RE: APPLICATION FOR SALVAGE PERMIT - *THE DOROTHEA*

Dear Jonathan

We thank you for the valued interest and support; and respectfully submit our application with the attached supporting documents.

In terms of the request for our aims and methodology, we recommend that the methods to be utilised by the professional companies of Geo Marine Surveys and Subtech are our submission. Based on these highly professional and efficient service providers experience, we will endeavor to recover the artefacts and cargo of The Dorothea. The methodology has been included in their quotation to our company.

The aim of this salvage operation is to use all the modern technology, skilled expertise and the research that is currently available, to effectively recover the wreck and manifest of the sunken ship. The records of all the objects recovered will be meticulously maintained.

Hopefully this meets with your favorable approval.

Yours sincerely,

P MUNNS
