

COMMENTS, QUESTIONS AND ISSUES	COMMENTATOR(S)	SOURCE(S) to the DSR	RESPONSE(S)
and income.	Mt RF Johannes, Welvediend, Scheepersrust, Rondekopje, PO Box 17, Paulpietersburg, 3180		
31 The proposed servitude puts us in a disadvantaged financial position as land value escalates. A once-off payment for a servitude is not a long term investment.	Mr Heindrich Hagen, Eersteling, PO Box 31, Commandale, 2385	Comment received per letter on 3 Dec 2010 in response to the DSR	Noted
32 An additional power line will be an economic disaster on the timber farming aspect, regarding loss of forestry land, loss of plantation permits – farms will no longer be economic viable units.	Mr Rudolf Friedrich Johannes, Welvediend, Scheepersrust, Rondekopje, PO Box 17, Paulpietersburg, 3180  Mr Jan Van Romburg, Silverton, Paulpietersburg, 3180	Comment received per letter on 3 Dec 2010 in response to the DSR	Noted
33 The power line will divide my farm in uneconomical units. We already have Eskom power lines and a railway line. Nothing viable will remain of the farm – I'm gravely against the construction of the line on my property.  In addition, Mr Van Romburgh already has one 400KV line and two railway lines going through his land.	Ms Amanda Klingenberg, Morgenzon, PO Box 289, Paulpietersburg, 3180  Mr Christian Schütte, Private Bag X317, Paulpietersburg, 3180  Mr Jan Van Romburg, Silverton, Paulpietersburg, 3180	Comment received per letter on 3 Dec 2010 in response to the DSR	Noted
34 There are not enough 25ha plots available in Wakkerstroom to enable a relocation/repurchase of the Wakkerstroom affected smallholders into an equal lifestyle situation ahead of this proposed new line (if we have to relocate we may have to relocate to another town altogether, even to another province, because this is such a small community). There	Mr Roland Stone, Landowner, PO Box 125, Wakkerstroom	Email on 2 February 2011 in response to the FSR.	Noted

<b>COMMENTS, QUESTIONS AND ISSUES</b>		<b>COMMENTATOR(S)</b>	<b>SOURCE(S)</b>	<b>RESPONSE(S)</b>
<p><b>4 POST EIA COMMENTS</b></p>				
<p><b>(4.1) Construction</b></p>				
1	<p>What are the time lines with regards to the construction of the proposed 765kV line?</p>	<p>Mr Johan Ceiliers, Weltevreden Farm, PO Box 1136, Ermelo 2350</p>	<p>Public meeting held on 15 November at 12:00 in Ermelo</p>	<p>Construction is planned to commence in 2013 with completion planned for 2016.</p>
2	<p>In a recent experience with a construction of a transmission line on our farm we have experienced huge problems with Eskom's contractors. When we have reported the problems we came up against a brick wall until such time that we have locked our gates and hired an external company to patrol our land to prevent contractors from entering our farm.</p>	<p>Ms Mandy Hattingh, Beginsel Boerdery, PO Box 456, Volksrust, 2470</p>	<p>Public meeting held on 16 November 2010 at 14:00 in Volksrust</p>	<p>These problems are unacceptable. Stakeholders are requested to take pictures and to write a report to Eskom in the instance that they have difficulty with contractors. Eskom's principal is to compensate for any losses and damage to property, livestock, etc. Eskom and their contractors have to adhere to the conditions that were specified in the Environmental Authorisation and the Environmental Management Programme (EMProg) of that specific project.</p>
3	<p>Will a Water Use License Application or registration be required during the construction phase of the proposed development? Will any water be taken from any river, stream or drainage line? Therefore in terms of the Scoping Phase – details regarding all water uses and provision is required to be included in the EIA phase.</p>	<p>GCS on behalf of the Piet Retief Agricultural Union  Mr Bernd Rohrs, Farm owner, PO Box 77, Piet Retief, 2380</p>	<p>Comment received per email on 8 Dec 2010 in response to the DSR  Comments received per email on 16 February 2011</p>	<p>No water will be abstracted from water courses and no towers will be placed within water bodies, therefore no water use license is required for the proposed project.</p>
4	<p>Where will water be sourced from during the construction phase of the northern section of the line and how much water will be required? Has assurance been provided that water is available? Please provide proof of water</p>	<p>GCS on behalf of the Piet Retief Agricultural Union</p>	<p>Comment received per email on 8 Dec 2010 in response to the DSR</p>	<p>This will be determined once the Environmental Authorisation has been issued. Should a water use permit be required, all the necessary permits will be obtained before commencement.</p>

<b>COMMENTS, QUESTIONS AND ISSUES</b>		<b>COMMENTATOR(S)</b>	<b>SOURCE(S)</b>	<b>RESPONSE(S)</b>
	availability from wherever received. Note that the Mkhondo area experiences various water provision related problems, with water supply being cut for entire days.			
5	Where will construction material, especially sand and earth material (where applicable) be sourced from if required. If soil or sand is planned to be taken from a borrow pit –provide details regarding the planned permitting of such pits.	GCS on behalf of the Piet Retief Agricultural Union	Comment received per email on 8 Dec 2010 in response to the DSR	This will be determined once the Environmental Authorisation has been issued. Eskom might buy the construction material or use a borrow pit. Should a borrow pit be a viable option, all the necessary permits will be obtained before commencement.
6	Where will construction waste be disposed of and what volume is expected to be generated?	GCS on behalf of the Piet Retief Agricultural Union	Comment received per email on 8 Dec 2010 in response to the DSR	Where possible construction waste will be recycled and no recyclables will be disposed of at a licensed landfill site. These details for waste management will be included in the EMPProg.
7	What energy efficiency measures, if any, are being considered during the construction and operational phases of the proposed line?	GCS on behalf of the Piet Retief Agricultural Union	Comment received per email on 8 Dec 2010 in response to the DSR	<b>Please refer to Section 12</b> This will be addressed in the EMPProg.
8	How will the location of constructions camps be determined? Provide an estimate of: a) How many labourers will be housed in construction camps? b) What entertainment, if any, will be provided to these labourers? c) Where domestic waste of these labourers will be stored and disposed of.	GCS on behalf of the Piet Retief Agricultural Union	Comment received per email on 8 Dec 2010 in response to the DSR	This will be regulated by the EMPProg and was researched during the social impact assessment. <b>Please refer to Section 12 and Appendix O6</b>
9	How much water will be used during construction and stringing of the line and where will this water be sourced from? Will a water use registration be required?	Mr E Eggers, Pampoenkraal, Nootgedacht, Wildrand, Rustplaats, PO Box 34, Piet Retief, 2380 Mr H Gerken, Pampoenkraal, Ernstdraai, Viakplaats, Umgwempies, Basel, PO Box 70, Iswepe,	Comment received per email on 8 December in response to the DSR	This will be determined once the Environmental Authorisation has been issued. Should a water use permit be required, all the necessary permits will be obtained before commencement.

<b>COMMENTS, QUESTIONS AND ISSUES</b>		<b>COMMENTATOR(S)</b>	<b>SOURCE(S)</b>	<b>RESPONSE(S)</b>
		2382 Mr TI Ferreira, Heyshope, Kromrivier, PO Box 147, Piet Retief, 2380		
10	How much construction waste will be generated for the northern section and where will this waste be disposed of?	Mr E Eggers, Pampoenkraal, Nootgedacht, Wildrand, Rustplaats, PO Box 34, Piet Retief, 2380	Comment received per email on 8 December in response to the DSR	The quantities of waste are unknown at this stage however all non-recyclable waste will be disposed of at a licensed landfill.
11	Will any construction camp be placed in the vicinity of any homestead and will this be considered in the Social Impact Assessment as mentioned in the DSR to be conducted?	Mr E Eggers, Pampoenkraal, Nootgedacht, Wildrand, Rustplaats, PO Box 34, Piet Retief, 2380 Mr TI Ferreira, Heyshope, Kromrivier, PO Box 147, Piet Retief, 2380	Comment received per email on 8 December in response to the DSR	The social impact assessment addresses the issue of construction camps and also identifies and advises on the least impacting areas. The EMPProg will also address the issue of construction camps.  <b>Please refer to Section 12 and Appendix O6</b>
12	Will any local labour be trained and used during the construction and operations of the proposed line?	Mr Bernd Rohrs, Farm owner, PO Box 77, Piet Retief, 2380	Comments received per email on 16 February 2011	The contracts with the contractors that erect the power line will allow for a percentage how unskilled local labour where required i.e. during bush clearance. However skilled labour will be sourced by the contractors themselves.
13	Will Eskom construct the transmission line without informing farmers?	Ms Quzette Bosman, Mkhondo Resident, Private Bag X5022, Piet Retief	Telephonic conversation on 1 February 2011	No, farmers will be notified in advance.
<b>5 OTHER</b>				
<b>(5.1) Eskom related comments</b>				
1	Let me know whether a decision has been made (RoD) regarding the site of the Theta Substation	Mr Clive Kelly, Clive Kelly Family Trust, PO Box 36, Empangeni, 3880	Email in October in response to the BID.	Your contact details will be sent to Eskom to add your name to the Theta Substation database. You will then be notified when Eskom receives a response from the relevant authorising authority.
2	There are still many farms and households in	Mr Eric Buthelezi,	Meeting to discuss	Government is striving to provide

<b>COMMENTS, QUESTIONS AND ISSUES</b>	<b>COMMENTATOR(S)</b>	<b>SOURCE(S)</b>	<b>RESPONSE(S)</b>
this area without electricity. When will that happen?	landowner and emCakwini Trust, PO Box 75, Babanango, 3850	the DSR in Ulundi on 22 November 2010	universal access to electricity for all households by 2012.
3 If a farmer wants electricity on his farm, then the farmer must pay for the connection from the nearest distribution line to his farm.	Mr Eric Buthelezi, landowner and emCakwini Trust, PO Box 75, Babanango, 3850	Meeting to discuss the DSR in Ulundi on 22 November 2010	Noted.
4 Plantations owners are unhappy with Eskom's policy of cutting trees encroaching into existing line servitudes. We would prefer Eskom telling us about the problem and then we will cut the tree down ourselves, because Eskom employees cut the tree down in small pieces only suitable for firewood.	Mr Maarten Grobbelaar, landowner, Bayfibre, PO Box 329, Melmoth, 3835.	Meeting to discuss the DSR at Melmoth on 23 November 2010.	Eskom has got a standard agreement which is used for all commercial foresters. This agreement includes the maintenance of servitudes and upkeep of fire breaks. In this agreement, it will be decided who will be responsible. This must be negotiated with the relevant Eskom region.
5 It is almost impossible to change a pre-arranged date with Eskom for the switching off of a specific line when it is time to burn fire breaks. Sometimes the wind is too strong or coming from the wrong direction making it impossible to burn. I have also noticed that lines are sometimes live (a distinct humming noise) when Eskom insisted they are off.	Mr Maarten Grobbelaar, landowner, Bayfibre, PO Box 329, Melmoth, 3835	Meeting to discuss the DSR at Melmoth on 23 November 2010.	Noted
6 We must phone Eskom three days before we want to burn near their lines. Sometimes not possible burn on the specific day due to strong wind, or a change in the wind direction. This throws our whole routine out on the farms, because we have to build or schedules around Eskom.	Mr Alistair McMurray, landowner Vlakpoort Trust, PO Box 223, Melmoth, 3835	Meeting to discuss the DSR at Melmoth on 23 November 2010.	The reason for giving Eskom three days' notice is because the line must be switched off when the farmers are burning and the electricity load must be deviated along a different route. If burning does take place and the line is not switched off, then it can trip the line, causing a drop in voltage which leads to power failures.  This is the reason why we need to strengthen the grid to prevent power failures.
7 I am the final Eskom client on a specific line in the district and suffer from power failures on a regular basis. When the power comes on again it is always too powerful and the surge in current has destroyed many electrical appliances on my farm. The last person I spoke	Mr Maarten Grobbelaar, landowner, Bayfibre, PO Box 329, Melmoth, 3835	Meeting to discuss the DSR at Melmoth on 23 November 2010.	Eskom promised to investigate and Mr Jacob Mbele said he will discuss this in New Germany with Eskom's KwaZulu-Natal management of Distribution.

COMMENTS, QUESTIONS AND ISSUES	COMMENTATOR(S)	SOURCE(S)	RESPONSE(S)
to was Ms Lauren Jones and my Eskom reference number is 344384.	Mr Maarten Grobbelaar, landowner, Bayfibre, PO Box 329, Melmoth, 3835	Meeting to discuss the DSR at Melmoth on 23 November 2010.	During the construction of this line and Environmental Control Officer will monitor all construction to ensure that contractors adhere to the EMPreg. Eskom will also have a Farm Liaison Officer that will be the landowners' link to report all problems regarding this line. It is the Umfolozi-Mbewu line.
8 I have spoken to so many people at Eskom about Eskom-related issues. What are you going to do about communication?	Question asked before the meeting starting while studying the maps of the proposed alternatives	Meeting to discuss the DSR in Empangeni on 23 November 2010	
9 What 765 kV line comes in from the north to the proposed Mbewu (Theta) Substation?	Mr Luke Harel, Umhlatuzi Valley Sugar Company, PO Box 511, Empangeni, 3880	Meeting to discuss the DSR in Empangeni on 23 November 2010	Eskom uses the Greek alphabet to provide temporary names to proposed substations until they are officially named. Theta is the eight letter in the Greek alphabet and was used until the name Mbewu was given to this proposed substation that will be built near Empangeni.
10 Why did the name of the proposed Substation change from Theta to Mbewu?	Mr John Readman, landowner Mevamhlope, PO Box 14, Empangeni, 3880	Meeting to discuss the DSR in Empangeni on 23 November 2010	The lines that will eventually connect Mbewu Substation to the national grid are: <ul style="list-style-type: none"> <li>• Camden – Mbewu 765 kV (this study);</li> <li>• Umfolozi – Mbewu 765 kV line;</li> <li>• Invubu – Mbewu 400kV line;</li> <li>• Sigma – Mbewu 2x 400kV lines;</li> <li>• Loop into Mbewu: Umfolozi – Athene 400kV line (two lines); and</li> <li>• Loop into Mbewu: Umfolozi – Invubu 400kV line (two lines).</li> </ul>
11 Can you give as indication of all the nine lines that will eventually be connected to the Mbewu Substation?	Mr Frans van der Walt, Chairperson, uThungulu Strategic Development Committee, PO Box 10376, Meerensee, 3901	Meeting to discuss the DSR in Empangeni on 23 November 2010	Eskom Transmission's present plans to supply electricity include this line. A number of independent Power Producers (IPPs) are now entering the market through NERSA which makes the need for this line even more necessary because
12 There are private companies in this region who are looking at generating own energy such in this region that could be operational by 2016. Umbane is looking at building a power station, while other companies are investigating wind power. Should that materialise it will not be			

COMMENTS, QUESTIONS AND ISSUES	COMMENTATOR(S)	SOURCE(S)	RESPONSE(S)
necessary for Eskom to build additional transmission lines to this region.			IPPs also have to be integrated into the system. Eskom is aware of Umbane and has been in correspondence with them. Eskom has not heard anything from Umbane recently. Eskom asked for the contact details of companies interested in alternative energy to be forwarded to them.
13 What about old servitudes on farmlands that have not been used by Eskom? When will these servitudes be lifted?	Mr Frans van der Walt, Chairperson, uThungulu Strategic Development Committee, PO Box 10376, Meerensee, 3901	Meeting to discuss the DSR in Empangeni on 23 November 2010	Eskom has got strategic servitudes throughout the country which will be used in future.
14 The possibility of a bio-diesel power plant running on sugar cane waste (fibres) is also being investigated.	Mr Frans van der Walt, Chairperson, uThungulu Strategic Development Committee, PO Box 10376, Meerensee, 3901	Meeting to discuss the DSR in Empangeni on 23 November 2010	Noted.
15 Why did Eskom not wait for the EIA of the proposed Mbewu (Theta) substation to be finalised before starting with this project?	Various stakeholders	Meeting to discuss the DSR in Empangeni on 23 November 2010	The EIA for the Mbewu Substation was supposed to be finalised by June 2010, but it has been delayed due to a review of the geotechnical studies by the Council for Geoscience. Eskom cannot delay all projects while waiting for one project to be finalised. It is unfortunate that the position of the substation has not yet been confirmed, but the other studies in the strengthening project cannot be delayed due to one project running late.
16 Sugar cane waste (fibres) has been declared a renewable resource and a study has been undertaken looking to generate 70 MW from the sugar cane waste in Empangeni. If this project becomes a reality Eskom could downscale the proposed line and reduce the impact on the environment. Studies have shown that there is enough sugar cane waste in KZN to produce 186 MW of electricity.	Mr Rusty Tedder, landowner, Tedder Farm, PO Box 139, Empangeni, 3880	Meeting to discuss the DSR in Empangeni on 23 November 2010	Eskom does not know anything about this. If there is a proposal to generate electricity from bio-fuel then Eskom should be contacted to discuss this.
17 The reason why Eskom does not know anything about the studies regarding sugar cane waste	Mr Pierre Redinger, Crystal Holdings, Private	Meeting to discuss the DSR in	Noted.

<b>COMMENTS, QUESTIONS AND ISSUES</b>		<b>COMMENTATOR(S)</b>	<b>SOURCE(S)</b>	<b>RESPONSE(S)</b>
	as an alternative energy source is probably because all talks have been with the National Energy Regulator of South Africa (NERSA).	Bag X 20004, Empangeni, 3880	Empangeni on 23 November 2010	
18	Are any substation planned on the proposed 765kV route?	Mr Kerneels van der Walt, landowner, PO Box 640, Vryheid	Public meeting held on 18 November at 08:30 in Vryheid	No, the line will be constructed from Camden substation to the Mbewu (Theta) substation.
19	Has Eskom considered DC lines instead of AC lines?	Mr Waldo Hein, landowner of Goedgeloof, PO Box 450 Vryheid, 3100	Public meeting held on 18 November at 08:30 in Vryheid	DC lines are very expensive and usually used for much longer lines (800km and more). South Africa receives power from the Kahora Bassa Dam with a DC line. The network in the country is based on AC technology; therefore a DC line cannot just be built, since it will not connect with the current AC technology.
20	Is it true that Camden power station only provides power to the aluminium plant in Mozambique (Mozal)?	Mr Johan Celliers, Weitevreden Farm, PO Box 1136, Ermelo 2350	Public meeting held on 15 November at 12:00 in Ermelo	Mr Bertie Jacobs, Eskom responded that Camden exports power to Mozambique, however it also supplies power to Normandie. Camden will also supply power for the new 765kV line towards Mbewu substation.
21	The closing of gates where Eskom has existing servitudes remains a problem. Several farmers brought this up.	Mr Tito Vorster, Lodewykslust farm, PO Box 1028, Piet Retief, 2380	Public meeting held on 16 November at 08:30 in Piet Retief	In the agreement that individual landowners has with Eskom, the closing of gates is a condition. Landowners have the right to take the matter up directly with Eskom to take them to task. It should also be noted that once the EMP (with all its conditions) is approved, it becomes a legally binding document. Violation of any of the conditions constitutes a legal contravention according to NEMA.
22	The community was under the impression that the public meeting was held by Eskom to provide individuals the opportunity to sign up so that they can receive electricity.	Several stakeholders from the Swart Mfolozi area who attended the public meeting.	Public meeting held on 18 November 2010 at 14:00 in Swart Mfolozi	The purpose of the meeting was to review the contents of the Draft Scoping Report and to provide stakeholders with the opportunity to raise their concerns with regards to the EIA for the proposed 765 kV transmission line from Camden, Mpumalanga to Empangeni, KwaZulu-Natal.
23	Why can the proposed 765kV line from Ermelo to Empangeni not provide us in this community	Mr Zakheleni Kunene, Swart Mfolozi	Public meeting held on 18 November	The proposed 765kV line is a transmission line, which is meant to

COMMENTS, QUESTIONS AND ISSUES	COMMENTATOR(S)	SOURCE(S)	RESPONSE(S)
with electricity?		2010 at 14:00 in Swart Mfolozi	strengthen the grid. Distribution lines take electricity from substations to houses in communities. The 765kV line will help to make sure that sufficient power will be available to substations for distribution of power to houses and communities. The proposed route past the Swart Mfolozi area is one of several alternatives and may not necessarily be the recommended route.
24 Eskom is responsible for the maintenance and clearing of their servitudes, yet farmers need to go to their offices at own costs to arrange for the burning of fire breaks. Eskom wants to acquire further servitudes and again landowners must attend meetings in their own time on their own costs. Eskom needs to come to us individually or we should be compensated for our time and costs to drive to meetings.	Mr Hans Gerken, Basel, PO Box 70, Iswepe	Public meeting held on 16 November at 08:30 in Piet Retief	Noted
25 Proposals for the development of renewable energy in the area have been heard from private developers. Is Eskom liaising with these companies to ensure that once the power has to be transported that the same lines can be used, since landowners do not want another set of lines on the farms. If the same lines cannot be used, Eskom and the developers of renewable energy should discuss the alignment of lines over farm land.	Mr Tito Vorster, Lodewykslust farm, PO Box 1028, Piet Retief, 2380	Public meeting held on 16 November at 08:30 in Piet Retief	Noted. Good proposal – this is being implemented under NERSA’s supervision.
26 What is the difference between a 400kV line and a 765kV line?	Ms Mandy Hattingh, Beginzel Boerdery, PO Box 456, Volksrust, 2470	Public meeting held on 16 November 2010 at 14:00 in Volksrust	A 765kV transmission line transmits more power than a 400kV line, thus the infrastructure is larger in size. The Pylons are bigger – between 50 to 60m high and bigger servitudes are required – 94m or 104m depending on whether it is agricultural or forestry/sugarcane area.
27 Eskom’s 086 toll free telephone number is not working. Eskom does not give their cooperation with regards to fire breaks. As landowners we cannot wait to burn fire breaks and Eskom is	Ms Mandy Hattingh, Beginzel Boerdery, PO Box 456, Volksrust, 2470	Public meeting held on 16 November 2010 at 14:00 in Volksrust	Eskom will in future provide the specific telephone number of the Eskom maintenance teams to landowners. Landowners should not have to dial the

	<b>COMMENTS, QUESTIONS AND ISSUES</b>	<b>COMMENTATOR(S)</b>	<b>SOURCE(S)</b>	<b>RESPONSE(S)</b>
	often late with their procedure.			086 number, but instead should know exactly who they should liaise with at the time when it is necessary to burn fire breaks.
28	Can a nuclear power plant not be built in Richard's Bay to supply KwaZulu-Natal with power?	Mr Robert Stannard, Utrecht Farmer's Association, PO Box 31, Utrecht, 2980	Public meeting held on 17 November at 08:30 in Utrecht	The climatic (high humidity) conditions do not allow for the construction of a nuclear power plant in KwaZulu-Natal.
29	There was mention made at the Wakkerstroom meeting of other new Mpumalaga power station/s coming on stream around 2013 onwards. Should cognisance not also be taken of the transmission line routes required for those as well as for the Camden/Theta line and therefore the scope be widened (in view of the Environmental impacts) to accommodate a corridor area for future lines, otherwise the whole countryside could potentially end up with multi corridors, line cross-overs, more EIA's etc etc? The process will just get more difficult as time goes on as more and more land is transformed into protected areas, more plantations , dwellings, expansion of railways, roads, fuel pipelines, new planned water affairs dam construction projects, etc etc.	Mr Roland Stone, Landowner, PO Box 125, Wakkerstroom	Public meeting held on 16 November at 18:00 in Wakkerstroom and email in response to the DSR, 20 November 2010	Noted
30	The community at Yakwamabula near the Swart Mfolozi would like to receive power. In the vicinity of Yakwamabula 96 households are without electricity.	Ms Ngema Zmubuntu, resident of Yakwamabula, PO Box 30, Swart Mfolozi, 3115	Reply sheet received in response to the BID	Noted, this will be referred to the relevant Distribution office.
31	Has consideration been given to the possible power station which may be erected by Eskom Generation in the vicinity of the AM alignment? It is requested that proof of consultation be provided. Furthermore it is recommended that Kangra Coal, as the land owners, be contacted in this regard. Refer to Mr Takalani Ndou (Head of the Department Technical Services) contact nr: 017 826 9700.	GCS on behalf of the Piet Retief Agricultural Union	Comment received per email on 8 Dec 2010 in response to the DSR	Ms Olivia Radebe, Environmental Control Officer at Kangra Coal (PTY) LTD was contacted and the necessary information was sent to her. Proof of consultation is appended to the FSR.

<b>COMMENTS, QUESTIONS AND ISSUES</b>				<b>COMMENTATOR(S)</b>	<b>SOURCE(S)</b>	<b>RESPONSE(S)</b>
32	<p>There are so many negative comments about Eskom. I cannot allow a power line to cross my farm from power which was generated through a non-green method.</p> <p>Having been involved extensively in the EIA processes as they pertain the substation location as well as in-coming and outgoing lines, it has given overall insight for us to make the following submission and proposal:</p> <ol style="list-style-type: none"> <li>1. Substation location to be at Site B. Stakeholders were not aware that the final footprint is 40 ha, not the 150 ha investigated. 40 ha can be tolerated.</li> <li>2. In-coming lines: To follow existing 400Kva North of the Heatonville irrigation scheme directly into Substation Site B. This avoids the agricultural impact as well as inland informal settlements by following an existing corridor.</li> <li>3. Outgoing lines North. From Substation site B, the lines can circumnavigate the farm lands and a corridor of least impact exists between the commercial farms and the tribal land which will have minimal impact.</li> <li>4. Outgoing lines South: These too will follow existing corridors and will require some relocation of informal settlements, but nowhere near as populated as the other alternatives.</li> </ol> <p>We appeal as stakeholders to the authority (in this case, the DEA) issuing the Environmental Authorisation to look at the consolidated approach indicated above to find a sustainable solution for all involved.</p>	<p>Mr Jan Van Romburg, Silverton, Paulpietersburg, 3180</p> <p>Mr Pierre Redinger General Manager, Crystal Holdings, Private Bag X20004, Empangeni, 3880</p>	<p>Comment received per letter on 3 December in response to the DSR</p> <p>Comments received per email on 1 March 2011 in response to the FSR</p>	<p>Noted</p> <p>Noted</p>

Attention: Ms Anelie Lötter

PUBLIC PARTICIPATION: REVIEW OF THE SCOPING REPORT FOR THE PROPOSED 765KV TRANSMISSION LINE FROM CAMDEN TO MBEVU

Dear Madam,

As per the information received at the public meeting which was held on the 16<sup>th</sup> of November 2010 regarding the proposed transmission line as referred to above, the below listed concerns and issues are submitted for your action. As per the public participation requirements in terms of the National Environmental Management Act, 1996 (Act No 107 of 1998) Environment Impact Assessment Regulations Chapter 6 of Government Notice No 33506 Regulation 543, response to the concerns and issues below are required in writing for review.

Please further note that I am a trustee and manager of leased properties of the Berli Eggers Trust which is the owner of the following properties (which may be affected by the proposed Transmission Line):

- Pampoenkraal 318 IT (leased to NCT (Pty) Ltd);
- Nootgedacht 319 IT (leased to NCT (Pty) Ltd);
- Wildrand 495 IT (various portions); and
- Rustplaats 494 IT (Various portions).

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

- Anelie
1. The proposed power line will increase the collision risk with the line by aircraft using the landing strip on the farm Wildrand. This facility is used on a weekly basis and the safety risks will be increased (if not disabling the use of the landing strip completely). It is further used by the aircraft of the Forest Fire Air-Tanker Association as a fill-up point during the fire fighting season. What will be done by Eskom to ensure that the facility will be able to function without an increased collision risk, should the proposed line be established along the AP alignment? It is further recommended that the Forest Fire Tanker Association be contacted regarding the proposed power-line.
- L

2. Various aquatic habitats occur on and around the Pamponkritai property. A waterfall and related aquatic environment is well known in the area as a "conserved area" used for tourism purposes. The Umgwempies River feeds this waterfall. The entire area is underlain by TMS Sandstone.
  - a. How will the sensitivity of these environments be established as there may be various orange and red data plant species (such as grass orchids, aloes and proteas) present on site. The area further hosts various bird species of importance such as the Bald Ibis and Blue Crane which visits the area from time to time. ✓
  - b. Where will tower placing be proposed in relation to the aquatic features and resources? and
  - c. If so required, provide proof of water use registration of related water uses in terms of the National Water Act, 1989 (Act No 36 of 1989).
3. How much water will be used during construction and stringing of the line and where will this water be sourced from? Will a water use registration be required? ✓
4. How much construction waste will be generated for the northern section and where will this waste be disposed of? ✓
5. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
  - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed? ✓
  - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be compensated for as the timber price varies from year to year? ✓
6. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing.
  - a. Please provide a study regarding the correlation of veld and forest fires with the presence of power lines. An increase in veld and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season. ✓
  - b. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalised prior to the consideration of an environmental authorisation. ✓
  - c. If Eskom is to maintain the fire breaks - an agreement between the landowner and Eskom is required to be established regarding the timing and methods used for such maintenance activities. ✓
  - d. The use of "fire bombing" as a technique in fire fighting employed by aircraft will be impacted due to the fact that the collision risk with the proposed line will be increased. Fire fighting is conducted in very windy conditions with almost zero visibility above the canopy which will be in line with proposed transmission line (please note that a safety clearance of approximately 200 feet is required above agl). ✓  
Therefore during such conditions, these aircraft will not be able to reach any humming portion of trees which are located too close to the proposed power line.

7. A concern is raised regarding the data received in Shapefile format. The properties as listed which are being affected (please refer to your Appendix K of the Draft Scoping Report) are not in line with the proposed alignment of the Google Earth Image depicting the various alternative routes. ✓
8. Rustplaats (Pnt 17 B 13) (Which is owned by Vomo Trust and leased by the Eggers Group) is largely used for game conservation purposes. The 650 Ha area further houses an educational facility used for environmental training. This is a fenced area which has been established over 15 years ago. Various game species as well as Oribi is being conserved in this area. ✓
9. How will the electromagnetic field, of such a high voltage line, impact on the game, cattle and vegetation of not only the conservation area but on all properties as mentioned above including that of the CPA? ✓
10. A serious concern is raised regarding the proposed alignment of line AP which, as per the Shapefiles (on Google earth) received will cross over various existing power lines which serve to connect an Eskom substation located adjacent to Pnt 13 of the farm Rustplaats. During the public meeting which was held on the 16<sup>th</sup> of November - it was categorically stated that a power line of this magnitude may not be constructed above another transmission line. Please clarify whether the proposed alignment will cross any Distribution power lines and whether Eskom Distribution has been contacted in this regard. If there are power lines which are to be crossed are however Transmission lines, clarity regarding the public meeting statement is required as well as technical details of such a crossing. (3.6) ✓
11. All of the properties as mentioned above have established homesteads and must have related graves. Please clarify:
  - a. How these possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councillors);
  - b. Where will tower structures be placed in relation to existing homesteads; ✓
  - c. What educational safety precautions will be taken and provided to the communities regarding the power lines; and ✓
  - d. Will any local labour be trained and used during the construction and operations of the proposed line. ✓
  - e. Will any restriction camp be placed in the vicinity of any homestead and will this be considered in the Social Impact Assessment as mentioned in the DSR to be conducted? ✓
12. An established Communal Property Association (Ezakeni Communal Property Association) owns a portion of a portion 13 of the farm Rustplaats. It is recommended that consultation be conducted with the established Ezakeni CPA committee as soon as possible (Contact Mr Shongwa at 076 166 8885). Please provide proof of such consultation. Please further note that various heritage and cultural resources is established on this property and will require documentation during a Heritage Assessment in terms of the Heritage Act. (12.6) ✓
13. The main railway line between Richard Bay and the Mpumalanga Coal fields is located on various portions of the properties. Please clarify:
  - a. Whether Spoomet has been consulted;
  - b. Where tower structures will be placed in relation to the railway lines;
  - c. Whether the electromagnetic field will impact on the railway line, should it be in close proximity to the line. ✓

*Amelia*

14. On the properties as mentioned above, various parastatal and government organisations require (or have acquired) property for: roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non-agricultural and non-profitable uses are increasing to the detriment of the land owners. ✓

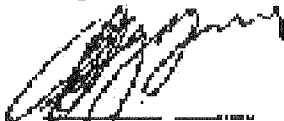

- a. Please indicate what measures have been taken to consider the cumulative impact - financially - on the losses incurred by landowners of land being expropriated for infrastructure requirements. What impact will this have on farm extract; pulp-fibre security and structural wood? ✓
- b. Whether SANRAL has been consulted ✓

I trust that you will find the above in order. Please direct any queries and responses, in writing to Mr E Eggers at the following contact details:

Attention: Ms Anelle Lötter

**PUBLIC PARTICIPATION: REVIEW OF THE SCOPING REPORT FOR THE PROPOSED 763KV TRANSMISSION LINE FROM CAMDEN TO MBEVU**

Dear Madam,

As per the information received at the public meeting which was held on the 16<sup>th</sup> of November 2010 regarding the proposed transmission line as referred to above, the below listed concerns and issues are submitted for your action. As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environmental Impact Assessment Regulations Chapter 6 of Government Notice No 31306 Regulation 543, response to the concerns and issues below are required in writing for review.

Please further note that I am the owner of the following properties which may be affected by the proposed development:

- Rem of Portion of Portion 4 (Portion of Portion 1) and portion 5 of Pampoenkraal 318 II;
- Ernstdraai 536 II;
- Rem of Portion of Portion 10 (Portion of portion 4) Vakplaats 284 II;
- Various portions of Umgwempies 309 II; and
- Rem of Portion Basal 313 II.

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

1. The proposed power line will increase the collision risk with the line by aircraft using the landing strip on the farm Umgwempies. This facility is used on a weekly basis and the safety risks will be increased (if not disabling the use of the landing strip completely).  
What will be done by Eskom to ensure that the facility will be able to function without an increased collision risk, should the proposed line be established along the red (AP) alignment?
2. Umgwempies is largely used for game conservation purposes. As such, the area has been declared as a Gribi Custodian (please refer to the attached photo) by the following organisations:
  - a. Endangered Wildlife Trust;
  - b. Ezemvelo Wildlife; and
  - c. Gribi Working Group.

Anelle

(Handwritten circle around items a, b, and c of point 2)

(Handwritten mark)

- How will the proposed power line be constructed and maintained in a manner which will not affect the conservation area, or which will have a minimum impact thereon. It is further requested that all of the parties as mentioned above be notified about the proposed development and notification proof be provided.
3. How will the electromagnetic field, of such a high voltage line, impact on the game and vegetation of not only the conservation area but on all properties as mentioned above?
  4. Various aquatic habitats occur on and around the Umgwenotes property as well as a river which is in close proximity to the farm Erastdoozi.
    - a. How will the sensitivity of these environments be established?
    - b. Where will tower placing be proposed in relation to the aquatic features and resources? and
    - c. If so required, provide proof of water use registration of related water uses in terms of the National Water Act, 1989 (Act No 36 of 1989).
  5. How much water will be used during construction and stringing of the line and where will this water be sourced from? Will a water use registration be required?
  6. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity.
    - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed?
    - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be compensated for as the timber price varies from year to year?
  7. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing. Please provide a study regarding the correlation of veld and forest fires with the presence of power lines. An increase in veld and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalised prior to the consideration of an environmental authorisation.
  8. All of the properties as mentioned above have established homesteads and most have related graves. Please clarify:
    - a. How these possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councillors);
    - b. Where will tower structures be placed in relation to existing homesteads;
    - c. What educational safety precautions will be taken and provided to the communities regarding the power lines; and
    - d. Will any local labour be trained and used during the construction and operations of the proposed line.
  9. A possible heritage structure is located on the farm Umgwenotes. A heritage Assessment is required to investigate the school which is around 110 years old. Where will tower structures be placed in relation to this heritage resources?
  10. The main railway line between Richard Bay and the Mpumalanga Coal fields is located on various portions of the properties. Please clarify:
    - a. Whether Spoornet has been consulted;
    - b. Where tower structures will be placed in relation to the railway line;

c. Whether the electromagnetic field will impact on the railway line, should it be in close proximity to the line.

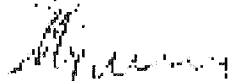

11. On the properties as mentioned above, various parastatal and government organisations require (or have acquired) property for roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non-agricultural and non-profitable uses are increasing to the detriment of the land owners. Please indicate what measures have been taken to consider the cumulative impact - financially - on the losses incurred by landowners of land being expropriated for infrastructure requirements.

I trust that you will find the above in order. Please direct any queries and responses, in writing to Mr. H. Gerken at the following contact details:

Your time and consideration regarding the matter is appreciated.

Regards,

Mr H Gerken  
Lead Officer

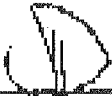

2-

In Conclusion:

1. Our farm is already a small farm with a large part of that is taken up by the mining operation. The plantation compartments are also small blocks 3 - 10ha in size which are now going to get even smaller, making them uneconomical units to manage.
2. We already have an existing servitude. ✓
3. There are bound to be effects from blasting at the mine on the power lines and their foundations. Eskom must take responsibility for this.
4. The whole community of Plot Kotlef is going to be affected by the removal of land suitable for housing. ✓

I thank you for your time and look forward to your response on this matter.

JOHN DAVIS

### DOCUMENT ISSUE STATUS

Report Issue	Final		
Reference Number	12/12/20/2029		
Title	Eskom Camden - Mbewu 765 kV Power Line: Public Participation Representation		
	Name	Signature	Date
Author	Quzette Bosman		08/12/2010
Document Authorisation	Quzette Bosman		08/12/2010

## Introduction

GCS (Pty) Ltd has been appointed by the Piet Retief Agricultural Union (hereafter referred to as Piet Retief Agri) to collate and record all issues and concerns as made by it's members regarding the above referenced project. Furthermore, GCS is expected to review the Scoping Report in terms of related possible impacts as well as the consideration of the public participation process followed in terms of the regulating legislation.

This report therefore serves to inform the project team about the general issues and concerns Agri Piet Retief has with the proposed project.

## Issues and Concerns

As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environment Impact Assessment Regulations Chapter 6 of Government Notice No 33306 Regulation 543, response to the concerns and issues below are required in writing for review.

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

1. Proposed alignment AM and AP as referred to in the "Alternative Map" are in close proximity to the Mankgala Grasslands Project as driven by the World Wide Fund For Nature in Partnership with SANBI. These alignments are further proposed over a protected area know as KwamaNkangampisi. ✓
2. Proposed alignment AM and AP are located over an catchment which has been classed as irreplaceable in term of aquatic biodiversity (Please refer to the Mmamalanga Biodiversity Conservation Plan). ✓
3. Please provide technical information during the EIA phase regarding the impacts of the electromagnetic field of the proposed power line. How will the electromagnetic field, of such a high voltage line, impact on the game, cattle, timber and vegetation of not only the conservation area but on all possibly affected properties? ✓
4. Please provide proof the local authorities and related infrastructure planning departments have been consulted to ensure that local, regional and national governmental planning is co-operative. ✓
5. Where will water be sourced from during the construction phase of the northern section of the line and how much water will be required?. Has assurance been provided that water is available? Please provide proof of water availability from wherever received. Please further note that the Mkhondo area experiences various water provision related problems, with water supply being out for entire days. ✓
6. Will a Water Use License Application or registration be required during the construction phase of the proposed development? Will any water be taken from any river, stream or drainage line. Therefore in terms of the Scoping Phase -details regarding all water uses and provision is required to be included in the EIA phase. ✓
7. Where will construction material, especially sand and earth material (where applicable) be sourced from if required. If soil or sand is planned to be taken from a borrow pit - please provide details regarding the planned permitting of such pits. ✓
8. Where will construction waste be disposed of and what volume is expected to be generated. ✓
9. What energy efficiency measures, if any, are being considered during the construction and operational phases of the proposed line? ✓

10. How will the location of construction camps be determined? Please further provide an estimate of:
- How many labourers will be housed in construction camps;
  - What entertainment, if any, will be provided to these labourers;
  - Where domestic waste of these labourers will be stored and disposed off.
11. Has consideration been given to the possible power station which may be erected by Eskom Generation in the vicinity of the AM alignment? It is requested that proof of consultation be provided. Furthermore it is recommended that Kangra Coal, as the land owners, be contacted in this regard. Please refer to Mr Takelan Ndou (Head of the Department Technical Services) contact nr: 017 826 9700.
12. A concern is raised regarding the Application reference number. During the public meeting as well as on the various sets of information received reference is made to two different Authoritative reference numbers. The one referring mostly to the initial project public advertisements please refer to the BID dated October 2010 as handed out during the meeting of the 16<sup>th</sup> of November 2010 (Ref 12/12/20/1776). While the other number appears on the Draft Scoping Report (Ref 12/12/20/2079).
13. Considering point 7 as well as existing lines, please provide the cumulative impacts - on the biophysical, social and economic spheres of the environment.
14. Agricultural Potential assessments to be conducted are to be linked with economic assessment regarding land value and an exponential, real in our lives of income.
15. Section 5.6 of the Draft Scoping Report is to be amended to include the Nu-Scotland Javaria (in vicinity of the AP alignment) the Oribi Custodians (in the vicinity of the AM and AP alignments).
16. The proposed power line will increase the collision risk with the line by aircraft using the landing strip on the on various farms as well as with any other landing strips used by any other IAP including Mondi Forestry. Please note that the proposed AM and AP alignments are located through mainly forestry land. It is proposed that all landing strips be plotted on the map to indicate the vicinity of these with the proposed alignments.
17. Lion Metals (Pty) Ltd. owns various large sections in the vicinity of the proposed AP alignment. It is highly recommended that the company be contacted. Please refer to Mr Eugene Kraamwinkel as reachable at 0833260874.
18. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
- Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed?
  - Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be determined and compensated for?
19. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing. Please provide technical information regarding the correlation of veld and forest fires with the presence of power lines. An increase in veld and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalised prior to the consideration of an environmental authorisation.

to be done with

Plus

20. The use of "fire bombing" as a technique in fire fighting employed by aircraft will be impacted due to the fact that the collision risk with the proposed line will be increased. Fire fighting is conducted in very windy conditions with almost zero visibility above the canopy which will be in line with proposed transmission line (please note that a safety clearance of approximately 200 feet is required above agl). Therefore during such conditions, these aircraft will not be able to reach any burning portion of trees which are located too close to the proposed power line.
21. Many of the possibly affected properties have established homesteads and most have related graves. Please clarify:
- How these possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councillors and CPA's);
  - Where will tower structures be placed in relation to existing homesteads, it is assumed that no homestead will be directly affected or required to be moved. If not, such detail will have to be considered during the EIA phase of the application; and
  - Will any local labour be trained and used during the construction and operations of the proposed line (specific consideration is to be awarded to the clearing of vegetation for construction purposes).
22. All heritage features as identified by land occupiers are to be considered during the Heritage Assessment.
23. A concern is raised regarding the data received in Shapefile format. The properties as listed which are being affected (please refer to your Appendix X of the Draft Scoping Report) are not in line with the proposed alignment of the Google Earth image depicting the various alternative routes.
24. The main railway line between Richards Bay and the Mpumalanga Coal fields is located on various portions of possibly affected properties. Please clarify:
- Whether Spoornet has been consulted;
  - Where tower structures will be placed in relation to the railway line;
  - Whether the electromagnetic field will impact on the railway line, should it be in close proximity to the line.
25. On various properties which may be affected, various parastatal and government organisations require (or have acquired) property for: roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non-agricultural and non-profitable uses are increasing to the detriment of the land owners. Please indicate what measures have been taken to consider the cumulative impact - financially - on the losses incurred by landowners of land being appropriated for infrastructure requirements.

**Conclusion**

The issues and concerns as identified in this document are general issues relating to mostly the northern section of the proposed line. No detailed issues and concerns have been mentioned as these are documented in the individual responses as sent electronically to Zitholele Consulting. Therefore, this report and all further communication received is to be read together during the updating of the Issues and responses report.

I trust that you will find the above in order. Please direct any queries and responses, in writing to Ms Q. Bosman at [Quzette@gcs-sa.biz](mailto:Quzette@gcs-sa.biz).

**OBJEKSIE TEEN DIE VOORGESTELDE CAMDEN - MBEWU 70510V KRAGLYN**

TELEFAX	076 366 5357		Geen
DATE	08 Desember 2010		Politiek 29

**WIE DIT MAG AANGAAN**

My eiendom Politiek 29 gaan geraak word deur die AM beplande kraglyn. Hiermee my redes hoekom daar van 'n alternatiewe roete gebruik gemaak moet word.

1. Die ekosisteme sal beslis ge-impak word.
2. Dit sal die beste en wydste prosesse beïnvloed.
3. Die visuele impak op die hele gebied so groot wees en torensmeel negatief beïnvloed word.
4. Vuurgevaar sal in die winter verhoog word met die sterk westerwinde wat ons belei.
5. Daar is geen direkte voordede wees vir die my plaaslike inwoners nie, hulle sal bv. nie teen 'n goedkoper tarief krag bekom nie.
6. Die krag sal nie "groen"-krag wees wat opgewek word nie of veiligbaar wees op die langtermyn nie. Dit sal bydra tot aardverwarming.
7. Die lyn gaan ook 'n lawaai maak.

Ek hoop u neem die bogenoemde punte in ag, sodra u 'n besluit neem oor die gevestigde roete.

Beste dankie.

Attention: Ms Anette Keller

**PUBLIC PARTICIPATION: REVIEW OF THE SCOPING REPORT FOR THE PROPOSED 765KV TRANSMISSION LINE FROM CAMDEN TO MBEVU**

Dear Madam,

As per the information received at the public meeting which was held on the 16<sup>th</sup> of November 2010 regarding the proposed transmission line as reference to above, the below listed concerns and issues are submitted for your action. As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environmental Impact Assessment Regulations Chapter 6 of Government Notice No 33306 Regulation 343, response to the concerns and issues below are required in writing for review.

Please further note that I am a Director and owner of the following properties which may be affected by the proposed development:

- Various portions of Lodewykst 181 ht (IT is IT (Pty) Ltd)
- Various portions of Spierkoppies 179 ht (IT is IT (Pty) Ltd)
- Delft 22 hu (Delft Eieindamme (Pty) Ltd)
- Welkom 266u (Delft Eieindamme (Pty) Ltd)

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

1. The proposed power line will increase the collision risk with the line by aircraft used for fire fighting purposes.
2. Farm Lodewykst is used for stud breeding purposes. The following issues relate specifically to the this farming enterprise:
  - a. How will the electromagnetic field, of such a high voltage line, impact on the cattle and vegetation of all properties as mentioned above?
  - b. Eskom have of late mowed the grass under existing power lines on the property, prior to the winter and related cutting season. To what extent does this practice impact on the cattle carrying capacity of the farm and what impact will this have on the profitability of this division?
  - c. What is the impact of the proposed line on the probability of cattle grazing in the vicinity of line being killed by lightning?

3. The farm Lodewykstuit and Speenkoppies hosts four existing powerlines and a railway line dividing the properties. At what point and to what extent does the cumulative impact of these power lines and a railway line effect a diversified farm to such an extent that the property cannot be used for conducting an agricultural business or where the cumulative impact becomes so intrusive that it is difficult to conduct such a business. How will this be determined during the Impact Assessment Phase?
4. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
  - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed?
  - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be compensated for as the timber price varies from year to year?
  - c. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing. Please provide a study regarding the correlation of veld and forest fires with the presence of power lines. An increase in veld and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalised prior to the consideration of an environmental authorisation. Each power line requires new firebreaks. These firebreaks impact on grazing veld. To what extent does this apply and what is the estimated loss of income attributable to this factor.
5. All of the properties as mentioned above have established homesteads and most have related graves. Please clarify:
  - a. How these possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councillors);
  - b. Where will tower structures be placed in relation to existing homesteads;
  - c. What educational safety precautions will be taken and provided to the communities regarding the power line; and
  - d. Will any local labour be trained and used during the construction and operations of the proposed line.
6. The main railway line between Richards Bay and the Mpumalanga Coal fields is located on various portions of the properties. Please clarify:
  - a. Whether Spoornet / Transnet has been consulted;
  - b. Where tower structures will be placed in relation to the railway line;
  - c. Whether the electromagnetic field will impact on the railway line, should it be in close proximity to the line.
7. On the properties as mentioned above, various "Parastatal" and government organisations require (or have acquired) property for roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non agricultural and non-profitable uses are increasing to the detriment of the land owner). Please indicate what measures have been taken to consider the cumulative impact financially on the losses incurred by landowners of land being expropriated for infrastructure requirements.
8. We further wish to place on record that we have not received the detail maps for the above mentioned properties as promised during the public meeting. Because of

this we may not have included all the matters that we would have wished to be included in your scoping. We wish to reserve our rights in this regard.

We have also not received the minutes of the public meeting we attended during which many aspects were raised by those present. This letter must hence be read in conjunction with the matters raised during the meeting. We would have included them in print had we received the minutes of the meeting timeously.

I trust that you will find the above in order. Please direct any queries and responses, in writing to Mr AT Vorster at the following contact details:

**PUBLIC PARTICIPATION: REVIEW OF THE SCOPING REPORT FOR THE PROPOSED 765KV TRANSMISSION LINE FROM CAMDEN TO MBEVU**

Dear Madam,

As per the information received at the public meeting which was held on the 16<sup>th</sup> of November 2010 regarding the proposed transmission line as referred to above, the below listed concerns and issues are submitted for your action. As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environment Impact Assessment Regulations Chapter 6 of Government Notice No 33306 Regulation 543, response to the concerns and issues below are required in writing for review.

Please further note that I am the owner of the following properties which may be affected by the proposed development:

- Heyslope 501, portion 5; and
- Kromrivier 445

Concerns and issues which are required to be resolved prior to environmental authorization being considered include the following:

1. HEYSLOPE and KROMRIVIER is largely used for commercial grain, maize, soybean (ain fed, pivot) and cattle stud purposes.

How will the proposed power line be constructed and maintained in a manner which will not affect the production area, or which will have a minimum impact thereon.

2. How will the electromagnetic field, of such a high voltage line, impact on the grain and beef of not only the production area but on all properties as mentioned above?

3. Various aquatic habitats occur on and around the Heyslope property as well as a river which is in close proximity to the farm Kromrivier.

- a. How will the sensitivity of these environments be established?
- b. Where will tower placing be proposed in relation to the aquatic features and resources?

- c. If so required, provide proof of water use registration of related water uses in terms of the National Water Act, 1989 (Act No 36 of 1989).
4. How much water will be used during construction and servicing of the line and where will this water be sourced from? Will a water use registration be required? ✓
5. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
  - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed? ✓
  - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be compensated for as the timber price varies from year to year? ✓
6. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing. Please provide a study regarding the correlation of veld and forest fires with the presence of power lines. An increase in veld and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalised prior to the consideration of an environmental authorisation. If Eskom is to maintain the fire breaks - an agreement between the landowner and Eskom is required to be established regarding the timing and methods used for such maintenance activities. ✓
7. All of the properties as mentioned above have established homesteads and most have related graves. Please clarify:
  - a. How these possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councillors); ✓
  - b. Where will tower structures be placed in relation to existing homesteads; ✓
  - c. What educational safety precautions will be taken and provided to the communities regarding the power line; and ✓
  - d. Will any local labour be trained and used during the construction and operations of the proposed line. ✓
  - e. Will any construction camp be placed in the vicinity of any homestead and will this be considered in the Social Impact Assessment as mentioned to be conducted? ✓
8. A possible heritage structure is located on The Farm Heyshope. A heritage Assessment is required. Where will tower structures be placed in relation to this heritage resource?
9. On the properties as mentioned above, various parastatal and governmental organisations require (or have acquired) property for roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non-agricultural and non-profitable uses are increasing to the detriment of the land owners. Please indicate what measures have been taken to consider the cumulative impact financially - on the losses incurred by landowners of land being expropriated for infrastructure requirements. What impact will this have on food security? ✓

I trust that you will find the above in order. Please direct any queries and responses, in writing to Mr T I Ferreira at the following contact details:

**WIE DIT MAG AANGAAN**

My eiendom en Rondtekopje 70 gaan geraak word deur die AP beplande kraglyn. Hiermee my redes hoekom daar van 'n alternatiewe route gebruik gemaak moet word.

1. Die eksistente sal beslis getripak word.
2. Dit sal die Bosboubedryf gemeenskaplik ekonomies maak ook a.g.v. die langer produksieperiodes vir bome om te groei. Dit sal die toegestaaude staatspermitte hektare oornivoud en ons sal hielikwaamtylik nie addisionele boomplantpermitte bekom nie, aangesien die wateropvanggebied alreeds volgeplant is – volgens die Departement van Waterwee en Bosbou. Dit sal my boerdeyeenheid onekonomies maak en die volkswaardheid van boomproduksie op langtermyn negatief beïnvloed.
3. Die visuele impak op die hake gebied sal groot wees en toerisme sal negatief beïnvloed word.
4. Vuurgevaar sal in die winter vermeerter word die sterk westewinde wat ons beleef.
5. Daar is geen direkte voordele wees vir die my plaaslike inwoners nie, hulle sal bv. nie teen 'n goedkoper tarief krag bekom nie.
6. Die krag sal nie "groen"-krag wees wat opgewek word nie of volhoubaar wees op die langtermyn nie. Dit sal bydra tot stankverwarming.
7. Die lyn gaan ook 'n lewisaal maak.

Ek hoop u neem die voorgesemde punte in ag, sodra u u besluit neem oor die gepaste route.

Daar danks.

R.M Bohmer

CAMDEN - MBEWU 765 KV POWERLINE

Welverdiend Nr 2 193 Portion 0 & 1

Welverdiend No 1 1/0// Portion 0,1,2,3

Scheepersrust 196 Portion 3

Rondekopje 70

Concerns to all above:

1. Will have a negative impact on the Eco system
2. It will be an economic disaster on the timber farming aspect, regarding loss of forestry land, lost of plantation permits, the farms won't be longer economic viable units.
3. The possibility for increasing spread of fire will increase dramatically
4. There won't be any benefit for the community; it will create job losses as a result of less timber plantations.
5. The line is noisy
6. The line will be very close to three residential sites.
7. The paragliders won't be able to continue with their National championships in the Paulpietersburg area.
8. The power line will be in danger for the vultures at Nalal Spa.

Welverdiend 208 Portion 0

Concerns:

1. As above
2. There is already a high voltage line crossing this farm. I definitely do not want a second line on my farm.

Thank you for the possibility to raise my concerns.

**PUBLIC PARTICIPATION: REVIEW OF THE SCOPING REPORT FOR THE PROPOSED 765KV TRANSMISSION LINE FROM CAMDEN TO MBOWENI**

Dear Madam,

As per the information received at the public meeting which was held on the 16<sup>th</sup> of November 2010 regarding the proposed transmission line as referred to above, the below listed concerns and issues are submitted for your action. As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environment Impact Assessment Regulations Chapter 6 of Government Notice No 33305 Regulation 543, response to the concerns and issues below are required in writing for review.

Please further note that I am the owner of the following properties which may be affected by the proposed development:

- Rem of Portion of Portion 4 (Portion of Portion 1) and portion B of Pampoenkraal 318 IT;
- Ernstshazi 536 IT;
- Rem of Portion of Portion 10 (Portion of portion 4) Vlaklaats 234 IT;
- Various portions of Umgwenpies 309 IT; and
- Rem of Portion Basel 313 IT.

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

1. The proposed power line will increase the collision risk with the line by aircraft using the landing strip on the farm Umgwenpies. This facility is used on a weekly basis and the safety risks will be increased (if not disabling the use of the landing strip completely).  
What will be done by Eskom to ensure that the facility will be able to function without an increased collision risk, should the proposed line be established along the red (AP) alignment?
2. Umgwenpies is largely used for game conservation purposes. As such, the area has been declared as a Oribi Custodian (please refer to the attached photo) by the following organisations:
  - a. Endangered Wildlife Trust;
  - b. Eemivolo Wildlife; and
  - c. Oribi Working Group.

How will the proposed power line be constructed and maintained in a manner which will not affect the conservation area, or which will have a minimum impact thereon. It is further requested that all of the parties as mentioned above be notified about the proposed development and notification proof be provided.

3. How will the electromagnetic field, of such a high voltage line, impact on the game and vegetation of not only the conservation area but on all properties as mentioned above?
4. Various aquatic habitats occur on and around the Umgwenzi's property as well as a river which is in close proximity to the farm Ernsdors.
  - a. How will the sensitivity of these environments be established?
  - b. Where will tower placing be proposed in relation to the aquatic features and resources? and
  - c. If so required, provide proof of water use registration of related water uses in terms of the National Water Act, 1989 (Act No 36 of 1989).
5. How much water will be used during construction and stringing of the line and where will this water be sourced from? Will a water use registration be required?
6. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
  - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be removed, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed?
  - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be compensated for as the timber price varies from year to year?
7. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing. Please provide a study regarding the correlation of veld and forest fires with the presence of power lines. An increase in veld and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalised prior to the consideration of an environmental authorisation.
8. All of the properties as mentioned above have established homesteads and most have related graves. Please clarify:
  - a. How these possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councils);
  - b. Where will tower structures be placed in relation to existing homesteads;
  - c. What educational safety precautions will be taken and provided to the communities regarding the power line; and
  - d. Will any local labour be trained and used during the construction and operations of the proposed line.
9. A possible heritage structure is located on the farm Umgwenzi's. A heritage Assessment is required to investigate the school which is around 110 years old. Where will tower structures be placed in relation to this heritage resource?
10. The main railway line between Richtersdyk and the Mpumalanga Coal fields is located on various portions of the properties. Please clarify:
  - a. Whether Spoornet has been consulted;
  - b. Where tower structures will be placed in relation to the railway line;

...

c. Whether the electromagnetic field will impact on the railway line, should it be in close proximity to the line.

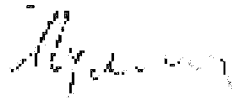

11. On the properties as mentioned above, various parastatal and government organisations require (or have acquired) property for roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non-agricultural and non-profitable uses are increasing to the detriment of the land owners. Please indicate what measures have been taken to consider the cumulative impact - financially - on the losses incurred by landowners of land being expropriated for infrastructure requirements.

I trust that you will find the above in order. Please direct any queries and responses, in writing to Mr H Gerken at the following contact details:

**PUBLIC PARTICIPATION: REVIEW OF THE SCOPING REPORT FOR THE PROPOSED 765KV TRANSMISSION LINE FROM CAMDEN TO MBEVU**

Dear Madam,

As per the information received at the public meeting which was held on the 14<sup>th</sup> of November 2010 regarding the proposed transmission line as referred to above, the below listed concerns and issues are submitted for your action. As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environment Impact Assessment Regulations Chapter 6 of Government Notice No 33306 Regulation 543, response to the concerns and issues below are required in writing for review.

Please further note that I am the owner of the following properties which may be affected by the proposed development:

- Heyshope 501, portion 5; and
- Kromrivier 445

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

1. HEYSHOPE and KROMRIVIER is largely used for commercial grain, maize, soybean (grain fed, pivot) and cattle stud purposes.  
How will the proposed power line be constructed and maintained in a manner which will not affect the production area, or which will have a minimum impact thereon.
2. How will the electromagnetic field, of such a high voltage line, impact on the grain and beef of not only the production area but on all properties as mentioned above?
3. Various aquatic habitats occur on and around the Heyshope property as well as a river which is in close proximity to the farm Kromrivier
  - a. How will the sensitivity of these environments be established?
  - b. Where will tower placing be proposed in relation to the aquatic features and resources?  
and

- c. If so required, provide proof of water use registration of related water uses in terms of the National Water Act 1988 (Act No 36 of 1989).
4. How much water will be used during construction and stringing of the line and where will this water be sourced from? Will a water use registration be required?
5. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
  - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed?
  - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be compensated for as the timber price varies from year to year?
6. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing. Please provide a study regarding the correlation of veld and forest fires with the presence of power lines. **PUBLIC PARTICIPATION: REVIEW OF THE SCOPING REPORT FOR THE PROPOSED 765KV TRANSMISSION LINE FROM CAMDEN TO MBEWU**

Dear Madam,

As per the information received at the public meeting which was held on the 16<sup>th</sup> of November 2010 regarding the proposed transmission line as referred to above, the below listed concerns and issues are submitted for your action. As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environmental Impact Assessment Regulations Chapter 6 of Government Notice No 33306 Regulation 513, response to the concerns and issues below are required in writing for review.

Please further note that I am a Director and owner of the following properties which may be affected by the proposed development:

- Various portions of Lodowykust 181 ha (IT is IT (Pty) Ltd)
- Various portions of Speensoppies 179 ha (IT is IT (Pty) Ltd)
- Delft Z2 hu (Delft Coindomine (Pty) Ltd)
- Welkom Z&u (Delft Coindomine (Pty) Ltd)

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

1. The proposed power line will increase the collision risk with the line by aircraft used for fire fighting purposes.
2. Farm Lodowykust is used for stud breeding purposes. The following issues relate specifically to the this farming enterprise:
  - a. How will the electromagnetic field, of such a high voltage line, impact on the cattle and vegetation of all properties as mentioned above?
  - b. Eskom have of late mowed the grass under existing power lines on the property, prior to the winter and related cutting season. To what extent does this practice impact on the cattle carrying capacity of the farm and what impact will this have on the profitability of this division?
  - c. What is the impact of the proposed line on the probability of cattle grazing in the vicinity of line being killed by lightning?

3. The farm Lodewykstuit and Spoorkoppies hosts four existing powerlines and a railway line dividing the properties. At what point and to what extent does the cumulative impact of these power lines and a railway line effect a diversified farm to such an extent that the property cannot be used for conducting an agricultural business or where the cumulative impact becomes so intrusive that it is difficult to conduct such a business. How will this be determined during the impact Assessment Phase?
4. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
  - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed?
  - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be compensated for as the timber price varies from year to year?
  - c. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing. Please provide a study regarding the correlation of veld and forest fires with the presence of power lines. An increase in veld and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalised prior to the consideration of an environmental authorisation. Each power line requires new firebreaks. These firebreaks impact on grazing veld. To what extent does this apply and what is the estimated loss of income attributable to this factor.
5. All of the properties as mentioned above have established homesteads and most have related graves. Please clarify:
  - a. How those possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councillors);
  - b. Where will tower structures be placed in relation to existing homesteads;
  - c. What educational safety precautions will be taken and provided to the communities regarding the power lines; and
  - d. Will any local labour be trained and used during the construction and operations of the proposed line.
6. The main railway line between Richardbay and the Apumalanga Coal fields is located on various portions of the properties. Please clarify:
  - a. Whether Spoornek / Trusnet has been consulted;
  - b. Where tower structures will be placed in relation to the railway line.
  - c. Whether the electromagnetic field will impact on the railway line, should it be in close proximity to the line.
7. On the properties as mentioned above, various "parastatal" and government organisations require (or have acquired) property for roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non-agricultural and non-profitable uses are increasing to the detriment of the land owners. Please indicate what measures have been taken to consider the cumulative impact - financially - or the losses incurred by landowners of land being expropriated for infrastructure requirements.
8. We further wish to place on record that we have not received the detail maps for the above mentioned properties as promised during the public meeting. Because of

As we may not have included all the matters that we would have wished to be included in your sampling, We wish to reserve our rights in this regard.

9. We have also not received the minutes of the public meeting we attended during which many aspects were raised by those present. This letter must hence be read in conjunction with the matters raised during the meeting. We would have included these points had we received the minutes of the meeting timely.

I trust that you will find the above in order. Please direct any queries and responses, in writing to Mr AT Vorster at the following contact details:

**PUBLIC PARTICIPATION: REVIEW OF THE SCOPING REPORT FOR THE PROPOSED 765KV TRANSMISSION LINE FROM CAMDEN TO MBEVU**

Dear Madam,

As per the information received at the public meeting which was held on the 16<sup>th</sup> of November 2010 regarding the proposed transmission line as referred to above, the below listed concerns and issues are submitted for your action. As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environment Impact Assessment Regulations Chapter 6 of Government Notice No 33306 Regulation 343, response to the concerns and issues below are required in writing for review.

Please further note that I am a trustee and manager of leased properties of the Fort Eggers Trust which is the owner of the following properties (which may be affected by the proposed Transmission Line):

- Palmboomkruis 315 IT (leased to NLI (Pty) Ltd);
- Noelgedacht 319 IT (leased to NCT (Pty) Ltd);
- Wildbrand 495 IT (various portions); and
- Rustplaas 494 IT (various portions).

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

1. The proposed power line will increase the collision risk with the line by aircraft using the landing strip on the farm Wildbrand. This facility is used on a weekly basis and the safety risks will be increased (if not disabling the use of the landing strip completely). It is further used by the aircraft of the Forest Fire Air-Tanker Association as a fill-up point during the fire fighting season. What will be done by Eskom to ensure that the facility will be able to function without an increased collision risk, should the proposed line be established along the AP alignment? It is further recommended that the Forest Fire Tanker Association be contacted regarding the proposed power line.

2. Various aquatic habitats occur on and around the Pampoenkraal property. A waterfall and related aquatic environment is well known in the area as a "conserved area" used for tourism purposes. The Ormgewenters River feeds this waterfall. The entire area is underlain by TMS Sandstone.
  - a. How will the sensitivity of these environments be established as there may be various orange and red data plant species (such as grass orchids, aloes and proteas) present on site. The area further hosts various bird species of importance such as the Bald Ibis and Blue Crane which visits the area from time to time.
  - b. Where will tower placing be proposed in relation to the aquatic features and resources? and
  - c. If so required, provide proof of water use registration of related water uses in terms of the National Water Act, 1957 (Act No 36 of 1957).
3. How much water will be used during construction and stringing of the line and where will this water be sourced from? Will a water use registration be required?
4. How much construction waste will be generated for the northern section and where will this waste be disposed of?
5. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
  - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed?
  - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be compensated for as the timber price varies from year to year?
6. The presence of the line will increase the risk of wild and forest fires due to the increased potential of arcing.
  - a. Please provide a study regarding the correlation of wild and forest fires with the presence of power lines. An increase in wild and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season.
  - b. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalized prior to the consideration of an environmental authorisation.
  - c. If Eskom is to maintain the fire breaks an agreement between the landowner and Eskom is required to be established regarding the timing and methods used for such maintenance activities.
  - d. The use of "fire bombing" as a technique in fire fighting employed by aircraft will be impacted due to the fact that the collision risk with the proposed line will be increased. Fire fighting is conducted in very windy conditions with almost zero visibility above the canopy which will be in line with proposed transmission line (please note that a safety clearance of approximately 200 feet is required above ag.). Therefore during such conditions, these aircraft will not be able to reach any burning portion of trees which are located too close to the proposed power line.

7. A concern is raised regarding the data received in Shapefile format. The properties as listed which are being affected (please refer to your Appendix K of the Draft Scoping Report) are not in line with the proposed alignment L of the Google Earth Image depicting the various alternative routes.
8. Rustplaats (Pnt 17 & 18) (Which is owned by Vicmo Trust and leased by the Eggers Group) is largely used for game conservation purposes. The 650 Ha area further houses an educational facility used for environmental training. This is a fenced area which has been established over 15 years ago. Various game species as well as Orniths being conserved in this area.
9. How will the electromagnetic field, of such a high voltage line, impact on the game, cattle and vegetation of not only the conservation area but on all properties as mentioned above including that of the CPA?
10. A serious concern is raised regarding the proposed alignment of line AP which, as per the Shapefiles (on Google earth) received will cross over various existing power lines which serve to connect an Eskom Substation located adjacent to Pnt 13 of the farm Rustplaats. During the public meeting which was held on the 16<sup>th</sup> of November - it was categorically stated that a power line of this magnitude may not be constructed above another transmission line. Please clarify whether the proposed alignment will cross any Distribution power lines and whether Eskom Distribution has been contacted in this regard. If these power lines which are to be crossed are ~~power~~ Transmission lines, clarify regarding the public meeting statement is required as well as technical details of such a crossing.
11. All of the properties as mentioned above have established homesteads and most have related graves. Please clarify:
  - a. How these possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councillors);
  - b. Where will tower structures be placed in relation to existing homesteads;
  - c. What educational safety precautions will be taken and provided to the communities regarding the power line; and
  - d. Will any local labour be trained and used during the construction and operations of the proposed line.
  - e. Will any construction camp be placed in the vicinity of any homestead and will this be considered in the Social Impact Assessment as mentioned in the DSR to be conducted?
12. An established Communal Property Association (Ezakheni Communal Property Association) owns a portion of a portion 13 of the farm Rustplaats. It is recommended that consultation be conducted with the established Ezakheni CPA committee as soon as possible (Contact Mr Shogwe at 076 166 8585). Please provide proof of such consultation. Please further note that various heritage and cultural resources is established on this property and will require documentation during a Heritage Assessment in terms of the Heritage Act.
13. The main railway line between Richards Bay and the Mpumalanga Coal fields is located on various portions of the properties. Please clarify:
  - a. Whether Spoorlines has been consulted;
  - b. Where tower structures will be placed in relation to the railway line;
  - c. Whether the electromagnetic Field will impact on the railway line, should it be in close proximity to the line

14. On the properties as mentioned above, various parastatal and government organisations require (or have acquired) property for roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non-agricultural and non-profitable uses are increasing to the detriment of the land owners.

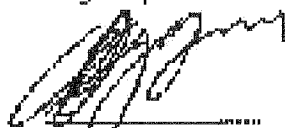

- a. Please indicate what measures have been taken to consider the cumulative impact - financially - on the losses incurred by landowners of land being expropriated for infrastructure requirements. What impact will this have on tannin extract; pulp-fibre security and structural wood?
- b. Whether SANRAL has been consulted

I trust that you will find the above in order. Please direct any queries and responses, in writing to Mr E Eggers at the following contact details:

Dear Sir/Madam

**ENVIRONMENTAL IMPACT ASSESSMENT FOR THE PROPOSED 765 KV  
CAMDEN-MBEWU (THETA) POWER LINE BACKGROUND  
INFORMATION DOCUMENT.**

Thank you for your indication that development is to take place in this area.

In terms of the National Heritage Resources Act, no 25 of 1999, heritage resources, including archaeological or palaeontological sites over 100 years old, graves older than 60 years, structures older than 60 years are protected. They may not be disturbed without a permit from the relevant heritage resources authority. This means that before such sites are disturbed by development it is incumbent on the developer (or mine) to ensure that a **Heritage Impact Assessment** is done. This must include the archaeological component (Phase 1) and any other applicable heritage components. Appropriate (Phase 2) mitigation, which involves recording, sampling and dating sites that are to be destroyed, must be done as required.

In your application received by SAHRA there was no indication of an assessment of the archaeological resources. The quickest process to follow for the archaeological component is to contract a specialist (see link to CRM

archaeologists) to provide a Phase 1 Archaeological Impact Assessment Report. This must be done before any large development takes place.

The Phase 1 Impact Assessment Report will identify the archaeological sites and assess their significance. It should also make recommendations (as indicated in section 3.6) about the process to be followed. For example, there may need to be a mitigation phase (Phase 2) where the specialist will collect or excavate material and date the site. At the end of the process the heritage authority may give permission for destruction of the sites.

Where bedrock is to be affected, or where there are coastal sediments, or marine or river terraces and in potentially fossiliferous superficial deposits, a Palaeontological Desk Top study must be undertaken to assess whether or not the development will impact upon palaeontological resources - or at least a letter of exemption from a Palaeontologist is needed to indicate that this is unnecessary. If the area is deemed sensitive, a full Phase 1 Palaeontological Impact Assessment will be required and if necessary a Phase 2 rescue operation might be necessary. (See attached list of accredited Palaeontologists).

If the property is very small or disturbed and there is no significant site the specialist may choose to send a letter to the heritage authority to indicate that there is no necessity for any further assessment.

Any other heritage resources that may be impacted such as built structures over 60 years old, sites of cultural significance associated with oral histories, burial grounds and graves, graves of victims of conflict, and cultural landscapes or viewsapes must also be assessed.

Attached please find a list of palaeontological specialists who may be contacted to undertake the necessary palaeontological impact assessments. See link below for CRM archaeologists.

Yours sincerely

Dear M's Lotter

EIA Ref. 12/2/2011776  
Eskom Corben - Mbevu 765 KV Transmission Line

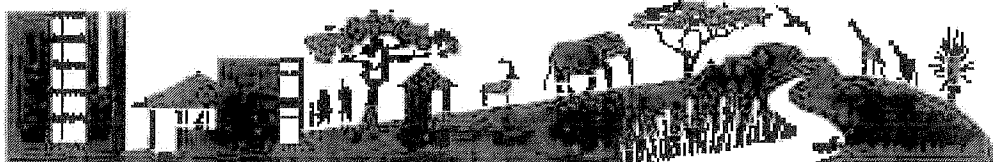

**Draft Scoping Report:**

Having read the Background Information Document and draft Scoping Report Executive Summary prepared by Zitholele Consulting for the proposed 765 KV transmission powerline I find that the documents provide the most comprehensive description of an Eskom project in KwaZulu-Natal which I have had the opportunity to review. The information is well presented, it is clearly presented and should be easily understood by I&APs at all levels.

As a result of a communication problem (the Executive Summary only has been read, however, having dealt with several Eskom applications in the past WESSA is satisfied that the issues of interest have been identified for further study and the terms of reference for specialist studies are inclusive, although we would like the following taken into consideration –

- Bats. We would like to know if impacts on bats could be an issue in terms of the "humming" (described as a noise impact) and the electro-magnetic fields associated with high voltage lines.
- In terms of impacts on agricultural enterprises the following mitigation provided in similar Eskom projects are of value –
  - If possible, align the proposed transmission line to cross forestry plantations and farms (a) next to their borders to reduce the affected area under crop or forestry and/or (b) along the areas of the farm that is not used for any economic activity.
  - If possible, give preference of the corridor over the large-scale farms rather than small-scale farms to minimise the impact on small-scale farmers who are more susceptible to the loss of areas under cultivation.
  - If possible, prioritise the corridor over farms where the transmission line would cross the farm in the width rather than in the length to allocate the adverse effects over a number of farms rather than clustering them on one farm, posing a threat to its viability. Encourage farmers, and if possible, assist them financially and through training to engage in other crop cultivation within the servitude, to increase the production output and income from the land.
  - Routing of the transmission line could be done in such a way as to avoid traversing agricultural land in the middle minimising the area that will need to be cleared out of crops and forestry plantations.
  - Where avoidance of agricultural land is impossible, farmers could be assisted with the establishment of alternative crops should it be required within the servitude to be able to still receive income from the land.
  - Careful selection of tower positions could also reduce the potential negative impacts, in particular, the impacts on subsistence farming.
  - Develop a Monitoring Framework to monitor positive and negative impacts and their management.

I thank you for the information and we look forward to receiving the reports on the

## Anelle Lötter

From: Trish & Roland Stone [stone@acanet.co.za]  
Sent: 17 November 2010 10:20 AM  
To: Anelle Lötter  
Subject: EIA for proposed 765KV line, Wakkerstroom

Hi Anelle,

### Regarding your list of Affected Properties

Under your listing of affected properties there is no latest data shown regarding the properties listed under Marthinus Wesselstroom 121 HT. Some of the portion numbers and therefore their ownership info that has been published in your list is either no longer valid or out of date. Accordingly you may be assuming unspecified portions to be under Same Council, in the case of municipal townlands instead of actual private ownership. size, use etc. Anyway some of the portion numbers shown no longer exist or are now now part of larger portion numbers.

For example my property portion 131 is not listed in your list. Prior to 2003 part of it was listed as portion 61 which you show, to which was added portion 130 in 2003 the two jointly registered since 2003 as one portion in the deeds office as portion 131 and is not listed in your list.

Similarly, my fence neighbours at the Waavers Nest Hotel/County Village site is also made up into a new 25ha portion, consisting of the former 20ha portion 103 plus the original smaller 4ha portion of which I do not have the info. Similarly my other neighbour across the road which was portion 22 of only 4ha now 25ha consisting of a new larger entity which includes also the 20ha portion 129. I do not know what that larger 25ha portion number is.

I suspect therefore that this situation exists at other smallholdings because owners were all given options in 2003 to purchase an additional 20Ha from the Council, to make their smallholdings sizes up to 25Ha. some accepted, some did not take the offer up.

So your data may still only show old 4Ha portions, no longer valid due to the redevelopment of the area since 2003 and therefore not showing developments.

### Regarding historical sites in Wakkerstroom near or inside to this proposed corridor over Wakkerstroom Town and There are lots of early San, Zulu, Swazi, German, Boer and Brit sites in and around the town and inside the proposed corridor.

Amongst which are the grave site in the townlands, of Swart Dirk Uys and his family, the Voortrekker leader who fought and won at Blood River. Swart Dirk Uys is the founder of Wakkerstroom (Marthinus Wesselstroom)

The re-located grave sites to the townlands from a large area of Mpumalanga of Boer soldiers and British soldiers who died in both Anglo-Boer Wars. There are probably more than 100 of these graves and monuments. There are further Boer monuments inside the grounds of the NG Kerk.

This whole large historical cemetery and grave site, including that of Swart Dirk Uys has recently been renovated and signposted for tourism and postarity purposes by the community of Wakkerstroom and fundations received in South Africa and abroad.

There are two other Boer settler family grave sites within 1 km of the corridor at the Driefontein turnoff on the town boundary, another 1 km down the Driefontein road and there are two family group Black family graves, one inside the proposed corridor on Rudd's Hill farm (Mogiplasa, next to Zwerwers) and the other is on the airport dirt road just past the airport turn in on or near the Morris's property.

Two km down the Driefontein road from the turnoff is the Boer/Brit battle site of Naudaschoogte where annual mock-battles are staged for tourism and local benefit.

For more detailed information on the British block houses, the trenches on Osseswakop and fortifications, camp sites, the concentration camp site, the Boer Long Tom gun positions and other visitor interests please contact Mr. Chris Smit, of Ophokopia Museum in Wakkerstroom. he is our local historian at To 017 7300284, he is expecting your call, I called him, he said you're welcome.

There are also three registered and labelled National Monument buildings in Wakkerstroom which draw visitors here, other than for birding reasons. One structure is the Paul Kruger Bridge in the Wetlands, presented to the people of Wakkerstroom by the then President after his wagon got stuck in the wetlands.

Rider Haggard the American author also reportedly resided here during his tenure as the local magistrate. His wooden-iron home is still standing and used.

Wakkerstroom town is currently also the Mpumalanga town of the year 2010, judged as the best in Mpumalanga for tourism and historical and other interests and development.

Regards  
Roand Stone  
Wakarhuom

Anelle Lötter

Sent: 18 November 2010 10:47 AM  
To: Anelle Lötter  
Subject: Draft Scoping Report- proposed Caricen-Mbowu line

*See next page*

Hi Anelle,

Following your presentation at Wakkerstroom today, I would confirm a few points raised by myself.

Point 6.1 Surface Water - Route BK (pg 62) the "unnamed tributary of the Stang" is in fact the "Wakkerstroom River" which is part of the Wakkerstroom wetlands system.

Point 5.B (pg 71) Conservation Areas and Tourism, there is only a 1.5 km gap between the Wakkerstroom Campsite and Oudheidfontein conservation areas. And in fact the Wakkerstroom Wetland Reserve and the Wakkerstroom Campsite/Martin's Dam are part of the same unit, although described separately. In addition the whole of Martinus Wesselstroom is being declared a conservation area as we speak in order to allow the proclamation of the greater Ramsar site to proceed. Ekangala Grasslands trust can give you more current info (Angus Burns). These two matters would change the shape and size of "Green Areas" as shown on your map.

Issues and Responses section (version 1): Please would you clarify 'Market Value' when it comes to evaluating property. Bearing in mind our discussions today, the market value is normally what the property would trade at under natural circumstances, what the normal buyer is prepared to pay, not what Eskom is prepared to pay for expropriated properties.

In this instance, given that the process of negotiation with owners would only take place once the route go-ahead was authorised by Government, the affected property and its surrounds would immediately lose its market value and would certainly not attract a likely buyer under normal circumstances and there would no longer be a market value as in a normal free market trade situation. There needs to be a "normal commercial circumstances" clause and understanding as if nothing had happened to cause this situation to happen. In no case of circumstances caused by an unwanted Eskom intervention.

The Eskom statement from the floor that the EIA's only lasted for six years is not clearly understood (In answer to why another EIA was again being conducted for powerlines over Wakkerstroom) because the last EIA was done in May 2008, by Eskom/BKS four years ago, and the Wakkerstroom route for the proposed Ma. uba-Umfolozi 765Kv line was moved then to the present Volksrust route, hence our questions as to why a potential Wakkerstroom route was being raised each time, at such short frequencies.

Thank You

Roland Stone

Wakkerstroom

From: Trish & Roland Stone [stone@acenet.co.za]  
Sent: 28 November 2010 04:31 PM  
To: Anella Lötter  
Subject: Proposed Gamber/Thela line

*Suzanne*

Hi Anella,

When I look at your drawing on pg 87 at the Volksrust corridor area there is a red line indicating a 765Kva line from Majuba power station crossing the R543 Volksrust/Wakkerstroom road, which we know about. Is the red line on the drawing masking a 400 Kva yellow line which lies underneath it?

At a site inspection this morning I found three power lines, a 400Kva right next to a new 765Kva, and a third one, other 400Kv line which lies 2 kms away - closer to Volksrust & I running parallel into Natal.

There is a 2 km gap between the two 400Kva lines, no other line in-between them. The new 765 Kva line is on the Wakkerstroom side of one 400Kva line.

This gap may provide you with a suitable pathway for a second 765Kva line inside that corridor.

That corridor also provides you with a very favourable descent path into Natal, running smoothly downhill - rather than the more abrupt escarpment alternatives elsewhere and lots of serviceable access roads. In fact at the point of crossing the R542 you will already be in Natal.

Hope this helps.

Regards

Roland Stone  
Wakkerstroom

**Sent:** 20 November 2010 09:11 AM  
**To:** Anelle Lötter  
**Subject:** Proposed new Camden/Theta line

*Refer to ...*

Hi Anelle,

There was mention made in our meeting at Wakkerstroom of other new Mpumalanga power stations coming on stream around 2103 onwards. Should cognisance not also be taken of the transmission line mints required for those as well as for the Camden/Theta line and therefore the scope be widened (in view of the Enviro impacts) to accommodate a corridor area for both, otherwise the whole countryside could potentially end up with multi corridors, line cross-overs, more FIA's etc etc? The process will just get more difficult as time goes on as more and more land is transformed into protected areas, more plantations, dwellings, expansion of railways, roads, fuel pipelines, new planned water affairs dam construction projects, etc etc.

I don't know where these other planned stations are to be or the plans for transmission lines from them, hence my comment, it seems more logical to have these other new stations in mind at the same time.

Regards  
Roland Stone  
Wakkerstroom

--	----------

In terms of Regulations GNR 543 - 548 – Government Gazette No 33308 of 18 June 2010 (EIA process regulations) I declare to own any direct business, financial, personal or other interest that I may have in the approval or refusal of the application:

.....

.....

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment:

Wakkerstrom is one of the last natural wetlands in South Africa and home to numerous endemic species. It is a well-known global birding area. The proposed power line is a severe threat to this environmentally sensitive area.

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment:

Breeding and flocks of many birds such as Blue and Grey Crowned Cranes are prolific in the grasslands as well as in the wetlands.

I believe I presume it is not necessary to point out that the grasslands are prime stock areas and stock can be affected by powerlines – and together with grasslands, go wetlands.

.....

I would like to receive documents for comment as follows

In terms of Regulations GNR 543 - 546 - Government Gazette No. 33303 of 18 June 2010 (EIA process regulations) I disclose below any direct business, financial, personal or other interest that I may have in the approval or refusal of the application:

.....LANDOWNER.....

YES	NO
<input checked="" type="checkbox"/>	<input type="checkbox"/>
Letter/Email	<input checked="" type="checkbox"/>
Email	<input type="checkbox"/>
Fax	<input type="checkbox"/>
Telephone	<input type="checkbox"/>
Paper copies	<input checked="" type="checkbox"/>
By email	<input type="checkbox"/>
On CD	<input type="checkbox"/>

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment:

1) IRRIGATION SYSTEMS (PIVOTS) CANNOT FUNCTION UNDER POWERLINE

2) WATER USE PERMITS FOR FORESTRY ARE VERY DIFFICULT TO OBTAIN. POWERLINE WOULD RESULT IN REGISTERED FORESTRY LAND TO BE FORTIFIED

3) SPRINKLING IMPOSSIBLE UNDER POWERLINE

4) IF I HAD TO LOSE MY PIVOT IRRIGATION I WOULD HAVE TO CLACK DOWN MY FAMILY'S IMPACT = IS PEOPLE JOB LOSS = 150 DEPENDENTS WITHOUT INCOME

5) PROXIMITY TO CHURCH WITH HAS NEGATIVE IMPACT ON AESTHETIC VALUE.

THANK YOU FOR YOUR CONTRIBUTION

.....

.....

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment:

...It is important that land use is considered very carefully and that land uses that can continue under the powerlines should help determine the route chosen. Forestry activities can not take place under powerlines and so displacement of forestry is not only very costly, there is a shortage of land on which forestry can occur (no water use licenses available). Displacement means loss of fibre with the associated financial loss. Infrastructure like airfields for fire fighting purposes should also be avoided.

I would like to receive documents for comment as follows

In terms of Regulations GNR 543 - 548 – Government Gazette No. 33308 of 18 June 2010 (EIA process regulations) I disclose below any direct business, financial, personal or other interest that I may have in the approval or refusal of the application:  
I own a half share in plot 24 Walkerstroom, which is directly in the servitude of the proposed line.

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment

The area in Walkerstroom that the line is going through is an internationally renowned wetland. On the vlei in front of our plot, directly beneath where the line is planned, is a breeding pair of crowned cranes – a severely endangered species of bird. The farmhouse, and outbuildings, are directly within the servitude of the proposed line.

Any other comments:

Building the line on this route would have a severe environmental impact on an important wildlife preservation area.

Please ask the following of my colleagues/friends to register as ISAPs for this project:

Peter Alkema, peter.alkema@lalkema.net

THANK YOU FOR YOUR CONTRIBUTION

In terms of Regulations: GN R 543 - 545 – Government Gazette No. 33306 of 18 June 2010 (EIA process regulations) I disclose below any direct business, financial, personal or other interest that I may have in the approval or refusal of the application: ..... ...None.....		

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment

I suggest that the Wakkerstroom wetland be considered during the EIA process. In the process of the EIA please consider the impact of pylons/towers on the wetland, construction impact of the pylons/towers or whether the access roads would not endanger the lives of already threatened species such as the cranes in the area, the vegetation and generally the bird area in respect of foraging, roosting and nesting and nesting sites would not be affected.

.....

Any other comment:

In the Wakkerstroom and Volkrust area could we request that you contact Me Kristi Garland who is secretary of the Wakkerstroom Protected Environment Management Committee and also Birdlife official on the following numbers: 383 227 0128 or by mail or wakkerstroom-centre@birdlife.org.za.

Please formally register me as an interested and affected party (I&AP) so that I may receive further information and notifications during the Environmental Impact Assessment process

I would like my notifications by  Letter (mail)  Fax  Telephonic

I would like to receive documents for comment as follows:  Paper copies  CD

In terms of Regulations GNR 543 - 548 - Government Gazette No. 33306 of 15 JUNE 2010 (EIA process regulations) - disclose below any direct business, financial, personal or other interest that I may have in the approval or refusal of the application:

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment

The impact on the loss of commercial forestry is a productive landscape

Any other comments:

Please ask the following of my colleagues/friends to register as I&APs for this project:

David Buthe - Projects Manager David Buthe - david@buthe.co.za

THANK YOU FOR YOUR CONTRIBUTION

## Eskom Camden - Mbewu 765 kV Power Line: Public Participation Representation

Report  
Version - Final

December 10

Piet Retief Agricultural Union  
10-661

### DOCUMENT ISSUE STATUS

<b>Report Issue</b>	Final		
<b>Reference Number</b>	12/12/20/2029		
<b>Title</b>	Eskom Camden - Mbewu 765 kV Power Line: Public Participation Representation		
	<b>Name</b>	<b>Signature</b>	<b>Date</b>
<b>Author</b>	Quzette Bosman		08/12/2010
<b>Document Authorisation</b>	Quzette Bosman		08/12/2010

## Introduction

GCS (Pty) Ltd has been appointed by the Piet Retief Agricultural Union (hereafter referred to as Piet Retief Agri) to collate and record all issues and concerns as made by its members regarding the above referenced project. Furthermore, GCS is expected to review the Scoping Report in terms of related possible impacts as well as the consideration of the public participation process followed in terms of the regulating legislation.

This report therefore serves to inform the project team about the general issues and concerns Agri Piet Retief has with the proposed project.

## Issues and Concerns

As per the public participation requirements in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) Environment Impact Assessment Regulations Chapter 6 of Government Notice No 33306 Regulation 543, response to the concerns and issues below are required in writing for review.

Concerns and issues which are required to be resolved prior to environmental authorisation being considered include the following:

1. Proposed alignment AM and AP as referred to in the "Alternative Map" are in close proximity to the Nkangala Grasslands Project as driven by the World Wide Fund For Nature in Partnership with SANBI. These alignments are further proposed over a protected area know as KwaMandlangampisi.
2. Proposed alignment AM and AP are located over an catchment which has been classed as irreplaceable in term of aquatic biodiversity (Please refer to the Mpumalanga Biodiversity Conservation Plan).
3. Please provide technical information during the EIA phase regarding the impacts of the electromagnetic field of the proposed power line. How will the electromagnetic field, of such a high voltage line, impact on the game, cattle, timber and vegetation of not only the conservation area but on all possibly affected properties?
4. Please provide proof that local authorities and related infrastructure planning departments have been consulted to ensure that local, regional and national governmental planning is co-operative.
5. Where will water be sourced from during the construction phase of the northern section of the line and how much water will be required?. Has assurance been provided that water is available? Please provide proof of water availability from wherever received. Please further note that the Mkhondo area experiences various water provision related problems, with water supply being cut for entire days.
6. Will a Water Use License Application or registration be required during the construction phase of the proposed development? Will any water be taken from any river, stream or drainage line. Therefore in terms of the Scoping Phase -details regarding all water uses and provision is required to be included in the EIA phase;
7. Where will construction material, especially sand and earth material (where applicable) be sourced from if required. If soil or sand is planned to be taken from a borrow pit - please provide details regarding the planned permitting of such pits.
8. Where will construction waste be disposed of and what volume is expected to be generated.
9. What energy efficiency measures, if any, are being considered during the construction and operational phases of the proposed line?

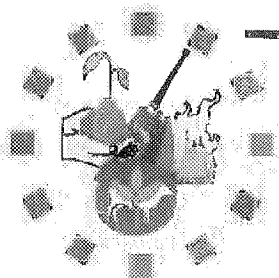

10. How will the location of constructions camps be determined? Please further provide an estimate of:
  - a. How many labourers will be housed in construction camps;
  - b. What entertainment, if any, will be provided to these labourers;
  - c. Where domestic waste of these labourers will be stored and disposed off.
11. Has consideration been given to the possible power station which may be erected by Eskom Generation in the vicinity of the AM alignment? It is requested that proof of consultation be provided. Furthermore it is recommended that Kangra Coal, as the land owners, be contacted in this regard. Please refer to Mr Takalani Ndou (Head of the Department Technical Services) contact nr: 017 826 9700.
12. A concern is raised regarding the Application reference number. During the public meeting as well as on the various sets of information received - reference is made to two different Authoritative reference numbers. The one referring mostly to the initial project public advertisements - please refer to the BID dated October 2010 as handed out during the meeting of the 16<sup>th</sup> of November 2010 (Ref 12/12/20/1776). While the other number appears on the Draft Scoping Report (Ref 12/12/20/2029).
13. Considering point 7 as well as existing lines, please provide the cumulative impacts - on the biophysical, social and economic spheres of the environment.
14. Agricultural Potential assessments to be conducted are to be linked with economic assessment regarding land value and an exponential, continuous loss of income.
15. Section 5.6 of the Draft Scoping Report is to be amended to include the Nu-Scotland Bavaria (in vicinity of the AP alignment) the Oribi Custodians (in the vicinity of the AM and AP alignments).
16. The proposed power line will increase the collision risk with the line by aircraft using the landing strip on the on various farms as well as with any other landing strips used by any other IAP including Mondi Forestry. Please note that the proposed AM and AP alignments are located though mainly forestry land. It is proposed that all landing strips be plotted on the map to indicate the vicinity of these with the proposed alignments.
17. Lion Match (Pty) Ltd owns various farm portions in the vicinity of the proposed AP alignment. It is highly recommended that the company be contacted. Please refer to Mr Eugene Kraamwinkel as reachable at 0833260874.
18. Various properties are established timber producing areas. The following serious concerns regarding timber production requires clarity:
  - a. Tree planting permits - should the proposed power line cross any plantation which will be required to be cleared, the tree planting permit, as issued by the Department of Forestry and Fisheries, will be lost (as this permit is specific to an area). How will the issues of these permits be addressed?
  - b. Should an area no longer be used for timber production, a continuous exponential loss will be incurred by the landowner. How will this exponential loss be determined and compensated for?
19. The presence of the line will increase the risk of veld and forest fires due to the increased potential of arcing. Please provide technical information regarding the correlation of veld and forest fires with the presence of power lines. An increase in veld and forest fires will not only increase the risk of surrounding plantations being destroyed but will also have financial implications during the fire season. Who will be responsible for the maintenance for fire breaks, especially around the power line and should an agreement be entered into between the landowners and Eskom, such an agreement should be finalised prior to the consideration of an environmental authorisation.

20. The use of "fire bombing" as a technique in fire fighting employed by aircraft will be impacted due to the fact that the collision risk with the proposed line will be increased. Fire fighting is conducted in very windy conditions with almost zero visibility above the canopy which will be in line with proposed transmission line (please note that a safety clearance of approximately 200 feet is required above agl). Therefore during such conditions, these aircraft will not be able to reach any burning portion of trees which are located too close to the proposed power line.
21. Many of the possibly affected properties have established homesteads and most have related graves. Please clarify:
- How these possibly affected people will be notified and their concerns noted. Please further provide proof of consultation (including ward councillors and CPA's);
  - Where will tower structures be placed in relation to existing homesteads, it is assumed that no homestead will be directly affected or required to be moved. If not, such detail will have to be considered during the EIA phase of the application; and
  - Will any local labour be trained and used during the construction and operations of the proposed line (specific consideration is to be awarded to the clearing of vegetation for construction purposes).
22. All heritage features as identified by land occupiers are to be considered during the Heritage Assessment.
23. A concern is raised regarding the data received in Shapefile format. The properties as listed which are being affected (please refer to your Appendix K of the Draft Scoping Report) are not in line with the proposed alignment of the Google Earth Image depicting the various alternative routes.
24. The main railway line between Richardbay and the Mpumalanga Coal fields is located on various portions of possibly affected properties. Please clarify:
- Whether Spoornet has been consulted;
  - Where tower structures will be placed in relation to the railway line;
  - Whether the electromagnetic field will impact on the railway line, should it be in close proximity to the line.
25. On various properties which may be affected, various parastatal and government organisations require (or have acquired) property for: roads, railways and now a power line. A concern is raised that the cumulative effect of land being used for non-agricultural and non-profitable uses are increasing to the detriment of the land owners. Please indicate what measures have been taken to consider the cumulative impact - financially - on the losses incurred by landowners of land being expropriated for infrastructure requirements.

**Conclusion**

The issues and concerns as identified in this document are general issues relating to mostly the northern section of the proposed line. No detailed issues and concerns have been mentioned as these are documented in the individual responses as sent electronically to Zitholele Consulting. Therefore, this report and all further communication received is to be read together during the updating of the issues and responses report.

I trust that you will find the above in order. Please direct any queries and responses, in writing to Ms Q Bosman at [Quzette@gcs-sa.biz](mailto:Quzette@gcs-sa.biz).

Dear Anelle Lötter

### PROPOSED CAMDEN – MBEWU 765KV POWERLINE

The proposed Camden –Mbewu 765kv powerline refers.

Paulpietersburg and surrounding area will be affected by the Ap – Po, Am – Mn and the Mp proposed lines. Herewith find attached objections from the following parties against the above mentioned proposed powerline in our area:

- |                      |                       |

**CAMDEN – MBEWU 765 KV KRAGLYN**

Brief van beswaar oor voorgenome kraglyn.

Graag wil ek teen die voorgenome kraglyn beswaar aanteken oor die volgende redes:

i. Die voorgenome kraglyn gaan oor PTN 0 NO. 197 UITZOEK. Die titelakte is 426.4ha groot waarvan slegs 19 ha bome. Die 19 ha bome is die waardevolste deel van die plaas byde ten opsigte van waarde asook profeyte wat geskep word. 50% of meer van die plantasies sal vernietig moet word vir die voorgenome kraglyn. ✓

ii. Die plaas le in 'n gebied waarin baie plantasies is. Met die sterk weste winde wat wel in ons gebied waai in die winter, is al verskeie vure deur kraglyne veroorsaak. Dit skep 'n geweldige gevaar met die hoe brandrisiko van bome. Aangesien Paulpietersburg n' digbewoonde landelike gebied is word baie mense lewens ingevaar gestel, soos reeds met vure in die afgelope jare bewys is. Lewens verliese het plaasgevind. ✓

iii. Dit blyk dat geen langtermyn voordele aan die persone, waarvan verwag word om opofferings te maak, sal deur gegee word nie. ✓

Uit bogenoemde is dit uiters belangrik dat na alternatiewe roetes gekyk word.

.....  
VH Böhmer

<b><u>DATUM</u></b>	06 Desember 2010	<b><u>PLAASNAAM &amp; PORSIE NO.</u></b>	Sien onderstaande.

Aan wie dit mag aangaan

**re: beplande Camden Mbewu kraglyn**

Ek is die grondeienaar van Vaderland en Knooppaan plase wat geraak word deur die kraglyn.

Feitlik die hele gebied is tans onder plantasies ,wat deel uit maak van 'n groter rotasie sisteem tov volhoubare boerdery.Aangesien daar op genoemde gronde slegs met bome geboer word ,kan die verlore hektare nie met ander beskikbare hektare "vervang" word nie.Die kans om verdere boomplantpermitte te bekom is onmoontlik ,aangesien die orige gebiede in vleilande is.Op die langtermyn sal dit die volhoubare boomproduksie erg beïnvloed. ✓

Die beplande lyn sal ook direk langs die bewoonde opstal wees ,asook feitlik oor die informele nedersettings op die gronde.Die primere skool,Sonkela, lê ook in die betrokke area.Visueel ,sowel as ouditief sal die die inwoners en leerders ontwig. ✓

Hierdie gebied word ook die afgelope tyd deur erge winde geteister en die weerlig is besonder hoog.Daar is rede tot kommer of 'n kraglyn nie die voorkoms van vure sal verhoog nie, en dit in 'n plantasie ryke area. ✓

Hierdie gebied word al hoe meer ontwikkel tov toerisme ,en die estetiese waarde

van die gebied sal definitief verminder agv die kraglyn. ✓

Verder is daar kommer oor die voordeel wat ons as inwoners van die gebied sal kry agv die kraglyn. Is dit wys om 'n steenkoolgedrewe krag te ontwikkel terwyl die hele wereld skree vir alternatiewe, volhoubare vorme van energie? Wil Eskom werklik aangaan met aktiwiteite wat bewys is dra by tot aardverwarming? ✓

Die kraglyn loop ook direk deur die gebied wat geormerk is as 'n potensiele dam. Hierdie Pongola dam is ondersoek, en voorlopig uitgestel, maar met die dreigende waterskaarste in Suid Afrika mag dit dalk weer nodig wees om die dam te heroorweeg. ✓

Camden is ook al 'n ou kragstasie, en die vraag bestaan of 'n nuwe kragstasie nader aan die punt van verbruik nie effektiewer op die langtermyn sal wees nie. ✓

Dankie  
Ralf Gevers

To Whom It May Concern:

With the following letter I would like to urge ZITHOLELE CONSULTING, on behalf of the whole Knooppaan community, to reconsider the path of the CAMDEN – MBEWU 765 KV POWER LINE. Not only are there two schools in the Path of the power line mentioned above, more than 50 families in the Knooppaan community would need new homes away from the danger and the noise the power line brings. The community will draw no benefit from the power line. No cheaper power or job creation. ✓

It brings with it a huge fire hazard to the community due to the fact that we are surrounded by tree plantations from which the community benefits due to jobs etc. ✓

The question remains: Why are we building a power line if we strive for a cleaner, better, greener earth for us and our children? ✓

Zithole Consulting

Proposed 765 kV Camden-Mbewu power line

The line is proposed to pass through my property : Eersteling 690.

I would like to object for the following reasons:

- 1) We are in process to redistribute half of the property to a previously disadvantaged community. If the power line traverses the property, plantations will have to be taken out and the project would be doomed for failure as it would no longer be an economically viable unit. ✓
- 2) Power line will cross homesteads. ✓
- 3) Our existing plantations will have to be removed and we have no alternative land to plant trees. ✓
- 4) We will be in a disadvantaged financial position as land value escalates. A once off payment for a servitude is not a long term investment. ✓

I hope you take the above into serious consideration.

Thank you.

TAL

**OBJEKSIE TEEN DIE VOORGESTELDE CAMDEN – MBEWU 765KV KRAGLYN**

<b>TITEL</b>	Mr.	<b>NAME</b>	Louis
<b>VOORLETTERS</b>	L.	<b>VAN</b>	Hinze
<b>ORGANISASIE</b>			
<b>ADRES</b>	Posbus PAULPIETERSBURG	<b>KODE</b>	3180
<b>TELEFOON NR</b>		<b>FAKS NO.</b>	
<b>SEL NO.</b>	084 491 5956	<b>EPOS</b>	elizehinze@gmail.com
<b>DATUM</b>	06 Desember 2010	<b>PLAASNAAM &amp; PORSIE NO.</b>	Silverton 21

**Silverton 21**

Hiermee kortweg 'n lys van redes eie aan die plaas Silverton 21 en waarom dit ons opinie is dat die oprigting van 'n addisionele kraglyn 'n uiters negatiewe impak op ons gaan hê:

1. Die plaas Silverton vorm deel van 'n wildsplaaas, behoorlik as sulks by die owerhede geregistreer, waarop daar onder andere maar bepaald 'n groep van amper 50 buffels (algemeen na verwys as 'addo' of 'skoon buffels') wild loop. ✓

Soos jy sal weet is buffels bekend vir hul swak temperament en is menige mense al deur hierdie diersoort gedood. Weens hul grootte en genoemde temperament is daar geen eenvoudige manier om die diere te hanteer nie, behalwe om al die diere van die perseel te verwyder na 'n ander goedgekeurde perseel, welke geheel en al buite die kwessie is. Gevolglik is die betreding van die plaas, nie eers te noem die verrigting van enige soort werk daarop, lewensgevaarlik vir enigeen wat dit daarop sou waag. Dit moet dan ook nog gesê word dat 'n voertuig nie eens genoegsame beskutting teen 'n verwoede buffel bied nie. ✓

Soos gemeld, is die buffels 'addo' oftewel 'skoon buffels'. Laasgenoemde beteken dat die buffels nie draers is nie van sekere siektes welke kommersiële vee (beeste, skape, varke, ens) kan dood. Alhoewel die diere huidiglik nie die relevante siektes dra nie, is hul egter nie daarteen immun nie en kan 'n enkele besmette parasiet die hele groep besmet. Ten einde teen die besmetting van die diere te waak word streng ontsmettingsmaatreëls gevolg en elke voertuig wat die plaas betree moet 'n ontsmettingsprosedure ondergaan. Sou laasgenoemde prosedure nie gevolg word nie sal dit nie net kan meebring dat die kommersiële waarde van die diere drasties verlaag word nie, maar bepaald dat talle kommersiële vee in die streek kan vrek en verwoestende skade kan aangerig word. ✓

Laastens is dit doenlik om te meid dat die oprigting van torings sal noodsaak dat meerdere persone/instansies die plaas moet betree. Die kommersiële waarde van 'skoon' buffels wissel van R300 000.00 tot R6 800 000.00 elk. Inaggenome die hoë waarde van die diere en die ongetwyfelde risiko van 'poaching', sal dit genoodsaak dat enige en alle persone wat die perseel betree beide gemonitor en as te waarde opgepas moet word sodat diere nie gedood word nie. Duidelik is dit 'n onmoontlike taak vir ons om elke individu op die werksplek op te pas terwyl daar reeds vele ander ✓

take is wat op die ander plase verrig staan te word. ✓

2. Die plaas Silverton wat tans as wildplaas bedryf word, is dit egter ook hoogs vrugbare grond en kan dit maklik in plantasies omskep word. Sou 'n verdere kraglyn aangebring word, inaggenome die vereiste 'oop' areas om die lyn sal dit meebring dat 'n wesenlike gedeelte van die plaas onbruikbaar sal wees en sal ons deurgaans direk skade as gevolg van die kraglyn ly. ✓

Ek vertou dat jy bogemelde in orde sal vind en vra dat jy ons laat weet indien enige verdere inligting en/of redes vereis word.

**Mnr. L. Hinze**

**OBJECTION AGAINST THE PROPOSED CAMDEN – MBEWU 765KV POWERLINE.**

<b>TITLE</b>	Mr.	<b>NAMES</b>	Rudolf Friedrich

Welverdiend No 1 17077 Portion 0,1,2,3  
Scheepersrust 196 Portion 3  
Rondekopje 70

Concerns to all above:

1. Will have a negative impact on the Eco -system ✓
2. It will be an economic disaster on the timber farming aspect, regarding loss of forestry land, lost of plantation permits, the farms won't be longer economic viable units. ✓
3. The possibility for increasing spread of fire will increase dramatically. ✓
4. There won't be any benefit for the community; it will create job losses as a result of less timber plantations. ✓
5. The line is noisy ✓
6. The line will be very close to three residential sites. ✓
7. The paragliders won't be able to continue with their National championships in the Paulpietersburg area. ✓
8. The power line will be in danger for the vultures at Natal Spa. ✓

Welverdiend 208 Portion 0

Concerns.

1. As above
2. There is already a high voltage line crossing this farm. I definitely do not want a second line on my farm.

Thank you for the possibility to raise my concerns.

02 December 2010

TO WHOM IT MAY CONCERN

### CAMDEN – MBEWU 765KV POWERLINE

The following farms belong to us and have been implicated in the proposed routes for the above mentioned power line.

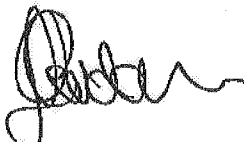

1. Kortbegrip
2. Koubad
3. Pivaansbad
4. Reddersdal
5. Roodeloop
6. Vrijwilliger
7. Wildgelegen
8. Zeerust

All the above farms are enclosed in an electrified game fence. This has recently been erected at a cost of R1.5 million. We are a registered game farm as well as cattle ranching – 1300 animals.

We have grave concerns as to the environmental and visual impact these lines will have and will be unable to continue our farming operation, if we are to sacrifice 2km of land on either side of these lines. There is also a whole community of people who will have to be relocated as they live directly in this 2 km demarcated area. Can these people remain where they are? What about health risks, line noise, fire ect. ?

We already have Eskom lines running through our properties and encounter security problems with entrance, gates left open, poaching and veld fires in winter. The areas proposed are in difficult terrain where no road access exists. This will need to be done for service maintenance and we are concerned about erosion and visual disturbance to the landscape and rivers.

Yours sincerely

CE JORDAAN

<b>DATUM</b>	06 Desember 2010	<b>PLAASNAAM &amp; BORSIE NO.</b>	Ostberg, Morgenson, Wonderfontein & Viljoensrust

**WIE DIT MAG AANGAAN**

My eiendom Ostberg, Morgenson, Wonderfontein en Viljoensrust gaan geraak word deur die AP - PO beplande kraglyn. Hiermee my reeds hoekom daar van 'n alternatiewe roete gebruik gemaak moet word.

1. Die ekosisteme sal beslis ge-impak word. ✓
2. Die visuele impak op die hele gebied sal groot wees en toerisme sal negatief beïnvloed word.
3. Vuurgevaar sal in die winter vermeerder met die sterk westewinde wat ons beleef. ✓
4. Daar is geen direkte voordele wees vir die my plaaslike inwoners nie, hulle sal bv. nie teen 'n goedkoper tarief krag bekom nie. ✓
5. Die krag sal nie "groen"-krag wees wat opgewek word nie of volhoubaar wees op die langtermyn nie. Dit sal bydra tot aardverwarming. ✓
6. Die lyn gaan ook 'n lawaai maak. ✓

Ek hoop u neem die bogenoemde punte in ag, sodra u u besluit neem oor die gepaste roete.

Basie dankie.

**CAMDEN – MBEWU 765 KV KRAGLYN**

Die bogenoemde kraglyn sal my plaas in onekonomiese eenhede verdeel en is alreeds verdeel deur vorige Eskom lyn en spoorlyn. Daar gaan piks vir my oorhly nie !

Die lyn gaan 'n GROOT brand gevaar in hou, wie gaan daarvoor verantwoordelik wees ?

Wie gaan baat by die Lyn ? Wie ons nie , ons het nie eers Eskom krag nie !  
Die lyn gaan baie lelik lyk en die hele ekosisteem verniel. ✓

Ek as eienaar is geheel en al gekant teen die krag lyn !

Ek hoop van harte dat U rede insien en 'n ander moete kies !

Amanda Klingenberg

Dear Madam

**PROPOSED 765 KV TRANSMISSION LINE: CAMDEN TO MBEWU**

I write this letter on behalf of RMN Family Trust and Schwarzwald Forestry (Pty) Ltd of which I am trustee/director and chairman of both.

The following properties are affected:

- Rondekopje No 70 – portions 1,2,8,9,14,15
- Halberton No 19 – portions 9,14
- Welverdiend No 17077 – portions 0,2,3

The RMN Family Trust is the title deed holder of these affected properties and the land is leased to Schwarzwald Forestry (Pty) Ltd.

The proposed powerline in the Paulpietersburg area will have a major impact on farming operations, especially forestry. This also applies to the abovementioned properties. ✓

The afforested areas which will have to be taken out, will cause a permanent loss for our forestry section, because no planting permits (water license use) will be allocated in future to replace the loss of area. ✓

Fire hazard in forestry during dry winter months, is already major concern and could be negatively impacted by the proposed powerline. Plantation insurance is presently a major cost in forestry and in our operation. A powerline could impact our risk profile and our ability to insure as well as increased premiums. The construction phase on its own will cause a major disruption in the affected plantation compartments with an additional fire hazard. ✓

The proposed line severely impacts on four households (myself, two sons with family, B Hambrook (lessee)) by being too close to present buildings as well as causing a negative visual impact. ✓

Formal and traditional labour housing for many employees and their families (approximately 300 people) will also be severely impacted because of possible relocations.

The Paulpietersburg/Lüneburg area is a growing tourism destination appreciated for its scenic views and one the few pristine areas left in the country. The Dumber Mountain is popular amongst paragliders and championships have been held in this area. A power line could make paragliding impossible.

I trust that these concerns and comments will receive the necessary attention. ✓

Yours faithfully

  
RM NIEBÜHR

<b>DATUM</b>	06 Desember 2010	<b>PLAASNAAM &amp; POSBUS NO.</b>	Vlakfontein 202 & Ontevrede 203

**WIE DIT MAG AANGAAN**

My elendom Vlakfontein 202 en Ontevrede 203 gaan geraak word deur die AP beplande kraglyn. Hiermee my redes hooftom daar van 'n alternatiewe roete gebruik gemaak moet word.

1. Die ekosisteme sal beslis ge-impak word. ✓
2. Dit sal die Bosboubedryf aansienlik ekonomies raak ook a.g.v. die langer produksieperiodes vir bome om te groei. Dit sal die toegestaande staatspermitte hektare beïnvloed en ons sal heelwaarskynlik nie tradisionele boomplantpermitte bekom nie, aangesien die wateropvangsgebied alreeds volgeplant is – volgens die Departement van Waterreue en Bosbou. Dit sal my boerderyeenheid ekonomies maak en die volhoubaarheid van boomproduksie op langtermyn negatief beïnvloed. ✓
3. Die visuele impak op die hele gebied sal groot wees en toerisme sal negatief beïnvloed word. ✓
4. Vuurgevaar sal in die winter vermeerder met die sterk westewinde wat ons beleef.
5. Daar is geen direkte voordele wees vir die my plaaslike Inwoners nie, hulle sal bv. nie teen 'n goedkoper tarief krag bekom nie. ✓
6. Die krag sal nie "groen"-krag wees wat opgewek word nie of volhoubaar wees op die langtermyn nie. Dit sal bydra tot aardverwarming.
7. Die lyn gaan ook 'n lawaai maak. ✓

Ek hoop u neem die bogenoemde punte in ag, sodra u u besluit neem oor die gepaste roete.

Baie dankie.

**OBJEKSIE TEEN DIE VOORGESTELDE CAMDEN – MBEWU 765KV KRAGLYN**

<b>TITEL</b>	Mr.	<b>NAME</b>	Johannes Abraham
<b>VOORLETTERS</b>	JA	<b>VAN</b>	Scheepers
<b>ORGANISASIE</b>			
<b>ADRES</b>	Posbus 273 PAULPIETERSBURG	<b>KODE</b>	3180
<b>TELEFOON NR</b>	034 – 995 0406	<b>FAKS NO.</b>	034 – 995 1795
<b>SEL NO.</b>	082 419 0234	<b>EPDS</b>	
<b>DATUM</b>	06 Desember 2010	<b>PLAASNAAM &amp; PORSIE NO.</b>	Rondekopje Porsie no.

**VOORGESTELDE CAMDEN – MBEWU 765 KV KRAGLYN.**

My redes om nie die roetes te volg nie is soos volg (Bala duur roete):

1. Dit sal die Bosboubedryf aansienlik ekonomies raak ook a.g.w. die langer produksieperodes vir bome om te groei. Dit sal die toegestaande staatspermitte hektare beïnvloed en ons sal heelwaarskynlik nie addisionele boomplantpermitte bekom nie, aangesien die wateropvanggebied alreeds volgeplant is. (Volgens Dept Waterwese en Bosbou). My eenheid sal onekonomies gemaak word en die volhoubaarheid van boomproduksie op langtermyn negatief beïnvloed.
2. Ek is bekommerd oor die vuurgevaar in die winter met die verskriklike sterk westewinde wat ons beleef.
3. Daar sal geen direkte voordeel wees vir die gemeenskap nie, m.a.w. ons sal nie teen 'n goedkoper tarief Eskom bekom nie.

Ek hoop u vind die bageoemde in orde.

SILVERTON PLAAS  
PAULPIETERSBURG  
3180

**BESWAAR TEEN CAMDEN-MBEWU 765 KV KRAGLYN**

Hiermee wil ek skriftelik beswaar aanteken teen bogenoemde lyn , AP LYN, wat beplan word om oor my gronde te loop.

Ek boer op SILVERTON 21 gedeeltes 5&7 in die Paulpietersburg distrik en die be-oogde lyn loop oor my gronde. Volgens die kaarte tot ons beskikking loop die lyn reg deur my bloekomplantasies wat vir my onaanvaarbaar is. Die oppervlakte wat geraak word is +/- 100ha bloekomplantasies.

My besware is as volg:

1. inkomste verlies deur bome wat geraak word deur beplande lyn, nie net huidige, maar ook in die toekoms.
2. bome wat geraak word so inkomste is totaal verlore en kan nie vervang word om te kort aan te vul nie
3. boer in area waar geen verdere uitbreidings in bosbou toegelaat word nie, geen verrens permissie beskikbaar nie ✓
4. my totale inkomste begroting draai om bosbou en deur die beplande kraglyn gaan daar 25% van my boerdery tot niet
5. my grondwaardes sal negatief beïnvloed word deur bogenoemde lyn
6. verhoogde brandgevaar ✓
7. daar loop reeds 'n 400 kv kraglyn op die plaas . hoekom word die lyn nie vervang met be-oogde 765kv lyn nie ✓
8. daar is al soveel negatiewe berigte rakende eskom, ek kan nie toelaat dat die lyn wat krag gelei wat uit vuilopwekkingsmateriaal verkry word deur my gronde loop nie
9. Ons eie kraglyn, wat krag hevat wat skoon opgewek is met hidro, gaan ook geraak word deur die be-oogde lyn wat bo-oor ons lyn loop

Ek wil hiermee afsluit my gronde word al klaar beïnvloed deur 'n 400kv lyn en twee spoorlyne wat daar deur loop en ek praat uit ondervinding oor probleme wat ek as boer onder vind met sulke servitute en die invloed daar van op my besigheid ✓

Ek kan nie toelaat dat ek nog 100ha se inkomste verloor nie.

Ek pret by ESKOM om te besin voor daar voortgegaan word met die geplande lyn , ekonomies trek ek as boer swaar en die projek voorspel net ekonomiese ram aspoed .

Die Uwe

Jan van Romburgh

- Rem. Van Marzana of Traktaat 200.
- Sub A van Lot 4 van Voorkeurplaats 332.
- Rem Lot 4 van Voorkeurplaats 332.

Sorge oor die kraglyn:

1. Die voorgestelde 2 km servituut beïnvloed ons en die gemeenskap wat op die plaas woon. Ongeveer 26 gesinne.
2. Die konstante gebied wat die kraglyn sal afgegee sal 'n steuring wees.
3. Ekos'stome – "Wetlands", Bloukransvoëls wat bedreig word deur die kraglyn, Sekretarisvoëls en Aasvoëls.
4. Kommer oor die impak wat die lyn oop die vee sal hê. Die magneetveld wat veroorsaak word deur die lyn.
5. Hoe gaan julle ons verged vir die bome:
  - a. Verlies van inkomste vir die staande bome en vir die toekoms.
  - b. Die verlies van die permltte a.g.v. die kraglyn en die servituut.
  - c. Die kostes wat met die aansoeke om permltte te kry vir die skuiving van die bome.

Ek hoop u vind die bogenoemde in orde.

<b>DATUM</b>	06 Desember 2010	<b>PLAASNAAM &amp; PORSIE NO.</b>	Rooipoot 190 porsie 1

As eienaar van die Plaas Rooipoot 190 gedeelte 1 maak ek beswaar teen die oprigting van die kraglyn wat beplan word om oor my plaas te loop.

Ek is 'n wildeboer en my plaas is met hoë koste wildwerende heining omgeëp. Hierdie kraglyn sal oor 'n deel van my wildekamp loop en dit sal gevaar inhou en moontlik skade of dood aan my diere veroorsaak. Dit sal groot onkoste behels as ek die wildekamp kleiner moet spaar om Eskom te akkomodeer en dit sal ook die gebied waar die wild kan beweeg wat reeds beperk is, nog meer beperk en dit is tot nadeel van my wild.

Verder moet Eskom dan ook besef dat om op 'n heining te skuif 'n groot gevaar inhou dat daar tydens die proses van my wild kan uitkom. Dit sal onaanvaarbaar wees.

Geliewe dan my petisie teen enige span van kraglyne aan die betrokke partye oor te dra.

Byvoorbate dank

**Subject:** Re: Environmental Impact - CAMDEN-Mbewu Transmission Line

Hi Anelle,

There is some confusion about the required date of submission.

The registration and comment sheet attachment sent to me says "please complete by 5 November 2010", which I have completed and returned to you as requested.

I also forwarded my information to Wakkerstroom based organisations as requested in your correspondence.

However the same registration and comment sheet document in your attachment in this letter today says " please complete by 5 December 2010".

That's why there is a query regarding the availability of the information pack from the local library at this time.

Regards

Roland Stone

Dear Mr Wischhausen

As already explained to Mr Lawlor this morning the notice that we have sent out to you clearly stated that the document is only available between 8 November and 8 December 2010. Please find attached again the notice as well as the Summary of the DSR.

We will appreciate your registration. The Full Draft Scoping Report will also be published on our web site (see information in the notices that was sent out on 22 October) as from 8 November 2010. You are welcome to download a copy.

Kind regards

**Subject:** Environmental Impact - CAMDEN-Mbewu Transmission Line

Dear Florence,  
dear Anelle,

reference is given to the ENVIRONMENTAL IMPACT ASSESSMENT (DEA Ref No 12/12/ 1774) for the proposed 765 KV Camden - Mbewu (Theta) Transmission Line.

\* I regret to advise that the copy of the draft scoping report contrary to you publication has **not been available as per today in the WAKKERSTROOM Public Library.**

Please look into this matter; possibly you can arrange a copy of the draft report to be send to my postal address which is listed below.

I am the Chairman of the the WTA - Wakkerstroom Tourism Association and we will register as interested party within the next 2 days.

We shall appreciate your help and assistance in this matter. In case of questions, please do not hesitate to contact me on my mobile - 079 637 62 77

Best regards

Hans Wischhausen

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment: One of the line routes (AM) is located on the periphery of the recently declared Kwamandlangampisi Protected Environment (KPE) (declared in September 2010) and thus should not go through the declared area at all due to numerous biodiversity concerns as well as the destruction of the aesthetic beauty of the area (in addition the area, being a declared Protected Environment, has clear restrictions on developments of the nature being proposed). The proposed line (AM) would also impact on future expansion intentions for the KPE and thus should not be located anywhere near the Luneburg area.

The route proposed through the town of Wakkerstroom (BK) is of serious concern given that the town is an international tourist destination and is thus reliant on the self evident natural beauty and viable bird populations that draw such tourists. Any large power line through such an area would pose major threats to such bird populations and furthermore diminish the aesthetic appeal of this unique destination. This has major implications for the only established tourism destination in the Pixley Ka Seme district municipality and must be avoided at all costs. The areas is also earmarked for further protected area expansion in the near future and thus best avoided.

The powerline route though Volkrust (BC) is probably the best alternative at this point but further detailed studies are needed to ensure minimal environmental impacts

.....  
.....  
.....  
Any other comments:

I attach the government gazette notice of the KPE for your information.

Inkozi D. Zondo

Dear Anelle Lotter

This letter is a letter for your special attention. This letter is on behalf of our inkozi DV ZONDO and our community of SWART-MFOLOZI. We all live in a wonderful area called SWART-MFOLOZI. It is a rural area with great opportunities. In our area is a substation that is not named on your map called UITKOMS SUBSTATION AND IT'S ON THE ALFA RURAL NETWORK RUNNING FROM LANGKRANS. I am the manager at my father (Lodewyk van rooyen) shop in Swart-Mfolozi. He has been in this area for over 40 years and I myself 10 years. We serve our customers with great passion and pleasure.

Therefore we would like to develop the area with electricity.

There is a great need for the privileges for PAY AS U GO or other kind of electricity. The residents are more than willing to buy there Eskom electricity for the use at their own homes.

There are surplus lines that can be utilize for the use of electricity. We are taking the opportunity to present to u all the names that are interested to apply for the electricity.

It would be much appreciated if u can take this to hart and help our people to enjoy the future with electricity and the privileges to use it in there own homes.

I have received the registration and comment sheet on the 12-10-2010. I already have names and ID numbers of 500 people that is attached to this letter.

Yours sincerely  
The van Rooyens.  
(karlien van rooyen)

Dear Ms Lötter

**ENVIRONMENTAL IMPACT ASSESSMENT (DEA REF NO. 12/12/20/1776) FOR THE PROPOSED 765KV CAMDEN-MBEWU (THETA) TRANSMISSION LINE**

Your letter dated 06 October 2010 has reference.

Transnet Pipelines (ex-Petronet), a division of Transnet Limited, has no objection in principle to the proposed 765KV transmission line that may criss-cross the 457,2mm and 406,4mm diameter pipelines within Transnet's 9,14m and 6m wide pipeline servitudes respectively as indicated on your route plan number PROJ CODE: ZPJ12619 Ver 2, subject to compliance to our standard crossing conditions and requirements. We have included copies of cadastral plans depicting our pipelines route which may be affected by your proposed alternative routes.

This authority to proceed shall only be valid for 12 months from the date of this letter. If it is envisaged that the work will commence at a later stage an extension of time must be requested timeously.

**CONDITIONS**

Prior to commencement of the work it is required that a representative of Transnet Pipelines be present to indicate the position of the pipeline and to undertake any work on Transnet's pipeline that may be necessary. In this connection our **Servitude Supervisor, Mr Leon Oelofse must be contacted at (034) 989 9220 or 083 288 8897 at least 14 days before the date on which you wish to commence the work in the vicinity of the pipeline.**

Arrangements will also be made to visit the site periodically whilst the work is in progress. Should the work be undertaken without Transnet Pipelines' representative being contacted as mentioned above, Transnet Pipelines reserves the right to request that you expose the pipeline at your cost in order that an examination can be made for possible damage.

The attached standard crossing conditions and requirements for overhead cables and additional overhead cables must be complied with.

A division of	202 Anton Lombard Street	P.O. Box 3113

\*Executive British

[www.transnet.net](http://www.transnet.net)

Group Company Secretary: A Cobe

Heavy plant or mechanical driven equipment (for example, excavator) shall not be used in the pipeline servitudes. All excavations must be done by hand. Hand-held compactors shall be used in the servitude area.

It is imperative that our representative must be contacted before work commencement to determine our pipeline levels and also assist you with our pipeline related information. It is also important that our representative must witness and approve all the crossings/works. Please be informed that in the event of damage of our pipelines, repair costs will be to your account.

On completion of the work you are required to return a copy of this letter to our office, duly endorsed and signed by your site representative as well as Transnet Pipelines' representative that the work was satisfactorily completed and conditions adhered to.

Yours Sincerely

## **ADDITIONAL OVERHEAD CABLES CONDITIONS FOR TRANSMISSION POWER LINES – 88kV AND ABOVE**

1. Where high voltage lines of 88 kV and higher cross and/or run parallel in close proximity to Transnet Pipelines tests must be done to measure the magnitude of AC and DC Interference on Transnet's pipelines.
2. AC and DC voltage recordings must be done on Transnet Pipelines before construction work begins over the pipeline at a pipeline test point to get a footprint of the "before" AC and DC voltage levels on the pipe.
3. A test point will be required to be installed at the point of crossing and/or where the transmission line converges on and diverges from the pipeline route if no test point already exists, and to be done at the applicant's expense.
4. Transnet Pipelines staff will supply the necessary material and do the installation of the test point at the applicant's expense and the applicant will supply the labour to expose and backfill the pipe for the test point installation.
5. Once the line has been energized Transnet Pipelines will do AC and DC recordings of the pipeline to ascertain if there is any interference on the pipeline.
6. The Applicant will be required to implement mitigating measures at the Applicants expense if it is found that AC and DC interference and / or induced current/voltages exceed those levels as contained in NACE Standard RP0177-2000 and ISO 15589-1 or if it is considered necessary by Transnet Pipelines.
7. Any AC mitigating installation must be designed by a suitably qualified Cathodic Protection Consulting Engineer and installed by a suitable CP Contractor at the Applicants expense.
8. On completion of the installation further tests will be done to ascertain whether the requirements have been fully met.
9. If the installation does not meet the requirements further investigations and remedial action is to be taken at the Applicants expense.
10. These requirements are in addition to any other Transnet Pipelines requirements and do not replace any other requirements.

**ANY UNAUTHORIZED ACTIVITIES WITHIN THE PIPELINE SERVITUDE IS STRICTLY PROHIBITED. APPLICATION TO CARRY OUT ANY WORK WHATSOEVER, WITHIN A TRANSNET PIPELINE SERVITUDE, MUST BE MADE TOGETHER WITH DETAILED PLANS IN TRIPLICATE, TO:-**

**Servitude Manager  
Transnet Pipelines  
P O Box 3113  
DURBAN  
4000**

**TRANSNET PIPELINES STANDARD CROSSING CONDITIONS AND  
REQUIREMENTS FOR OVERHEAD CABLES**

1. No foundations or structures shall be erected on, over or across the pipeline servitude/s, nor shall any stays etc. be anchored inside the pipeline servitude/s. It is, however, preferred that these structures should not be erected within 15m from the pipeline/s.
2. In the interest of safety it is recommended that distinctive markers, clearly visible from both directions shall be provided for cables and towers higher than 20 metres so that a pilot will readily see the powerline during aerial inspections.
3. Any interstructure earth continuity conductor shall be insulated from the structure for a distance of at least 800m on either side of the pipeline/s measured perpendicular to its axis/their axes. The conductor may be "spark-gapped" at the structures if required.
4. Should authorisation be granted that work may proceed, Transnet Pipelines' representative must be contacted prior to any work being undertaken within Transnet's pipeline servitude/s. Details of contact person will be furnished when application is made to carry out work.
5. Transnet shall not be liable for any damage, including consequential loss or damage whether direct or indirect which might be caused to the applicant's service during normal operations, routine maintenance and repairs to the pipeline/s.
6. (a) The APPLICANT shall and hereby does indemnify TRANSNET against -
  - (i) any damage to TRANSNET'S own property, whether movable or immovable, including any consequential damage directly flowing from physical damage to any such property;
  - (ii) liability in respect of any damage to the property, whether movable or immovable of the APPLICANT or third parties;
  - (iii) liability in respect of the death of or injury to any employees of TRANSNET or the APPLICANT or any third party;
  - (iv) any legal costs or expenses reasonably incurred in connection with claims or actions arising out of any of the foregoing;

whenever such damage, injury or death is due to or arises out of the construction, installation or existence of the WORKS or any portion thereof, or the use thereof by the APPLICANT, provided that the APPLICANT shall incur no liability for any damage, injury or death which is due to wilful misconduct or gross negligence on the part of Transnet or any of its employees.
- (b) TRANSNET shall notify the APPLICANT forthwith of the occurrence of any damage or the receipt of any claim or damage for or against which the APPLICANT is prima facie liable to indemnify Transnet in terms of paragraph (a) of this clause and shall, in respect of such claim or demand abide by the directions of the APPLICANT as to whether and on what terms it shall be settled, compromised or contested, it being understood and agreed that whatever action may be taken by Transnet pursuant to such directions of the APPLICANT shall be at the APPLICANTS risk and expense.

**ANY UNAUTHORISED ACTIVITIES WITHIN THE PIPELINE SERVITUDE IS STRICTLY PROHIBITED. APPLICATION TO CARRY OUT ANY WORK WHATSOEVER, WITHIN A TRANSNET PIPELINE SERVITUDE, MUST BE MADE, TOGETHER WITH DETAILED PLANS IN TRIPLICATE, TO:-**

**Subject:** FW: EIA for a proposed 765kV Camden-Mbewu power line  
**Attachments:** Alternatives.pdf; Announcement letter - English.pdf; BID - English.pdf; Comment sheet (2).docx

Dear Anelle,

As invited in a recent advert in the media, we hereby wish to register as Interested and Affected party for the E.I.A. for this project.

We also use this opportunity to include and invite a member of the Zululand Energy Forum to note and participate in the process, and register their interest with you.

Without having studied the information, we are curious as to the status of the EIA study which is currently being undertaken by ESKOM which we understood was nearing completion. (The EIA was called "Umfolazi - Empangeni 765kV EIA" which process was facilitated by Karin Bowler Enterprises, and which seems to be a duplication of your study, albeit that your study covers a much wider area.

Trusting that this would be in order, we look forward to being updated on further details on and participating in the project/process and receiving notice of meetings, etc.

Regards

Frans van der Walt

**Subject:** EIA for a proposed 765kV Camden-Mbewu power line

Dear stakeholder:

Please find attached an introductory letter, Background Information Document, a map and a comment sheet to announce to you the Environmental Impact Assessment (EIA) that is being undertaken on behalf of Eskom for the proposed 765kV power line from Camden substation (Mpumalanga), near Umelo to Mbowu (Theta) substation near Empangeni (KwaZulu-Natal).

Several alternatives are being investigated and we would like you to become involved as an interested and affected party to provide your comments in this EIA. Please be so kind as to complete the attached comment sheet – sending a completed sheet back to us will indicate that you would like to be involved and that we should send further information to you.

The documents attached are available in Afrikaans and Zulu – should you wish to receive copies, please let us know. Alternatively you are also welcome to visit the web site of Eskom or our company web site to download the information <http://www.zitholele.co.za/camden-theta> or [www.eskom.co.za](http://www.eskom.co.za)

Please watch your local press as advertisements announcing the EIA are being published. Our team is also putting up site notices and handing out Background Information Documents along the proposed alternative routes this week.

We will appreciate your assistance to "spread the word" about this EIA – please forward this to your colleagues, other members of your organization, neighbours and friends.

Should you have any questions, please do not hesitate to contact us.

Kind regards

**Subject:** Fw: Proposed 765kV Camden

Hi Anelle,

As I progress in discussions with my neighbors regarding this proposed transmission line corridor over the Wakkerstroom municipal townlands, other matters come up which I have added to my document below concerning our joint water rights from natural water springs on each others' properties which we draw from each other and which could be closed off or damaged by heavy earthmoving equipment or tower foundations on each others properties. I have added other mailers as well.

I will forward updates to you as and when they arise, ahead of the November 8th meeting

Thank You

Roland Stone

**To:** Anelle Lötter  
**Sent:** Thursday, October 28, 2010 4:09 PM  
**Subject:** Proposed 765kV Camden

Proposed 765kV Camden-Mbewu (Thato) power line  
Over Wakkerstroom Townlands (Marthinus Wesselstroom 121 HT)  
Objection issues raised by R.A. Stone ( Portion 131 of the Farm Townlands of  
Marthinus Wesselstroom, 25ha in extent) who's property lies totally within the  
proposed corridor

There are certain flaws perceived in the proposal, apart from other real issues.

1. The Wakkerstroom Townlands is not open farmland. It is a growing residential (at least 12 main dwellings and other buildings affected within the 2km corridor as featured) and in some cases commercial and business dwellings (2 x tourist hotels are either within sight of, one is totally within the proposed corridor). It will cross over existing small-holding dwellings.
2. The map used to draw the proposed corridor was presumably the South African Map Office 2730AC (1:50000) which is out of date having being last drawn up and printed in 1989 (21 years ago), the extent of the current smallholdings and dwellings are not featured on the proposed corridor map which you present and therefore assumed in the proposal to be open undeveloped areas. My particular property is shown on your map as Nellies Park, now five times bigger, where I have three dwellings and a few sheds and garages, 3x dams, new boundaries, trees and water storage tanks and roads and an HF radio tower. Other dwellings and properties owned by other people in the neighborhood are also not shown on your map.
3. Any path inside the proposed 2km wide corridor will directly impact either on dwellings or commercial and tourist activity and will necessitate

the removal or vacating of dwellings, noting that many established windbreak trees and some parts of these dwellings are about 100 years old, as the town has already celebrated its 150<sup>th</sup> anniversary.

4. The visual effect of this power line system running over our properties or being visible from other establishments is totally unacceptable.
5. The Wakkerstroom Wetlands is already a protected area. Mpumalanga Parks and Tourism is almost complete with having it registered also as a world heritage UN Ramsar site, due to its significant ecological importance, crane and other bird habitat and flight paths.
6. Eskom has already opted to sidestep this route at the last proposal (about two years ago) to locate rather to the existing corridor at Volksrust. This was in respect of the new 765kV Majuba/Ulundi line.
7. There will be a direct impact on the landing and take off of aircraft from the Wakkerstroom airfield, which is shown on your drawing.
8. There are not enough 25Ha plots available in Wakkerstroom to enable a relocation of the affected smallholders into an equal situation ahead of the commissioning of the new line.
9. The Wakkerstroom townland smallholdings in general have surrounding rented town-lands attached to them, on which various subsistence farming and grazing takes place. A loss or impingement on dwellings and farm buildings will be a real problem as owners normally prefer to live within sight of livestock in order to feed, enclose and protect them as the area has a high fire danger, risk of sickness and theft. The footprint of operations around dwellings and potential loss of buildings and dwellings is therefore a significant factor.
10. The question of recompense is therefore not a simple matter of worth of a few buildings on apparent open farmland. This potentially means the re-creation of whole new estates. These costs are far higher as they involve the reconstruction of the same standards of like-for-like dwellings, garages, workshops, and other buildings and facilities, sewerage disposal systems, water storage, development of subterranean springs, water reticulation pipelines, irrigation and enclosed veggie production areas water and cleaning systems, electrical re-supply and reticulation, multi-dwelling, other garaging and parking and paved areas, windbreak planting, paddocks and fencing, free of cost access to fresh water springs and new water borehole stand-by systems, new roadways and dams which in themselves now may now require EIA's of their own, as well as property transfer and other relocation costs involving livestock and personal effects, new furnishings and loss of income as well as temporary rental costs while the reconstructions take place. In some cases these buildings and facilities that are threatened have been constructed to luxury standards, in excess of R10000 per sq m, in the fairly recent past.

11. Studies regarding the possible serious health effects on people and livestock are yet to be determined. Until there is a definitive outcome to these studies it will not be possible to accede to this impingement.
12. Once we allow a corridor to come in over the Wakkerstroom Townlands we will in effect give the go-ahead for this corridor to be filled with further overland transmission lines, which is likely to happen once Durha or other new ones comes in operation in 2012, which is totally untenable to local residents and to Avian Tourism and other visitors.
13. Reports indicate that the current Volksrust corridor space is under-utilized. There are currently two lines within it, both running to Kwa-Zulu Natal. One is a 765kV, one is a 400kV.

The 765kV presently has only 400kV running on it (awaiting certain transformers) and the other line is at 400kV. Can the new 765kV towers not be converted into a double structure, and could the existing 400kV line not be replaced with a 765kV system ?, built into a double structure . Or is there not space enough to put in a third transmission line within the existing 2 km wide corridor ? Potentially therefore the existing corridor could carry at least an additional 765kV capacity, if not 2 x 765kV more.

The existing Volksrust Corridor already has all the access roads, EIA process and reports, geological and other detailed knowledge as well as all the access roads, rights of way, construction experience etc etc.

14. There is storage and distribution of approximate 2000kg of LPG in cylinders on my Smallholding 131, lorries arriving and departing.

15. I am a licensed Radio Ham (ZS6ROC) and operate a base radio station from the main dwelling on smallholding 131, on HF, VHF , UHF and AM , including aircraft bands. I located here to enable the erection of the radio tower and to operate unhindered and free from interference of power lines etc. An overland 765kV power line running over or near the main dwelling would close down this radio station and force me to relocate, at an additional expense and inconvenience.

16. There is a symbiotic relationship between the smallholdings on the Wakkerstroom town-lands which is bound both in each other's title deeds and in practise which may be irrevocably damaged by the use of heavy earthmoving machinery and by the digging and placing of concrete foundations. For example my particular townlands smallholding portion 131 has bound rights to provide water and or to receive water from my neighbour portion 127 ( shown on you map as "Bergsig") and to others ,because our locations are at altitudes higher than the municipal water reticulation systems can provide . (we receive no municipal water services and have to rely on our own springs). Our dually supplied portion 131 main water supply emanates mainly from "Bergsig" via tanks, pumps and underground pipelines. In turn there are gated access points

between these two properties to let through livestock twice daily to graze on each others' land in order to also share the grazing resources. If the owner of Bergsig had to vacate his portion, we would have no fresh water to run our own household, veggie production and to feed our livestock, as he provides most of the pumping, raised storage and distribution infrastructure for portion 131.

17. There are Zulu speaking land owners and occupiers of smallholdings and other townlands in your proposed corridor at the Walkerstroom townlands who need to be personally visited and spoken to about this proposal because some are functionally illiterate and have not had posters posted on their boundary fences and who would not be willing to walk the several kilo distance across hillside footpaths into town at night to attend your 18h00 meeting on the 16th November. They would also be directly affected.

18. We are very concerned about the fact that it is likely that we will have to relocate/sell out and that we will lose our financial resources and retirement savings, all

spent on this property in the past seven years or not be paid out ahead in time or be able to recover from this loss at all and also the damage to our location and

lifestyle, not to develop further our planned larger dams and tree windbreaks or the further development and introduction of other new animals onto this property

and the new additional guest accommodation being considered for the future. We may not even be able to re-establish ourselves on a like-for-like basis in this

area again and may have to find another place to live and therefore migrate to elsewhere in South Africa at higher costs, as we are not originally from this area.

There are no assurances given that we will be compensated or reallocated new estates and facilities equal to or better than we presently hold in this

event and there is also the unknown resultant future, including issues of Receiver of Revenue dues and implications if capital gains is recovered on this transaction but

not immediately spent. There are all the other costs of property and asset re-registration and transfer and all the costs of transfer and relocation of people,

moveable assets and livestock, apart from the reconstruction and re-building our lifestyle and facilities elsewhere in South Africa as there are a limited number of

fully developed luxury 25 Ha smallholdings/estates available in this town. Also what happens if we have to move to an area with higher costs of living, insurance

costs, rates and taxes and labor costs , or one which does not have the facilities or infrastructure which we require in order to be living at the same standard of

living including travelling costs etc. these are some of the social costs which we are also concerned about in this outcome and not discussed in your documents. We will not be able to financially recover if we had to be paid out an arbitrary evaluation fee just on the on land and buildings assumed value.

Subject: ESKOM LINES EMPANGENI TO MIDDLEBURG: Section NL

Hi Anelle

I have seen the notice attached to a sign on our District Road D135. From the map it appears that the line (or section) NL would be through our valley.

This is not the first time Eskom had suggested this as a route for power lines to interconnect their grid. With seemingly easier alternatives, where lines already run, I fail to understand their persistence.

In January 2002 I drew up a report for the company doing the EIA, when Eskom last attempted a proposal to build a line through our property. In view of the valuations we have recently had done I have amended the report slightly to reflect the current situation.

In summary:

1. We are in tourism and our marketing for 20 years has reflected the pristine nature of our property. The construction of a power line will severely impact on this.
2. Our property is one of the biggest Natural Heritage Sites in private ownership. If Eskom constructs this line, it will discredit Government's commitment to this project.

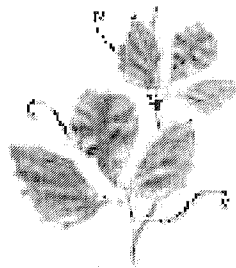

In addition, our properties have just been valued at R22 million rands (excluding the business value, the value of the game and the value of the moveable). The business was valued in 2006 at a further R5 million then. I believe the new expropriation act suggests that any expropriation, if it affects the business, requires that the entire property be purchased. If Eskom is prepared to settle for R30 million, they would be welcome to put the line over our property. If not, we will take whatever action is available to contest the construction of the line.

I would appreciate confirmation of receipt of our submission.

With my best wishes and God Bless  
John

Dr John Turner

**CONTENTS**

1. INTRODUCTION	1
2. CONSERVATION PERSPECTIVE	1
3. BUSINESS PERSPECTIVE	3
4. FEASIBILITY AND ALTERNATIVES	4
5. REGIONAL AND POLICY CONSIDERATIONS	4
6. CONCLUSION	4

## 1. INTRODUCTION

Eskom is currently doing a feasibility on a proposed route for a power line and a number of options have been proposed, including routes over the properties of the Turner Family Trust.

## 2. CONSERVATION PERSPECTIVE

There are several compelling reasons from a conservation perspective why a power line should not be built through the properties.

- a. The farm Goudhoek was proclaimed a Natural Heritage Site (No. 30) in 1986 under the South African Natural Heritage Programme (SANHP) run by the Department of Environment Affairs in recognition of sites of extreme conservation significance on privately owned land. One of the numerous reasons for the proclamation of "Goudhoek" as a Natural Heritage Site was its pristine vegetation and outstanding scenic beauty. In 1983 we purchased a small section of "Nonpareil", also proclaimed a Natural Heritage Site (No. 227) in 1995. In 1997 we purchased the farm "Paardeplaas", which was incorporated into Site no. 30 in 1988 (refer to map areas outlined in dark green). The farm Langkloof/Winterkamp was purchased in June 2003. Since the proclamation of "Goudhoek" as a Natural Heritage Site in 1986 the focus of management has been even more towards conservation than it had previously been. In light of our primary objective, one of the management goals is to turn the properties into a private game reserve, at present capital being the limiting factor. That this is our intent is manifested in the management of the properties.
  - i. Impala were first introduced in 1975.
  - ii. We immediately terminated the cultivated pasture intensification programme that was embarked upon and let all cultivated pastures revert back to veld when "Goudhoek" was proclaimed a Natural Heritage Site in 1986.
  - iii. We established a guest lodge using the existing farmhouse as the basis for this in 1991. We did this:
    - iv. because of an expected reduction in environmental impact that this would have compared to even extensive cattle ranching;
    - v. despite the fact that the prospects of success in tourism were more bleak than ever in the history of our country.
  - vi. We acquired the farm "Paardeplaas" as a key for the introduction of game since the area where game would most likely establish straddled the boundary between the two farms.
  - vii. We started dismantling of fences on the property since 1995 in preparation for game reintroduction and discontinued cattle ranching in 1986.

- vii. We started a game reintroduction programme in 1998, having since then purchased Zebra, Red Haartebeest, Warthog, Wildebeest and additional Impala, at a total cost of R 140 000.
- ix. In 2003 we acquired the farms Winterkamp/Langkloof to facilitate catchment management which is threatening the head of the valley and therefore also the pristine nature of the valley.
- b. Conservation ethic has always been the guiding philosophy in managing Bahenango Valley since the first farm "Goudhoek" was acquired by our family in 1964. My father always won the district soil conservation awards year after year during the late 1960's and early 1970's when the farmers association made these awards. In 1989 he was runner up of the prestigious Grassland Farmer of the Year awards from the Grassland Society of South Africa. He started with a game reintroduction programme in 1975 with the introduction of Impala purchased from the then Natal Parks Board. The properties have been involved in the conservancy movement throughout the 1980's and the properties were registered as a stand alone conservancy, established in 1990. Our current management objective is:
 

**To transform the properties owned by the Turner Family Trust into a Private Game Reserve and to manage them so that they revert to a pristine condition - to a point where they become a true wilderness.**

A Power line through the property would negate this management objective.

In the broader picture there are three reasons.

- a. The sites "Goudhoek" and "Nonpareil" form part of a cluster of 6 (six) natural heritage sites in the area, including the farm "Nonpareil" owned by Mr Viljoen and the farm "Scheepershok" (Eagles View) owned by Mr Oldenburg, both which adjoin our properties. A power line will negatively affect the pristine nature of the area. This will make a mockery of the SANHP because it will breach the spirit of the programme in which Government and land owners have agreed to the conservation and preservation of these sites.
- b. KZN Wildlife in 1995 proposed a biosphere for the area, hinging on the KZN Wildlife field training centre at Ntini. The farms "Hartstogt" and the remainder of "Goudhoek" were expropriated in 1989 and signed over to the then KwaZulu Bureau of Natural Resources to extend the area of the field training centre making a Biosphere a real possibility. (I have heard that a land claim has been lodged in an attempt to stop the extension of the field training centre so the issue of the biosphere needs only to have this obstacle cleared before it can continue.)
- c. On a local level, Government (Amafa KwaZulu-Natal) has at the cost of millions embarked on the emaKhosini project. They will attest to the difficulties in establishing and drawing tourists to the area. I cannot believe that a Power Line would be built through a property where an existing successful and expanding tourism enterprise is established, particularly if feasible alternatives are possible.

### 3. BUSINESS PERSPECTIVE

We have developed a strong tourism business since 1991. The original farms "Goudhoek" and "Nonpargil" were zoned for recreation development in October 1997. We have obtained forms in preparation for application to re-zone "Paardeplaaf" and "Winterkamp/Langkloof" for recreation development as well. There are currently five tourism and recreation developments and operations on the properties.

- a. Babanango Valley Lodge, an upmarket guest Lodge of 9 rooms (sleeping 21 guests) catering largely for an exclusive international clientele attracted by our proximity to Isandlwana, Rorke's Drift and the Zulu historical sites and which brings in more than R1million in foreign revenue annually and set to continue to grow.
- b. Rock Pools Bush Camp, a more middle market accommodation facility catering for the budget international traveller as well as the South African family market. With 9 units (sleeping 18 to 36 guests) the potential for this in generating foreign exchange is similar to that of the Lodge. This development has recently received approval from the DTI under the new Tourism infrastructure development incentives scheme.
- c. An Environmental Education Centre which caters for more than 8000 school children annually, one of the most successful EECs in KwaZulu Natal with an excellent reputation for food, facilities and the courses we present.
- d. A Zulu Heritage Village has been established and is operating as a community project in conjunction with a community living on a property adjoining "Winterkamp/Langkloof" (a portion of "Langkloof"). The Turner Family Trust provided R50 000 funding for the construction, the training and programme development and the community is benefiting from the proceeds of visitor fees.
- e. We have allowed limited hunting over the last three years as a game management tool, which has provided a small but significant source of revenue.

The first three businesses provide a combined employment of 35 permanent staff and has provided substantial casual labour to many locals during major development phases over the last 6 years. The Zulu Heritage Village is benefiting the community involved with prospective employment for a further 30+ people as well as the additional potential to make and sell crafts. These operations combined probably place us as the biggest employer in Babanango, excluding forestry.

In addition to these established businesses, two additional businesses are in the process of establishing.

- a. We are developing horse riding trails, to be conducted through our properties with overnight facilities in east African Safari Style camps. This development could prospectively create work for an additional 8 people.

- b. We have pioneered a bush school programme where school groups stay for extended periods. In 2003 we ran two groups and this year both schools booked again and two new groups have booked, totalling 4 groups. If this takes off it will necessitate the construction of a facility to accommodate these groups to run these specialist programmes. This development will create permanent employment for at least 12 additional people and a great deal of temporary labour during construction.

The prospective development of power lines through the properties of the Turner Family Trust, which span the Valley, will spoil the pristine nature of the area. We believe it will have a large negative impact on our business.

#### **4. FEASIBILITY AND ALTERNATIVES**

We believe that there must be alternatives. There are already routes that have power lines, as suggested by your map. There must be routes through ecologically less sensitive areas, although we have not investigated these ourselves.

#### **5. REGIONAL AND POLICY CONSIDERATIONS**

It is difficult to believe that a power line will be constructed when the commitment to tourism and conservation as a means of economic growth has been so strongly endorsed at both National and Regional level. This will fly in the face of such policies and be a severe blow to confidence that Government is prepared to endorse its policies. I have seen government support for such policies and I believe precedents set such as for example:

- a. the emaKhosini development in the Babanango District;
- b. the Greater St Lucia Wetland Park and Eastern Shores;
- c. the rerouting of the road around Phinda Game Reserve; and
- d. the investment into aspects such as the Lebombo SDI.

#### **6. CONCLUSION**

We have developed our business over a period of 20 years. We have shown growth every year since we opened. Our standing and reputation has cost a great deal of money to establish. We featured in the Portfolio of Country Retreats for 16 years, one of three publications in the Portfolio Collection, rated internationally as the pick of the accommodation establishments in South Africa. We have attained the highest accolades awarded by Portfolio for our type of establishment: a luxury rating and a good food accolade.

Our property can be viewed on [www.kakarangovalley.co.za](http://www.kakarangovalley.co.za).

Our staff packages and work conditions are exceptionally good when compared to the industry specifically and with business in general. We currently employ 35 people permanently, of whom 23 live in the neighbouring community and a further 5 within the district. The cash fraction of the staff packages would contribute significantly to the local communities. Our policy has in fact been to employ local, train well and pay well. The Zulu Heritage Village is giving hope for a community and income for about 30 people. The proposed new developments have a potential to create at least a further 20 positions for members of the local communities.

Should such a power line be constructed through the properties of the Turner Family Trust, it will severely undermine our confidence. We will certainly not consider any further tourism development on our properties (the new developments will not be forthcoming) and we will look to make any future investments elsewhere. Any future job creation potential will be stopped.

Can our initiatives be ignored because we are a small business, one of the types Government desperately needs to inject growth into the economy? Does the fact that we invested in tourism in 1991, when there was zero optimism before the 1994 elections, be ignored? We have continued to maintain a strong optimism in South Africa as a country and in its future. We cannot believe that such efforts and endeavours would be jeopardised by pulling a power line through our properties, particularly in the light that a very feasible alternative could be found.

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment:  
Many flocks of endangered birds are prolific in the grasslands. Furthermore, the grasslands are prima stock areas which too can be affected by powerlines. Likewise the danger to the surrounding wetlands.

Any other comments:

no direct or indirect interest in the project.

COMMENTS (please use separate sheets if you wish)

I suspect that the following issues of concern have not been identified in the Environmental Impact Assessment  
Our farm has already been divided by a residential road,  
the railway here and Eskom having us very little  
to farm on. Timber is our livelihood.

Any other comments:

Please ask the following of my colleagues/friends to register as IAPs for that project:

**COMMENTS (Please use separate sheets if necessary)**

1. Have your questions, concerns, issues and suggestions been captured? If not, please indicate below.

Yes, in broad terms .....

.....

2. Of the issues already covered, do you wish to add additional aspects that have not yet been mentioned?

Yes. I have replied separately to Anelle Lotter, but also see my additional comments in item 4 below, which are additional issues.

Also, there are a number of Zulu speaking families affected by this proposal within the townlands of Wakkerstroom who have not been contacted and who are unaware of this proposed transmission line route through Wakkerstroom and who live on smallholdings within the proposed corridor who would need to be visited and consulted to explain verbally because they are functionally illiterate and because no notices have been posted on their fences. Some of these people are also owners of their own smallholdings in this corridor and run farming operations of their own. They would also be hesitant to attend a 18:00 meeting in the town hall on 18<sup>th</sup> November as

planned because they live several kms away and would not be walking in the dark by themselves to get home from the meeting on unlit hillside footpaths.....

3. Please tell us, did you find the document useful? Please indicate below.

YES, USEFUL	R
NEED IMPROVEMENT	
NO, NOT USEFUL	

Please tell us why:

.....It does also cover some of the qualitative... issues...and concerns.....

4. Any other comments you may have:

We are very concerned about the fact that it is likely that we will have to relocate/sell out and that we will lose our financial resources and retirement savings, all spent on this property in the past seven years or not be paid out ahead in time or be able to recover from this loss at all and also the damage to our location and lifestyle. We may not even be able to re-establish ourselves on a like-for-like basis in this area again and may have to find another place to live and therefore migrate to elsewhere in South Africa at higher costs. There are no assurances given that we will be recompensed or reallocated new estates and facilities equal to or better than we presently hold in this event and there is also the unknown resultant future, including issues of Receiver of Revenue dues and implications if capital gains is recovered on this transaction but not immediately spent. There are all the other costs of property and asset re-registration and transfer and all the costs of transfer and relocation of people, moveable assets and livestock, apart from the reconstruction and re-building our lifestyle and facilities elsewhere in South Africa as there are a limited number of fully developed luxury 25 Ha smallholdings/estates available in this town. Also what happens if we have to move to an area with higher costs of living, insurance costs, rates and taxes and labor costs, or one which does not have the facilities or infrastructure which we require in order to keep living at the same standard of living including traveling costs etc, these are some of the social costs which we are also concerned about in this outcome and not discussed in your documents.....

THANK YOU FOR YOUR CONTRIBUTION

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment:

*THE TRUST AREA IS A RURAL AREA WITH MANY FARMERS AND A RIVER...*

*ALTHOUGH THE TRUST CAN'T BE HELD FOR THE LAND I SUGGEST THAT...*

*THE SAME RURAL AGREEMENT WILL BE APPLIED AS WITH FARMERS...*

Any other comments:

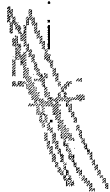

*I DON'T WANT THE TRUST TO HAVE MORE POWER OVER THE LAND...*

*THEY WANT THE SAME AGREEMENT AS GENERALLY APPLIED TO FARMERS...*

*AS LONG AS THE TRUST IS SIGNED BY THEM REPRESENTATIVE IS NEW AMONGST THEM*  
Please ask the following of my colleagues/friends to register as IAPs for this project

*SELVIN A. BÖHMER

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment:

Tongaot Hulet Sugar conducts substantial sugar cane farming and is the holder of various restraints in alienation registered over various properties in terms of which the properties are to be maintained under sugar cane for delivery to Tongaot Hulet's Sugar Mills.

It would be extremely useful to have a list of the properties likely to be affected by the proposed routes

**COMMENTS** (please use separate sheets if you wish)

I suggest that the following issues of concern be investigated in the Environmental Impact Assessment:

See attached map from the Mpumalanga Biodiversity Conservation Plan (C-plan) with the alternatives (A-B-C as the best). Terrestrial and Aquatic Biodiversity on the other alternatives are Irreplaceable or Highly Significant in large parts.

Irreplaceable areas support unique biodiversity features, such as endangered species or rare habitat patches that do not occur anywhere else in the province. These features have already been so reduced by loss of natural habitat that 100% of what remains must be protected (Lötter M.C. & Ferrar A.A., 2008).

Highly significant / important & necessary areas are those where biodiversity has been heavily compromised and very few options remain to meet biodiversity targets. Natural vegetation cover in these areas should be maintained or restored. (Lötter M.C. & Ferrar A.A., 2008).

Dear Jacqui Hex

**THE PROPOSED 765 KV CAMDEN – MBEWU (THETA) POWER LINE FROM ERMELO TO EMPANGENI:**

Final Scoping report refers.

The Mpumalanga Tourism and Parks Agency still have the following concerns:

1. Alternative routes BK and AM are a concern for the MTPA as the Terrestrial and Aquatic Biodiversity in this routes are Irreplaceable or Highly Significant. See attached map from the Mpumalanga Biodiversity Conservation Plan (C-plan).

Irreplaceable areas support unique biodiversity features, such as endangered species or rare habitat patches that do not occur anywhere else in the province. These features have already been so reduced by loss of natural habitat, that 100% of what remains must be protected (Lötter M.C. & Ferrar A.A., 2006)

Highly significant/important & necessary areas are those where biodiversity has been heavily compromised and very few options remain to meet biodiversity targets. Natural vegetation cover in these areas should be maintained or restored. (Lötter M.C. & Ferrar A.A., 2006).

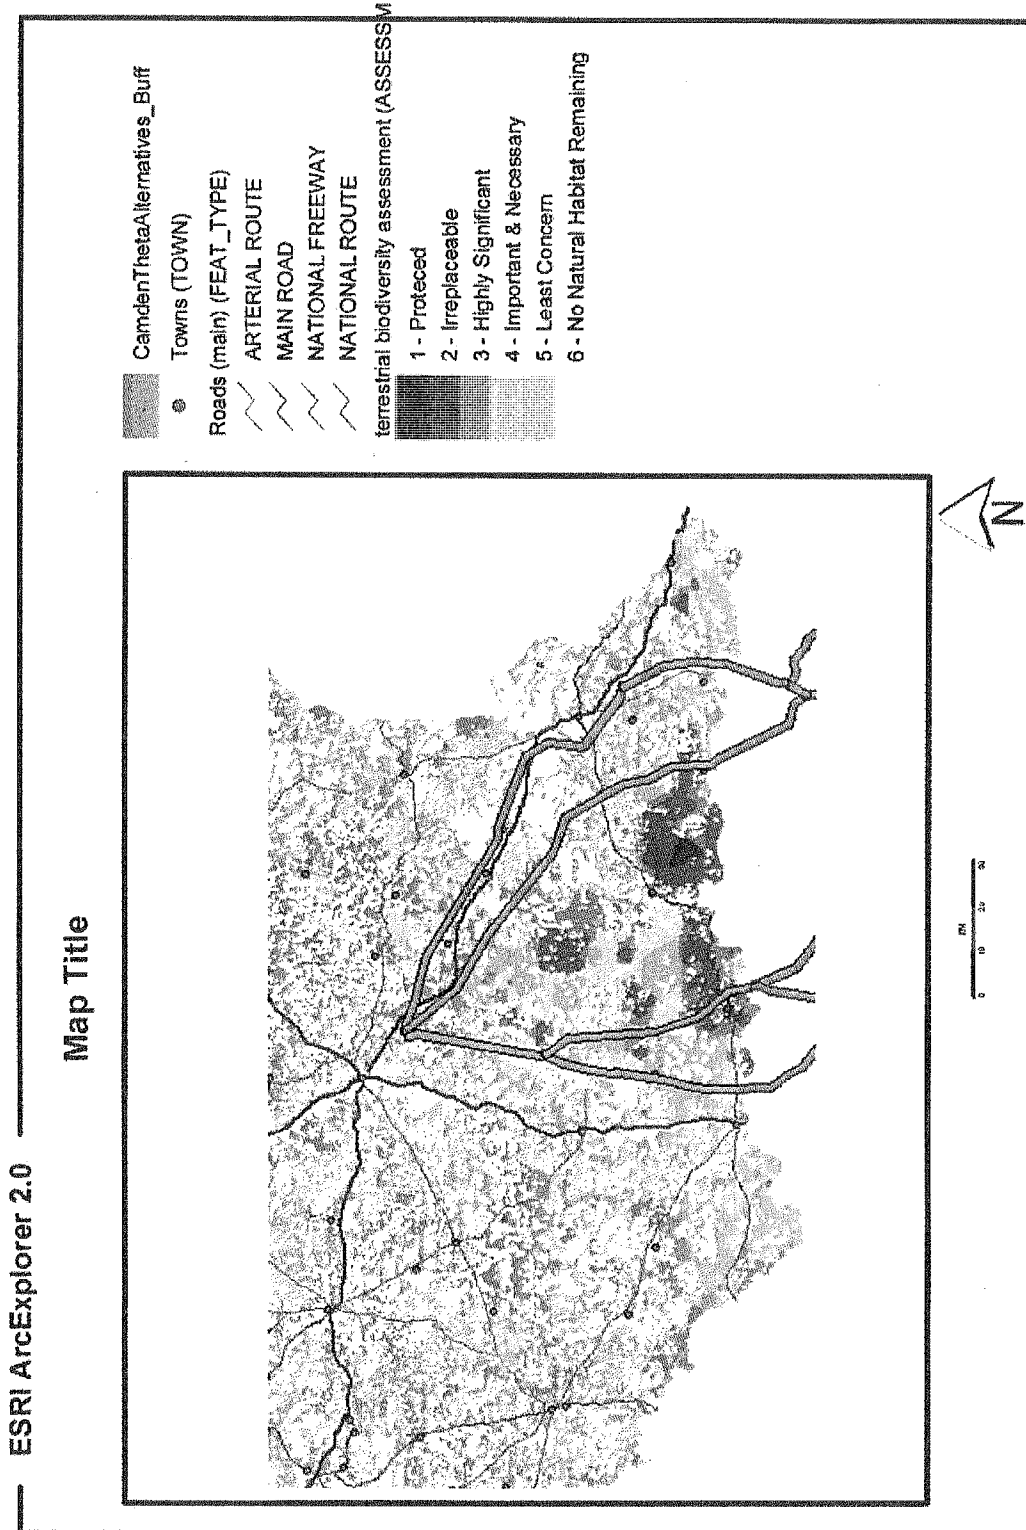

2. Alternative routes AB-BC and AP are probably the best but further specialist study are needed to provide better information to ensure minimal environmental impact.

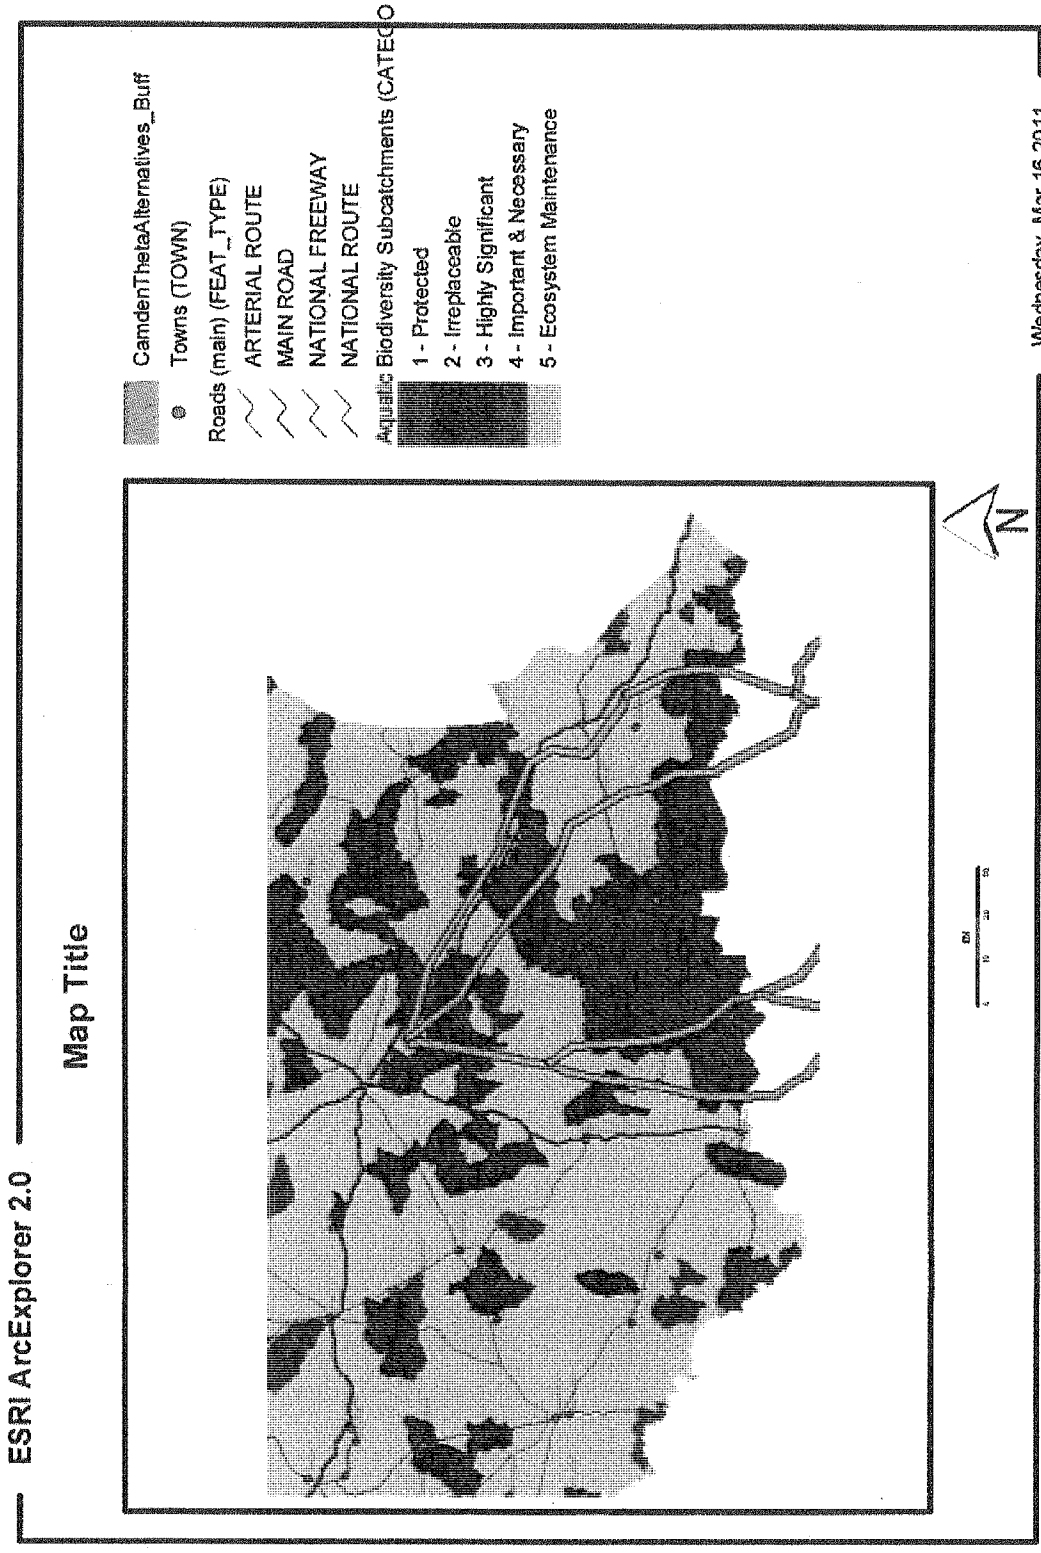

Kind regards

A handwritten signature in black ink, appearing to read "Ndabeni", is written over a horizontal line.

MR. C. NDABENI  
CHIEF EXECUTIVE OFFICER

**FINAL SCOPING REPORT FOR THE PROPOSED CONSTRUCTION OF THE 765 KV  
 CAMDEN-MBEWU (THETHA) TRANSMISSION LINE.**

The above mentioned document received by the Department of Agriculture, Environmental Affairs and Rural Development (DAEARD) for comment on the 14<sup>th</sup> of February 2011.

DAEARD does not have objections regarding the proposed project however; this Department recommends that all the issues raised during the public participation process be clearly and thoroughly covered in the EIR. Moreover this Department encourages implementation of mitigation measures as outlined in the report so that the project does not result in any environmental degradation.

Please contact this Department should you have any queries regarding this correspondence.

Yours faithful

IN THE PLANNING OF THE EASTERN GRID POWER NETWORK

Ms Mnqokoyi

On behalf of the Head of Department, Ms DN Qhobosheane, receipt of your letter dated 11 April is herewith acknowledged.

Let me first take this opportunity to apologies for any inconvenience that might have been caused by the lack of co-operation by Mr Guma, who might have been overwhelmed by a high vacancy rate in the Department. This matter has now been dealt with, as evident in the appointment of the Senior General Manager in the Traditional Affairs Branch and two General Managers. Your request will in fact be referred to the Senior General Manager for Traditional Affairs, Mr Ntokozo Chonco, who will endeavor to facilitate your request.

Thank you

**Cc:** Anelle Lötter  
**Subject:** RE: EIA for a proposed 765kV Camden-Mbewu power line: Final Scoping Alternatives  
**Importance:** High

Hi Annele

Having been involved extensively in the EIA processes as they pertain the substation location as well as in-coming and outgoing lines, it has given overall insight for us to make the following submission and proposal:

1. Sub-station location to be at Site B. Stakeholders were not aware that the final footprint is 40 ha, not the 150 ha investigated. 40 ha can be tolerated.
2. In-Coming lines: To follow existing 400Kva North of the Heatonville irrigation scheme directly into Sub-station Site B. This avoids the agricultural impact as well as inland informal settlements by following an existing corridor.
3. Outgoing lines North. From Substation site B, the lines can circumnavigate the farm lands and a corridor of least impact exits between the commercial farms and the triabl land which will have minimal impact.
4. Outgoing lines South: These too will follow existing corridors and will require some relocation of informal settlements, but nowhere near as populated as the other alternatives.

We appeal as stakeholders to the Department issuing the ROD's to look at the consolidated approach indicated above to find a sustainable solution for all involved.

Regards

Pierre Redinger

**Subject:** EIA for a proposed 765kV Camden-Mbewu power line: Final Scoping Alternatives

Dear stakeholders

On 21 January 2011 we sent an email to all of you announcing the availability of the Final Scoping Report. We have posted the same information to all whom have registered as an Interested and Affected party.

Please find attached the comment sheet in another format of MS Word - some stakeholders said they have difficulty opening a .docx document (Microsoft Office 2007).

Also attached is the shape files of the alternatives routes which are described in the Final Scoping Report. We have sent a map to you on 21 January 2011 showing these alternatives. Several stakeholders requested the shape files for further information. This information is only usable with the appropriate GIS software.

Please assist us in spreading the information as far and wide as possible to persons that may be affected. Should you need any further information, please do not hesitate to contact us.

Geagte Belanghebbende

Op 21 Januarie 2011 het ons 'n epos aan u gestuur rakende die beskikbaarheid van die Finale Omvangsverslag (FOV). Ons het dieselfde inligting aan almal gepos wat geregistreer het as 'n belanghebbende party.

Aangeheg is die kommentaarblad wat in 'n ander MS Word format gestoor is. Belanghebbendes het geskakel en laat weet dat dit moeilik is om die .docx (Microsoft Office 2007) oop te maak.

Verder is die "shape files" van die alternatiewe roetes wat in die Finale Omvangsverslag (FOV) verduidelik word, aangeheg. Die kaart wat op 21 Januarie 2011 versprei is wys die alternatiewe. Verskeie belanghebbendes het gevra vir die shape files vir verdere inligting. Die inligting kan egter slegs gebruik word indien 'n mens die gepaste GIS sagteware het.

Help ons asseblief om inligting rakende die projek so ver en wyd moontlik te versprei aan mense wat moontlik geraak mag word. Indien u enige verdere inligting verlang, moenie huiwer om ons te skakel nie.

Vriendelike groete

Dear Sir/Madam

**FINAL SCOPING REPORT: PROPOSED 765KV CAMDEN-MBEWU (THETA)  
POWERLINE FROM ERMELO (MP) TO EMPANGENI (KZN)**

Please be advised that Council in terms of Resolution EM 28/02/2011 of 2<sup>nd</sup> March 2011 resolved as follows:

1. That the report of the receipt of the **FINAL SCOPING ON THE PROPOSED 765KV CAMDEN-MBEWU (THETA) POWERLINE FROM ERMELO (MPUMALANGA) TO EMPANGENI (KWAZULU NATAL)**: is noted.
2. That the support for the proposed development is approved.

We hope you find the above in good order and please do not hesitate to contact the author hereof for any further inquiries in this regard.

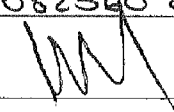

Yours faithfully,

**ATTENTION: A. LOTTER/F. RAMBUDA**

**ENVIRONMENTAL IMPACT ASSESSMENT FOR THE PROPOSED 765KV CAMDEN –  
MBEWU (THETA) TRANSMISSION LINE**

The provision of basic services to any new or envisaged housing project is a positive step in improving the lives of the citizens. The installation of the proposed powerline to strengthen the existing grid is supported in view of the fact that this will support municipalities sub-power stations which in turn will provide power supply to new/envisaged housing development within their jurisdiction. From your report, areas of human habitation has been considered and factored in your environmental study. From a land use management perspective, the respective municipality/ies will have to be contacted to address any concerns of land parcels earmarked for housing.

Yours faithfully

**MS G. GUMBI-MASILELA**  
**HEAD OF DEPARTMENT**

**ENVIRONMENTAL IMPACT ASSESSMENT**

Proposed 765 kV transmission line from Camden near Ermelo, Mpumalanga to Mbewu (Theta) near Empangeni, KwaZulu Natal

DEA Ref No 12/12/20/2029

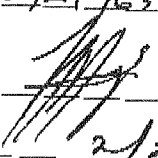

**COMMENT SHEET ON THE FINAL SCOPING REPORT**

Available for public review between 26 January and 2 March 2011

COMMENTS (Please use separate sheets if necessary)

1. Have your questions, concerns, issues and suggestions been captured? If not, please indicate below.  
 PIET RETIEF DISTRICT HAS GOT THE HIGHEST LIGHTNING ACTIVITY IN THE WORLD. HOW WOULD IT AFFECT ESCROW?

2. Of the issues already covered, do you wish to add additional aspects that have not yet been mentioned?  
 HOW WOULD THE HIGH ELECTRO-MAGNETIC FIELD AFFECT LIVESTOCK FERTILITY AND GROWTH?

3. Any other comments you may have:  
 BELLA VISTA IS DIVIDED IN HALF BY THE R33 ROAD. ANOTHER DIVISION BY FENCE WILL MAKE IT INTO LITTLE PLATS AND IMPOSSIBLE FOR COMMERCIAL FARMING. FARM IS ONLY 191 Ha

THANK YOU FOR YOUR CONTRIBUTION

**COMMENTS (Please use separate sheets if necessary)**

1. Have your questions, concerns, issues and suggestions been captured? If not, please indicate below.  
We would require a detailed map showing which of our land holdings / farm portions are affected. The current map is not refined enough and there is some guesswork involved in identifying the boundaries of the properties.

2. Of the issues already covered, do you wish to add additional aspects that have not yet been mentioned?  
- Added AT farm map

**COMMENTS** (Please use separate sheets if necessary)

1. Have your questions, concerns, issues and suggestions been captured? If not, please indicate below.  
 No, I have a guest house which is appreciated for its tranquil situation in unblemished nature with a lovely view on the mountain, not on electric wires. The yellow puppet is a extremely endangered species and is found here.

2. Of the issues already covered, do you want to add additional aspects that have not yet been mentioned?  
 Concern about the aesthetic impact of the line, as well as the impact on birdlife in Wakkerstroom, which is a tourist attraction. There is a lot of ground webbers.

3. Please tell us, did you find the document useful? Please indicate below.

YES, USEFUL	<input checked="" type="checkbox"/>	Please tell us why: Detailed information
NEED IMPROVEMENT	<input type="checkbox"/>	
NO, NOT USEFUL	<input type="checkbox"/>	

4. Any other comments you may have:  
 The yellow puppet is only to be found in about 2 small locations world wide, and it is found on my plot.

THANK YOU FOR YOUR CONTRIBUTION

**ENVIRONMENTAL IMPACT ASSESSMENT**

Proposed 765 kV transmission line from Camden near Enrelo, Mpumalanga to Mhewu (Thata) near Empangeni, KwaZulu Natal

Sorry Dr Everard – I sent the email by accident without having completed my message.

What I wanted to say was that we have received a request from Mondi to send them our shape files so that they can do an overlay to see which of their plantations may be affected. I thought to send you the information as well – perhaps you would like to do the same.

Kind regards

Dear Gerald

We have spoken a while back with regards to the proposed 765 kV Line from Camden to Empangeni. You said that you would be so kind as to assist in identifying who would be the correct people at the municipalities for commenting purposes - your assistance is much appreciated.

I will also send you a document with all the background in another email.

Should you have any questions, do not hesitate to contact me.

Kind regards

**Subject:** Inligting aanvraag: C.A.J.Hatting Tigerfontein 17071 : Voorgestelde 765 kV Camden-Mbewo(Theta)-Transmissielyn

Geagte Anelle Lotter of Florence,

Ek het so pas n brief van "Zitholele Consulting" ontvang insake die voorgestelde 765kV Transmissielyn , brief gedateer 6 Oktober 2010.

Te oordeel n.a.v die kaart wat ingesluit is, wil dit voorkom of my eiendom moontlik /waarskynlik op die (KD) transmissieroete le.

Ek sal dit waardeer indien u my van die nodige inligting plus kaart kan voorsien sodat ek presies kan vasstel in hoe n mate dit my eiendom sal raak.

Naamlik of die lyn op die grens of deur die middel van die eiendom sal loop .

Sal ook graag meer inligting wil kry of daar vergoeding vir eienaars sal wees .

Afgesien van die negatiewe impak wat die projek op die ekologie sal he , kan dit die waarde van die eiendom aansienlik laat daal.

Ek hoor graag van u.

Die uwe,  
Mev. C.A.J. Hatting (I.D. 4310290017085 )  
Posbus 156, Vryheid, 3100  
E-Pos Adres: [hattinwp1@telkomsa.net](mailto:hattinwp1@telkomsa.net)  
Tel/Faks: 034 9815455  
Sel: 0825665730 /0835665730

Datum : 15 Oktober 2010

Bogenoemde inligting is reeds na u toe deurgefaks . Ek was nie suksesvol met die ander e-mail adres wat deur u kantoor voorsien is nie

Groete,  
Nelle Hatting

Beste Mev Hatting

Baie dankie -- ons het u faks ontvang. Vreemd dat die epos nie by ons wou uitkom nie -- maar kom ons probeer weer.

Kan u dalk vir ons die geregistreeerde plaasnaam, gedeelte, porsie en area kode gee -- dus: Tigerfontein17071 porsie?? HT/ IR / GU, ens. Ek het vinnig op ons kadastrale inligting gekyk en ek vind nie die plaasnaam nie -- dit mag moontlik beteken dat u grond buite een van die voorgestelde roetes val wat ondersoek word. Maar laat ons nie te gou praat nie.

Vergoeding en onderhandelings daarvoor word deur Eskom self hanteer nadat die omgewingsimpakstudie voltooi is. Eskom sal grondeienaars vergoed in lyn met die 80m grond wat hulle nodige het as 'n serwituut vir die kraglyn.

Verskeie spesialiste sal ondersoeke doen om te bepaal wat die impak mag wees. Daardie studies sal aan almal beskikbaar gestel word vir kommentaar.

Ek sal dit baie waardeer indien u vir my die volledige plaasnaam kan aanstuur.

Groete

Dear stakeholder

Please find attached an introductory letter, Background Information Document, a map and a comment sheet to announce to you the Environmental Impact Assessment (EIA) that is being undertaken on behalf of Eskom for the proposed 765kV power line from Camden substation (Mpumalanga), near Ermelo to Mbewu (Theta) substation near Empangeni (KwaZulu-Natal).

Several alternatives are being investigated and we would like you to become involved as an interested and affected party to provide your comments in this EIA. Please be so kind as to complete the attached comment sheet – sending a completed sheet back to us will indicate that you would like to be involved and that we should send further information to you.

The documents attached are available in Afrikaans and Zulu – should you wish to receive copies, please let us know. Alternatively you are also welcome to visit the web site of Eskom or our company web site to download the information – <http://www.zitholele.co.za/camden-theta> or [www.eskom.co.za](http://www.eskom.co.za)

Please watch your local press as advertisements announcing the EIA are being published. Our team is also putting up site notices and handing out Background Information Documents along the proposed alternative routes this week.

We will appreciate your assistance to “spread the word” about this EIA – please forward this to your colleagues, other members of your organization, neighbours and friends.

Should you have any questions, please do not hesitate to contact us.

Kind regards

**Subject:** RE: 765kV Camden - Mbewu (Theta) kraglyn.

Hi Wayne,

Unfortunately the Drat Scoping Report is too large to send by email. You can however download it from our website. [www.zitholele.co.za](http://www.zitholele.co.za) if you go to 765kv Camden link on the right panel and then click on Draft Scoping Report. Alternatively I have included a link (not sure if it works) <http://www.zitholele.co.za/projects/ZPJ12619%20-%20Camden/2%20Draft%20Scoping%20Report/Draft%20Scoping%20Report.pdf>

Should you have any problems please contact me and I will see if I can make alternative arrangements.

Kind Regards

**Sent:** 18 November 2010 05:27 AM  
**To:** Anelle Lötter  
**Subject:** 765KV Camden Power Line

Att Anelle Lotter

After attending your presentation at the Town Hall in Wakkerstroom on the 16th November 2010 & reading the Drafting Scoping Report & Background Information, I noticed one very important matter that seems to be overlooked, as a Landowner, Resident & a Business Owner & the fact that most people residing in Wakkerstroom have invested most of their money in their properties or business in Wakkerstroom, no where in both documents is it mentioned what will happen to the value of the properties where the Towers are to be erected, or the value of the properties which are in the area of the towers.

Even if Eskom purchase the rights for 95meter of property from a landowner to erect a tower, the total value of the landowner's property will drop, in relation to the value of other properties in the area, "the question is by how much", this matter needs to be investigated by valuers and honest figures should be given to the landowners concerned and the residence of Wakkerstroom, (who wants to purchase a property which has a Tower carrying a 765 KV power line on it?).

After attending the meeting I and others felt that full transparency in the presentation was not there and if a preferred line as been marked, even if on paper this should be disclosed, as well as if the intention is to erect all three power lines this should also be disclosed, remember "honesty is the best policy".

If I look at your map of the three alternatives, then the one going through Wakkerstroom joining the current power line near Volksrust would be the most cost affective to erect, please advise if I am miss reading the map.

Yours Faithfully

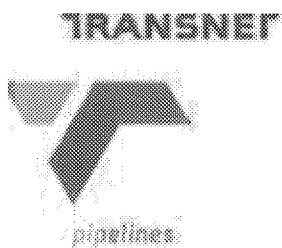

Mike Bartolo

**Sent:** 15 December 2010 08:41 AM  
**To:** alotter@zitholele.co.za  
**Subject:** Input from Utrecht Farmers

Anelle,

It stuck me like a bolt that i forgot to send you the Farmer's Associations input on the power lines,

After Thursday last week the official comment from the Framer's Association is that through the Utrecht District the Farmer's Association would request that the new proposed powerline follows the same route as the other 765 kv line, i.e. BC, CD and DE, with the alteration of BC to match that of the original line. The farmers and tourism stake holders definitely strongly object to the proposed KD line, as this would pass through the most scenic part of the district and detract from many tourism facilities in the area. As well as have detrimental impact on rare bird life such as blue cranes and crowned cranes, denhams bustards, blue Korhaans and numerous other species found in this area.

Should you have any queries please feel free to contact me

Regards

Robert Stannard

Utrecht Farmers Association

P.S. Should you require an official letterhead letter please contact me.

Anelle,

Thank you for the documentation forwarded to us through KwaNalu, We as the Utrecht Farmer's Association wish to be registered as a IAP, our contact details are as follows,

Office Phone/ Fax 034 331 3520

Chairperson: Robert Stannard

Contact No; 082 873 5575

Tel 034 331 4440

Fax 086 571 4400

email: [robert@pneviro.co.za](mailto:robert@pneviro.co.za)

I just have a few questions, there was a 765 KV power line constructed through this area from Matuba to the Richardsbay Area, it was completed less than a year ago, is this a new line?

What is the possibility of using much the same route through this area, as it does coincide with your route alternatives (marked BC, CD and DE)?

What do the route designation codes stand for?

Regards

Robert Stannard

Dear Sir,

On behalf of Wakkerstroom Natural Heritage Association ( WNHA ) we submit our application to be registered as an Interested Party in the above EIA for the proposed 765 kV Camden-Mbewu (Theta ) power line.

Look forward to hearing from you on the consultative process that will be part of the proposed project.

Kind regards

R.J.Lawlor

**Sent:** 26 November 2010 04:31 PM  
**To:** Anelle Lötter  
**Subject:** Proposed Camben/Theta line

Hi Anelle,

When I look at your drawing on pg 87 at the Volksrust corridor area there is a red line indicating a 765Kva line from Majuba power station crossing the R543 Volksrust/ Wakkerstroom road, which we know about.

Is the red line on the drawing masking a 400 Kva yellow line which lies underneath it ?

At a site inspection this morning I found three power lines, a 400Kva right next to a new 765Kva, and a third one, other 400Kv line which lies 2 kms away , closer to Volksrust all running parallel into Natal.

There is a 2 km gap between the two 400Kva lines, no other line in-between them. The new 765 Kva line is on the Wakkerstroom side of one 400Kva line.

This gap may provide you with a suitable pathway for a second 765Kva line inside that corridor.

That corridor also provides you with a very favourable descent path into Natal, running smoothly downhill, rather than the more abrupt escarment alternatives elsewhere and lots of serviceable access roads. In fact at the point of crossing the R543 you will already be in Natal.

Hope this helps.

Regards

Roland Stone  
Wakkerstroom

**Sent:** 16 October 2010 11:51 AM  
**To:** Anelle Lötter  
**Subject:** Re: EIA for a proposed 765kV Camden-Mbewu power line

Hi Anelle,

One of the documents you sent me is unable to be opened, it is the Comment Sheet. Could you please send me one again. The computer says that there is no file associated with the one you sent me.

Just a side comment on the map you sent. It shows that the proposed route will directly take out our new R5m+ (seven years ago costs) home and two other newly built guest dwellings and sheds and our 25Ha estate property (all on the red line) and our business, our own radio tower, underground telephone cabling, apart from the whole of the Weavers Nest Hotel complex, currently owned by IDC (our neighbour) as well as five other houses and other buildings in the neighbourhood as indicated by the map. All of these are inside the townlands of the Wakkerstroom municipal area, not open farmlands.

The correspondence does not talk about compensation terms.

If this goes ahead what arrangements would be made to pay our total costs of re-purchase and relocation to another 25Ha estate smallholding with housing and luxury finishes for us in the Wakkerstroom municipal area with exactly what we have here?

New all-in costs I estimate would easily stand at R8-R10m for us and our household and equipment at replacement value and even more if we had to leave this district to obtain the same in another highland area like Clarens or Dullstroom. This would also result in the retrenchment of four local workers on this property.

-We have established here over the past seven years at our expense fresh running natural spring water to accommodate us and our household and built from scratch the three new dwellings with luxury finishes and installed equipment, sheds, garages, stables, roadways, water dams, water tanks for both irrigation and household use and pipeline reticulation from the springs to tanks and houses and gardens, veggie production enclosed areas, fencing, improved on the established fruit trees and other garden trees, re-established gardens, we'd need possible new local Eskom and contractor re-supply fees, re-constructing cleared firebreaks, re-foresting new areas, new boreholes, we'd need possible restoration of the new land costs (donga removal and replanting), new chicken runs, duck breeding runs and dams, walkways, road and surround paving, outdoor recreation and entertainment areas, surround stone walling, wind break tree planting, etc etc. Considering that the construction we have been through took the master builder 2 years to complete the work here, this all has to be re-done somewhere else over the same period, and then there are removal costs, rental costs over a two year period until we can move into new buildings, installation of new blinds, curtains, etc etc.

We have and need over 600sq metres under roof buildings alone and current luxury finished costs are running at around R10K per square metre, without any finishings and fitments..

This could all cost around R8-R10m just for our relocation and re-construction costs, which we are unable to finance at this time as we are pensioners without that sort of additional cash to spend.

There are also the aesthetic country views which are the primary reasons for moving to this location which is of benefit to us and our guests, which would be lost.

I also act as an Afrox distributor for the district and store and distribute about 2000kgs of liquefied petroleum gas in cylinders from these premises, which would carry a real additional cost if this storage had to be relocated to town premises. This would also present a problem if it had to be guarded in town. This storage would not be permitted underneath such powerlines. This business would either have to be relocated to another cost-free site or closed down and a worker retrenched.

So you can expect a variety of response to this from affected people in Wakkerstroom.

Regards

Roland Stone

Dear stakeholder

Please find attached an introductory letter, Background Information Document, a map and a comment sheet to announce to you the Environmental Impact Assessment (EIA) that is being undertaken on behalf of Eskom for the proposed 765kV power line from Camden substation (Mpumalanga), near Ermelo to Mbewu (Theta) substation near Empangeni (KwaZulu-Natal).

Several alternatives are being investigated and we would like you to become involved as an interested and affected party to provide your comments in this EIA. Please be so kind as to complete the attached comment sheet – sending a completed sheet back to us will indicate that you would like to be involved and that we should send further information to you.

The documents attached are available in Afrikaans and Zulu – should you wish to receive copies, please let us know. Alternatively you are also welcome to visit the web site of Eskom or our company web site to download the information – <http://www.zitholele.co.za/camden-theta> or [www.eskom.co.za](http://www.eskom.co.za)

Please watch your local press as advertisements announcing the EIA are being published. Our team is also putting up site notices and handing out Background Information Documents along the proposed alternative routes this week.

We will appreciate your assistance to “spread the word” about this EIA – please forward this to your colleagues, other members of your organization, neighbours and friends.

Should you have any questions, please do not hesitate to contact us.

Kind regards

**Attachments:** IMG.jpg

Hi,

Please find attached my comments attached.

I have advised my nine neighbours who also live within the Wakkerstroom municipal boundary to contact you as well as Birdlife SA, Wakkerstroom Tourism Assoc., Wakkerstroom Natural Heritage Assoc.

There is also a family of Africans living in this valley on their own smallholding within the municipal area, who also run their own cattle, they are illiterate, the Mdaki family, who are also directly affected by the Proposed Corridor lines, they live about 1 km from my dwelling, I am not sure how they will be able to respond as they have no postal address. Someone will have to go there to communicate with them, would you be able to send someone to them for discussions and recording of their comments please as they would become further disadvantaged as a result of loss of grazing off the adjacent plots if they had to relocate their family dwellings and have insufficient capital to relocate and re-build their lives..

**From:** Trish & Roland Stone [stone@acenet.co.za]  
**Sent:** 18 October 2010 05:34 PM  
**To:** Anelle Lötter  
**Subject:** Re: EIA for a proposed 765kV Camden-Mbewu power line

Thank you Anelle,

The red line on the drawing actually crosses about 40m in front of our house on our front lawn on the property marked as "Nellies Place" on your map, hence our concern. But it does cross directly overhead the house of our next door neighbour shown as "Bergsig" on the map.

If this red line was moved to the south about 1 km it would cross over the Esizamaleni township, less than that it would be directly overhead two other houses and may actually also be overhead the "Wetlands Lodge" hotel as well. If it was moved 1km to the north it would be outside of the municipal boundary, but would cross over tall electric game fences of a game ranch/foreign and local owned tourist hunting area. I'm not sure what interaction electric game fences may have on this.

The corridor as presently drawn includes 12 dwellings/buildings, all situated in the Wakkerstroom dorp townlands. I initially thought there were 10, but there are two more to the east of where we live, but I don't know the people there. The Wakkerstroom Wetlands are supposed to be a protected area, this proposed line would cross these wetlands whether the line was moved at any point within the two km strip. I know that Eskom employ the best Enviro people because we dealt with them on the 765Kv Majuba line two years ago and it was moved to the Volksrust corridor as a result of the consultations and inputs.

And no I haven't read the book, my wife is the reader in our family, she asks who the author is..

Regards

Roland Stone  
Wakkerstroom

**Subject:** RE: EIA for a proposed 765kV Camden-Mbewu power line

Dear Mr Stone

Many thanks for the email, the comment sheet which we have received as well as informing other landowners in the area – we really appreciate it. I have already spoken to both Julia and Colin.

Before we talk further about the power line....something else. Last December I read a book called "Cutting for Stone" – one of the most brilliant books I have ever read. Have you heard about the book?

Back to the power line:

- a) Please remember that a 2km wide corridor for each alternative is being investigated. Thus, within the 2km wide corridor, the power line (with a servitude of 80m (90m in commercial forest area) could be placed reasonably anywhere. The map that we have sent you shows the red line to run perfectly in the middle of the 2km wide corridor. Another reason for assessing a 2km wide corridor is to be able to make sure that a proposed line does not cross any building.
- b) The conclusion of the EIA process is an environmental authorization for only one route by the Department of Environmental Affairs. Once that authorization was granted, Eskom will send their team of negotiators to landowners for discussions on compensation for the servitude that is required.

- c) Your particular concerns with regards to what Eskom would compensate for will be forwarded to them for an answer – we will relay it back to you.

Kind regards

**From:** Trish & Roland Stone [stone@acenet.co.za]  
**Sent:** 19 October 2010 08:58 AM  
**To:** Anelle Lötter  
**Subject:** Re: EIA for a proposed 765kV Camden-Mbewu power line

Hi Anelle,

It's me again. I'm trying to look for a practical solution to this proposed route over Wakkerstroom . I got into my bakkie this morning and checked out and measured alternatives . There will always be ongoing dwellings, some gravesites, old established and newly planted windbreak trees plus strong visual impacts on hills and views from the dwellings and hotels anywhere within and within view of the present 2km corridor which crosses at the Wakkerstroom townlands present corridor location. No question.

If you want a route without dwellings, only open ground , ( if this transmission line really has to cross the Wakkerstroom river) then there is an open fields, no dwellings or trees, just game fences and wetlands route by moving the red centre line 2km up the R543 provincial road towards Piet Retief. This will take the transmission line outside of the Marthinus Wesselstroom 121 HT town boundary, miss all dwellings , sharp hillsides and views and trees and get it out of everyone's hair. I would then expect any remaining objections to revolve around complaints from the Wetlands Game Ranch ( situated on Oudehoutdraai 123HT) which I talked about previously, but still strong objections from Birdlife SA regarding the endangered Crane flight path and nesting issues which abound in this Wetland district as this route would still be crossing the same wetland environment.

I really do have a big problem with the present proposed path coming across our front lawn and full-in-the-face views for us and our visitors from our viewing positions from the verandah , and entertainment areas . itself, because the main reason why we moved here from Jhb was to live in this pristine open unrestricted view and protected habitat lifestyle. We would also have to have our 100yr old windbreak trees cut down as well as the 300 new windbreak /boundary trees that we have just planted. There would be several other property owners who would have similar problems with this as this area is full of occupied smallholdings because it is within Marthinus Wesselstroom 121HT (the Wakkerstroom municipal town boundary). These smallholdings all have leased townland grazing rights additionally allocated to the smallholdings which means that the use of the townlands by the smallholders increases the utilisation footprint of each smallholding by sometimes an additional 100ha. If people have to move off they would not be able to leave their cattle and sheep unattended and not locked up at night in supervised buildings for safety (veld fire and theft and sickness) reasons. People prefer to live with their stock. So it's not just a get up and go issue for individuals, its also for their pigs, cattle, sheep, horses and income and subsistence issues etc.

Moving the red line proposal anywhere towards Wakkerstroom village would not work, we are only 2km from the centre of the village, between us and the village it just gets more and more congested with dwellings, 2x hotels, sewerage and water treatment works, townships, schools etc etc. The present proposed route already cuts over 1 x hotel site as it stands...

Hope this helps  
Regards  
Roland Stone

Thank you Anelle,

The red line on the drawing actually crosses about 40m in front of our house on our front lawn on the property marked as "Nellies Place" on your map, hence our concern. But it does cross directly overhead the house of our next door neighbour shown as "Bergsig" on the map.

If this red line was moved to the south about 1 km it would cross over the Esizamaleni township, less than that it would be directly overhead two other houses and may actually also be overhead the "Wetlands Lodge" hotel as well. If it was moved 1km to the north it would be outside of the municipal boundary, but would cross over tall electric game fences of a game ranch/foreign and local owned tourist hunting area. I'm not sure what interaction electric game fences may have on this.

The corridor as presently drawn includes 12 dwellings/buildings, all situated in the Wakkerstroom dorp townlands. I initially thought there were 10, but there are two more to the east of where we live, but I don't know the people there. The Wakkerstroom Wetlands are supposed to be a protected area, this proposed line would cross these wetlands whether the line was moved at any point within the two km strip. I know that Eskom employ the best Enviro people because we dealt with them on the 765Kv Majuba line two years ago and it was moved to the Volksrust corridor as a result of the consultations and inputs.

And no I haven't read the book, my wife is the reader in our family, she asks who the author is..

Regards

Roland Stone

**Subject:** RE: EIA for a proposed 765kV Camden-Mbewu power line

Dear Mr Stone

Many thanks for the email, the comment sheet which we have received as well as informing other landowners in the area – we really appreciate it. I have already spoken to both Julia and Colin.

Before we talk further about the power line....something else. Last December I read a book called "Cutting for Stone" – one of the most brilliant books I have ever read. Have you heard about the book?

Back to the power line:

- a) Please remember that a 2km wide corridor for each alternative is being investigated. Thus, within the 2km wide corridor, the power line (with a servitude of 80m (90m in commercial forest area) could be placed reasonably anywhere. The map that we have sent you shows the red line to run perfectly in the middle of the 2km wide corridor. Another reason for assessing a 2km wide corridor is to be able to make sure that a proposed line does not cross any building.
- b) The conclusion of the EIA process is an environmental authorization for only one route by the Department of Environmental Affairs. Once that authorization was granted, Eskom will send their team of negotiators to landowners for discussions on compensation for the servitude that is required.
- c) Your particular concerns with regards to what Eskom would compensate for will be forwarded to them for an answer – we will relay it back to you.

Kind regards

**To:** Anelle Lötter  
**Subject:** Re: EIA for a proposed 765kV Camden-Mbewu power line

Hi Anelle,

One of the documents you sent me is unable to be opened, it is the Comment Sheet. Could you please send me one again. The computer says that there is no file associated with the one you sent me.

Just a side comment on the map you sent. It shows that the proposed route will directly take out our new R5m+ (seven years ago costs) home and two other newly built guest dwellings and sheds and our 25Ha estate property (all on the red line) and our business , our own radio tower, underground telephone cabling, apart from the whole of the Weavers Nest Hotel complex, currently owned by IDC (our neighbour ) as well as five other houses and other buildings in the neighbourhood as indicated by the map. All of these are inside the townlands of the Wakkerstroom municipal area, not open farmlands.

The correspondence does not talk about compensation terms.

If this goes ahead what arrangements would be made to pay our total costs of re-purchase and relocation to another 25Ha estate smallholding with housing and luxury finishes for us in the Wakkerstroom municipal area with exactly what we have here ?

New all-in costs I estimate would easily stand at R8-R10m for us and our household and equipment at replacement value and even more if we had to leave this district to obtain the same in another highland area like Clarens or Dullstroom. This would also result in the retrenchment of four local workers on this property.

-We have established here over the past seven years at our expense fresh running natural spring water to accommodate us and our household and built from scratch the three new dwellings with luxury finishes and installed equipment , sheds, garages , stables , roadways, water dams, water tanks for both irrigation and household use and pipeline reticulation from the springs to tanks and houses and gardens, veggie production enclosed areas, fencing, improved on the established fruit trees and other garden trees, re-established gardens , we'd need possible new local Eskom and contractor re-supply fees , re-constructing cleared firebreaks, re-foresting new areas, new boreholes , we'd need possible restoration of the new land costs (donga removal and replanting) , new chicken runs, duck breeding runs and dams, walkways, road and surround paving, outdoor recreation and entertainment areas , surround stone walling, wind break tree planting ,etc etc. Considering that the construction we have been through took the master builder 2 years to complete the work here, this all has to be re-done somewhere else over the same period, and then there are removal costs, rental costs over a two year period until we can move into new buildings, installation of new blinds, curtains, etc etc.

We have and need over 600sq metres under roof buildings alone and current luxury finished costs are running at around R10K per square metre, without any finishings and fitments..

This could all cost around R8-R10m just for our relocation and re-construction costs, which we are unable to finance at this time as we are pensioners without that sort of additional cash to spend.

There are also the aesthetic country views which are the primary reasons for moving to this location which is of benefit to us and our guests, which would be lost.

I also act as an Afrox distributor for the district and store and distribute about 2000kgs of liquified petroleum gas in cylinders from these premises, which would carry a real additional cost if this storage had to be relocated to town premises. This would also present a problem if it had to be guarded in town. This storage would not be permitted underneath such powerlines. This business would either have to be relocated to another cost-free site or closed down and a worker retrenched.

So you can expect a variety of response to this from affected people in Wakkerstroom.

Regards

Roland Stone

Dear stakeholder

Please find attached an introductory letter, Background Information Document, a map and a comment sheet to announce to you the Environmental Impact Assessment (EIA) that is being undertaken on behalf of Eskom for the proposed 765kV power line from Camden substation (Mpumalanga), near Ermelo to Mbewu (Theta) substation near Empangeni (KwaZulu-Natal).

Several alternatives are being investigated and we would like you to become involved as an interested and affected party to provide your comments in this EIA. Please be so kind as to complete the attached comment sheet – sending a completed sheet back to us will indicate that you would like to be involved and that we should send further information to you.

The documents attached are available in Afrikaans and Zulu – should you wish to receive copies, please let us know. Alternatively you are also welcome to visit the web site of Eskom or our company web site to download the information – <http://www.zitholele.co.za/camden-theta> or [www.eskom.co.za](http://www.eskom.co.za)

Please watch your local press as advertisements announcing the EIA are being published. Our team is also putting up site notices and handing out Background Information Documents along the proposed alternative routes this week.

We will appreciate your assistance to “spread the word” about this EIA – please forward this to your colleagues, other members of your organization, neighbours and friends.

Should you have any questions, please do not hesitate to contact us.

Kind regards

**Subject:** Eskom: Beoogde nuwe 765kV lyn

Dear Chairperson/Secretary

We have received the eMail below and would appreciate your contacting Anelle Lotter direct with your information so that you can be kept in the loop with regard to progress made with this development. As you will see it covers quite a vast area through KZN and there could be a number of farmers (your members) affected by this.

Kind regards

Ethel

>>> Anelle Lötter <[anellel@zitholele.co.za](mailto:anellel@zitholele.co.za)> 17/08/2010 11:01 AM >>>

Dear Ethel

A discussed telephonically, Eskom proposes another 765kV line from Ermelo (Camden) in Mpumalanga to Empangeni (KZN). Three alternative corridors for the proposed line have been identified and may impact land around the following towns in KZN:

- Utrecht,
- Paulpietersburg,
- Pongola,
- Vryheid,
- Dundee,
- Nqutu,
- Ulundi,
- Jozini,
- Melmoth,
- Hluhluwe,
- Hlabisa,
- Mtubatuba,
- Kwambonambi,
- Richardsbaai,
- Eshowe and
- Empangeni.

The Environmental Impact Assessment (EIA) has just started, in fact, we are in the process to compile a background information document and to compile a list of interested and affected parties. At the beginning of the process we would like to contact the relevant farmer associations to ensure that they are **involved from the start**. If possible could you please send this email to the chairpersons or secretaries of the various farmers' associations – all we need from them at this stage is a contact number, email address and a postal address so that we may send them the necessary information to register as interested and affected parties.

Should anyone require any information, they are more than welcome to contact me directly.

Your assistance will be greatly appreciated!

Kind regards  
Anelle

Dear Judy

I'm looking for a list with contact details of all forestry companies from Ermelo in Mpumalanga towards Empangeni in KZN. We're about to begin with an Environmental Impact Assessment and would like to ensure that we have the forest owners on our database. Could you perhaps assist?

Your help will be much appreciated!

Kind regards  
Anelle

Dear Ms Gumbi-Masilela

Zitholele Consulting has just been appointed to undertake an Environmental Impact Assessment for Eskom for a proposed 765kV power line. It is anticipated that the line will be running from Ermelo to Empangeni in KZN. We are urgently looking for a list of all the Traditional Leaders and their contact details in and around Utrecht, Paulpietersburg, Pongola, Vryheid, Dundee, Nqutu, Ulundi, Jozini, Melmoth, Hluhluwe, Hlabisa, Mtubatuba, Kwambonambi, Richard's Bay, Eshowe and Empangeni.

Your assistance will be most valuable.

Kind regards

**Subject:** RE: Public meeting at Empangeni -23 November 2010

Hallo André,

I have info. of the following :

1. Florian Kroeber, **Atrum Energy (Pty) Ltd**, Tel : +27 (31) 336 2503, [florian.kroeber@astrumenergy.com](mailto:florian.kroeber@astrumenergy.com)

I have the following info. on them :

- 2010/03 : Proposed installation of Construction Wind Monitoring Mast, Farm Mkonge, 17517 in Hluhluwe. The purpose is to measure wind data/speed over a period of a year or more (if required). Depending on the feasibility of the wind data obtained, a wind farm comprising of various wind turbines will be installed.
- Client/Developer : Atrum Energy (Pty) Ltd
- EIA (KZNDAAEA) : DC27/0002/2010 (EIA by Natasha Lalie, S.E.F.) > Basic assessment attached.

2. Emil Unger (Project Development – Africa), **Electrawinds**, Tel : +27 82 465 9825, [emil@megatrade.co.za](mailto:emil@megatrade.co.za)

I have the following info. on them :

- 2010/02 : Emil contact Frans w.r.t. development of commercial Wind-farm in the region. (they are busy with one at Coega (20 x mills at +-2MW each), Namibia and Mauritius and want to test this region for suitability.)
- 2010/04 : We put the 2 parties into contact with one another for possible collaboration and to possibly even share the cost, etc. of putting up wind monitoring mast/s.

I am also aware that some farmers in the region has had contact with/from people interested, but do not have details of whom the people were. The farmers I am aware that had contact include : Pierre Redinger (Crystal Holdings) and Kevin Seamark (UVS)

Please do not hesitate to contact me should you require further assistance. I would appreciate if you could keep me updated on developments in this regard.

Regards,

Frans van der Walt

Good morning Frans

I hope you are well and thank you very much for attending the Eskom meeting last week.

Just some follow-up from my side. During the meeting you mentioned a few companies in the region interested in wind energy and Jacob Mblele from Eskom asked that these companies should contact Eskom. Do you have names or contact details I can pass on to Eskom to keep the ball rolling?

Baie dankie en 'n lekker dag verder.

**Subject:** EIA for a proposed 765kV Camden-Mbewu power line

Dear stakeholder

Please find attached an introductory letter, Background Information Document, a map and a comment sheet to announce to you the Environmental Impact Assessment (EIA) that is being undertaken on behalf of Eskom for the proposed 765kV power line from Camden substation (Mpumalanga), near Ermelo to Mbewu (Theta) substation near Empangeni (KwaZulu-Natal).

Several alternatives are being investigated and we would like you to become involved as an interested and affected party to provide your comments in this EIA. Please be so kind as to complete the attached comment sheet – sending a completed sheet back to us will indicate that you would like to be involved and that we should send further information to you.

The documents attached are available in Afrikaans and Zulu – should you wish to receive copies, please let us know. Alternatively you are also welcome to visit the web site of Eskom or our company web site to download the information – <http://www.zitholele.co.za/camden-theta> or [www.eskom.co.za](http://www.eskom.co.za)

Please watch your local press as advertisements announcing the EIA are being published. Our team is also putting up site notices and handing out Background Information Documents along the proposed alternative routes this week.

We will appreciate your assistance to "spread the word" about this EIA – please forward this to your colleagues, other members of your organization, neighbours and friends.

Should you have any questions, please do not hesitate to contact us.

Kind regards

**Anelle Lotter** (Odendaal)

Please find attached some information for a start. We also have the shape files of the alternative routes available – would you like me to send them to you?

If you could please complete the attached comment sheet – we will make sure that you receive information throughout.

Please find attached an introductory letter, Background Information Document, a map and a comment sheet to announce to you the Environmental Impact Assessment (EIA) that is being undertaken on behalf of Eskom for the proposed 765kV power line from Camden substation (Mpumalanga), near Ermelo to Mbewu (Theta) substation near Empangeni (KwaZulu-Natal).

Several alternatives are being investigated and we would like you to become involved as an interested and affected party to provide your comments in this EIA. Please be so kind as to complete the attached comment sheet – sending a completed sheet back to us will indicate that you would like to be involved and that we should send further information to you.

The documents attached are available in Afrikaans and Zulu – should you wish to receive copies, please let us know. Alternatively you are also welcome to visit the web site of Eskom or our company web site to download the information – <http://www.zitholele.co.za/camden-theta> or [www.eskom.co.za](http://www.eskom.co.za)

Please watch your local press as advertisements announcing the EIA are being published. Our team is also putting up site notices and handing out Background Information Documents along the proposed alternative routes this week.

We will appreciate your assistance to “spread the word” about this EIA – please forward this to your colleagues, other members of your organization, neighbours and friends.

Should you have any questions, please do not hesitate to contact us.

Kind regards

Dear Florence and Anellie

WWF has heard about this proposed powerline and the EIA that you are running. It appears that the proposed routes run directly through the Enkangala Grasslands area.

Please could you register us as IAPs and send us the background information document.

Kind regards  
Brent Corcoran

Dear Anelle,

Will you please include me in your e-mailing list for the Camden-Mbewu power line. I want to herewith register as an interested and affected party so that I may receive further information and notifications during the Environmental Impact Assessment process.

Sorry for registering late, but I only received my letter earlier this week, it went via P.O. Box 176, Brits, 0250 (my auditors)

Title Mrs  
First Name Estelle  
Initials E  
Surname Van Deventer  
Organisation Balele Mountain Farms  
E-mail [balele@vodamail.co.za](mailto:balele@vodamail.co.za)  
Postal address P.O. Box 211, Wakkerstroom, 2480  
Tel no 0827728881  
Fax no 0866976449

I would like notifications via e-mail.  
I would like to receive documents for comment also via e-mail.

Regards  
Estelle van Deventer

Hi Heinz

Anelle is n konsultant wat op die Eskom projek werk.

Dis die beplande / potensiele roetes van Camden kragstasie na Empangeni.

Ek stuur die info na jou as voorsitter vd Commondale boerevereniging vir as daar dalk ander boere is wat belangstel.

N Mens moet registreer om op hulle kontak lys te kom om opvolg nuus te ontvang.

groete

Dave Smit

**Subject:** EIA for a proposed 765kV Camden-Mbewu power line

Dear Dave and Colin

Please find attached some information – do look at the urgent notice – it lists the times and venues for the proposed meetings.

I will be sending another email with the shape files.

PLEASE, complete the comment sheet and send it back to us so that we may include your details on our database – otherwise you may not receive further correspondence.

Kind regards

**Anelle Lotter**  
Zitholele Consulting  
Tel: (011) 207 – 2076

Email: [alotter@zitholele.co.za](mailto:alotter@zitholele.co.za)

Dear stakeholder

Please find attached an introductory letter, Background Information Document, a map and a comment sheet to announce to you the Environmental Impact Assessment (EIA) that is being undertaken on behalf of Eskom for the proposed 765kV power line from Camden substation (Mpumalanga), near Ermelo to Mbewu (Theta) substation near Empangeni (KwaZulu-Natal).

Several alternatives are being investigated and we would like you to become involved as an interested and affected party to provide your comments in this EIA. Please be so kind as to complete the attached comment sheet – sending a completed sheet back to us will indicate that you would like to be involved and that we should send further information to you.

The documents attached are available in Afrikaans and Zulu – should you wish to receive copies, please let us know. Alternatively you are also welcome to visit the web site of Eskom or our company web site to download the information – <http://www.zitholele.co.za/camden-theta> or [www.eskom.co.za](http://www.eskom.co.za)

Please watch your local press as advertisements announcing the EIA are being published. Our team is also putting up site notices and handing out Background Information Documents along the proposed alternative routes this week.

We will appreciate your assistance to “spread the word” about this EIA – please forward this to your colleagues, other members of your organization, neighbours and friends.

Should you have any questions, please do not hesitate to contact us.

Kind regards

**Anelle Lotter** (Odendaal)

## **Appendix I: Background Information Document**

## BACKGROUND INFORMATION DOCUMENT

October 2010

This Background Information Document (BID) provides Interested and Affected Parties (I&APs) with information on the Environmental Impact Assessment (EIA) that is being conducted by Zitholele Consulting (Pty) Ltd for the proposed 765 kV Camden-Mbewu (Theta) power line between Ermelo and Empangeni.

This BID also provides I&APs with the opportunity to:

- Register as stakeholders in the public participation process; and
- Comment on the proposed project.

The purpose of an EIA is to identify and evaluate potential impacts, to recommend measures to avoid or reduce negative impacts and to enhance positive impacts. The decision-making authority for this EIA is the Department of Environmental Affairs in accordance with Section 24(5) of the National Environmental Management Act (NEMA), Act No 107 of 1998.

### Register by 5 November 2010

You will be included on the stakeholder database and receive further documents for comment. Your comments will ensure that all relevant issues are incorporated. Either complete and submit the enclosed registration / comment sheet, write a letter, call or e-mail the public participation office, if you wish to raise any concerns regarding this EIA.

All EIA documents will be available on the internet at [www.eskom.co.za](http://www.eskom.co.za) and [www.zitholele.co.za](http://www.zitholele.co.za).

## BACKGROUND

Eskom is the South African utility that generates, transmits and distributes electricity. Eskom supplies about 95% of the country's electricity, and about 60% of the total electricity consumed in Africa. Eskom plays a major role in accelerating growth in the South African economy by providing a high-quality supply of electricity.

Eskom is in the process of undertaking major infrastructure investments, including the construction of substations and new transmission power lines. The transmission network supplying electricity to KwaZulu-Natal requires strengthening to meet the growing demand in this province and to improve service quality and reliability.

To address this situation Eskom wants to construct a number of new transmission lines, linking its main generating facilities in Mpumalanga with demand centres in KwaZulu-Natal.

The strengthening of the electricity network entails the phased construction of various 765kV transmission lines all over the country in the near future. The construction of a 765kV power line is a listed activity in terms of Section 24(5) of the National Environmental Management Act (NEMA), Act No 107 of 1998 and therefore requires environmental authorisation from the Department of Environmental Affairs (DEA).

## PROPOSED PROJECT

This Environmental Impact Assessment (EIA) focuses on the proposed 765 kV transmission line from the Camden, substation near Ermelo in the east of Mpumalanga to the Mbewu (Theta) substation that will be built near Empangeni in the north of KwaZulu-Natal.

The direct distance between the two substations is approximately 360km and is characterised by forestry, sugar cane farming, cultivated lands, open fields, cattle farming, game farms and residential areas.

There are several alternative routes with each route having a corridor of two kilometres wide (to be confirmed by the DEA). These alternatives will be screened during the scoping phase of the EIA to determine if they are environmentally feasible, to identify any high level fatal flaws and to propose other alternatives if applicable.

The alternatives will be assessed by specialists before the decision making authority, the DEA will study the findings of the EIA and decide whether to grant or refuse authorisation and determine the alternative with the least impact on the environment as the proposed transmission line corridor.

A 765 kV transmission line is the biggest of its kind used by Eskom, with a pylon, also

called a tower, with an average height of 40 m and it requires a servitude of 80 m wide – 40 m on either side of the centre line (90 m wide in plantations).

The reason for investigating a corridor of two kilometres wide (to be confirmed by the DEA) while a servitude of 80 m is needed for the transmission line, is once an alternative has been approved by the DEA a "walk down" of the approved corridor will take place by Eskom's team of negotiators together with relevant EIA specialists. This is to ensure that deviations of the route can still be made within the approved corridor should any environmental, social or economic sensitivities be observed or negotiations with landowners require the route to slightly deviate.

No structures, large trees, sugar cane or the stacking of any material may occur within the servitudes. Farmers are allowed to plant wheat, grain and maize, etc within the servitude underneath the transmission lines.

**ZITHOLELE**  
CONSULTING

## TRANSMISSION LINE POTENTIAL IMPACTS

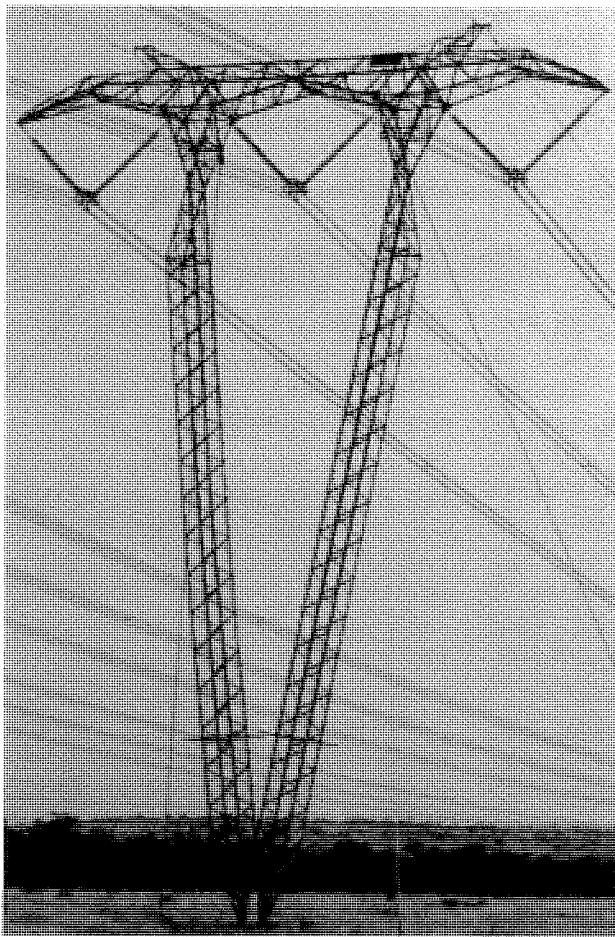

Transmission power lines are large structures and have potential impacts on their surroundings. Possible impacts to the physical and socio-economic environments include:

- Land use – The proposed corridors pass through agricultural land and there may be restrictions to what a farmer will be allowed to do beneath the lines.
- Land use management – Eskom requires regular access to the transmission line for maintenance.
- Visual impact – The pylons have an average height of 40 m and will be highly visible in certain areas.
- Heritage resources – The proposed corridor will be investigated for archaeological and historical remains and old buildings.
- Electro-magnetic field – A 765 kV line generates an electro-magnetic field and may have safety concerns that need to be investigated.

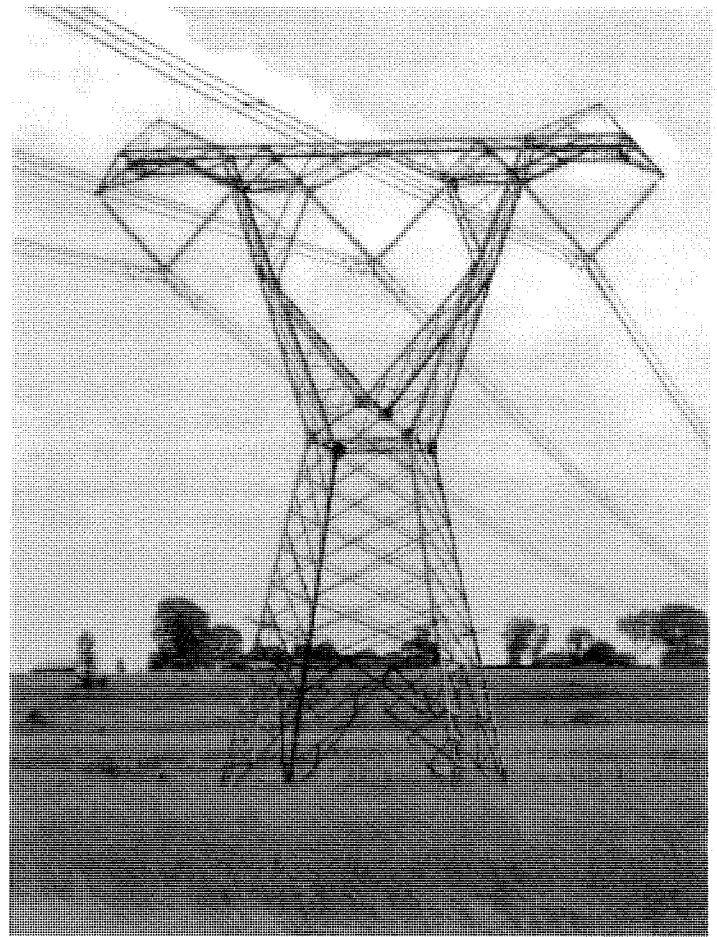

- The construction and placement of the pylons and the construction of access roads may have a negative influence on the vegetation, which must be surveyed for threatened and endangered plant and animal species.
- The transmission line might occur in the flight path of birds making mitigating measures necessary.

There are various types of pylon/tower designs such as the Guyed-V suspension tower/pylon that may be used for this transmission line once authorisation has been granted. The need for selecting a pylon/tower type will be determined by the project team that will consider the pylon type that is most feasible. Strain towers, with a much stronger and larger structure, could be used on bends greater than 3 degrees and where stronger structures are needed.

**Guyed V-Tower**

**Strain Tower**

## SELECTING ALTERNATIVES

The following criteria were used to select the alternatives for this proposed transmission line:

- The corridors run parallel to existing lines that may minimise the environmental impact.
- The minimisation of visual impacts, especially over mountainous terrain.
- Avoiding, where possible sudden changes in the topography such as valley-mountain interfaces.
- Unstable geological and soil areas.
- Areas with severe sheet and gully erosion and overgrazed areas.
- Sensitive bird areas including foraging, roosting and nesting sites.
- Sensitive nature reserves and wildlife areas.
- Wetlands.
- Areas of human habitation.
- Industrial and mining areas.

# Environmental Impact Assessment

An Environmental Impact Assessment (EIA) is a planning and decision-making process undertaken in terms of Section 24 (5) of the National Environmental Management Act (NEMA), Act No 107 of 1998.

## WHAT IS AN EIA?

An EIA has two parallel and integrated processes namely, a **technical** and a **public participation** process.

The **technical process** investigates "hard" information: facts based on scientific and technical studies, statistics or technical data. It identifies the potential negative and positive consequences of a proposed project or development at an early stage and recommends ways to enhance positive impacts and to avoid, reduce or mitigate negative impacts.

The EIA regulations require that an Environmental Management Plan (EMP) be developed. The EMP provides recommendations on how to operate and implement the project. The provisions of the EMP are legally binding on the developer and its contractors.

**Public participation** ensures that the EIA process is fair, open and, transparent. It also provides stakeholders with sufficient information and gives them opportunity to contribute.

Negotiations with landowners for land and servitudes and compensation will be shared with the stakeholders during the public participation process of the EIA.

However these negotiations will take place in a separate process. The findings of the EIA will assist landowners and Eskom to determine the extent of local impacts in support of any negotiations that might be necessary.

The public participation process is designed to provide sufficient and accessible information to interested and affected parties in an objective manner to assist them to:

- Raise issues of concern and make suggestions for alternatives and enhanced benefits;
- Contribute local knowledge;
- Verify that their issues have been captured and considered by the technical investigations; and
- Comment on the findings of the EIA.

## ACTIVITIES ASSESSED DURING THIS EIA

In terms of **Government Notice (GN) R. 545 of 2010**, the following listed activity requires that a full EIA be undertaken and are applicable to this proposed project:

**Activity 8:** The construction of facilities or infrastructure for the transmission and distribution of electricity with a capacity of 275kV or more, outside an urban area or industrial complex.

In terms of **Government Notice (GN) R. 544 of 2010**, the following listed activities require that a Basic Assessment be undertaken for the proposed project (these activities having a lesser impact than those of the activities requiring an EIA will result in an EIA being undertaken for the proposed project):

**Activity 10:** The construction of facilities or infrastructure for the transmission or distribution of electricity: - (ii) inside urban areas or industrial complexes with a capacity of 275 kV or more.

**Activity 22:** The construction of a road, outside urban areas, (i) with reserve wider than 13.5 metres or; (ii) where no reserve exists where the road is wider than eight metres.

**Activity 24:** The transformation of land bigger than 1000 square metres in size, to residential, retail, commercial,

industrial or institutional use, where, at the time of the coming into effect of this Schedule such land was zoned open space, conservation or had an equivalent zoning.

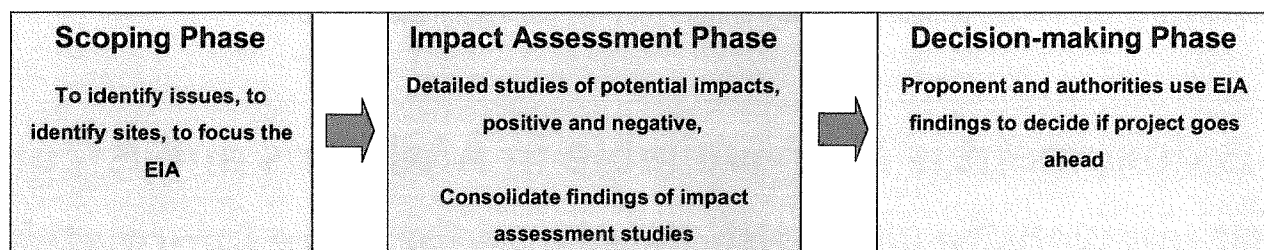

**Activity 26:** Any process or activity identified in terms of section 53(1) if the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004).

**Activity 38:** The expansion of facilities for the transformation and distribution of electricity where the expanded capacity will exceed 275 kV and the development footprint will increase.

**Activity 47:** The widening of a road by more than six meters, or the lengthening of a road by more than one kilometre: there the existing reserve is wider than 13.5 metres; or where no reserve exists, where the existing road is wider than eight metres.

Additional listed activities in terms of Government Notice (GN) R 546 of 2010 are being applied for. These listed activities are included in the EIA application form.

This application form will form an appendix to the Draft Scoping Report which will be made available for public comment once available.

The Environmental Impact Assessment Process

# PHASES OF AN EIA

## SCOPING PHASE OF THE EIA

The **first phase** of an EIA is the Scoping Phase, which is conducted to gain understanding of the potential environmental issues that are relevant to the project and to determine where further information is required, in the form of specialist studies/ investigations.

The Scoping Report and Plan of Study for the EIA are submitted to the Department of Environmental Affairs (DEA) for review and to approve the proposed approach to the detailed investigation required in the next phase.

The Mpumalanga Department of Economic Development, Environment and Tourism and the KwaZulu-Natal Department Agriculture, Environmental Affairs and Rural Development are the commenting authorities on the study.

Activities involved in the Scoping Phase include:

- Meetings with authorities to agree on process and study requirements;

- The placing of site notices, the distribution of letters, this Background Information Document and an invitation to contribute to the EIA process to Interested and Affected Parties in the project area and beyond;
- Advertisements in local and regional newspapers to announce opportunities to participate;
- Progress feedback letter to be issued and announcements to be made of the availability of the Draft Scoping Report (DSR) and Issues and Responses Report (IRR);
- Distribution of a DSR, including IRR, for comment;
- Convening stakeholder workshops in the project area to obtain comment on the DSR;
- Submission of a Final Scoping Report (FSR), capturing all issues raised for the impact assessment, to the DEA;
- Submit the Plan of Study for the EIA to the DEA;
- Distribution of the FSR for information; and
- Progress feedback letter to stakeholders.

## IMPACT ASSESSMENT PHASE OF THE EIA

The **second phase** of the EIA is an Impact Assessment Phase which entails undertaking various specialist studies, compiling an Environmental Impact Report (EIR) and a Draft EMP.

As part of the assessment, an EMP for the project will also be submitted to the DEA for their approval. Following the EMP, pre and post construction, will ensure compliance to environmental regulations during the planning, construction, operation and decommissioning (if applicable) phases.

The list of identified specialist studies required for this EIA (to date) is listed below (all seasonal dependent studies will be undertaken in the wet season):

- Terrestrial Ecology Assessment (Fauna and Flora);
- Avi-fauna Assessment;
- Heritage Impact Assessment;
- Social Impact Assessment;
- Surface Water Assessment;
- Soils and Land Capability / Agricultural Assessment;
- Visual Impact Assessment; and
- Geographic Information Systems (GIS).

The names of the specialists who will undertake these studies are available from the public participation office.

Specific activities in this phase will include:

- Specialist studies focused on outcomes of the Scoping Phase and issues raised by stakeholders;
- Progress feedback to stakeholders;
- Compilation of a Draft EIR indicating the potential positive and negative impacts and measures to enhance positive impacts and to reduce or avoid negative impacts;
- Environmental Impact Statement, highlighting the preferred alternative and reasons thereof;
- Advertise the availability of the Draft EIR in local and regional newspapers;
- Distribution of the Draft EIR, including Issues and Responses Report, for comment; and
- Stakeholder meetings in the project area to present the findings of the EIA for stakeholder comment.

The Draft EIR and EMP will then be finalised and submitted to the DEA for a decision.

## DECISION-MAKING PHASE OF THE EIA

The **third phase** involves a decision by the decision-making authority, the DEA in this case. The DEA must accept or reject this report within 105 days. Stakeholders will be advised of the DEA's decision if Environmental Authorisation has been granted or not and the appeal procedure should they wish to appeal the decision.

## AGTERGRONDINLICHTINGS-DOKUMENT

Oktober 2010

Hierdie Agtergrondinligtings-dokument (AID) bied aan Belanghebbende en Geaffekteerde partye (B&GP's) inligting oor die Omgewingsimpakbepaling (OIB) wat deur Zitholele Consulting (Edms) Bpk gedoen word vir die voorgestelde 765 kV Camden-Mbewu (Theta)-kraglyn tussen Ermelo en Empangeni. Hierdie AID bied ook aan B&GP's 'n geleentheid om:

- Te registreer as belanghebbendes in die proses van openbare deelname; en
- Kommentaar op die voorgestelde projek te lewer.

Die doel van 'n OIB is om potensieël impakte te identifiseer en te evalueer, om maatreëls aan te beveel om negatiewe impakte te verminder en om positiewe impakte te vergroot. Die besluitneemowerheid vir hierdie OIB is die Departement van Omgewingsake, ooreenkomstig artikel 24(5) van die Wet op Nasionale Omgewingsbestuur, 1998 (Wet No 107 van 1998).

### Registreer teen 5 November 2010

U sal in die databasis van belanghebbendes opgeneem word en sal verdere dokumente vir kommentaar ontvang. U kommentaar sal verseker dat alle tersaaklike kwessies opgeneem word. As u enige kwellings rakende hierdie OIB wil opper, vul die bygaande registrasie/kommentaarblad in en stuur dit aan ons per brief, of skakel per telefoon of e-pos met die Kantoor vir Openbare Deelname

Alle OIB-dokumente sal op die internet beskikbaar wees by [www.eskom.co.za](http://www.eskom.co.za) en [www.zitholele.co.za](http://www.zitholele.co.za).

## AGTERGROND

Eskom is die Suid-Afrikaanse nutsmaatskappy wat elektrisiteit opwek, oorbring en versprei. Eskom verskaf ongeveer 95% van die land se elektrisiteit en sowat 60% van al die elektrisiteit wat in Afrika verbruik word. Eskom speel 'n belangrike rol om groei in die Suid-Afrikaanse ekonomie te versnel deur elektrisiteitsvoorsiening van hoë gehalte te verskaf.

Eskom is besig met grootskaalse infrastruktuurinvestering, insluitende die bou van substasies en nuwe transmissiekraglyne. Die transmissienetwerk wat elektrisiteit aan KwaZulu-Natal lewer, moet versterk word om in die groeiende vraag in dié provinsie te voorsien en om die

gehalte en betroubaarheid van diens te verbeter.

Met die oog hierop wil Eskom 'n aantal nuwe transmissielyne bou om sy vernaamste opwekfasiliteite in Mpumalanga te verbind met vraagsentrums in KwaZulu-Natal.

Die versterking van die elektrisiteitsnetwerk behels die gefaseerde bou van verskeie 765 kV-transmissielyne dwarsdeur die land in die nabye toekoms. Die bou van 'n 765 kV-kraglyn is 'n gelyste aktiwiteit ingevolge artikel 24(5) van die Wet op Nasionale Omgewingsbestuur, Wet No 107 van 1998, en vereis dus omgewingsmagtiging van die Departement van Omgewingsake (DO).

## VOORGESTELDE PROJEC

Hierdie Omgewingsimpakbepaling (OIB) fokus op die voorgestelde 765 kV-transmissielyn van die Camden-substasie naby Ermelo in die ooste van Mpumalanga na die Mbewu (Theta)-substasie wat naby Empangeni in die noorde van KwaZulu-Natal gebou gaan word.

Die regstreekse afstand tussen die twee substasies is ongeveer 360 km en die terrein word gekenmerk deur bosbou, suikerrietboerdery, bewerkte landerye, oop veld, beesboerdery, wildplase en woongebiede.

Daar is verskeie alternatiewe roetes, en elke roete het 'n korridor van twee kilometer breed (moet deur die DO bevestig word). Hierdie alternatiewe sal gedurende die omvangsfase van die OIB ondersoek word om vas te stel of dit omgewingskundig doenlik is, om enige hoëvlakse groot tekortkominge te identifiseer en ander alternatiewe voor te stel waar van toepassing.

Die alternatiewe sal deur spesialiste geëvalueer word voordat die besluitneemowerheid, die DO, die bevindings van die OIB sal bestudeer en besluit om magtiging te verleen of te weier en die alternatief met die minste impak op die omgewing bepaal as die voorgestelde transmissielynkorridor.

'n 765 kV-transmissielyn is die grootste in sy soort wat deur Eskom gebruik word, met 'n mas, ook 'n toring genoem, van gemiddeld 40 m hoog, en dit vereis 'n serwituuat van 80 m breed – 40 m aan weerskante van die middellyn (90 m in plantasies.)

Die rede hoekom 'n korridor van twee kilometer breed (moet deur die DO bevestig word) ondersoek word terwyl 'n serwituuat van 80 m vir die transmissielyn vereis word, is dat nadat 'n alternatief deur die DO goedgekeur is, Eskom se span onderhandelaars saam met die betrokke OIB-spesialiste oor die goedgekeurde korridor sal stap. Dit word gedoen om te verseker dat afwykings van die roete nog binne die goedgekeurde korridor gemaak kan word as enige omgewingskundige, maatskaplike of ekonomiese sensitiwiteite opgemerk word of onderhandelings met grondeienaars vereis dat die roete effens gewysig word.

Binne die serwitute mag daar geen strukture, groot bome, suikerriet of opstapeling van materiaal wees nie. Boere mag koring, mielies ens in die serwituuat onder die transmissielyne plant.

## POTENSIËLE IMPAK VAN TRANSMISSIELYNE

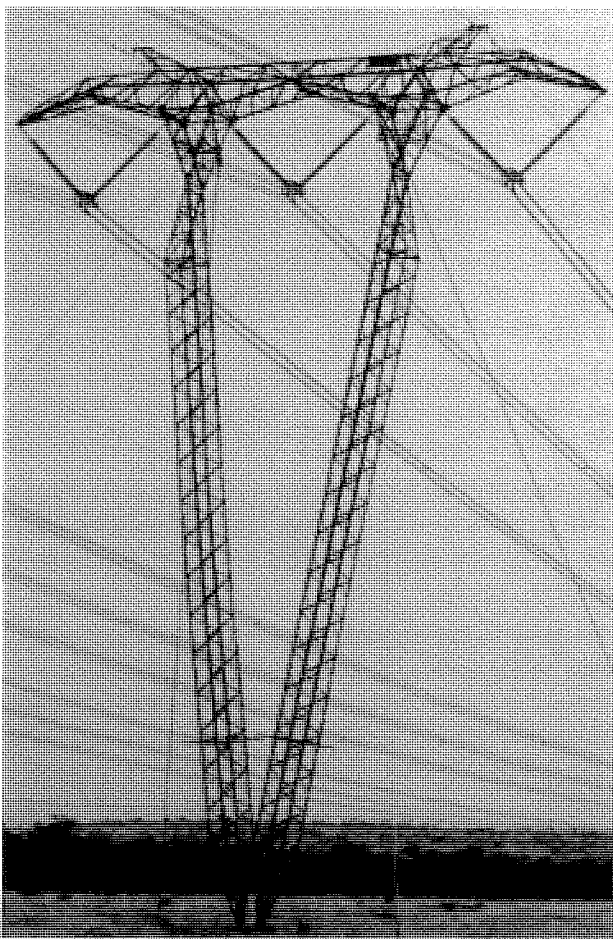

Transmissiekraglyne is groot strukture en het potensiële impakte op hulle omgewing. Moontlike impakte op die fisiese en sosio-ekonomiese omgewings sluit in:

- Grondgebruik – Die voorgestelde korridors loop deur landbougrond en daar kan beperkings wees op wat 'n boer onder die lyne mag doen.
- Grondgebruikbestuur – Eskom vereis gereelde toegang tot die transmissielyn vir instandhouding.
- Visuele impak – Die maste is gemiddeld 40 m hoog en sal in sekere gebiede baie sigbaar wees.
- Erfenishulpbronne – Die voorgestelde korridor sal ondersoek word vir argeologiese en geskiedkundige oorblyfsels en ou geboue.
- Elektromagnetiese veld – 'n 765 kV-lyn wek 'n elektromagnetiese veld op en kan veiligheidsoorwegings hê wat ondersoek moet word.

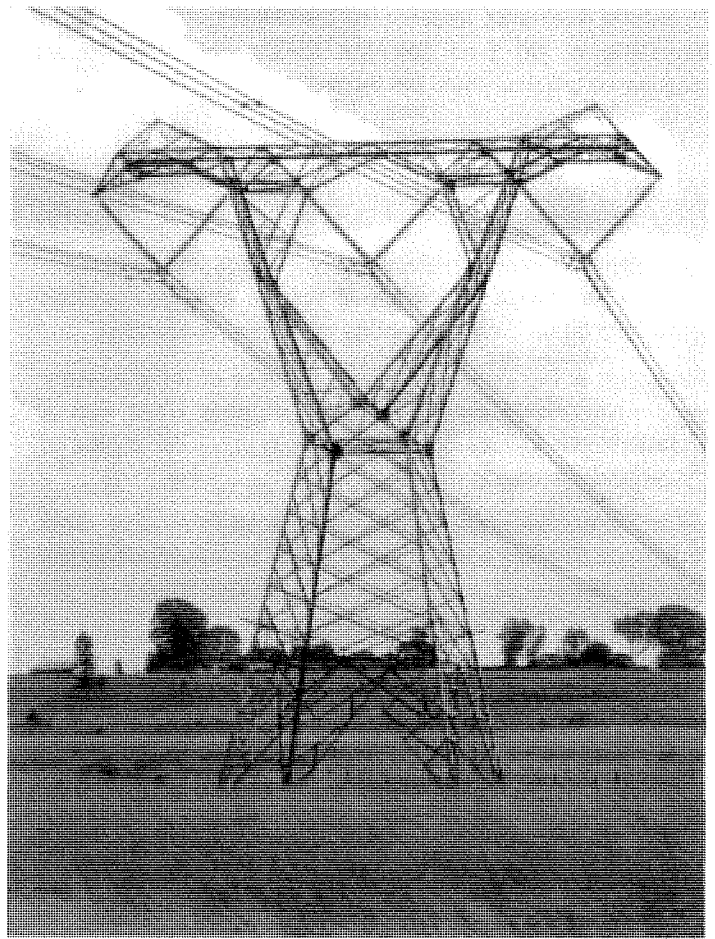

- Die konstruksie en plasing van die maste en die bou van toegangspaaie kan 'n negatiewe impak hê op plantegroei, wat ondersoek moet word vir bedreigde of kwynende plant- en diersoorte.
- Die transmissielyn kan dalk in die vlugbaan van voëls wees, wat versagtingsmaatreëls kan vereis.

Daar is verskeie tipes mas- of toringontwerpe, soos die geankerde V-draagmas wat vir hierdie transmissielyn gebruik kan word nadat magtiging verleen is. Die keuse van die geskikste mastipe sal deur die projekspan bepaal word. Spanmaste, met 'n baie sterker en groter struktuur, kan op draaie van meer as 3 grade gebruik word en waar sterker strukture nodig is.

Geankerde V-toring

Spantoring

## KEUSE VAN ALTERNATIEWE

Die volgende kriteria is gebruik om die alternatiewe vir hierdie voorgestelde transmissielyn te kies:

- Die korridors loop ewewydig aan bestaande lyne, wat die omgewingsimpak kan verminder.
- Die beperking van visuele impakte, veral oor bergagtige terrein.
- Vermy waar moontlik skielike veranderinge in die topografie, soos waar valleie en berge bymekaar kom.
- Onstabiele geologiese en grondgebiede.
- Gebiede met ernstige plaat- en sloeperosie en oorbeweide gebiede.
- Sensitiewe voëlgebiede, insluitende wei-, slaap- en nesmaakplekke.
- Sensitiewe natuurreservate en natuurlewegebiede.
- Vleilande.
- Gebiede wat deur mense bewoon word.
- Nywerheids- en mynbougebiede.

# Omgewingsimpakbepaling

'n Omgewingsimpakbepaling (OIB) is 'n beplannings- en besluitneemproses wat onderneem word ingevolge artikel 24(5) van die Wet op Nasionale Omgewingsbestuur, 1998 (Wet No. 107 van 1998).

## WAT IS 'N OIB?

'n OIB het tye twee parallelle en geïntegreerde prosesse, naamlik 'n **tegniese** proses en 'n proses van **openbare deelname**.

Die **tegniese** proses ondersoek "harde" inligting: feite gegrond op wetenskaplike en tegniese studies, statistieke of tegniese data. Dit identifiseer die potensiële negatiewe en positiewe gevolge van 'n voorgestelde projek of ontwikkeling in 'n vroeë stadium en beveel maniere aan om positiewe impakte te vergroot en negatiewe impakte te vermy, te verminder of te versag.

Die OIB-regulasies vereis dat 'n Omgewingsbestuursplan (OBP) ontwikkel word. Die OBP bevat aanbevelings oor hoe om die projek te bedryf en te implementeer. Die bepaling van die OBP is wetlik bindend vir die ontwikkelaar en sy kontrakteurs.

**Openbare deelname** verseker dat die OIB-proses billik, oop en deursigtig is. Dit bied ook aan belanghebbendes genoeg inligting en 'n geleentheid om by te dra.

Gedurende die proses van openbare deelname van die OIB sal die belanghebbendes op hoogte gehou word van onderhandelinge met grondeienaars oor grond en serwitute en vergoeding.

Hierdie onderhandelinge sal egter in 'n afsonderlike proses gevoer word. Die bevindings van die OIB sal grondeienaars en Eskom help om die omvang van plaaslike impakte te bepaal met die oog op enige moontlike onderhandelings.

Die proses van openbare deelname is bedoel om voldoende en toeganklike inligting op 'n objektiewe wyse aan belanghebbende en geaffekteerde partye te verskaf om hulle te help om:

- Sorgwekkende kwessies te opper en voorstelle te maak vir alternatiewe opsies en groter voordele;
- Plaaslike kennis by te dra;
- Seker te maak dat hulle kwessies opgeneem is en deur die tegniese ondersoek oorweeg is; en
- Kommentaar te lewer op die bevindings van die OIB.

## AKTIWITEITE WAT TYDENS HIERDIE OIB OORWEEG WORD

Ingevolge **Goewermentskennisgewing R. 545 van 2010** moet 'n volledige OIB vir die volgende gelyste aktiwiteit gedoen word en is dit op die voorgestelde projek van toepassing:

**Aktiwiteit 8:** Die konstruksie van fasiliteite of infrastruktuur vir die transmissie en verspreiding van elektrisiteit met 'n kapasiteit van 275 kV of meer, buite 'n stedelike gebied of nywerheidskompleks.

Ingevolge **Goewermentskennisgewing R. 544 van 2010** moet 'n Basiese Bepaling gedoen word vir die voorgestelde projek (hierdie aktiwiteite het 'n minder ernstige impak as die aktiwiteite wat 'n OIB vereis).

**Aktiwiteit 10:** Die konstruksie van fasiliteite of infrastruktuur vir die transmissie of verspreiding van elektrisiteit –

(ii) binne stedelike gebiede of nywerheidskomplekse, met 'n kapasiteit van 275 kV of meer.

**Aktiwiteit 22:** Die bou van 'n pad buite stedelike gebiede (i) met 'n reserwe breër as 13,5 meter, of (ii) waar daar nie 'n reserwe is nie, waar die pad breër as agt meter is.

**Aktiwiteit 24:** Die transformasie van grond groter as 1 000 vierkante meter tot residensiële, kleinhandels-, kommersiële, nywerheids- of institusionele gebruik, waar sodanige grond

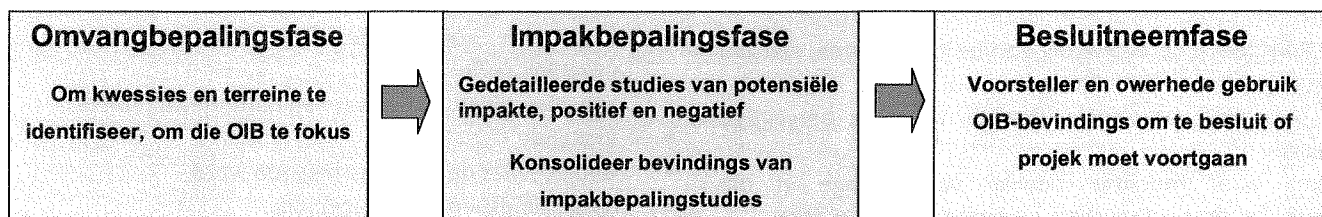

ten tyde van die inwerkingtreding van hierdie Bylae as oop ruimte of vir bewaring gesoneer was of 'n gelykwaardige sonering gehad het.

**Aktiwiteit 26:** Enige proses of aktiwiteit wat geïdentifiseer is ingevolge artikel 53(1) van die National Environmental Management: Biodiversity Act, 2004 (Wet No. 10 van 2004).

**Aktiwiteit 38:** Die uitbreiding van fasiliteite vir die transmissie en verspreiding van elektrisiteit, waar die vergrote kapasiteit meer as 275 kV sal wees en die ontwikkelingsvoetspoor sal toeneem.

**Aktiwiteit 47:** Die verbreding van 'n pad met meer as ses meter, of die verlenging van 'n pad met meer as een kilometer waar die bestaande reserwe breër as 13,5 meter is, of waar daar nie 'n reserwe is nie, waar die bestaande pad breër as agt meter is.

Daar word aansoek gedoen vir bykomende gelyste aktiwiteite ingevolge **Goewermentskennisgewing R. 546 van 2010**. Hierdie gelyste aktiwiteite word by die OIB-aansoekvorm ingesluit. Hierdie aansoekvorm sal 'n aanhangsel wees by die Konsep-Omvangsverslag, wat vir openbare kommentaar beskikbaar gestel sal word sodra dit beskikbaar is.

Die Omgewingsimpakbepalingsproses

# FASES VAN 'N OIB

## OMVANGBEPALINGSFASE VAN DIE OIB

Die **eerste fase** van 'n OIB is die Omvangbepalingsfase, wat gedoen word om 'n begrip te kry van die potensiële omgewingskwessies rakende die projek en om te bepaal waar verdere inligting nodig is, deur middel van spesialisstudies of ondersoeke.

Die Omvangsverslag en Studieplan vir die OIB word aan die Departement van Omgewingsake (DO) voorgelê vir beoordeling en goedkeuring van die voorgestelde benadering tot die gedetailleerde ondersoek wat in die volgende fase vereis word.

Mpumalanga se Departement van Ekonomiese Ontwikkeling, Omgewing en Toerisme en KwaZulu-Natal se Departement van Landbou, Omgewingsake en Landelike Ontwikkeling is die kommentaarowerhede vir die studie.

Aktiwiteite in die Omvangsfase sluit in:

- Vergaderings met owerhede om oor proses- en studievereistes ooreen te kom;

- Die plasing van terreinkennisgewings, die verspreiding van briewe, hierdie Agtergrondinligtingsdokument en 'n uitnodiging om tot die OIB-proses by te dra aan Belanghebbende en Geaffekteerde Partye in die projekgebied en verder;
- Advertensies in plaaslike en streekkoerante om geleenthede vir deelname bekend te maak;
- Terugvoerbrief oor vordering en aankondigings oor die beskikbaarheid van die Konsep-Omvangsverslag (KOV) en die Kwessies- en Reaksiesverslag (KRV);
- Verspreiding van 'n KOV, insluitende die KRV, vir kommentaar;
- Werkwinkels met belanghebbendes in die gebied om kommentaar oor die KOV te kry;
- Voorlegging van 'n Finale Omvangsverslag (FOV) met alle kwessies wat vir die impakbepaling geopper is, aan die DO;
- Voorlegging van die Studieplan vir die OIB aan die DO;
- Verspreiding van die FOV ter inligting; en
- Terugvoerbrief oor vordering aan belanghebbendes.

## IMPAKBEPALINGSFASE VAN DIE OIB

Die **tweede fase** van die OIB is 'n Impakbepalingsfase, wat die uitvoering van verskeie spesialisstudies en die opstel van 'n Omgewingsimpakverslag (OIV) en 'n Konsep-OBP behels.

As deel van die bepaling sal 'n OBP vir die projek ook aan die DO voorgelê word vir goedkeuring. Die nakoming van die OBP voor en na konstruksie sal voldoening aan omgewingsregulasies verseker gedurende die beplannings-, konstruksie-, bedryfs- en (indien van toepassing) uitdientsstellingsfases.

Die geïdentifiseerde spesialisstudies wat (tot dusver) vir hierdie OIB nodig is, verskyn hier onder (alle seisoensafhanklike studies sal in die nat seisoen ook gedoen word):

- Terrestriële Ekologiebepaling (Fauna en Flora);
- Voëllewebepaling;
- Erfenisimpakbepaling;
- Maatskaplike impakbepaling;
- Oppervlakwaterbepaling
- Grondsoort- en Grondvermoë/Landboubepaling;
- Visuele Impakbepaling; en
- Geografiese Inligtingstelsels (GIS).

Die name van die spesialiste wat hierdie studies sal onderneem, kan van die Kantoor vir Openbare Deelname verkry word.

Spesifieke aktiwiteite in hierdie fase sluit in:

- Spesialisstudies wat fokus op uitkomste van die Omvangsfase en kwessies deur belanghebbendes geopper;
- Terugvoer oor vordering aan belanghebbendes;
- Opstel van 'n Konsep-OIV wat die potensiële positiewe en negatiewe impakte toon, asook maatreëls om positiewe impakte te vergroot en negatiewe impakte te verminder of te vermy;
- Omgewingsimpakverklaring, wat die voorkeuralternatief en die redes daarvoor toon;
- Adverteer die beskikbaarheid van die Konsep-OIV in plaaslike en streekkoerante;
- Verspreiding van die Konsep-OIV, met Kwessies- en Reaksiesverslag, vir kommentaar; en
- Vergaderings met belanghebbendes in die projekgebied om die bevindings van die OIB voor te hou vir belanghebbendes se kommentaar.

Die Konsep-OIV en OBP sal dan gefinaliseer en aan die DO voorgelê word vir 'n besluit.

## BESLUITNEEMFASE VAN DIE OIB

Die **derde fase** behels 'n besluit deur die besluitneemowerheid, in hierdie geval die Departement van Omgewingsake (DO). Die DO moet hierdie verslag binne 105 dae aanvaar of verwerp. Belanghebbendes sal in kennis gestel word van die DO se besluit of Omgewingsmagtiging verleen is of nie, en van die appèlprosedure vir as hulle teen die besluit sou wou appelleer.

**DANKIE VIR U BYDRAE**

**Ukuhlolwa Komthelela Emvelweni (EIA) ngomgudu wamandla kagesi i-765 kV  
Camden-Mbewu (Theta)**

DEA Ref 12/12/20/2029

**INCWADI YOKUNIKEZA ULWAZI**

Okthoba 2010

Lo Mbhalo Wolwazi Oluvisendlalelo (Background Information Document (BID) uhlinzeka Abantu Abanentshisekelo Nabathintekile Interested and Affected Parties (I&APs) ngolwazi ngoKuhlolwa Komthelela Emvelweni (EIA) owenziwa iZitholele Consulting (Pty) Ltd ngomgudu wamandla kagesi i-765 kV Camden-Mbewu (Theta) phakathi kwe-Ermelo neMpangeni.

Le BID futhi ihlinzeka ama-I&AP ngethuba:

- Lokubhalisa njengabambiqhaza ohlelweni lokuhlanganyela komphakathi; kanye
- Nokuphawula ngeprojekthi ehlongozwayo.

Inhloso ye-EIA ukukhomba nokuhlola imithelela enokwenzeka, ukuncoma izindlela zokugwema noma zokunciphisa imithelela emibi nokukhuthaza imithelela emihle. Iziphathimandla ezenza izinqumo kule EIA Umnyango Wezemvelo ngokuhambisana nosigaba 24(5) soMthetho Wokuphathwa Kwezemvelo Kuzwelonke (NEMA), Umthetho 107 ka-1998.

**Bhalisa ngomhla ka-5 Novemba 2010**

Uzofakwa ohlwini lwamagama akukhompuyutha ababambiqhaza bese uthola eminye imibhalo yokuthi uphawule. Imibono yakho izoqinisekisa ukuthi zonke izinto ezifanele ziyafakwa. Ungagcwalisa bese uletha ikhasi lokubhalisa/lokuphawula elifakiwe, ungabhala incwadi, ungashaya ucingo noma uthumele i-e-meyili ehhovisi lokuhlanganyela komphakathi, uma ufuna ukuveza ukukhathazeka nanoma yikuphi maqondana nale EIA.

Yonke imibhalo ye-EIA izotholakala ku-inthanethi ku-[www.eskom.co.za](http://www.eskom.co.za) kanye no-[www.zitholele.co.za](http://www.zitholele.co.za)

**Ihhovisi Lokuhlanganyela komphakathi**

**ISENDLALELO**

U-Eskom owenza imisebenzi yosizo lwaseNingizimu Afrika, edlulisa nehambisa ugesi. U-Eskom uphakela ama-95% kagesi wezwe, kanye nama-60% kagesi wonke osetshenziswa e-Afrika. U-Eskom udlala indima enkulu ekusheshiseni ukukhula komnotho waseNingizimu Afrika ngokuhlinzeka ngokunikizela ngogesi okuseqophelweni eliphezulu.

U-Eskom usohlelweni lokutshala izimali kungqalasizinda enkulu, kubandakanya nokwakha iziteshi ezincane kanye nezintambo zokuhambisa amandla kagesi ezintsha. Umphambo wokuhambisa ugesi KwaZulu-Natal udinga ukuqiniswa ukuze uhlangebezane nokufuneka okukhulayo kulesi sifundazwe kanye nokwenza ngcono iqophelo lomsebenzi kanye nokwethembeka.

**IPHROJEKTHI EHLONGOZIWE**

Lokhu Kuhlolwa Komthelela Emvelweni (EIA) kugxile emgudwini wokudlulisa ohlongozwayo i-765 kV osuka eCamden, esiteshini esincane eduze kwase-Ermelo empumalanga neSifundazwe saseMpumalanga uya esiteshini esincane i-Mbewu (Theta) ozokwakhiwa eduze kwase-Empangeni enyakatho neKwaZulu-Natal.

Ibanga eliqondile phakathi kweziteshi ezincane ezimbili cishe ama-360km kanti ibonakala ngamahlathi, amasimu kamoba, imihlaba elinyiwe, amasimu avulekile, amapulazi ezinkomo, amapulazi ezinyamazane kanye nezindawo zokuhlala.

Kuneminye imigudu eminingana ehluahlukene kusukela kuma-320 ukuya kuma-410 km umgudu ngamunye ube nemihubhe (kufanele iqinisekise yi-DEA) engamakhilomitha amabili ububanzi. Lokhu okuhlukile kuzohlungwa ngesikhathi sesigaba sokuhlala se-EIA ukusho ukuthi kungenzeka yini ngokwemvelo, ukukhomba nanoma yimaphi amaphutha abulalayo asezingeni eliphezulu nokuphakamisa okunye okuhlukile uma kukhona.

Okuhlukile kuzohlolwa ngongcweti ngaphambi kwesiphathimandla esenza isinqumo, i-DEA izocwaninga okutholakele kwe-EIA bese iyanquma ukuthi ingabe iyayinikeza yini noma iyala nemvume nokusho okuhlukile okunomthelela omncane kunakho konke emvelweni njengomngcele wentambo yokudlulisa ophakanyisiwe.

Ukubhekana nalesi simo u-Eskom ufuna ukwakha izintambo zokuhambisa ezintsha, zixhume izindawo zokusiza eziphehlayo ezinkulu eMpumalanga nezikhungo zokufuna KwaZulu-Natal.

Ukuqinisa umphambo kagesi kufaka ukufakwa kokwakhiwa kwezintambo zokudlulisa ezahlukene ze-765kV ezweni lonke esikhathini esizayo. Ukwakhiwa kwamandla kagesi i-765kV umsebenzi obaliwe ngokweSigaba 24(5) soMthetho Wokuphathwa Kwezemvelo Kazwelonke (National Environmental Management Act (NEMA), Umthetho 107 ka-1998 futhi-ke kudingeka ukugunyaza kwezemvelo okuvela kuMnyango Wezemvelo (DEA).

Umgudu wokudlulisa i-765 kV ngenkulu kakhulu ohlotsheni lwayo esetshenziswa ngu-Eskom, enesigxobo esikhulu sikagesi i-pylon, futhi

ibizwa ngokuthi umbhoshongo, ongama-40 m ukuphakama futhi inobubanzi obungama-80 m -ama-40 m ohlangothini ngalunye lomugqa ophakathi nendawo (ama-90 m ububanzi emasimini).

Isizathu sokuphenya umhubhe ongamakhilomitha amabili ububanzi (kufanele kuqinisekise yi-DEA) lapho kudingeka khona imvume yokusebenzisa umhlaba yama-80 m adingekela umgudu wokudlulisa, uma okuhlukile sekuvunywe yi-DEA "ukuba ngaphansi" komhubhe ogunyaziwe kuzokwenziwa yithimba le-Eskom labakhulumeli kanye kanye nongcweti abafanele be-EIA. Lokhu okokuqinisekisa ukuthi ukuphambuka komgudu kusangenziwa ngaphakathi komhubhe ovunyiwe uma kubonakala nanoma yikuphi ukuzwela kwezemvelo, kwenhlalo yomphakathi kanye nokuzwela komnotho noma izingxoxo nabanikazi bomhlaba zidinga umgudu ukuthi uphambuke kancane.

Akukho zakhiwo, zihlahla ezinkulu, umoba noma ukutakwa kwananoma iyiphi impahla okungenzeka ngaphakathi emhlabeni wabanye abantu okunegunya lokuthi usetshenziswe. Abalimi bavunyelwe ukuthi balime ukolo, okusanhlamvu kanye nommbila, njll. ngaphakathi emhlabeni okunegunya lokuwusebenzisa ngaphansi kwemigudu yokudlulisa

## IMITHELELA ENOKWENZEKA EMIGUDWINI YOKUDLULISA

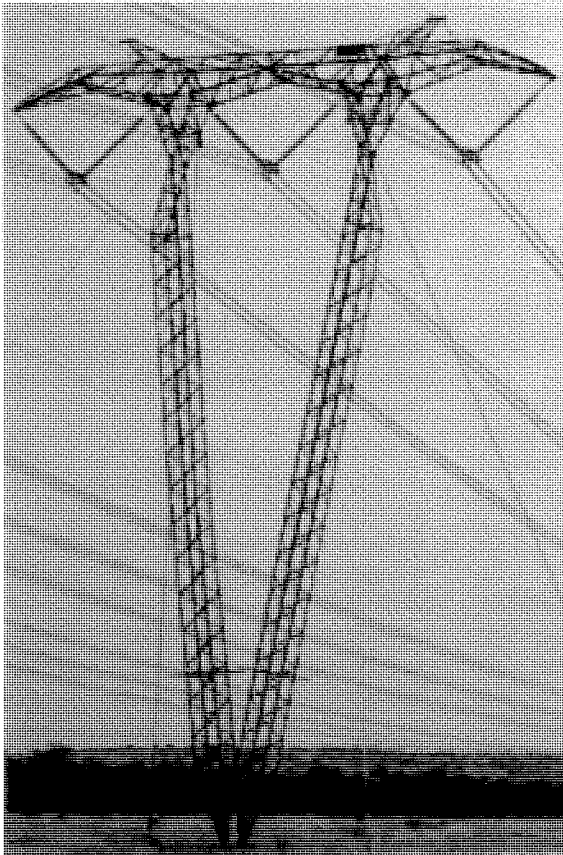

Izintambo zokudlulisa amandla kagesi izakhiwo ezinkulu futhi zinomthelela ezinokuba nawo endaweni ebazungezile. Imithelela enokwenzeka ezindaweni zomzimba nezenhlalo yomphakathi nomnotho nezibandakanya:

- Ukusetshenziswa komhlaba - Imihubhe ephakanyiswayo inqamula emhlabeni wokulima futhi kungenzeka kube nemingcele ekutheni yini abalimi abazovunyelwa ukuthi bayenze ngaphansi kwezintambo.
- Ukuphathwa kokusetshenziswa komhlaba - U-Eskom udinga ukufinyelela okuvamile entanjeni yokudlulisela ukuze anakekele.
- Umthelela obonakalayo - izigxobo ezinkulu zokuthwala ugesi zingama-40 m ukuphakama futhi ziyabonakala kakhulu ezindaweni ezithize.
- Izidingongqangi zamagugu - Umhubhe ophakanyiswayo uzophenywa kubhekwe izinsalela zokumbiwa kwizinto ezisemhlabathini kanye nezomlando kanye namabhilidi amadala.
- I-Electro-magnetic field - Intambo i-A 765 kV yenza i-electro magnetic field futhi kungenzeka kube nokukhathazeka kokuphepha okudinga ukuphenywa.

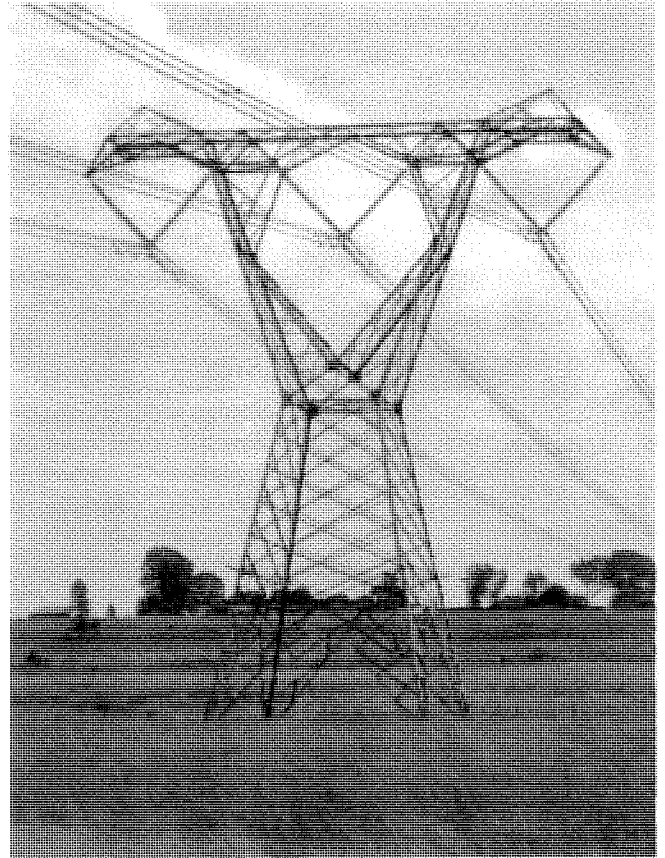

- Ukwakhiwa nokubekwa kwezigxobo ezinkulu zokuhambisa amandla kagesi kanye nokwakhiwa kwemigwaqo yokufinyelela kungabe nomthelela omubi ezitshalweni okufanele ziphenyelwe isitshalo esesatshisiwe nesibekeke engozini kanye nezinhlobo zezilwane.
- Umgudu wokudlulisa kungenzeka wenzeke endleleni yokundizela izinyoni ezenza ukuthi izindlela zokuthambisa zidingeke.

Kunezinhlobo ezahlukeni zezigxobo zokuhambisa ugesi/zamadizayini emibhoshongo anjenge-Guyed-V umbhoshongo wokubekela isikhathi esizayo/isigxobo sokuhambisa ugesi okungasetshenziselwa lomgudu wokudlulisa uma sekunikezwe imvume. Isidingo sokukhetha uhlobo lwesigxobo esikhulu sokuhambisa ugesi (iphayiloni)/umbhoshongo kuzoshiwo ithimba lephrojekthi ezobheka uhlobo lwephayiloni olufanele. Imibhoshongo yokudonsa enesakhiwo esinamandlanyana nesikhudlwana singasetshenziswa emakhoneni angaphezulu kwama-degree ama-3 nalapho okudingeka khona izakhiwo ezinamandlanyana.

Guyed V-Tower

Strain Tower

## UKUKHETHA OKUHLUKILE

Lezi zindlela zasetshenziswa ukukhetha okuhlukile kwalo mgudu wokudlulisa ohlongozwayo:

- Imihubhe ihambisana nemigudu evela ikhona enganciphisa umthelela wemvelo.
- Ukunciphisa kwemithelela ebonakalayo, ikakhulukazi umhlaba oyizintaba.
- Ukugwema, lapho kunokwenzeka khona izinguquko ezisheshayo emhlabeni njengemingcele yezintaba entabeni ephansi.

- Izindawo zemvelo nomhlabathi ezingaqinanga.
- Izindawo ezinokhethe olunamandla kanye nokuguguleka kwezindonga namadlelo asedliwe ngokweqile
- Izindawo ezizweleyo ezinyonini kubandakanya izindawo zokwalukela, zokuhlala ezintini nezokondlela.
- Iziqwi ezinokuzwela kanye nezindawo zezilwane zasendle.
- Amaxhaphozi.
- Izindawo zokuhlala abantu.
- Izindawo zezimboni nezezimayini.

# Ukuhlolwa Komthelela Emvelweni

Ukuhlolwa Komthelela Emvelweni (EIA) uhlelo lokuhlela kanye nokwenza izinqumo ezenziwe ngokweSigaba 24 (50 soMthetho Wokuphathwa Kwemvelo Kazwelonke (National Environmental Management Act (NEMA)), Umthetho 107 ka-1998.

## YINI I-EIA?

I-EIA inezinhlelo ezimbili ezihambisanayo okuyilezi, uhlelo lobuchwepheshe kanye nolokuhlanganyela komphakathi.

**Uhlelo lobuchwepheshe** luphenya ulwazi "olunzima" amaqiniso ancike ezifundweni zesayensi nezobuchwepheshe, izibalo noma ulwazi lobuchwepheshe. Ikhomba imiphumela emibi enokwenzeka nemihle yiphrojekthi ehlongoziwe noma intuthuko esigabeni esiphansi nokuncoma izindlela zokuthuthukisa imithelela emihle nokugwema, ukunciphisa noma ukuqeda imithelela emibi.

Izimiselo zomthetho ze-EIA zidinga ukuthi kwenziwe Uhlelo Lokuphathwa Kwemvelo (EMP): I-EMP ihlinzeka ngesincomo zokuthi iphrojekthi isetshenzwa kanjani futhi iqalisa kanjani ukusebenza. Ukuhlinzeka kwe-EMP kubopha ngokusemthethweni kumthuthukisi kanye nosonkontileka bayo.

**Ukuhlanganyela komphakathi** kuqinisekisa ukuthi uhlelo lwe-EIA luqotho, luvulelekile futhi lwenzelwe obala. Futhi luhlinzeka ababambiqhaza ngolwazi futhi lubanike nethuba lokufaka isandla.

Izingxoxo nabanikazi bomhlaba ngomhlaba kanye nemvume yokusebenzisa umhlaba nesinxephezelo kuzoshiyelwana ngakho nababambiqhaza ngesikhathi sohlelo lokuhlanganyela komphakathi lwe-EIA.

Kodwa-ke lezi zingxoxo zizokwenzeka ohlelweni oluseceleni. Okutholwe yi-EIA kuzosiza abanikazi bomhlaba ne-Eskom ukuthi basho ubungako bemithelela endaweni ukusiza kunanoma yiziphi izingxoxo ezingadingeka.

Uhlelo lokuhlanganyela komphakathi lwenzelwe ukuhlinzeka ngolwazi olwanele nolutholalalayo kubantu abanentshisekelo nabathintekayo ngendlela enonhloso yokubasiza:

- Ukuphakamisa izinto ezikhathazayo nokwenza iziphakamiso zokuhlukile nezinzuzo ezithuthukisiwe;
- Ukufaka isandla ngolwazi lwasendaweni;
- Ukuqinisekisa ukuthi izindaba zabo zithathiwe futhi zabhekela ngophenyo lobuchwepheshe; kanye
- Nokuphawula ngokutholwe yi-EIA.

## IMISEBENZI EHLOLWE NGESIKHATHI SE-EIA

**NgokweSaziso SikaHulumeni (GN).R. 545 sika- 2010**, imisebenzi ebaliwe elandelayo idinga ukuthi kwenziwe i-EIA ephelele futhi ifanele kule phrojekthi ehlongozwayo:

**Umsebenzi 8:** Ukwakhiwa kwezindawo zokusiza noma ingqalasizinda yokudlulisa nokuhambisa ugesi onamandla awu-275kV noma ngaphezulu, ngaphandle kwendawo yasedolobheni noma inxanxathela yezakhiwo zezimboni.

**NgokweSaziso SikaHulumeni (GN).R. 544 ka-2010**, imisebenzi ebaliwe elandelayo idinga Ukuhlolwa Okuyisisekelo kufanele yenziwe kuphrojekthi ehlongoziwe (le misebenzi inemithelela emincane kunaleyo misebenzi edinga i-EIA okuzoholela ekutheni i-EIA yenzelwe iphrojekthi ehlongoziwe):

**Umsebenzi 10:** Ukwakhiwa kwezindawo zokusiza noma ingqalasizinda yokudlulisa nokuhambisa ugesi: (ii) ngaphakathi ezindaweni ezisemadolobheni noma izinxanxathela zezakhiwo zezimboni onamandla angu-275kV noma ngaphezulu.

**Umsebenzi 22:** Ukwakhiwa komgwaqo, ngaphandle kwezindawo ezisemadolobheni, (i) ezinengodla ebanzana kunamamitha ayi-13.5 noma, (ii) lapho kungekho khona ingodla lapho umgwaqo ubanzana kunamamitha ayisishiyagalolunye.

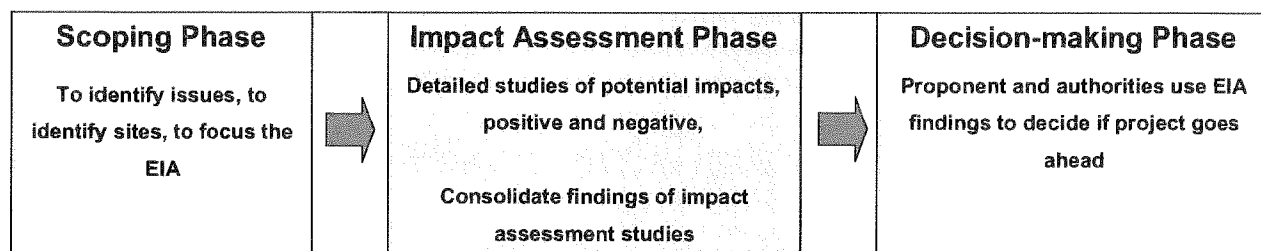

**Umsebenzi 24:** Ukuguqulwa komhlaba ongaphezudlwana kwama-square metre ayi-1000 ngobukhulu, ezindaweni zokuhlala, zokuthengisa, zohwebo, zezimboni noma zokusetshenziselwa izikhungo, lapho ngesikhathi sokuqala ukusebenza kwale Sheduli lowo mhlaba wawuhlelwe njengendawo evulekile, ukongiwa noma kwakunendawo eyayinokuhlelwa okufanayo.

**Umsebenzi 38:** Ukwandiswa kwezindawo zosizo zokuguqula nokuhambisa ugesi lapho amandla andisiwe ezokweqa u-27kV futhi nemilobo yamagxathu entuthuko azokhula.

**Umsebenzi 47:** Ukwandiswa kobubanzi bomgwaqo ngaphezu kwamamitha ayisithupha, noma ukwelula umgwaqo ngaphezu kwekilomitha elilodwa: lapho ingodla esikhona ibanzana kunamamitha ayi-13.5, noma lapho kungenangodla khona esikhona, lapho umgwaqo osukhona ubanzana kunamamitha ayi-8.

Imisebenzi ebaliwe eyengeziwe ngokweSaziso SikaHulumeni (GN) R 546 sika-2010 ifakelwa isicelo. Le misebenzi ebaliwe ifakiwe efomini lokufaka isicelo se-EIA.

Leli fomu lesicelo lizokwenza isithasiselo eMbikweni Wokuhlela Owuhlaka ozokwenziwa ukuthi umphakathi uphawule ngawo uma sewukhona.

# IZIGABA ZE-EIA

## ISIGABA SOKUHLELA INDAWO SE-EIA

**Isigaba sokuqala** se-EIA Isigaba Sokuhlela Indawo, okwenziwelwa ukuthola ukuqonda ngezindaba zemvelo esinokwenzeka ezifanele iphrojekthi nokusho ukuthi olunye ulwazi luyadingeka yini, ngesimo sezifundo zongcweti/ngophenyo.

Umbiko Wokuhlelwa Kwendawo kanye noHlelo Locwaningo lwe-EIA kuhanjiswa eMnyangweni Wezemvelo ukuyohlolwa bese kwenziwa ngcono indlela ehlongozwayo ophenyweni olunemininingwane edingekayo esigabeni esilandelayo.

Umnyango Wokuthuthukiswa Komnotho, Ezemvelo kanye Nezokuvakasha eMpumalanga kanye noMnyango Wezolimo KwaZulu-Natal, Umnyango Wezemvelo kanye Nokuthuthukiswa Kwezindawo Zasemakhaya ayiziphathimandla eziphawulayo ocwaningweni.

Imisebenzi ebandakanyeke eSigabeni Sokuhlela Indawo ibandakanya:

- Imihlangano neziphathimandla ukuvumelana ngohlolo kanye nezidingo zocwaningo,

- Ukubekwa kwezaziso zendawo, ukuhanjiswa kwezincwadi, lo Mbhalo Wolwazi Oluyisendlalelo kanye nesimemo sokufaka isandla ohlelweni lwe-EIA kuBantu Abanentshisekelo endaweni yephrojekthi nangaphezulu.
- Ukukhangisa kumaphephandaba asekhaya nawesifunda ukumemezela amathuba okuhlanganyela;
- Incwadi yokubuyisa umbiko ngenqubekela phambili kufanele ikhishwe futhi kwenziwe izimemezelo zokuba khona koMbiko Owuhlaka Wokuhlela Indawo (Draft Scoping Report (DSR)) kanye neZindaba Nombiko Wezimpendulo (Issues and Responses Report (IRR));
- Ukuhanjiswa kwe-DSR, kubandakanya i-IRR ukuze aphawule;
- Ukuhlanganisa imihlangano yababambiqhaza endaweni yephrojekthi ukuthola umbono nge-DSR;
- Ukuletha Umbiko Wokuhlela Indawo Okokugcina (Final Scoping Report (FSR)) kufaka zonke izindaba eziphakanyiswe ngokuhlolwa komthelela ku-DEA;
- Ukuletha Uhlelo Lwesifundo se-EIA ku-DEA;
- Ukuhanjiswa kolwazi lwe-FSR; kanye
- Incwadi yokunikezwa umbiko inqubekelaphambili kubabambiqhaza.

## ISIGABA SOKUHLOLWA KOMTHELELA SE-EIA

**Isigaba sesibili** se-EIA Isigaba Sokuhlolwa Komthelela okufaka ukwenza izifundo ezahlukeni zongcweti, kuhlanganisiwe Umbiko Womthelela Emvelweni (EIR) kanye ne-EMP Ewuhlaka.

Njengengxenywe yokuhlolwa, i-EMP yiphrojekthi nayo izohanjiswa ku-DEA ukuthi bayigunyaze. Kulandela i-EMP, ngaphambi nangemuva kokwakhiwa, kuzoqinisekiswa ukuhambisana nezimiso zomthetho wemvelo ngesikhathi sezigaba zokuhlela, zokwakha, zokusebenza nezokuthatha umsebenzi (uma kufanele).

Uhlu lwezifundo ezikhonjwe ongcweti oludingeka kule EIA (manje) lubalwe ngezansi (lonke ucwaningo oluncike ezikhathini zonyaka luzokwenziwa ngesikhathi sonyaka esimanzi):

- Ukuhlolwa Kwempilo Yasemhlabeni (Izilwane Zonke Ezikhona kanye Nemithi yonke ekhona endaweni);
- Ukuhlolwa Kwezinyoni zendawo ethile;
- Ukuhlolwa Komthelela Kumagugu
- Ukuhlolwa Komthelela Enhlalweni Yomphakathi
- Ukuhlolwa Kwamanzi Aphezulu
- Ukuhlolwa Kwamandla Omhlabathi Nombhlaba/ Kwezolimo;
- Ukuhlolwa Komthelela Obonakalayo; kanye
- Nezinhlelo Zolwazi Lomhlaba

Amagama ongcweti abazokwenza lolu cwanningo akhona ehhovisi lokuhlanganyela komphakathi.

Imisebenzi ethize ngqo kulesi sigaba izibandakanya:

- Ucwaningo longcweti okugxile emiphumeleni yeSigaba Sokuhlela Indawo kanye nezindaba ezivezwe ababambiqhaza;
- Umbiko ngenqubekelaphambili kubabambiqhaza;
- Ukuhlanganiswa kwe-EIR Ewuhlaka ekhombisa imiphumela emibi enokwenzeka nemihle nezindlela zokuthuthukisa imithelela emihle nokunciphisa noma ukugwema imithelela emibi;
- Isitatimende Somthelela Emvelweni, ukugqamisa okunye okukhethwayo nezizathu zakho;
- Ukukhangisa ngokuba khona koHlaka Lwe-EIR kumaphephabhuku asendaweni nawesifunda;
- Ukuhanjiswa koHlaka Lwe-EIR, kubandakanya Umbiko Wezindaba Nezimpendulo, ukuthi kuphawulwe; kanye
- Nemihlangano yababambiqhaza endaweni yephrojekthi ukwethula okutholakele ku-EIA ukuze ababambiqhaza baphawule.

Uhlaka lwe-EIR kanye ne-EMP luzobe seluqedwa bese luhanjiswa ku-DEA ukuthi ithathe isinqumo.

## ISIGABA SOKUHLELA ISINQUMO SE-EIA

**Isigaba sesithathu** sibandakanya isinqumo ngeziphathimandla ezenza isinqumo, i-DEA kulokhu. I-DEA kufanele yamukele noma yale lo mbiko ezinsukwini eziyi-105. Ababambiqhaza bazokwaziswa ngesinqumo se-DEA uma lmvume Yezemvelo isinikeziwe noma inganikezwanga kanye nenqubo yokudlulisa isicelo uma befuna ukudlulisa isicelo ngesinqumo.

Eskom Holdings Limited  
P.O. Box 1091  
JOHANNESBURG  
2000

Fax no: 011 800 3917

**PER FACSIMILE / MAIL**

Dear Ms Seabe

**ACCEPTANCE OF SCOPING REPORT AND PLAN OF STUDY FOR EIA: PROPOSED  
CONSTRUCTION OF ONE 765 KILOVOLTS ("KV") CAMDEN-MBEWU (THETA) POWER LINE  
FROM ERMELO (MPUMALANGA PROVINCE) TO EMPANGENI (KWAZULU-NATAL PROVINCE)**

1. The Department has evaluated the submitted Final Scoping Report (FSR) and the Plan of Study for Environmental Impact Assessment, dated 27 January 2011 and is satisfied that the document complies with the minimum requirements of the Environmental Impact Assessment (EIA) Regulations, 2010. The Final Scoping Report is hereby accepted by the Department in terms of GN R 543 (30) (1) (a) of the EIA Regulations, 2010.
2. You hereby advised that the Environmental Impact Assessment Report must contain all the information outlined in regulation 32(2) of the EIA regulations, omission of information may result in the EIA report being rejected.
3. **Activity Description and Listed Activities**  
  
While the information broadly refers to the construction of one 765 Kilovolts Camden-Mbewu power line from Ermelo to Empangeni, no specific details have been provided for other listed activities. More specific information must be provided regarding all listed activities being applied for.

7. F

- Removal of natural vegetation should be in accordance to the National Environmental Management: Biodiversity Act (Act No. 10 of 2004).
- Removal of alien invasive species in accordance with the Conservation of Agricultural Resources Act (Act No. 43 of 1983), and follow-up procedures for at least three years.
- Mitigation measures should be provided for the threatened reptiles, birds, and mammals that inhabit that ecosystem.

You may accordingly proceed with the environmental impact assessment process in accordance with the tasks outlined in the plan of study for environmental impact assessment.

Please note that if the Environmental Impact Assessment Report is not submitted to this Department within a period of six months from the date of this letter, your application will lapse (Regulation 67 of GN No. R. 543 of 18 June 2010 refers). As such, a new application and assessment process will have to be initiated if you wish to again pursue your proposed development.

Yours sincerely

Mr. Dumisani Mthembu

**Appendix L: Transmission Environmental Policy (TPL41-435)**

### 2.1.8 Waste Management

Seek opportunities to prevent waste by reducing at source, recycling, re-using and ensuring that disposal is done in accordance with legal requirements. Where these are not specific the Eskom policies and/or guidelines should be utilized.

## 3. Supporting Clauses

Additional policies may be developed in support of the aims and objectives of this policy, and are seen as equal in stature. Provisions of this document will apply to all policies developed in terms of this clause, except where specifically stated.

### Index of Supporting Clauses

- 3.1 Scope
- 3.2 Normative/Informative References
- 3.3 Definitions
- 3.4 Abbreviations
- 3.5 Roles and Responsibilities
- 3.6 Implementation Date
- 3.7 Process for monitoring
- 3.8 Related/Supporting Documents

#### 3.1 Scope

##### 3.1.1 Purpose

This policy serves as the basis for environmental management within Transmission Division inside and external to South Africa, and relevant subsidiaries, and to ensure uniformity in the application thereof in all applicable operations.

##### 3.1.2 Applicability

This policy shall apply throughout Transmission wherein Transmission has a controlling interest, including contractors, suppliers and service providers and customers where significant impacts and risks may occur.

#### 3.2 Normative/Informative References

The following document(s) contain provisions that, through reference in the text, constitute requirements of this template. At the time of publication, the edition indicated was valid. All controlled documents are subject to revision, and parties to agreements based on this template are encouraged to investigate the possibility of applying the most recent edition of the document(s) listed below. Information on currently valid national and international standards and specifications can be obtained from the Information Centre and Transmission Documentation Centre at Simmerpan.

ISO 14001:2004, Environmental Management System – Specification with guidance for use

TMN41-417: Transmission Environmental Management System Manual Document

#### 3.3 Definitions

#### 3.4 Abbreviations

#### 3.5 Roles and Responsibilities

This policy shall apply throughout Eskom Transmission. All Transmission's Business Units shall be responsible and accountable for the implementation of this policy.

Note: Concerns queries and comments on this document should be referred to the compiler. When downloaded from Transmission database, this document is uncontrolled, responsibility lies with the user to ensure that it is the authorised version.

### 3.6 Implementation Date

The implementation date is June 2007

### 3.7 Process for monitoring

Detailed monitoring requirements are included in the monitoring and measurement procedure TPC41-118.

### 3.8 Related/Supporting Documents

This document replaces TRMPBAAX3 Rev2
