Dear Sir or Madam,

We would like to thank you for your time in meeting with us regarding the Wonderstone and Driekuil Mining Rights and associated Section 102 application.

The meeting was held with the DMRE, Klerksdorp on 15 November 2021. The attendees at the meeting included:

- ☞ Ms. Tanja Bekker (EnviroGistics);
- ☞ Ms. Marisa Pienaar (Assore);
- ☞ Mr Percy Makamu (DMRE – Environment);
- ☞ Mr. Jackson Matloa (DMRE – Mineral Law).

The DMRE recommended the following to be undertaken:

- ☞ The mine must choose which of the rights will be chosen to remain active. The recommendation was to consider the Mining Right with the longest life span;
- ☞ It was recommended that Portion 44 then be included into the Driekuil Mining Right (if this is the chosen right);
- ☞ The portions to be abandoned must be named as “portion of portion” where entire portions are not abandoned;
- ☞ One application can be undertaken on the SAMRAD system for the Inclusion and Abandonment;
- ☞ A Closure application must be undertaken for the Abandonment – this will be submitted with the Application (above), but as a separate application to support the Abandonment.
- ☞ An EIA will have to be undertaken for the new mining activities and as part of this a Closure Application with the required risk assessment and audits must be submitted. This could all be included into the overall EIA documentation (recommended as an annexure).
- ☞ The purpose of the Closure Application is to determine whether any disturbances have been done by the mine which relates to financial provision components.

The meeting was concluded at 12h30.

Please provide me with any comment on these meeting notes, should you wish to make amendments.

Kind Regards,

Tanja Bekker
