RE: Application for Salvage Permit - **The Dorothea**

Dear Jonathan

During **February 1996** we made application for a salvage permit for the **Dorothea**.

At the time we experienced some difficulty in identifying and securing the technology that would be the most suitable to recover the cargo from the wreck site.

It is sincerely believed that we now have the necessary equipment and means to take our salvage endeavors to a successful conclusion.

All the previous documentation is respectfully attached for your perusal and valued support.

The salvage permit should be in the name of the Atlantis Salvage Company. Hoping this meets with your favourable approval. I have already made contact with Mr. Mlungisi Ngubane of the Durban Local History Museum for requesting his support and assistance in the registering process during the selvage operation.

Yours Sincerely

Peter Munns
Project Director – Atlantis Salvage Company
