IF YOU KNOW OF OTHERS WHO SHOULD BE INFORMED, PLEASE PROVIDE US WITH THEIR CONTACT DETAILS

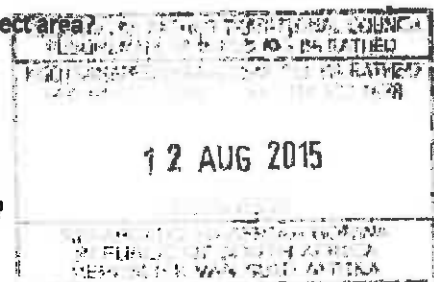

Please inform the Banker Board and of Eglansberg game reserve directors. Ledig farmers union also must be informed. Sun City Resort and Bakubung Hotel Directors. Inform them

PLEASE WRITE YOUR COMMENTS AND QUESTIONS HERE (use extra pages if needed)

1. *The government must ensure that air pollution from dust in the mine must not affect plants on the land of community.*
2. *The animals in the game reserve must not be affected by the dust, that also government must take care for it.*
3. *Water must not be polluted in the process of mining.*
4. *Young people must not be affected by pollution especially in giving birth. Please that as a government must take care of.*

PLEASE PROVIDE RESPONSES TO THE QUESTIONS BELOW (IF POSSIBLE)

1. Please provide information as to how your interests (socio-economic, cultural, heritage or environmental, etc.) will be affected by the proposed project.
2. How do you consider that the proposed activities will impact on you or your socio-economic conditions?
3. What are your suggestions to mitigate the anticipated impacts of each activity for the project?
4. According to you, what are the current land uses and their location within the project area?
5. What are the locations of environmental features on site?
6. How can the potential environmental impacts be remedied, and to what standard?
7. How can the potential impacts on your socio economic conditions be mitigated (reduced)?
8. How can the potential impacts on your infrastructure be managed, avoided or remedied?

Please return completed forms to:

Post: P.O. Box 1596, Cramerview, 2060, South Africa

the health of our community will be affected
badly, no safety for our children
There will be many diseases that will be discovered
throughout this proposed project

there will be disadvantages and advantages on this
project as for the sewerage we are struggling
with the hospital sewerage as it is, so for the
other one too there will be many health issues

Phatsame and Lebig are the current user of this
project

there are safety issues to be considered on this
project, community's needs and wants as well
lots of health issues that a first priority for
the mine to consider that.

The future of this community, what will the
community benefit from this? for how long?

PLEASE WRITE YOUR COMMENTS AND QUESTIONS HERE (use extra pages if needed)

I hereby comment & Question on how are we going to get information on your learnerships & internships & when & how will you be hiring us at your mine.

PLEASE PROVIDE RESPONSES TO THE QUESTIONS BELOW (IF POSSIBLE)

1. Please provide information as to how your interests (socio-economic, cultural, heritage or environmental, etc.) will be affected by the proposed project.
Socio-economic
2. How do you consider that the proposed activities will impact on you or your socio-economic conditions?
By providing more jobs to our community
3. What are your suggestions to mitigate the anticipated impacts of each activity for the project?
By including all the community members
4. According to you, what are the current land uses and their location within the project area?
sports & recreation
5. What are the locations of environmental features on site?
6. How can the potential environmental impacts be remedied, and to what standard?
7. How can the potential impacts on your socio economic conditions be mitigated (reduced)?
8. How can the potential impacts on your infrastructure be managed, avoided or remedied?

IF YOU KNOW OF OTHERS WHO SHOULD BE INFORMED, PLEASE PROVIDE US WITH THEIR CONTACT DETAILS

PLEASE WRITE YOUR COMMENTS AND QUESTIONS HERE (use extra pages if needed)

How this information was taken to the people it was really not appropriate not everyone in the Community of Motsima were aware of this information project. This are the things that need to be addressed and taken very seriously. Lets respect the Communities on things that will play an effect on them. (How is this going to benefit us as a community?)

PLEASE PROVIDE RESPONSES TO THE QUESTIONS BELOW (IF POSSIBLE)

1. Please provide information as to how your interests (socio-economic, cultural, heritage or environmental, etc.) will be affected by the proposed project. *As you know mines produces minerals and for those minerals to be reached chemicals are used and is taken, grass are to be destroyed, that's how its going to be affected.*
2. How do you consider that the proposed activities will impact on you or your socio-economic conditions? *Hope they will create jobs for us. Hopefully the job will be created from this project*
3. What are your suggestions to mitigate the anticipated impacts of each activity for the project? *This is not going to benefit us in anyway, its going to benefits the mines and its executives.*
4. According to you, what are the current land uses and their location within the project area? *The land is been used in the way that mines benefit. They dont care about people & their assets*
5. What are the locations of environmental features on site? *Water dams, farm and pit*
6. How can the potential environmental impacts be remedied, and to what standard? *That can be stopped only if you dont put your plan into existence. Stop whatever you are trying to do, that's a permanent solution*
7. How can the potential impacts on your socio economic conditions be mitigated (reduced)? *By paying the royalties to the communities, not dealing under the table & creating job. Dont place jobs on sales.*
8. How can the potential impacts on your infrastructure be managed, avoided or remedied? *But not doing anything to that side. Forget*

As the grazing Camp of the Phatuma Community was sold to the Mine, the owners of the animals made an informal agreement with some of the Mine employees to allow us the grazing in the Camp until the time they are going to use it. We requested a grazing land from the Municipality as they had also taken the remaining piece of land for another project and left us with no grazing land.

We informed the Municipality about the Mine land and they promised us to talk to the Mine to give us a chance until they find a land for grazing. We requested to be informed timeously about the changes and the agreement between the Mine and Municipality.

We are very much concerned about the tailings dam that is going to be erected so close to our location because it will contain acid water and sand which will dry up be the dust that will be blown by wind all over the location and cause some disease to the children. Could you please review this process.

Subject: Re: NOTIFICATION OF ENVIRONMENTAL APPLICATIONS FOR CHANGES TO INFRASTRUCTURE AT BAKUBUNG PLATINUM MINE

Can you please take note of the following points:

We need a full Air study taking into account the CUMULATIVE impacts in the area.

A Noise study with specific reference to the additional noise generated by the above ground Crusher plant.

Regards

Chris de Bruyn

**NOTIFICATION OF Environmental Applications for Changes to INFRASTRUCTURE AT
Bakubung Platinum Mine, Ledig, North West Province**

Dear Interested and Affected Party

You have been identified as a potentially interested and affected party for the following project:

“Environmental Applications for Changes to Infrastructure at Bakubung Platinum Mine, Ledig, North West Province”.

A Background Information Document (BID) providing further initial details on the project has been attached with this email. Please refer to the BID for further initial information on the project, information on your role with regard to the Public Participation Process and information on the public open days that will be held for the project.

The Background Information Document attached in this email is also available in Setswana. Please indicate if you would like a copy of this.

Tokumente ya tlhaloso e mo imeileng, e ka fumanegwa ka Setswana. O ka ikgolaganya le rona ha o batla tokumente e ngotsweng ka Setswana.

Should you have any queries you are welcome to contact Chiara Kotze or Shelley Seton-Rogers on the contact details provided below.

Hi Cathy

This is from the lady that originally alerted me to the advert, as she was making an enquiry. Can you please help and advise her?

Regards
Tebogo Matima

Subject: Energy Solutions
Importance: High

Good day Tebogo,

We trust this finds you well. I was at your offices on Monday with that enquiry on the meeting with your consultants.

Do you have any details for me or advice?

I represent a company who specialise in electricity and do work for Eskom and have a strategic partner who do the renewable energy, carbon credits, water purification and so on.

I would love to be able to introduce our company and the services before work begins as this could have huge cost saving implications as well as optimisation of all your integrated systems.

Please could you consider my request and help me to find the people who are dealing with these projects.

Looking forward to your favourable response.

Kind regards

Belinda Scherman

Subject: RE: NOTIFICATION OF ENVIRONMENTAL APPLICATIONS FOR CHANGES TO INFRASTRUCTURE AT BAKUBUNG PLATINUM MINE

Dear Nomzamo

Thank you for your email showing interest in the Environmental Applications for Changes to Infrastructure at Bakubung Platinum Mine. Please note that the project is currently in the stage where we are obtaining Environmental Authorisations and Licences. The project implementation will likely only take place in late 2016.

The EIA report will likely be completed in February/March 2016 and this report will include further details regarding impacts of the project on the local economy and employment. You will be notified when the EIA report is available and how you can access it.

Please also note that SLR Consulting will not be involved in the tendering process for services required for the implementation phase; Wesizwe should be contacted directly regarding tender enquiries.

Kind regards,
Shelley Seton-Rogers

Good day Mase

We have went through the public participation document and so far we have no formal comment.

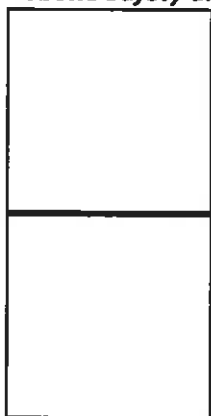

We have also realized that there will be more future economic opportunities and involvement during the planning and implementation stages of the above the document.

We further request you to advise on how do you involve local contractors (SMMEs) in this infrastructure development. We would be more than happy to know how far are you with the process and whether can you include us in your RFQs ,RFP and tender notifications/stages?

Kind Regards

Letter

In terms of Section of the National Heritage Resources Act (Act 25 of 1999)

Attention: Wesizwe Platinum Limited

Wesizwe Platinum Limited is the owner of Bakubung Platinum Mine. The Bakubung Platinum Mine received Environmental Authorisation in 2009. Wesizwe would now like to make several changes to the approved mine which require additional Environmental Authorisations, a Waste Management Licence and an additional Water Use Licence.

Thank you for the background information document for the proposed development. In terms of the National Heritage Resources Act, no 25 of 1999, heritage resources, including archaeological or palaeontological sites over 100 years old, graves older than 60 years, structures older than 60 years are protected. They may not be disturbed without a permit from the relevant heritage resources authority. This means that prior to development it is incumbent on the developer to ensure that a Heritage Impact Assessment is done. This must include the archaeological component (Phase 1) and any other applicable heritage components. Appropriate (Phase 2) mitigation, which involves recording, sampling and dating sites that are to be destroyed, must be done as required.

A Palaeontological Assessment is not necessary for the proposed footprint area as it lies within an area of insignificant palaeontological sensitivity according to the PalaeoSensitivity Map on SAHRIS (<http://sahra.org.za/map/palaeo>).

The quickest process to follow for the archaeological component is to contract an accredited specialist (see the web site of the Association of Southern African Professional Archaeologists www.asapa.org.za) to provide a Phase 1 Archaeological Impact Assessment Report. This must be done before any large development takes place.

The Phase 1 Impact Assessment Report will identify the archaeological sites and assess their significance. It should also make recommendations (as indicated in section 38) about the process to be followed. For example, there may need to be a mitigation phase (Phase 2) where the specialist will collect or excavate material and date the site. At the end of the process the heritage authority may give permission for destruction of the sites.

If the property is very small or disturbed and there is no significant site the heritage specialist may choose to send a letter to the heritage authority to indicate that there is no necessity for any further assessment.

Any other heritage resources that may be impacted such as built structures over 60 years old, sites of cultural significance associated with oral histories, burial grounds and graves, graves of victims of conflict, and cultural

Importance: High

Good Day Francois,

Thank you for the phone call.

As discussed we must liaise through you for any correspondence regarding this project for the Royal Family.

We have updated the project's Background Information Document which we need to send out to the public with information on the project and the venue for the public open days. As mentioned we have included the Bakubung Community Hall to the document as you indicated it is possible that we may be able to use the venue on the requested day (12th August 2015 from 10:00 – 16:00).

Would it be possible to let me know today if the venue can be used?

Please contact me with any queries.

Many thanks.

Chiara
