Ref. Platreef Mitigation Project: Re-application for destruction permit for Site PLA1677/S.35-027 in terms of Section 35(4) of the National Heritage Resources Act (Act 25 of 1999).

Attention: Mr Phillip Hine

The mitigation process for Site **PLA1677/S.35-027** was undertaken under a permit issued by SAHRA on 23 May 2016 (Case ID 7229). Subsequently a permit was issued for the destruction (Permit Number 2503) of the site based on the successful mitigation of the site.

Destruction of the site did not occur under the issued destruction permit since the site is located within 100 m from recorded grave sites. Within the EMP for the mine a 100 m buffer zone is required around grave sites where no earthmoving equipment is allowed. In adherence to this stipulation the site could not be destroyed within the validity period of the issued destruction permit.

The graves are currently being relocated and the 100-meter buffer zone does not apply anymore. We herewith apply for an updated permit to destroy Site PLA 1677/S.35-027.

Kindly contact me with any queries or concerns.

Sincerely

Jaco van der Walt.
