BACKGROUND INFORMATION DOCUMENT

Environmental Applications for Changes to Infrastructure at Bakubung Platinum Mine, Ledig, North West Province

INTRODUCTION

Wesizwe Platinum Limited is the owner of Bakubung Platinum Mine, currently shaft sinking on the farm Frischgewaagd 96JQ (Portions 3, 4 and 11). The mine is located near Ledig, just south of the Pilanesburg Game Reserve and Sun City in the North West Province. Two reefs will be mined for Platinum Group Elements - platinum, palladium, rhodium and gold, with copper and nickel as by-products. A locality map of the mine is shown in Figure 1.

The Bakubung Platinum Mine received Environmental Authorisation in 2009, in terms of both the National Environmental Management Act (Act 107 of 1998) (NEMA) and Mineral and Petroleum Resources Development Act (Act 28 of 2002) (MPRDA). The mine's Water Use Licence was issued in 2010.

Wesizwe would now like to make several changes to the approved mine which require additional Environmental Authorisations, a Waste Management Licence and an additional Water Use Licence.

Wesizwe appointed SLR Consulting (Africa) (Pty) Ltd (SLR) as the independent Environmental Assessment Practitioner to assist with the applications required for authorisation in terms of the environmental legislation. The initial legal review has indicated that the changes to the Bakubung Platinum Mine will require multiple authorisations under a number of different sets of legislation administered by different competent authorities.

NOTICE OF APPLICATION FOR ENVIRONMENTAL AUTHORISATION, ENVIRONMENTAL MANAGEMENT PROGRAMME AMENDMENT, WATER USE LICENCE AND WASTE MANAGEMENT LICENCE

FOR THE CHANGES TO INFRASTRUCTURE AT BAKUBUNG PLATINUM MINE

YOUR ROLE

The purpose of this Background Information Document (BID) is to provide Interested and Affected Parties (IAPs) with information and invite them to participate in a public consultation process regarding the changes to the Bakubung Platinum Mine. You have been identified as an IAP who may want to be informed about the proposed project and have input into the environmental assessment process.

ATTEND ONE OF THE PUBLIC OPEN DAYS

Two Public Open Days will be held to give further details about the project:

Open Day 1:

Place: Phatsima Hall,
Phatsima

Date: 11 August 2015

Time: 10h00 to 16h00

Open Day 2:

Place: Bakubung Community
Hall, Ledig

Date: 12 August 2015

Time: 10h00 to 16h00

You have the opportunity to provide input through review and comment on this document, the scoping report, the environmental impact assessment (EIA) report and interaction with the environmental team.

All comments will be recorded and will be addressed as part of the EIA process.

Please send us your initial comments and questions by **24 August 2015**. There will also be additional opportunities in the future for you to provide further comments.

HOW TO RESPOND

Please respond by submitting the attached comment sheet (last page of this document) or communicating with the persons listed below.

PROJECT LOCATION

The changes to the Bakubung Platinum Mine will take place on the farms Frischgewaagd 96JQ (Portions 3, 4 and 11) and Mimosa 81JQ near Ledig and Sun City, North West. The site is located near the R565 and R556 roads, and lies north of the Elands River (Figure 1).

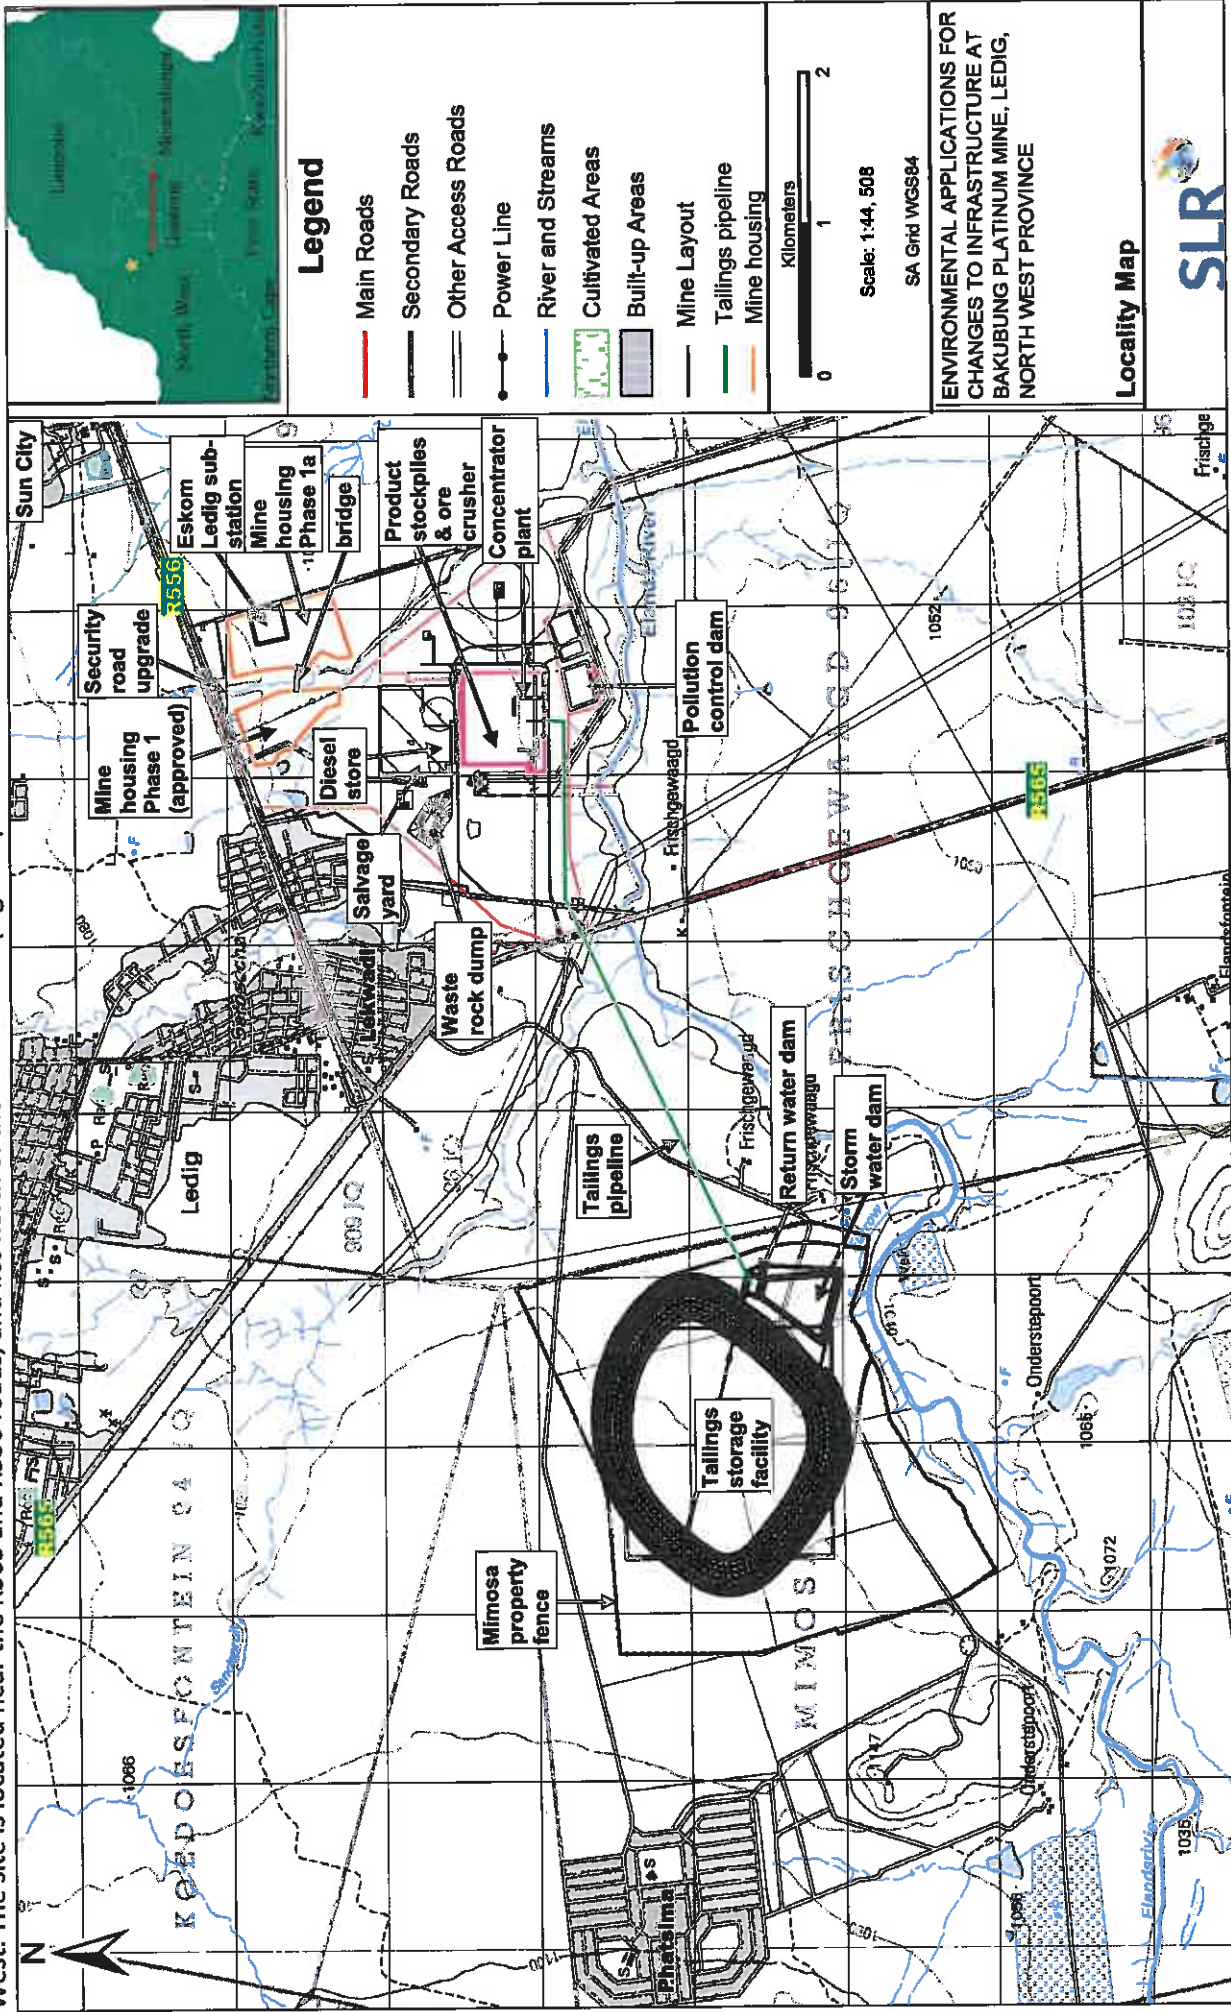

Figure 1. Locality map of the Bakubung Platinum Mine and related infrastructure

PROJECT OVERVIEW

The proposed project will involve the following changes to the approved Bakubung Platinum Mine (note that this is a preliminary list):

- The construction of a larger tailings dam on the farm Mimosa 81JQ. The area will increase from 142 ha to approx. 166 ha. The height will be approx. 44m;
- A tailings pipeline between the mine and the tailings dam;
- An increase in the capacity of the concentrator plant from 230 000 tons per month to approx. 265 000 tons per month;
- Increased capacity of the mine product stockpiles;
- Relocation of the ore crusher from underground to the surface;
- Inclusion of the minerals in the waste rock into the mining licence, as the waste rock may potentially be crushed and sold as aggregate;
- Construction of erosion control measures along watercourses within the mine;
- Storage and handling of dangerous goods such as diesel and reagents on site;
- Various pipeline and road crossings over watercourses, including a bridge crossing;
- New sewage and water pipelines;
- New internal mine roads;
- Ventilation shafts and raise boreholes;
- Generators or possibly a solar power plant on site, for back up ventilation; and
- The construction of phase 1a of the mine housing.

The following water uses will take place, which will require an amendment to the Bakubung Platinum Mine's Water Use Licence:

- *Storing of water (not containing waste)* – storing water in water reservoirs and settling dams;
- *Impeding or diverting the flow of water in a water course, and altering the bed banks, course, or characteristics of a watercourse* – various watercourse crossings including a bridge and tailings pipeline, and erosion control measures;
- *Disposing of waste in a manner which may impact on a water resource* – tailings dam, return water dams, storm water dams, pollution control dams, waste rock dumps, sewage treatment plant, ore stockpiles, dust suppression with water;
- *Removing, discharging or disposing of water found underground if it is necessary for the efficient continuation of an activity, or for the safety of people* – dewatering the mine shafts.

The following waste activities will take place, which will require a Waste Management Licence:

- The tailings dam;
- Waste rock dumps;
- The salvage yard (temporary storage of general and hazardous waste).

POTENTIAL ENVIRONMENTAL IMPACTS

The following preliminary list of potential impacts has been identified and will be investigated as part of the environmental assessment process.

Safety: The proposed project has the potential to alter the topography and present infrastructure and excavations which may present potential safety risks for both people and animals.

Soil and land capability: The placement of infrastructure has the potential to compromise soil resources through physical disturbance (erosion and compaction) and/or pollution. Loss of soil resources has a direct impact on the natural capability of the land.

Biodiversity: The placement of infrastructure has the potential to disturb and/or destroy vegetation, habitat units and related ecosystem functionality.

Surface water: The proposed project has the potential to alter surface drainage patterns through the placement of infrastructure and to pollute surface water resources.

Groundwater: The proposed project has the potential to contaminate groundwater resources which could impact availability to other groundwater users.

Air: The proposed project has the potential to contribute additional air pollution.

Noise: The proposed project has the potential to cause noise pollution through the construction of infrastructure and activities.

Visual: The placement of infrastructure has the potential to create visual impacts through topographical changes.

Heritage/cultural resources: The proposed project has the potential to damage heritage resources should any heritage/cultural resources be identified.

Land use: The proposed project has the potential to impact on surrounding land uses such as livestock grazing, surrounding mines and infrastructure (powerlines, railway and roads).

Socio-economic: The proposed project has the potential to contribute towards positive and negative socio-economic impacts. Positive impacts include job creation and stimulation of local and regional economy. Negative socio-economic impacts such as the influx of job seekers are linked to social pathologies.

ENVIRO-LEGAL REQUIREMENTS

An initial legal review has indicated that the changes to the Bakubung Platinum Mine will likely require multiple authorisations under various environmental legislation and administered by different competent authorities.

Notice is hereby given in terms of the following legislation, that applications for required authorisations will be submitted to the relevant government authorities listed below:

Legislation	Listed Activities (preliminary list of potential activities)	Process Required	Competent Authority
National Environmental Management Act 107 of 1998	GNR 983 (2), (9), (10), (12), (14), (19), (25), (27), (28). GNR 984 (2), (4), (6), (15), (17), (21), (25). GNR 985 (4), (10), (12).	Submission of application, Scoping & EIA Reports	North West Department of Mineral Resources (DMR)
National Environmental Management: Biodiversity Act 10 of 2004	N/A	Submission of application form (if required and if protected species are found on site).	North West Department: Rural, Environment & Agricultural Development/ Dept. of Agriculture, Fisheries & Forestry
National Water Act 36 of 1998	Water uses: S21 (b), (c), (g), (i) and (j).	Integrated water use licence amendment	Department of Water and Sanitation
National Heritage Resources Act 25 of 1999	N/A	Notify South African Heritage Resources Agency (SAHRA).	SAHRA
National Environmental Management: Waste Act 59 of 2008	GNR 921 Category B (7)	Submission of application, Scoping & EIA Reports	DMR
Mineral & Petroleum Resources Development Act 28 of 2002	N/A	Section 102 Amendment - submission of Scoping & EIA Reports (including EMPr).	North West DMR – as part of the NEMA authorisation

ENVIRONMENTAL PROCESS

The environmental process provides information on the project and environment in which it is being undertaken. It identifies, in consultation with interested and/or affected parties (IAPs), the potential negative as well as positive impacts of the project, and reports on management measures required to mitigate impacts to an acceptable level.

Prior to the commencement of the proposed project, an environmental assessment process is required, which includes an application, a scoping report, an EIA and an EMP.

Scoping

Scoping involves the identification of environmental issues and concerns. Public input is a key component of the scoping phase of the assessment. The methods to be used in conducting the EIA study are planned, to ensure that the identified issues will be adequately addressed.

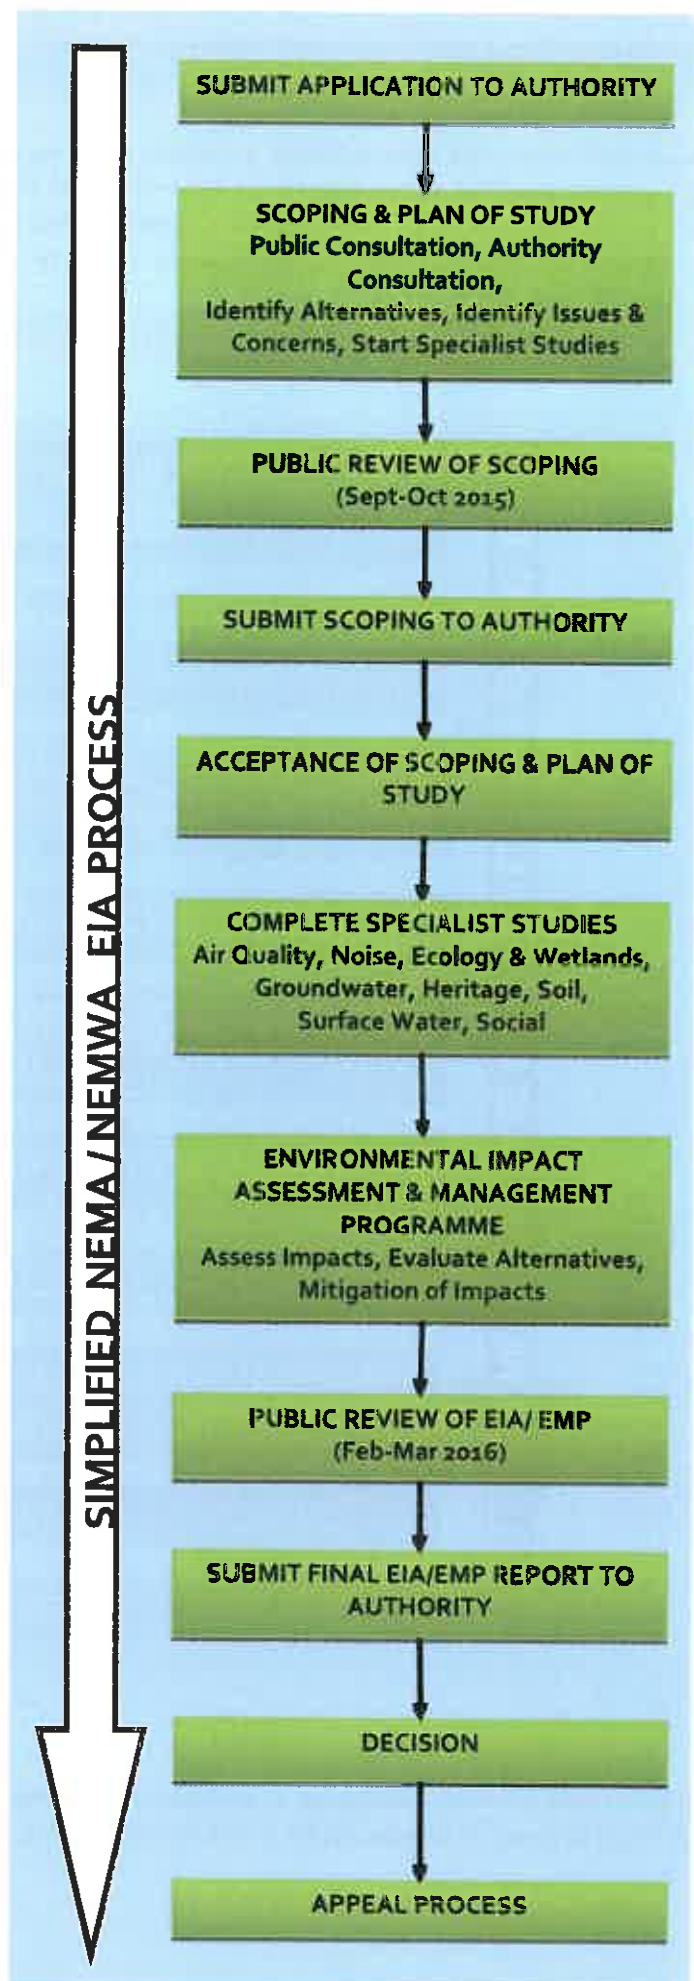

Environmental Impact Assessment (EIA)

This involves the review of available project and environmental information to identify potential environmental impacts and to assess the level of significance of these impacts. Specialists are involved to provide expert opinion on the impacts and often use computer modelling to assist with their studies.

Environmental Management Programme (EMP)

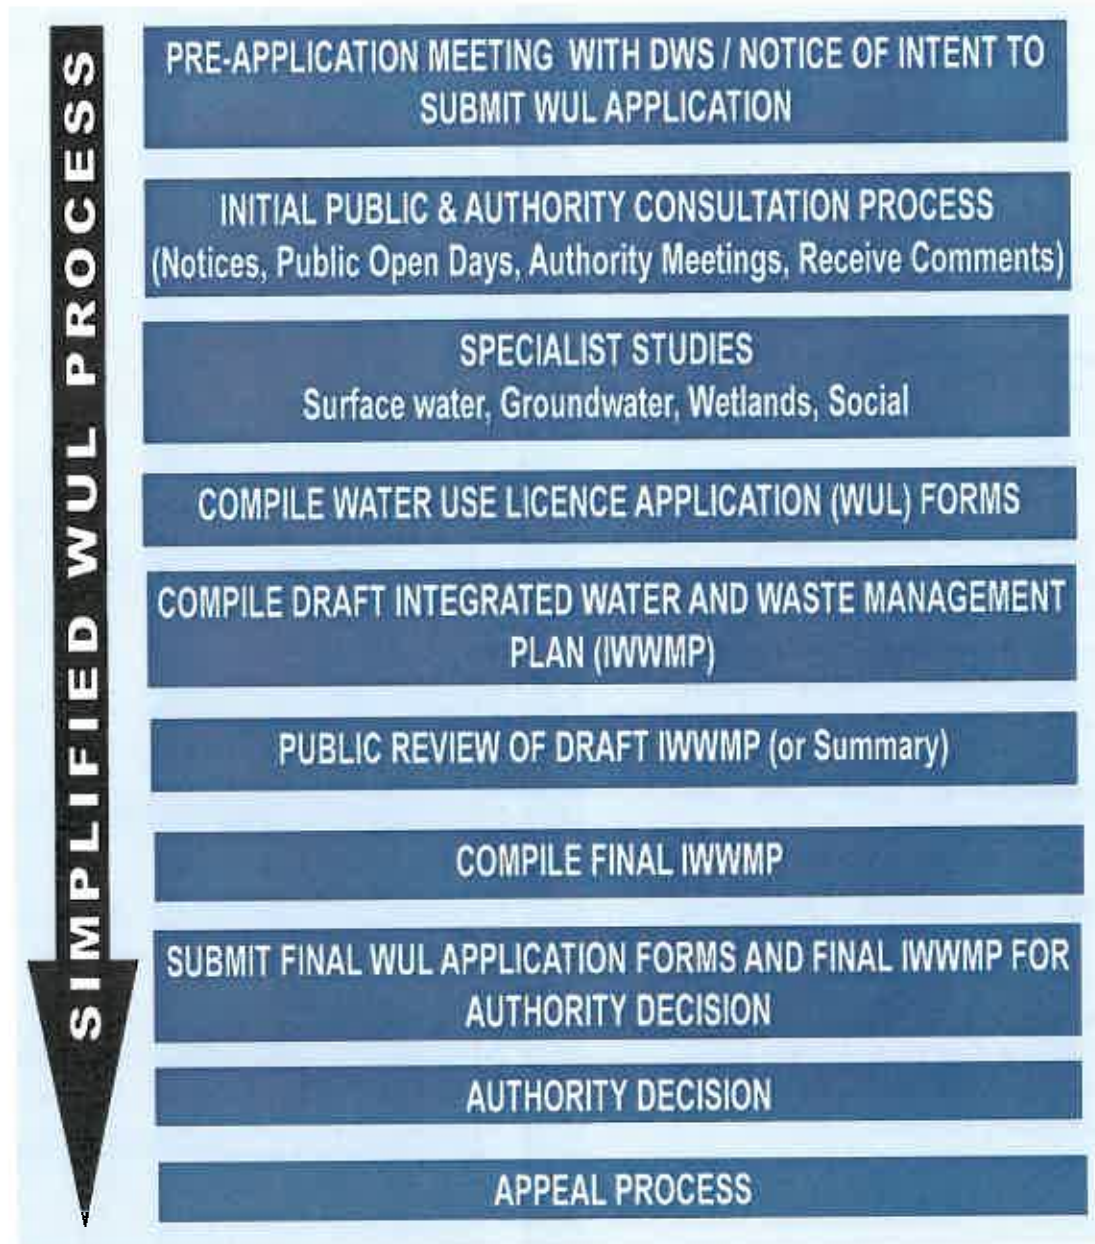

An EMP will be developed, aimed at addressing impacts identified and developing mitigation measures to reduce risks to acceptable levels. Recommendations of the specialists are used to assist in developing the EMP.

The likely process steps are provided alongside. IAPs and other stakeholders registered on the project's database will receive notification of information-sharing open days and report review periods in advance.

WATER USE LICENCE PROCESS

To obtain a water use licence (WUL), a process in terms of the National Water Act 36 of 1998 is required. The WUL process requires detailed technical information on the water uses which is captured in the WUL application forms. An Integrated Water and Waste Management Plan (IWWMP) report is also required which includes details of consultation with IAPs, the impacts on water resources, and management measures to mitigate impacts to an acceptable level.

(Note that the process may change if regulations regarding procedural requirements for WUL Applications are published in terms of Section 26(1)k of the National Water Act (36 of 1998).)

Case Type: Section 38 (1) - Decision from Heritage Authority required

ProposalDescription:

Wesizwe Platinum Limited is the owner of Bakubung Platinum Mine. The Bakubung Platinum Mine received Environmental Authorisation in 2009. Wesizwe would now like to make several changes to the approved mine which require additional Environmental Authorisations, a Waste Management Licence and an additional Water Use Licence.

Expanded_Motivation:

Wesizwe Platinum Limited is the owner of Bakubung Platinum Mine, currently shaft sinking on the farm Frischgewaagd 96JQ (Portions 3, 4 and 11). The mine is located near Ledig, just south of the Plianesburg Game Reserve and Sun City in the North West Province. Two reefs will be mined for Platinum Group Elements - platinum, palladium, rhodium and gold, with copper and nickel as by-products. The Bakubung Platinum Mine received Environmental Authorisation in 2009, in terms of both the National Environmental Management Act (Act 107 of 1989) (NEMA) and Mineral and Petroleum Resources Development Act (Act 28 of 2002) (MPRDA). The mine's Water Use Licence was issued in 2010. Wesizwe would now like to make several changes to the approved mine which require additional Environmental Authorisations, a Waste Management Licence and an additional Water Use Licence.

Relive childhood dreams at the Impi Challenge in Gauteng

RUSTENBURG HERALD - RUSTENBURG - The adrenaline pumping Impi Challenge heads to the North West Province one last time in 2015.

Should entrants wish to experience the true camaraderie of the Impi Challenge, competitors are encouraged to enter as part of a team. Seen here are participants in action earlier this year. (Photo credit: Mark Sampson|THRIBE).

Taking place at the picturesque Van Gaalens Cheese Farm (Hartbeespoort) on Thursday, 24 September 2015, adventure seekers can expect to get dirty! A trail run with a twist, the Impi Challenge has five age categories to choose from and is ideal for entrants of all ages.

Categories: Impi Challenge - 10km with 18 obstacles (age 18+ years); Impi Dash - 5km with 12 obstacles (ages 10+, all adults welcome); Impi Mini - 1km with smaller supervised obstacles (ages 6 - 10 years); Impi Elite - 18-20km with 25 tough obstacles (age 18+ years); timed event with prize money); Impi Corporate -the 10km Challenge distance with extra benefits (age 18+ years). Prize money will be allocated to the top 3 finishers in the men's and women's Impi Elite Race.

An event favourite, entrants are invited to enter the best dressed competition. Pull out all the stops! There are awesome sponsor prizes up for grabs. Family and friends are invited to relax in the Festival Area while loved ones conquer their fears out on route.

For more information on the Impi Challenge contact 076 772 3735, email info@impichallenge.co.za

Impala hardloop oor Randfontein

RUSTENBURG HERALD - RANDFONTEIN - As iemand gedink het dat Rustenburg Impala het hulle slag verloor as gevolg van hulle speeldroogte moet hulle dalk weer dink. Rustenburg Impala se Newrakespan het Saterdag op Randfontein die tuisspan in 'n vriendskaplike wedstryd verspot maklik met 'n reusagtige 75 - 5 geklop.

In die proses het Rustenburg Impala 'n allemintige 11 drieë gedruk teenoor die enkele poging van Randfontein. Dit bly steeds 'n groot jammer dat die tweedebeste klubspan in die land nie in 'n volwaardige liga speel nie maar terselfdertyd is dit 'n groot kompliment aan die spelers en die afrigtingsspan van Nico le Roux dat hulle fokus behou en elke wedstryd steeds hul beste lewer.

Daar bly vir Impala twee wedstryde oor vir die seisoen. In albei wedstryde het hulle 'n appeltjie te skil met hulle opponent. Eerstens is daar Centurion wat hulle vroeë die seisoen geklop het toe hulle met 'n erg verswakte span teen Centurion moes opdraf en Tukkie - die enkele een span wat hulle nog nie die seisoen kon klop nie.

Maar om reg te laat geskied aan die wedstryd van Saterdag. Die agterlyn het gekook en die twee senters Edmar Marais en Dumi Matyeshane het elk twee drieë gedruk en so ook die speler van die wedstryd Kyle Verwey. Verwey het gewys dat hy nie net spoed het nie maar ook 'n giftige afstamp as 'n opponent te naby aan hom kom.

Die heeiagter Aubrey MacDonald het ook gedruk onder die agterspelers. Dit was egter nie net die agterspelers wat baljaar het nie - verskeie van die voorspelers soos Leon du Plessis (agtsteman), Justin Wheeler (flank), Bruce Muller (haker) en Tiaan Nel (slot) het ook bygedra tot die elf drieë.

Die doelskoppe was ook 'n span poging en almal wat wou en kon het 'n kans gekry. Nie dat hulle nie kon nie want 10 van die 11 drieë is verdoel deur MacDonald (4),

Wheeler (3) en Henro Huyser, Verwey, en Muller elk een.

Dit was nie net die eerstespan wat hulle ding gedoen het nie maar selfs die tweedespan het hul wedstryd gemaklik met 33 - 7 gewen.

PUBLIC PARTICIPATION PROCESS

NOTICE OF APPLICATION FOR ENVIRONMENTAL AUTHORISATION, ENVIRONMENTAL MANAGEMENT PROGRAMME AMENDMENT, WATER USE LICENCE & WASTE MANAGEMENT LICENCE FOR THE CHANGES TO INFRASTRUCTURE AT BAKUBUNG PLATINUM MINE, LEDIG, NORTH WEST

Wesize Platinum Limited is the owner of Bakubung Platinum Mine, currently siting on the farm Frischgewag 96J0 (Portions 3, 4 and 11) The mine is located near Ledig, south of the Phaseng Game Reserve and Sun City in the North West Province. Two reefs are mined for platinum, palladium and gold with copper and nickel as by-products.

The Bakubung Platinum Environmental Authorisation in 2009, in terms of both the National Environmental Management Act (Act 107 of 1989) (NEMA) & Mineral and Petroleum Resources Development Act (Act 28 of 2002) (MPRDA). The mine's Water Use Licence (WUL) was issued in 2010 in terms of the National Water Act 36 of 1998 (NWA).

Wesize would like to make several changes to infrastructure at the approved mine which require an additional Environmental Authorisation, Waste Management Licence (WML) & WUL amendment. The proposed project will likely involve the following changes to the approved mine, some of which require Environmental Authorisation: larger tailings dam & tailings pipeline, increased capacity of concentrator plant & product stockpiles, relocation of ore crusher from underground to surface, inclusion of minerals in waste rock into the mining licence, erosion control; storage & handling of dangerous goods; sewage & water pipelines; internal roads, pipeline & road crossings over watercourses; ventilation shafts & raise boreholes; back-up generators

Water uses which require an amendment to the Bakubung Platinum Mine's WUL include: dewatering mine shafts; water reservoirs; watercourse crossings & erosion control; tailings dam; return water dams; waste rock dumps; sewage treatment plant, ore stockpiles; pollution control dams; dust suppression wip; water & increased capacity of settling dams

Waste activities which require a WML include: tailings dam; waste rock dumps & salvage yard.

Notice is hereby given in terms of the legislation listed below, of the various environmental approvals required prior to changes to the approved Bakubung Platinum Mine. The preliminary steps of likely related activities are included below

NEMA - GNR 963: activity 2, 9, 10, 12, 14, 19, 25, 27, 28. GNR 964: activity 2, 4, 6, 15, 17, 21, 25. GNR 985: activity 4, 10, 12. National Environmental Management: Waste Act (59 of 2008); - GN 924 Category B 7. NWA - Water uses in section 21 a, b, c, g, h, i, j. MPRDA - Section 102 amendment

SLR Consulting (Africa) (Pty) Ltd has been appointed as the independent environmental practitioner responsible for undertaking the necessary environmental work and conducting the public participation process for the project. These appointments will be supported by a full Environmental Impact Assessment Process in terms of the Environmental Impact Assessment Regulations (GNR982).

Public Open Days will be held for this project. If you would like to receive details of the Open Days and out more information, register as an interested & affected party, or raise issues & concerns contact: Chiara Kotze or Shelley Selton-Rogers.

Wesizwe would like to make several changes to infrastructure at the approved mine which require an additional Environmental Authorisation, Waste Management Licence (WML) & WUL amendment. The proposed project will likely involve the following changes to the approved mine, some of which require Environmental Authorisation: larger tailings dam & tailings pipeline; increased capacity of concentrator plant & product stockpiles; relocation of ore crusher from underground to surface; inclusion of minerals in waste rock into the mining licence; erosion control; storage & handling of dangerous goods; sewage & water pipelines; internal roads; pipeline & road crossings over watercourses; ventilation shafts & raise boreholes; back-up generators.

Water uses which require an amendment to the Bakubung Platinum Mine's WUL include: dewatering mine shafts; water reservoirs; watercourse crossings & erosion control; tailings dam; return water dams; storm water dams; waste rock dumps; sewage treatment plant; ore stockpiles; pollution control dams; dust suppression with water & increased capacity of settling dams. Waste activities which require a WML include: tailings dam; waste rock dumps & salvage yard.

Notice is hereby given in terms of the legislation listed below, of the various environmental approvals required prior to changes to the approved Bakubung Platinum Mine. The preliminary lists of likely listed activities are included below:

NEMA - GNR 983: activity 2, 9, 10, 12, 14, 19, 25, 27, 28. GNR 984: activity 2, 4, 6, 15, 17, 21, 25. GNR 985: activity 4, 10, 12.

National Environmental Management: Waste Act (59 of 2008) - GN 921 Category B 7.

NWA - Water uses in section 21 a, b, c, g, h, i, j.

MPRDA - Section 102 amendment.
