations. All issues identified and comments raised through the review of the Scoping Reports will be captured in an updated Issues and Responses Trail (as an appendix to the Scoping Report), for submission to the National DEA for decision-making. As a key stakeholder on the project database, you will be notified of the submission of the Scoping Reports to the National DEA for decision-making.

Please do not hesitate to contact us should you have any queries relating to the above.

Sincerely,

Paul Lochner (EAP-CSIR, EMS)

Emails sent to all I&APs to notify them of the release of the Scoping Report for comment

>>> Minnelise Levendal 23/10/2015 17:57 >>>

Dear Stakeholders and Interested and Affected Parties

RELEASE OF SCOPING REPORT FOR COMMENT

SCOPING AND ENVIRONMENTAL IMPACT ASSESSMENT (EIA) FOR THE PROPOSED DEVELOPMENT OF SEVEN SOLAR PHOTOVOLTAIC OR CONCENTRATED PHOTOVOLTAIC (CPV) SOLAR FACILITIES AND ASSOCIATED ELECTRICAL INFRASTRUCTURE NORTH-EAST OF KENHARDT, NORTHERN CAPE PROVINCE (GEMSBOK SOLAR PV3-, PV4, PV5, PV6; AND BOVEN SOLAR PV2-, 3 & 4) ON PORTIONS 3 AND 8 OF GEMSBOK BULT FARM 120 AND ON THE REMAINING EXTENT OF BOVEN RUGZEER FARM 169

Competent Authority: National Department of Environmental Affairs

CSIR REFERENCE: EMS0106/MULILO/2015

This e-mail correspondence serves to inform you of the release of seven Scoping Reports for a 30-day commenting period ending on **24 November 2015** for the proposed Solar PV Facilities and associated electrical infrastructure near Kenhardt in the Northern Cape (CSIR Reference Number: EMS0106/MULILO/2015).

Mulilo Renewable Project Developments (PTY) LTD (Mulilo) intends to develop seven Solar PV Facilities of 75 MW each and associated electrical infrastructure (132 kV transmission lines for each 75 MW facility) on Portions 3 and 8 of Gemsbok Bult Farm 120 and the Remaining Extent of Boven Rugzeer Farm 169 near Kenhardt in the Northern Cape. The seven projects are indicated in Table 1.

Table1: Seven Preferred Solar PV Facilities proposed by Mulilo near Kenhardt in the Northern Cape

No	Solar PV Project	Project Site
1.	Gemsbok Solar PV3	Portion 3 of Gemsbok Bult Farm 120
2.	Gemsbok Solar PV4	Portion 3 of Gemsbok Bult Farm 120
3.	Gemsbok Solar PV5	Portion 8 of Gemsbok Bult Farm 120
4.	Gemsbok Solar PV6	Portion 8 of Gemsbok Bult Farm 120
5.	Boven Solar PV2	Remaining Extent of Boven Rugzeer Farm 169
6.	Boven Solar PV3	Remaining Extent of Boven Rugzeer Farm 169
7.	Boven Solar PV4	Remaining Extent of Boven Rugzeer Farm 169

Since the proposed 75 MW Solar PV facilities are located within the same geographical area and constitute the same type of activity, an integrated PPP will be undertaken for the proposed seven projects. However, separate Applications for EA are currently being lodged with the Competent Authority (i.e. the National Department of Environmental Affairs (DEA)) for each proposed Scoping and EIA project. Furthermore, separate reports (i.e. Scoping and EIA Reports) will be compiled for each project.

Please find attached the following:

- Executive Summary of each Scoping Report (please note due to mailbox size limitations I will email these in two emails-attached are the ones for Boven Solar);
- Letter 2 to I&APs; and

- Comment and Registration Form.

Hard copies of the Scoping Reports are also available for public viewing at the Kenhardt Library (in Park Street) The Scoping Reports can also be downloaded from the project website: <http://www.csir.co.za/eia/MuliloSolar>

Kindly complete the enclosed Comment and Registration Form in order to submit any comments, issues or concerns you may have. Please submit the completed form to the CSIR Project Leader, Minnelise Levendal, at the contact details provided below by **24 November 2015**.

Thank you and kind regards,

Minnelise Levendal

Dear Interested and Affected Party

RE: RELEASE OF SCOPING REPORTS FOR THE PROPOSED DEVELOPMENT OF SEVEN SOLAR PHOTOVOLTAIC (PV) FACILITIES (REFERRED TO AS GEMSBOK SOLAR PV3, GEMSBOK SOLAR PV4, GEMSBOK SOLAR PV5 AND GEMSBOK SOLAR PV6; AS WELL AS BOVEN SOLAR PV2, BOVEN SOLAR PV3 AND BOVEN SOLAR PV4) ON PORTIONS 3 AND 8 OF GEMSBOK BULT FARM 120 AND THE REMAINING EXTENT OF BOVEN RUGZEEER FARM 169, NORTH-EAST OF KENHARDT, NORTHERN CAPE PROVINCE (CSIR REFERENCE: EMS0102/SCATEC/2015)

As an Interested and Affected Party on our database, you are hereby notified of the release of the seven Scoping Reports for a 30-day commenting period ending on **24 November 2015** for the seven Solar PV Facilities and associated electrical infrastructure near Kenhardt in the Northern Cape (CSIR Reference Number: EMS0106/MULILO/2015).

Mulilo Renewable Project Developments (PTY) LTD (Mulilo) intends to develop seven Solar PV Facilities of 75 MW each and associated electrical infrastructure (132 kV transmission lines for each 75 MW facility) on Portions 3 and 8 of Gembok Bult Farm 120 and the Remaining Extent of Boven Rugszeer Farm 169 near Kenhardt in the Northern Cape. The seven projects are indicated in Table 1.

6.	Boven Solar PV3	Remaining Extent of Boven Rugszeer Farm 169
7.	Boven Solar PV4	Remaining Extent of Boven Rugszeer Farm 169

In terms of the National Environmental Management Act (Act 107 of 1998, as amended) (NEMA) and the 2014 NEMA Environmental Impact Assessment (EIA) Regulations promulgated in Government Gazette 38282 and Government Notice (GN) R982, R983, R984 and R985 on 8 December 2014, a full Scoping and EIA Process is required for the construction of the seven Solar PV facilities. In line with Regulation 12 of the 2014 EIA Regulations, the Council for Scientific and Industrial Research (CSIR) has been appointed by the Project Applicant to undertake the separate Scoping and EIA Processes for the proposed projects.

Since the proposed 75 MW Solar PV facilities are located within the same geographical area and constitute the same type of activity, an integrated PPP will be undertaken for the proposed seven projects. However, separate Applications for EA are currently being lodged with the Competent Authority (i.e. the National Department of Environmental Affairs (DEA)) for each proposed Scoping and EIA project. Furthermore, separate reports (i.e. Scoping and EIA Reports) will be compiled for each project.

Kindly complete the enclosed Comment and Registration Form in order to submit any comments, issues or concerns you may have. Please submit the completed form to the CSIR Project Leader, Minnelise Levendal, at the contact details provided above by **24 November 2015**. Hard copies of the Scoping Reports are also available for public viewing at the Kenhardt Library (in Park Street) The Scoping Reports can also be downloaded from the project website: <http://www.csir.co.za/eia/MuliloSolar>

In terms of the way forward, the Scoping Reports will be finalised subsequent to the 30-day comment period, and submitted to the National DEA for decision-making in line with Regulation 22 of the 2014 EIA Regulations. All issues identified and comments raised through the review of the Scoping Reports will be captured in an updated Issues and Responses Trail (as an appendix to the Scoping Report), for submission to the National DEA for decision-making. As a key stakeholder on the project database, you will be notified of the submission of the Scoping Reports to the National DEA for decision-making.

Please do not hesitate to contact us should you have any queries relating to the above.

Sincerely,

Paul Lochner (EAP-CSIR, EMS)

Dear Interested and Affected Party

RE: NOTICE OF SCOPING AND ENVIRONMENTAL IMPACT ASSESSMENT (EIA) FOR THE PROPOSED DEVELOPMENT OF SEVEN SOLAR PHOTOVOLTAIC OR CONCENTRATED PHOTOVOLTAIC FACILITIES AND ASSOCIATED ELECTRICAL INFRASTRUCTURE NORTH-EAST OF KENHARDT, NORTHERN CAPE PROVINCE (CSIR REFERENCE: EMS0106/MULILO/2015)

Mulilo Renewable Project Developments (Pty) (Ltd) (hereafter referred to as "Mulilo") proposes to construct and operate seven Photovoltaic (PV) or Concentrated Photovoltaic (CPV) Solar Facilities with a generating capacity of 75 MW each and associated electrical infrastructure (132 kV transmission lines for each 75 MW facility), on Portions 3 and 8 of Gembok Bult Farm 120 and the Remaining extent of Boven Rugszeer Farm 169, located 30 km north-east of Kenhardt. Two of the projects will be located on Portion 3-, two projects on Portion 8 of Gembok Bult Farm 120 and three projects on the Remaining Extent of Boven Rugszeer Farm 169. Each 75 MW Solar PV facility proposed will cover an approximate area of 200 hectares (ha) with a collective footprint of approximately 1 400 ha and a combined power generation capacity of 525 MW. The proposed projects will entail the construction of the solar field, buildings, electrical infrastructure, internal access roads, and associated infrastructure and structures.

In terms of the National Environmental Management Act (Act 107 of 1998, as amended) (NEMA) and the 2014 NEMA EIA Regulations promulgated in Government Gazette 38282 and Government Notice (GN) R982, R983, R984 and R985 on 8 December 2014, the proposed projects require a full Scoping and EIA Process for the construction of the seven Solar PV facilities. The CSIR has been appointed by Mulilo to undertake the requisite Scoping and EIA Processes for the proposed projects.

Since the proposed seven 75 MW Solar PV facilities are located within the same geographical area and constitute the same type of activity, an integrated Public Participation Process will be undertaken for the proposed projects. However, separate Applications for Environmental Authorisation will be lodged with the Competent Authority (i.e. the National Department of Environmental Affairs (DEA)) for each proposed 75 MW Solar PV facility and transmission line, which will be referred to as Gembok Solar PV3, Gembok Solar PV4, Gembok Solar PV5, Gembok Solar PV6, Boven Solar PV2, Boven Solar PV3 and Boven Solar PV4. One integrated Scoping Report will be compiled for all seven projects, but seven separate EIA Reports will be compiled.

In line with this, notice is hereby given that Scoping and EIA Processes will be undertaken for the proposed 75 MW Solar PV facilities and transmission lines.

Please find enclosed, a Background Information Document (including a Comment and Registration Form), which provides an overview of the proposed projects, as well as the potential listed activities that form part of the Scoping and EIA Processes and require Environmental Authorisation from the National DEA. The proposed projects potentially trigger the following listed activities:

- GN R983: Activity 11 (i); 12 (x) and 12 (xii); Activity 19 (i); Activity 24 (ii) and Activity 28 (ii);
- GN R984: Activity 1 and Activity 15; and
- GN R985: Activity 12 (d)

A comment and registration period of **30 days** has been allocated for the review of the Background Information Document, for the submission of any issues or concerns, and for the registration of I&APs (which requires the completion of the enclosed Comment and Registration Form). Kindly complete the enclosed Comment and Registration Form and submit it to the CSIR at the contact details provided above by **10 October 2015**. All comments received during this 30 day period will be recorded and included in the Scoping Report.

Kindly note that available project information can be accessed at the following website: <http://www.csir.co.za/eia/MuliloSolar>

Should you have any queries or require additional information please do not hesitate to contact the undersigned (CSIR Project Manager) using the contact details provided above.

Sincerely,

Minnelise Levendal

Scoping and Environmental Impact Assessment for the proposed Development of seven Solar Photovoltaic Facilities and associated Electrical Infrastructure north-east of Kenhardt, Northern Cape Province

1. INTRODUCTION TO THE PROPOSED PROJECT

Mulilo Renewable Project Developments (Pty) Ltd (hereinafter referred to as "Mulilo") proposes to construct and operate seven Photovoltaic (PV) or Concentrated Photovoltaic (CPV) Solar Facilities with a generating capacity of 75 MW each and associated electrical infrastructure (132 kV transmission lines for each 75 MW facility), on Portions 3 and 8 of Gemsbok Bult Farm 120 and the Remaining Extent of Boven Rugzeer Farm 169 located 30 km north-east of Kenhardt within the !Kheis Local Municipality, Northern Cape Province. Two of the projects will be located on Portion 3-, two projects on Portion 8 of Gemsbok Bult Farm 120 and three projects on the Remaining Extent of Boven Rugzeer Farm 169 north-east of Kenhardt. The proposed facilities will connect to the substation which will be located on the Remaining Extent of Portion 3 of Gemsbok Bult Farm 120.

Mulilo is a locally owned, South African based renewable energy developer that was formed in 2008. The company focuses on solar, wind and hydro technologies and works with landowners, project developers, technology providers, regulators and investors to source and develop renewable energy projects.

Each 75 MW Solar PV facility proposed by Mulilo will cover an approximate area of 200 hectares (ha) and will be constructed adjacent to each other (with a collective footprint of approximately 1 400 ha and a combined power generation capacity of 525 MW). The proposed projects are located in proximity to the Eskom Nieuwehoop Substation (which is currently being constructed on the farm Gemsbok Bult (Remaining Extent of Portion 3 of Farm 120)). Each proposed 132 kV transmission line will link to the Eskom Nieuwehoop Substation.

Separate Applications for Environmental Authorisation (EA) will be lodged with the Competent Authority (i.e. the National Department of Environmental Affairs (DEA)) for each proposed 75 MW Solar PV facility and transmission line. Mulilo has identified seven sites and potential projects with alternatives and transmission lines (see Table 1 at the end of the page).

Figure 1 shows the proposed preferred project sites, the alternative sites and the transmission lines. The proposed project is located directly alongside the proposed Nieuwehoop Solar Development of Mulilo (Phase 1), which is currently undergoing an Environmental Impact Assessment (EIA). The alternative sites will be considered as part of the EIA process.

In terms of the National Environmental Management Act (Act 107 of 1998, as amended) (NEMA) and the 2014 NEMA Environmental Impact Assessment (EIA) Regulations promulgated in Government Gazette 38282 and Government Notice (GN) R982, R983, R984 and R985 on 8 December 2014, the proposed projects (solar PV facilities and its associated powerlines) require a full Scoping and EIA Process for the construction of the seven Solar PV facilities. The CSIR has been appointed to undertake the EIA Process for the proposed projects.

Since the proposed 75 MW Solar PV facilities are located within the same geographical area and constitute the same type of activity, an integrated Public Participation Process (PPP) will be undertaken for the proposed projects. One integrated Scoping Report will be submitted to DEA (covering all seven projects). However, seven separate EIA reports will be submitted to DEA for decision-making.

2. NEED AND JUSTIFICATION FOR THE PROPOSED PROJECTS

At a national level, South Africa is facing serious electricity shortages as well as water scarcity. Linked to this, the proposed projects aim to supply additional electricity to the national grid. Furthermore, the urgent need to reduce greenhouse gas emissions and the importance of a secure and diversified energy supply has resulted in a global shift towards, and an increased focus on, the use of renewable energy technologies. In South Africa, national government has encouraged the utilisation of renewable energy through national policy and strategic planning. The objective is to expand electricity generation capacity in South Africa and promote the practice of sustainable development.

The Integrated Resource Plan for South Africa for the period 2010 to 2030 (hereinafter referred to as "IRP 2010") was released by government in 2010 (with an Updated Report, dated 2013) and proposes to develop and secure 17 800 MW of renewable energy capacity by 2030 (including wind, solar and other energy sources). The Department of Energy (DoE) is currently entered into a bidding process, i.e. the Renewable Independent Power Producer Procurement Programme (REIPPPP), for the procurement of 3725 MW of renewable energy from Independent Power Producers (IPP) by 2016 and beyond to enable the Department to meet this target. Subsequent to this, an additional target of 6 300 MW from renewable energy sources was added to the REIPPPP as published in Government Gazette No. 39111 of 18 August 2015. The additional target allocated for wind energy is 3040 MW and 2 200 MW for solar photovoltaic.

The two main evaluation criteria for compliant proposals are price and economic development, with other selection criteria including technical feasibility and grid connectivity, environmental acceptability, black economic empowerment, community development, and local economic and manufacturing propositions. The bidders with the highest rankings (according to the aforementioned criteria) are appointed as "Preferred Bidders" by the DoE.

The proposed projects aim to contribute to the above strategic imperative.

3. WHAT DOES THIS DOCUMENT TELL YOU?

This Background Information Document (BID) provides you, as an Interested and Affected Party (I&AP), with:

- Background information on the proposed projects;
- A description of the EIA and Public Participation Process that will be undertaken for the proposed projects; and
- Details on how to register your interest in the projects and receive further information.

As a registered I&AP, there will be opportunities for you to be involved in the Scoping and EIA Processes through receiving information, registering your interest on the project database, raising issues of concern and commenting on reports. The input from I&APs, together with the information and assessment provided by the Environmental Assessment Practitioner and relevant specialists, will assist DEA with their decision-making in terms of whether to grant or refuse EA for the proposed projects.

4. WHAT DO THE PROPOSED PROJECTS ENTAIL?

The locality map (Figure 1) included with this BID provides an overview of the proposed locality of the projects (including the alternatives sites for the projects) on Portions 3 and 8 of Gembok Bult Farm 120 and the Remaining Extent of Boven Ruzgeer Farm 169 and their connection points to the substation on the Remaining Extent of Portion 3 of Gembok Bult Farm 120, north-east of Kenhardt in the Northern Cape. The proposed projects will take place on land owned by a third party, and as such consent has been obtained from the landowner. It is anticipated that the property on which the proposed projects will be constructed will be leased from the landowner.

Each Solar PV facility will consist of the components listed below. The components and their dimensions will be discussed within the integrated Scoping Report and the separate EIA Reports that will be produced for each facility:

5. ENVIRONMENTAL AUTHORISATION

In terms of the NEMA and the 2014 NEMA EIA Regulations published in GN R982, R983, R984 and R985 on 8 December 2014 in Government Gazette 38282, notice is hereby given that a Scoping and EIA Process is required as the proposed projects include, amongst others, the activities shown in Table 2. Table 2 indicates the applicable listed activities together with a summary of the listed activity in the context of the proposed project activities.

Table 2: Listed Activities for the Scoping and EIA Processes – Proposed 75 MW Solar PV Facilities

Relevant Notice and Activity Number	Description of the planned activity that relates to the applicable listed activity
GN R983: Activity 11 (i)	The proposed project will entail the construction and installation of a total of seven overhead transmission lines with a capacity of 132 kV each. One transmission line will be constructed for each 75 MW Solar PV facility. The proposed project will take place on Portions 3 and 8 of Gembok Bult Farm 120 and the Remaining Extent of Boven Rugszeer Farm 169 and the connection points to the substation will take place on the Remaining Extent of Portion 3 of Gembok Bult Farm 120, north-east of Kenhardt in the Northern Cape Province, outside an urban area.
GN R983: Activity 12 (x) and (xii)	Each proposed 75 MW Solar PV facility will entail the construction of building infrastructure and structures (such as the solar field, offices, workshops, ablution facilities, on-site substations, laydown areas and security enclosures). The buildings and infrastructure are expected to exceed a footprint of 100 m ² and some of which are likely to occur within 32 m of a watercourse.
GN R983: Activity 19 (i)	The proposed project may entail the excavation, removal and moving of more than 5 m ³ of soil, sand, pebbles or rock from the nearby watercourse. The proposed project may also entail the infilling of more than 5 m ³ of material into the nearby watercourse.
GN R983: Activity 24 (ii)	The proposed project will entail the construction of internal access roads. These roads could possibly be wider than 8 m (without a road reserve).
GN R983: Activity 28 (ii)	The proposed project will take place on Portions 3 and 8 of Gembok Bult Farm 120 and the Remaining Extent of Boven Rugszeer Farm 169 and the connection points to the substation will take place on the Remaining Extent of Portion 3 of Gembok Bult Farm 120, north-east of Kenhardt in the Northern Cape. It is understood that the land is currently used for agricultural purposes. The proposed projects (i.e. commercial/industrial development) will cover a total combined footprint of approximately 1 400 ha.
GN R984: Activity 1	The proposed project will entail the construction of seven 75 MW Solar PV facilities with a total of 525 MW (i.e. facilities for the generation of electricity from a renewable resource). The proposed project will take place on Portions 3 and 8 of Gembok Bult Farm 120 and the Remaining Extent of Boven Rugszeer Farm 169 and the connection points to the substation will take place on the Remaining Extent of Portion 3 of Gembok Bult Farm 120, north-east of Kenhardt in the Northern Cape Province, outside an urban area.
GN R984: Activity 15	The total footprint of the proposed project is expected to be approximately 1 400 ha (i.e. 200 ha x 7 proposed 75 MW Solar PV facilities). As a result, more than 20 ha of indigenous vegetation could possibly be removed for the construction of the proposed Solar PV facilities.
GN R985: Activity 12 (d)	The proposed facility's development footprint will be 525 ha and therefore more than 300 square metres of indigenous vegetation will be removed.

Scoping and Environmental Impact Assessment for the proposed Development of seven Solar Photovoltaic Facilities and associated Electrical Infrastructure north-east of Kenhardt, Northern Cape Province

Note from the CSIR:

It is also important to note that a precautionary approach has been adopted by the CSIR when identifying listed activities, in that if there is any doubt at this stage of the project planning whether or not an activity is included in the project design, then the activity is listed. This list may be refined during the course of the Scoping and EIA Processes, and listed triggers may be removed or added as applicable.

The applicable listed activities require EA from the National DEA. The Scoping and EIA Process needs to show the Competent Authority, the National DEA, and the project proponent, Mulilo, the consequences their choices will have on the biophysical, social and economic environment. The steps in the Scoping and EIA Process are outlined below.

6. SCOPING AND EIA PROCESS

The Scoping and EIA Process being implemented can be summarised as follows:

Stage 1: Environmental Scoping:

This Scoping Process is being planned and conducted in a manner that is intended to provide sufficient information to enable the authorities to reach a decision regarding the scope of issues to be addressed in the EIA, and in particular to convey the range of specialist studies that will be included as part of the Environmental Impact Reporting Phase of the EIA, as well as the approach to these specialist studies. Within this context, the main objectives of this Scoping Process are to *inter alia*:

- Identify and inform a broad range of stakeholders about the proposed projects;
- Through a process of broad-based consultation with stakeholders, conduct an open, participatory and transparent Public Participation Process and facilitate the inclusion of any concerns and issues raised by stakeholders;
- Identify the relevant policies and legislation relevant to the proposed project;
- Provide the need and desirability of the proposed project, as well as the need and desirability of the project in the context of the preferred location;
- Identify and confirm the preferred activity, technology alternative, and preferred site (i.e.

clarify the scope and nature of the proposed activities and the alternatives being considered);

- Identify and document the key issues to be addressed in the subsequent EIA Phase;
- Confirm the level of assessment required, impact assessment methodology, and the specialist input; and
- Identify suitable measures to avoid, manage or mitigate identified impacts and to determine the extent of the residual risks that need to be managed and monitored.

Stage 2: EIA:

The purpose of this stage of the EIA Process is to:

- Undertake specialist investigations to address the issues of concern that have been raised and identified through the Scoping Process;
- Assess reasonable and feasible alternatives that form part of the proposed project (including the No Go Option);
- Determine the policy and legislative context of the proposed project;
- Describe the need and desirability of the proposed project, as well as the need and desirability of the project in the context of the preferred location;
- Identify the location of the proposed development footprint within the preferred site;
- Identify the most ideal location for the proposed activity within the preferred site;
- Identify, determine and assess the significance of the predicted impacts in line with the accepted Plan of Study for EIA;
- Recommend management actions to enhance positive benefits or avoid/minimise potential negative impacts (based on specialist input); and
- Identify residual risks that need to be managed and monitored.

The following specialist studies have been identified, at this stage, to form part of the EIA Phase of the proposed projects:

- Ecological Impact Assessment (including Terrestrial Ecology, Aquatic Ecology and Avifauna);
- Visual Impact Assessment;
- Heritage Impact Assessment (Archaeology and Cultural Landscape);

Scoping and Environmental Impact Assessment for the proposed Development of seven Solar Photovoltaic Facilities and associated Electrical Infrastructure north-east of Kenhardt, Northern Cape Province

- Desktop Palaeontological Impact Assessment;
- Soils and Agricultural Potential Assessment; and
- Social Impact Assessment.

7. PUBLIC PARTICIPATION PROCESS

Public involvement forms an important component of the Scoping and EIA Process by assisting in the identification of issues and alternatives to be evaluated. The following outlines the steps in the Public Participation Process. Please note that one integrated Public Participation process will be undertaken for all seven projects.

Step 1: Notify Authorities and I&APs of the Scoping and EIA Processes (30 days)

The initial step entails providing notification to Authorities and potential I&APs of the proposed projects and the commencement of the Scoping and EIA Processes. An initial database of potential I&APs and Authorities will be compiled. Authorities and potential I&APs will be provided with a BID (i.e. this document), including a Comment and Registration Form and written notification. An advertisement will also be placed in a local newspaper during this phase. I&APs will be provided with a 30-day review period within which to raise any issues or concerns for inclusion in the Scoping Report. During this review period, I&APs are required to register their interest on the project database in order to be included from the outset of the Scoping and EIA Processes.

Step 2: Preparation of Applications for EA, and Scoping Report

Separate Applications for EA for each proposed 75 MW Solar PV facility with its associated transmission line will be prepared (i.e. a total of seven applications will be prepared). In addition, the Scoping Report and Plan of Study for EIA will be compiled in line with Appendix 2 of the 2014 EIA Regulations (GN R982). Since the proposed 75 MW Solar PV facilities are located within the same geographical area and constitute the same type of activity, an integrated Scoping Process will be undertaken for the proposed seven projects. One integrated Scoping Report will be submitted to DEA (covering all seven projects). However, seven separate EIA reports will be submitted. All issues and concerns raised by the Authorities and I&APs

during the review of the BID will be recorded and compiled into an Issues and Responses Trail for inclusion in the Scoping Report.

Step 3: Submission of Applications for EA

Seven separate applications for EA for each proposed 75 MW Solar PV facility and transmission line (i.e. a total of seven applications) will be submitted to the National DEA for processing.

Step 4: Authority and I&AP Review of the Scoping Report (30 days)

The Scoping Report will be released to the public for a 30-day review period. All Authorities and registered I&APs on the project database will be notified in writing of the opportunity to review the Scoping Report. A Comment and Registration Form will also be sent with the written notification to all registered stakeholders. A copy of the Scoping Report will be placed on the project website (<http://www.csir.co.za/eia/MuiloSolar>), and at the Kenhardt public library.

Step 5: Submission of Scoping Report to the National DEA for Decision-Making

The comments received from I&APs during the 30-day review of the Scoping Report will be recorded into a comprehensive Issues and Responses Trail, and will be included in the Scoping Report before submission to the National DEA. The Scoping Report will thereafter be finalised and submitted to the National DEA for decision-making. All registered I&APs on the project database will be notified of the submission of the Scoping Report to DEA.

The National DEA will have 43 days (from receipt of the Scoping Report) to either accept the Scoping Report with or without conditions, or refuse EA.

Step 6: Undertake Specialist Studies and Preparation of EIA Reports (including the Environmental Management Programme (EMPr))

Once the National DEA accepts the Scoping Report, the Impact Assessment Phase may commence.

During this phase, the specialist studies (as listed above) will be undertaken and the EIA Reports (including the EMPr) will be compiled in line with the

Scoping and Environmental Impact Assessment for the proposed Development of seven Solar Photovoltaic Facilities and associated Electrical Infrastructure north-east of Kenhardt, Northern Cape Province

2014 EIA Regulations and the accepted Plan of Study for EIA.

As stated above, seven separate EIA reports will be prepared, i.e. one for each project.

Step 7: Authority and I&AP Review of the EIA Reports and EMPr (30 days)

During this phase, the EIA Reports will be released to the public for a 30-day review period. All Authorities and registered I&APs on the project database will be notified in writing of the opportunity to review the EIA Reports. A Comment and Registration Form will also be sent with the written notification to all registered stakeholders. Copies of the EIA Reports will be placed on the project website <http://www.csir.co.za/eia/MuliloSolar> and at the local public library.

Step 8: Submission of the EIA Reports to the National DEA for Decision-Making

A key component of the EIA Process is documenting and responding to the comments received from I&APs and Authorities. The comments received from I&APs during the 30-day review of the EIA Reports will be recorded into a comprehensive Comments and Responses Trail, and will be included in the EIA Reports before submission to the National DEA. The Comments and Responses Trail will indicate the nature of the comment, when and who raised the comment, as well as indicate how the comment received has been considered in the EIA Reports, in the project design or the EMPr. The EIA Reports will thereafter be finalised and submitted to the National DEA for decision making. All registered I&APs on the project database will be notified of the submission of the EIA Reports to the national DEA.

The National DEA will have 10 days (from receipt of the EIA Reports) to acknowledge the reports and will thereafter have 107 days to grant or refuse EA.

Step 9: Notification of Environmental Decision and Appeal Period

All registered stakeholders on the project database will be notified in writing of the Environmental Decision for the proposed projects, and will be informed of the opportunity to appeal.

HOW CAN YOU GET INVOLVED?

Dear Stakeholders and Interested and Affected Parties

Notice of scoping and environmental impact Assessment for the Proposed development of seven Solar Photovoltaic Facilities AND ASSOCIATED ELECTRICAL INFRASTRUCTURE FOR MULILO RENEWABLE PROJECT DEVELOPMENTS (PTY) LTD, north-east of Kenhardt, Northern Cape Province

Competent Authority: National Department of Environmental Affairs

csir reference: EMS0106/MULILO/2015

This e-mail correspondence serves to inform you of the initiation of a Scoping and Environmental Impact Assessment (EIA) Process for the above-mentioned proposed project, located approximately 30 km north-east of Kenhardt within the !Kheis Local Municipality, Northern Cape Province. The Project Applicant is Mulilo Renewable Project Developments (Pty) Ltd (hereinafter referred to as "Mulilo"). The CSIR has been appointed by Mulilo to undertake the required Scoping and EIA Process.

A full Scoping and EIA Process is required for the development of seven 75 Megawatt (MW) Solar Photovoltaic (PV) or Concentrated Photovoltaic (CPV) Solar power generation facilities and associated electrical infrastructure (132 kV transmission lines for each 75 MW facility), on Portions 3 and 8 of Gemsbok Bult Farm 120 and the Remaining extent of Boven Rugszeer Farm 169. Two of the projects will be located on Portion 3-, two projects on Portion 8 of Gemsbok Bult Farm 120 and three projects on the Remaining Extent of Boven Rugszeer Farm 169. Each 75 MW Solar PV facility proposed will cover an approximate area of 200 hectares (ha) with a collective footprint of approximately 1 400 ha and a combined power generation capacity of 525 MW. The proposed projects will entail the construction of the solar field, buildings, electrical infrastructure, internal access roads, and associated infrastructure and structures.

The proposed 75 MW Solar PV facilities and transmission lines are located within the same geographical area and constitute the same type of activity; hence an integrated Public Participation Process will be undertaken. However, separate Applications for Environmental Authorisation will be lodged with the National Department of Environmental Affairs (DEA) for each proposed 75 MW Solar PV facility and transmission line. The projects and locations are listed below:

PROPOSED CONSTRUCTION OF THE MULILO SOLAR DEVELOPMENT CONSISTING OF SEVEN 75 MW PV OR CPV SOLAR ENERGY FACILITIES AND ASSOCIATED INFRASTRUCTURE NEAR KENHARDT, NORTHERN CAPE PROVINCE

CSIR REFERENCE NUMBER: EMS0106/MULILO/2015

JOINT NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT (EIA) PROCESSES

Notice is hereby given in terms of Regulation 41 of the Environmental Impact Assessment (EIA) Regulations published in Government Notice (GN) R982 in Government Gazette 38282 of 8 December 2014, under Section 24(4)(a) of the National Environmental Management Act (Act 107 of 1998, as amended) (NEMA), that Mulilo Renewable Project Developments (Pty) Ltd proposes to construct and operate seven Photovoltaic (PV) or Concentrated Photovoltaic (CPV) Solar Facilities with a generating capacity of 75 MW each and associated electrical infrastructure (132 kV transmission lines for each 75 MW facility), on Portions 3 and 8 of Gemsbok Built Farm 120 and the Remaining extent of Boven Rugzeer Farm 169, located 30 km north-east of Kenhardt. Two of the projects will be located on Portion 3-, two projects on Portion 8 of Gemsbok Built Farm 120 and three projects on the Remaining Extent of Boven Rugzeer Farm 169. Each 75 MW Solar PV facility proposed will cover an approximate area of 200 hectares (ha) with a collective footprint of approximately 1 400 ha and a combined power generation capacity of 525 MW. The proposed projects will entail the construction of the solar field, buildings, electrical infrastructure, internal access roads, and associated infrastructure and structures.

A full Scoping and EIA Process is required for the construction of the seven Solar PV facilities and the development of the proposed transmission lines. The CSIR has been appointed by Mulilo to undertake the required Scoping and EIA Processes for the proposed projects. The need for a Scoping and EIA is triggered by the following potential listed activities listed in GN R983, R984 and R985:

Government Notice	Listed Activity Number
GN R983 - 8 December 2014	Activity 11 (i); 12 (x) and (xii); 19 (i); 24 (ii); 28 (ii)
GN R984 - 8 December 2014	Activity 1 & 15
GN R985 - 8 December 2014	Activity 12 (d)

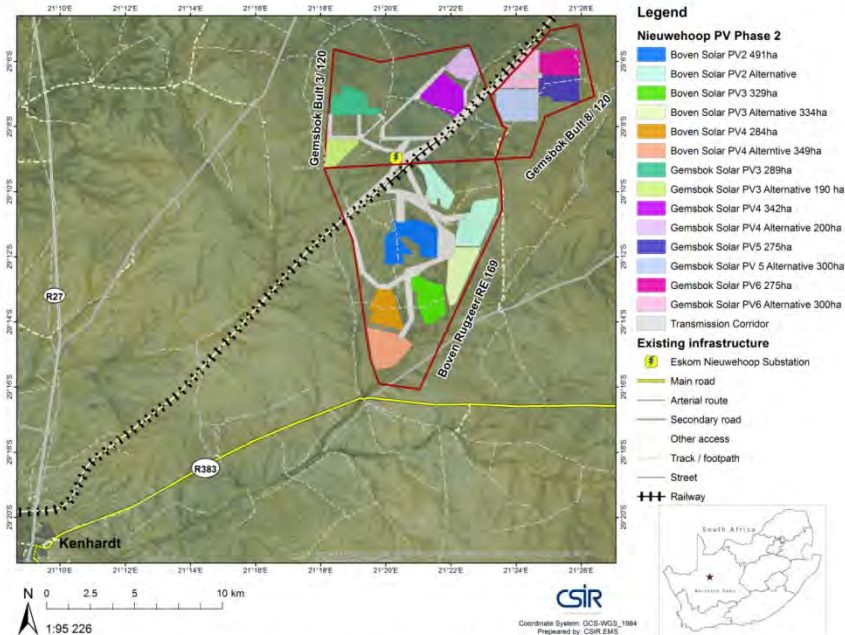

Since the proposed 75 MW Solar PV facilities are located within the same geographical area and constitute the same type of activity, an integrated Public Participation Process will be undertaken for the proposed projects. However, seven separate Applications for Environmental Authorisation (EA) will be lodged with the National Department of Environmental Affairs (DEA).

To ensure that you are included on the project register as an Interested and Affected Party (I&AP), as well as to raise any issues and concerns for inclusion in the Scoping/EIA Reports, you are kindly requested to register your interest in the projects and submit any comments you may have to the CSIR (at the details indicated below).
