GRANTED ENVIRONMENTAL AUTHORISATION

Reference number: FS 30/5/1/1/3/2/1 (10631) EM
Last amended: First Issue
Holder of Authorisation: Matsopa Minerals (Pty) Ltd
Location of activity: On the farms Goudgelaagte 238 and Geluk 237, in the Magisterial District of Koppies.

DECISION

ACRONYMS

NEMA : The National Environmental Management Act, 1998 (Act 107 of 1998), as amended.
DEPARTMENT : Department of Mineral Resources and Energy.
EA : Environmental Authorisation.
IEA : Integrated Environmental Authorisation.
EMPr : Environmental Management Programme.
BAR : Basic Assessment Report.
S&EIR : Scoping and Environmental Impact Report.
I&AP : Interested and Affected Parties.
ECO : Environmental Control Officer.
SAHRA : South African Heritage Resources Agency.
EIA REGULATIONS: EIA Regulations, 2014 as amended.
MPRDA : Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002), as amended.
NEM: WA : National Environmental Management: Waste Act, 2008 (Act 59 of 2008), as amended.
NWA : National Water Act, 1998 (Act 36 of 1998) as amended.
EIA : Environmental Impact Assessment.
FINANCIAL PROVISIONING REGULATIONS: The National Environmental Management Act, 1998 (Act 107 of 1998), Regulations Pertaining to the Financial Provision for prospecting, Exploration, mining or Production operations

The Department is satisfied, on the basis of information available to it and subject to compliance with the conditions of this environmental authorisation, that the applicant should be authorised to undertake **NEMA EIA** listed activity specified below. Details regarding the basis on which the Department reached this granting decision are set out in **Annexure "1"** and **"2"** of this environmental authorisation.

ACTIVITY APPLIED FOR

By virtue of the powers conferred on it by NEMA, the Department hereby Grants an EA to Matsopa Minerals (Pty) Ltd with the following contact details –

The Directors
Matsopa Minerals (Pty) Ltd
P.O. Box 14052
Wadeville
1422

Contact person: Mr. D. Bennett
Cell: 082 077 1665

to undertake the following activity listed in the EIA Regulations.

NEMA: LISTED ACTIVITIES:

Listed in the EIA Regulations GNR 327 of 2017 as amended as:-

Activity 20- "Any activity including the operation of that activity which requires a prospecting right in terms of section 16 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002), including-

- (a) associated infrastructure, structures and earthworks, directly related to prospecting of a mineral resource; or*
- (b) the primary processing of a mineral resource including winning, extraction, classifying, concentrating, crushing, screening or washing; but excluding the secondary processing of a mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource in which case activity 6 in Listing Notice 2 applies".*

Listed in the EIA Regulations R.324 of 2014 as amended:-

Activity 12 - The clearance of an area of 300 square metres or more of indigenous vegetation except where such clearance of indigenous vegetation is required for maintenance purposes undertaken in accordance with a maintenance with a management plan.

Detailed specifications of the activity are as follows:

Proposed prospecting activities details are as follows:
Area under application- 340.4897 ha
The Proposed project will include both invasive and non-invasive prospecting activities as part of the proposed prospecting activities. It is expected that prospecting programme will be completed over a 5 year period.
The proposed activities will include:
<ul style="list-style-type: none">• The first phase will be information gathering which include detailed desktop studies and geological mapping.

- This will be a preliminary study that will be undertaken prior to any physical investigations onsite. An area of interest will be selected for geophysical surveys.
- Preliminary Drilling – reconnaissance drilling will consist of ± 330 holes, on a 100m x100m grid.
- An environmental footprint of approximately 10m² per borehole will be impacted by the drilling activities (total affected area of 3,300m²).
- Holes will be drilled to a depth of 30 metres using a jumper drill rig which will be used to retrieve core samples from the different geological units. It is estimated that the depth for the holes can be drilled in 1-3 days.
- Drilling programme will determine the exact outline, shape, and size of the ore body.
- No formal road will be constructed, existing farm roads and tracks will be utilised. A site camp and laydown area will be established on site for the storage of equipment.

Property name	21 digit Surveyor General Code
The farm Goudgelaagte 238	F01900000000023800000
The farm Geluk 237	F01900000000023700000

The granting of this EA is subject to the conditions set out below (site specific) and in **Annexure 2** (Departmental standard conditions). The EMPr attached as part of reports for the above development submitted as part of the application for an EA is hereby approved and must be adhered to throughout the life cycle of the mining operation.

EA SITE SPECIFIC CONDITIONS

1. Land owners and occupiers must be re-consulted at least 1 month prior to any site activities being undertaken once drill sites have been identified.
2. Maintain a minimum of 100m buffer from any infrastructure or dwelling i.e the Eskom and Telkom power lines crossing via the farm as well as the farm houses if available on site
3. The existing access road must be utilised, establishment of new access roads is not permitted.
4. Indigenous animals and birds that are found in the area must not be harmed and must be protected as far as it is practicable.
5. Recommendations from all specialist reports must be adhered to.
6. Recommendations from other state departments must be adhered to.
7. Mitigation measure stipulated in the submitted BAR and EMPr must be implemented.
8. No activities may be undertaken within 32 m of wetlands and or within 100m of watercourses without approval from DWS.
9. Graves/graveyards should be protected in situ and a 30 m buffer area should be applied where no prosecuting activities may take place.

10. No relocation of heritage resources may be undertaken without the approval of SAHRA.
11. Surface and ground water monitoring must be done frequently.
12. An Environmental Control Officer should be applied to do regular monitoring as suggested in the BAR and EMPr.
13. Notice must be given to landowners and surrounding landowners 1 month prior to visiting prospecting area.
14. The environmental Authorization is for prospecting activities for drilling, so no bulk sampling and pitting to be conducted.
15. The applicant must adhere to the conditions of the Environmental Authorization and EMPr for this project.
16. If any Archaeological or paleontological material or human burials are uncovered during the course of the development then work in the immediate area should be halted.
17. No activities to occur within 100 m of any wetlands and their 100 m buffer zones, within the rivers and their 100 m buffer zone/ 1:100 year flood line without the necessary authorization under NEMA and NWA.
18. Rehabilitation must be applied on an ongoing basis and no sites must be left exposed for more time than necessary to obtain the necessary data. All areas disturbed during the drilling must be rehabilitated to previous land use capability.
19. Please note that only listed activities applied for in the NEMA Application form and issued on the Environmental Authorization are to be conducted, conducting of listed activities not applied for is a non-compliance.

ANNEXURE 1: REASONS FOR THE DECISION

1. Background

Matsopa Minerals (Pty) Ltd submitted an application for an EA for an activity listed in the EIA Regulations as:

Listed in the EIA Regulations GNR 327 of 2017 as amended, as:-

Activity 20-“Any activity including the operation of that activity which requires a prospecting right in terms of section 16 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002), including-

(a) associated infrastructure, structures and earthworks, directly related to prospecting of a mineral resource; or

(a) the primary processing of a mineral resource including winning, extraction, classifying, concentrating, crushing, screening or washing; but excluding the secondary processing of a mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource in which case activity 6 in Listing Notice 2 applies”.

Listed in the EIA Regulations R.324 of 2014 as amended:-

Activity 12 - *The clearance of an area of 300 square metres or more of indigenous vegetation except where such clearance of indigenous vegetation is required for maintenance purposes undertaken in accordance with a maintenance with a management plan.*

Matsopa Minerals (Pty) Ltd appointed Ms. Jane Barret from Cabanga Environmental Concepts CC as an EAP to undertake the BAR and EMPr process as required by Regulation 19 of the EIA Regulations, 2014 as amended.

2. Information considered in making the decision

In reaching its decision, the Department took, *inter alia*, the following into consideration -

- a) The information contained in the revised EA application form received by the Department on the 07th of December 2021.
- b) The information contained in the revised BAR & EMPr received by the Department on the 28th of July 2022;
- c) The objectives and requirements of the applicable and relevant legislation, policies and guidelines and the EIA Regulations ;
- d) Public Participation Process (PPP) attached in the revised BAR and EMPr.
- e) Relevant information contained in the Departmental information database, including, the Department's circular on the One Environmental Management System dated 8 December 2014;
- f) The comments received from "I&APs" and the responses provided thereon, as included in the BAR and EMPr received by the Department on the 28th of July 2022;
- g) The sense of balance of the negative and positive impacts and mitigation measures;
- h) The findings of the pre-approval inspection conducted by Ms. T.J. Makhokha and Ms. N. Mhlarhi of this Department with Mr. D. Bennett and Mr. P. Hlongwane representatives of Matsopa Minerals (Pty) Ltd on the 25th of May 2022.
- i) The applicant has determined the financial provision as required in terms of the Financial Provisioning Regulations, 2015. Moreover, an amount of R 81 496.76 was provided for the environmental liability associated with this EA. This amount is deemed sufficient to cater for the purposes set in regulation 2 of the Financial Provisioning Regulations.

3. Key factors considered in making the decision

All the information presented to the Department was taken into account upon the Department's consideration of the application. A summary of the issues which, in the Department's view, were of the most significance are set out below.

- a) Sufficient PPP was undertaken and the applicant has satisfied the minimum requirements as prescribed in the EIA Regulations for public involvement;
- b) The environmental impacts associated with the activity will be addressed by the implementation of mitigation measures outlined in the revised BAR and EMPr compiled by Ms. Jane Barret of Cabanga Environmental Concepts CC and submitted to the Department on the 28th of July 2022;

- c) The Environmental Awareness Plan contained in the revised BAR and EMPr submitted to the Department on the 28th of July 2022; compiled by Ms. Jane Barret of Cabanga Environmental Concepts CC is in support of development.
- d) The rehabilitation and closure plan contained in the revised BAR and EMPr submitted to the Department on the 28th of July 2022; compiled by Ms. Jane Barret of Cabanga Environmental Concepts CC is in support of development.

4. Findings

After consideration of the information and factors listed above, the Department made the following findings –

- a) The potential impacts on the site were clearly investigated and mitigation measures were also outlined.
- b) The PPP complied with Chapter 6 of the EIA Regulations GNR 326. The PPP included, *inter-alia*, the following:
- Fixing a notice board at the site where the listed activity is to be undertaken;
 - Giving written notice to the owners and occupiers of land including the owners and occupiers of the land adjacent to the site where the listed activity is to be undertaken, the municipality, and the various Organs of State having jurisdiction in respect of any aspect of the listed activity.
 - The newspaper adverts published on Parys Gazette newspaper of 17 March 2022.

ANNEXURE 2: DEPARTMENTAL STANDARD CONDITIONS

1. SCOPE OF AUTHORISATION

- 1.1 The holder of the EA shall be responsible for ensuring compliance with the conditions contained in the EA. This includes any person acting on the holder's behalf, including but not limited to an agent, servant, contractor, subcontractor, employee, consultant or any person rendering a service to the holder of EA.
- 1.2 Any changes to, or deviation from the project description set out in this EA must be approved in writing by the Department before such changes or deviation may be effected. In assessing whether to grant such approval or not, the Department may request such information as is deems necessary to evaluate the significance and impacts of such changes or deviation and it may be necessary for the holder of the EA to apply for further authorisation in terms of the EIA Regulations.
- 1.3. The activity (ies), which is/are authorised, may only be carried out at the property (ies) indicated in the EA and or on the approved EMPr.
- 1.4 Where any of the holder of the EA contact details change including name of the responsible person, physical or postal address/ or telephonic details, the holder of the EA must notify the Department as soon as the new details become known to the holder of the EA.
- 1.5 The EA does not negate the responsibility of the holder to comply with any other statutory requirements that may be applicable to the undertaking of such activity (ies).
- 1.6 The holder of EA must ensure that all areas where the authorized activities occur have controlled access to ensure safety of people and animals.

2. APPEAL OF AUTHORISATION

- 2.1 The holder of EA must in writing, within 14 (fourteen) calendar days from the date of this decision and in accordance with regulation 4(2) of the EIA Regulation do the following:
- 2.2 Notify all registered I&APs of –
 - 2.2.1 The outcome of the application;
 - 2.2.2 The date of the decision;
 - 2.2.3 The date of issue of the decision and;
 - 2.2.4 The reasons for the decision as included in Annexure 1 and Departmental Standard Conditions in Annexure 2.
- 2.3 Draw the attention of all registered I&APs to the fact that an appeal may be lodged against the decision in terms of the NEMA: National Appeals Regulations,
- 2.4 Draw the attention of all registered I&APs to the manner in which they may access the decision.
- 2.5 Provide the registered I&APs with:
 - 2.5.1 Name of the holder (entity) of this EA

- 2.5.2 Name of the responsible person for this EA
- 2.5.3 Postal address of the holder;
- 2.5.4 Telephonic and fax details of the holder and
- 2.5.5 E-mail address of the holder if any.

3. COMMENCEMENT OF THE ACTIVITY (IES)

- 3.1 The site establishment and drilling must not exceed an area of 0.64ha per drill site.
- 3.2 All the mitigation matters to prevent negative environmental impacts must be implemented as per the BAR and EMPr.
- 3.3 No activity is to occur within wetlands and their 100m buffer zones, within rivers and their 100m buffer zones/ 1: 100 year flood line without the necessary authorization under NEMA and NWA.
- 3.4 Protected species must remain in situ until the necessary permits are obtained under NEM: BA.
- 3.5 Heritage sites and 30m buffer zones will be preserved at all times unless the necessary permits are obtained under SAHRA.
- 3.6 In order to ensure safety, all employees must be given the necessary personnel protective equipment (PPE).
- 3.7 This EA must be provided to the site operator and the requirements thereof must be made fully known to him or her.
- 3.8 Access routes for prospecting vehicles and machinery must be clearly marked and appropriate signalling must be posted to that effect. Furthermore, movement of prospecting vehicles and machinery must be restricted to areas outside of the drainage line or wet areas.
- 3.9 Appropriate notification sign must be erected at the prospecting site, warning the public (residents, visitors etc.) about the hazard around the prospecting area and presence of heavy vehicles and machinery.
- 3.10 Prospecting and all related activities must be limited to daytime hours on Mondays to Saturdays and no work must be undertaken on Sundays as indicated in your report.
- 3.11 Noise abatement equipment such as mufflers on diesel engines must be maintained in good condition.
- 3.12 Prospecting must include design measures that allow surface and subsurface movement of water along the drainage lines so as not to impede natural surface and subsurface water flow, and drainage measures must promote the dissipation of storm water runoff.
- 3.13 The holder of the EA must note that in terms of the National Forest Act, 1998 (Act No.84 of 1998) protected plant species, also listed in must not be cut, disturbed, damaged, destroyed and their products must not be possessed, collected, removed, transported, exported, donated, purchased or sold unless permission is granted by the Department of Agriculture, Forestry and fisheries.
- 3.14 All prospecting activities must occur in the low flow season, during the drier months.
- 3.15 An active search for floral and faunal Species of Conservation Concern (SCC) must be conducted in areas where prospecting activities are planned prior to such activities taking place, the anticipated prospecting footprint along with all access roads and the immediate vicinity must be investigated.
- 3.16 Any activity proposed within the water courses and associated buffer zones, including rehabilitation must be authorized by the DWS in terms of section 21 (c) & (i) of the National Water Act, 1998 (Act 36 of 1998).
- 3.17 The prospecting activity foot print must fall outside the 1:100 year flood line of the watercourse or 100m from the edge of the feature, whichever distance is the greatest.
- 3.18 Prospecting activities must not take place on sensitive areas as indicated on the sensitivity map, the sensitivity map must be considered when selecting prospecting areas.
- 3.19 If any soil contamination is noted at any phase of the proposed activity (ies), the contaminated soil must be removed to a licensed waste disposal facility and the site must be rehabilitated to the satisfaction of the Department and Department of Water and Sanitation. The opportunity for the onsite remediation and re-use of contaminated soil must be investigated prior to the disposal and this Department must be informed in this regard.

- 3.20 An integrated waste management approach must be implemented that is based on waste minimization and must incorporate avoidance, reduction, recycling, treatment, reuse and disposal where appropriate. Uncontaminated rubble generated on the premises can be re-used as back filling material on site. Ensure that no refuse or rubble generated on the premises is placed, dumped or deposited on the adjacent properties or public places and open space.
- 3.21 In terms of sections 28 and 30 of NEMA, and sections 19 and 20 of the NWA, any costs incurred to remedy environmental damage must be borne by the person responsible for the damage. It is therefore imperative that the holder of the EA reads through and understand the legislative requirements pertaining to the project. It is the holder of EA responsibility to take reasonable measures which include informing and educating contractors and employees about environmental risks of their work and training them to operate in an environmentally acceptable manner.
- 3.22 Heritage remains be exposed during operation or any actions on the site, these must immediately prospecting vehicle must be serviced and maintained in the manner of the PRM. If any leaks or contaminated soil are produced and noise production is reduced to acceptable levels, and to prevent of leaks. Contaminated soil must be remediated on site or removed to an authorized landfill site.
- 3.23 Residents (if any) on the property (ies) and surrounding areas must be informed if any unusual noisy activities are planned.
- 3.24 Dust suppression measures must be implemented on all exposed surface to minimize and control airborne dust.
- 3.25 Mixing of cement, concrete, paints, solvent, sealants and adhesive must be done in specified areas on concrete aprons or on protected plastic linings to contain spill and prevent soil and air contamination of underground water and environmental damage.
- 3.26 Maintenance and refuelling of machineries must be done at specified areas to minimize soil contamination.
- 3.27 Drilling muds must be contained in lined drill sumps, and the material must be removed from site and disposed in an environmental friendly manner.
- 3.28 Spill kit must be available on each site where prospecting activities will be taking place.
- 3.29 Should any be reported to the South African Heritage Resource Agency (SAHRA) and (in accordance with the applicable legislation). Heritage remains uncovered or disturbed during earthworks must not be further disturbed until the necessary approval has been obtained from SAHRA. The Department must also be informed about such exposure in writing. Heritage remains include: archaeological remains (including fossil bones and fossil shells); coins; middens, indigenous and/or colonial ceramics; any articles of value or antiquity; marine shell heaps; stone artefacts and bone remains; structures and other built features; rock art and rock engravings; shipwrecks; and graves or unmarked human burials. A qualified archaeologist must be contracted where necessary (at the expense of the applicant and in consultation with the relevant authority) to remove any human remains in accordance with the requirements of the relevant authority.
- 3.24 Hydraulic fluid or chemicals required during construction must be stored in a concrete lined surface with bund walls and shall be designed in such a manner that any spillage can be contained and reclaimed without any impact on the surrounding environment. Should any spills occur it should be cleaned immediately by removing spillage together with the polluted solids and dispose it in the authorised disposal site permitted of such waste. The regional office of the Department of Water and Sanitation must be notified within 24 hours of an incident that may pollute surface and underground water resources.
- 3.25 Chemical sanitation facilities or system such as toilets that do not rely on the seepage of liquids must be provided with a ratio of 1 for every 15 workers. These must be placed such that they prevent spills or leaks to the environment and must be maintained according to the operating instructions and the content thereof must be disposed of at an authorised waste water treatment works.
- 3.26 The holder of EA must ensure that any water uses listed in terms of section 21 of National Water Act must get authorization from Department of Water and Sanitation prior to the commencement of such activity (ies).
- 3.27 This EA does not purport to absolve the holder of EA from its common law obligations towards the owner of the surface of land affected.
- 3.28 The holder of EA must ensure that rehabilitation of the disturbed areas caused by operation at all times comply with the approved EMPr.

- 3.29 This EA may be amended or withdrawn at any stage for non-compliance and provides no relief from the provisions of any other relevant statutory or contractual obligations.
- 3.30 The holder of EA must note that in terms section 43A of NEM: WA, residue deposit and residue deposit must be deposited and managed in a prescribed manner on any site demarcated for that purpose in the Environmental Management Plan or EMPr. No person may temporary or permanently deposits residue stockpile or residue deposit on any area or site other than on site indicated on the Environmental Management Plan or EMPr.
- 3.31 The holder of EA must note that in terms section 20 of the NEM: WA, no person may commence, undertake or conduct a waste management activity, except in accordance, with the requirements of norms and standards determined in terms of Section 19 (3) for that activity or a waste management license is issued in respect of that activity if license is required.
- 3.32 An appeal under Section 43 (7) of NEMA suspend an EA or exemption or any provisions of conditions attached hereto, or any directive unless the Minister directs otherwise.
- 3.33 Should you be notified by the Minister of a suspension of the authorisation pending appeal procedure, you may not commence with the activity (ies) until such time that the Minister allows you to commence with such activity (ies) in writing.
- 3.34 The Department reserves the right to audit and/or inspect the activity (ies) without prior notification at any reasonable time and at such frequency as may be determined by the Regional Manager.
- 3.35 The waste storage site must have a firm, impermeable, chemical resistant floors and a roof to prevent direct sunlight and rain water from getting in contact with the waste.
- 3.36 The storage of hydrocarbons must have bund walls with adequate capacity to contain the maximum volume that is stored in the area. Uncontaminated storm water must be prevented from coming into contact with the waste and must be diverted away from the storage site.
- 3.37 Subject to the commencement and duration requirements of the MPRDA and NEMA for the listed Prospecting activity is valid for the period for which the aforesaid Right is granted provided that this activity must commence within 10 years. If the commencement of the proposed activity does not occur within the specified period, the EA lapses and a new application for EA in terms of the NEMA and the EIA Regulations should be made for the activity to be undertaken.
- 3.38 This EA will only be effective on the event that a corresponding Permits or rights is issued in terms of MPRDA as amended and none of the activities listed in this EA may commence without permit.
- 3.39 The listed activity (ies), including site preparation, must not commence within 20 (twenty) calendar days of the date of the notification of the decision being sent to the registered I&APs. In the event that an appeal is lodged with the appeal administrator, the effect of this environmental authorisation is suspended until such time as the appeal is decided.
- 3.40 Should there be any conflicting conditions between this EA and other approval granted by other authorities, it is the EA holder's responsibility to bring it to the attention of the Department for resolution.
- 3.41 Should any Species of Conservation Concern (SCC) or other protected floral and faunal species be encountered within the study area, the following must be done
- ❖ If any threatened species will be disturbed, ensure effective relocation of individuals to suitable offset areas
 - ❖ Permit applications must be obtained from the relevant authorities where applicable; and
 - ❖ A suitable qualified specialist must oversee all rescue and relocation plans.

4. MANAGEMENT OF ACTIVITY (IES)

- 4.1 A copy of the EA and EMPr must be kept at the property or on site office where the activity (ies) will be undertaken. The EA and EMPr must be produced to any authorised officials of the Department who request to see it and must be made available for inspection by any employee or agent of the holder of the EA who works or undertakes work at the property (ies).
- 4.2 The content of the EMPr and its objectives must be made known to all contractors, subcontractors, agent and any other people working on the site, and any updates or amendments to the EMPr must be submitted to the Department for approval.
- 4.4 Regular monitoring and maintenance of storm water drainage facilities must be conducted at all times, if damaged as directed by the Department or any other relevant authority.
- 4.5 A buffer zone of 100 metres between the activity (ies) and the residential areas, cemeteries or burial grounds, Eskom power lines and the fuel pipe line must be clearly demarcated and maintained.
- 4.6 The holder of the EA must prevent nuisance conditions or health hazards, or the potential creation of nuisance conditions or health hazards.
- 4.7 The holder of the EA must ensure that all non-recyclable waste are disposed of at waste management facilities licenced to handle such wastes and all recyclable waste are collected by licenced waste management facilities for recycling, reuse or treatment.
- 4.8 All watercourses are off-limits to all prospecting vehicles and personnel
- 4.9 All sanitary facilities provided onsite must be emptied on a weekly basis and be maintained in a good hygienically condition.
- 4.10 No fire is permitted in or near the prospecting area
- 4.11 Alien and invasive vegetation control must take place throughout the duration of the prospecting activities
- 4.12 Alien species must be eradicated and controlled to prevent their spread beyond the footprint area.
- 4.13 Alien and weed species encountered within the footprint area must be removed to comply with the existing legislation (amendments to the regulations under the Conservation of Agricultural Resources Act, 1983 and section 28 of the National Environmental Management Act, 1998).
- 4.14 Collection of plant material for any purpose is prohibited.
- 4.15 No hunting or trapping of fauna is allowed.
- 4.16 Existing farm roads must be utilised, no new access roads must be established
- 4.17 All vehicles must be regularly inspected for leaks
- 4.18 Refuelling of vehicles and machineries must take place on a sealed surface area to prevent soil contamination.
- 4.19 The footprint of the activity (ies) must be limited on the areas authorised for the actual construction works and operational activities and all areas outside of the footprint must be regarded as a "no go" areas.
- 4.20 Erosion and soil loss must be prevented by minimizing the construction site exposed to surface water run-off. Where necessary erosion stabilizing action such as gabions or re-vegetation must be implemented to prevent further habitat deterioration.
- 4.21 The holder of the EA must ensure that all personnel who work with hazardous waste are trained to deal with these potential hazardous situations so as to minimize the risk involved. Records of training and verification of competence must be kept by the holder EA.
- 4.22 In order to prevent nuisance conditions, the holder of the EA must ensure that all storage skips and bins are not overfilled.
- 4.23 In the event of vehicle breakdown, maintenance must be done with care. Drip trays must be used to control oil spillages.
- 4.24 All oil spillages must be immediately cleaned up and treated accordingly.

- 4.25 Sheet runoff from access roads must be slowed down by the strategic placement of berms
- 4.26 The holder of the EA must ensure that all liquid wastes, whose emissions to water or land could cause pollution are diverted to sewer, after testing water quality and receiving written approval from the relevant local authority.
- 4.27 All alien vegetation in the vicinity of the study area should be removed regularly and reseeded with indigenous grasses and sedges throughout the life cycle of the of the prospecting activities
- 4.28 Non-compliance with any condition of this EA or EMPr may result in the issuing of a directive in terms of section 28 and or a compliance notice in terms of section 31L of NEMA.
- 4.29 Only listed activities that are expressly specified in the EMPr that forms part of this EA may be conducted, and additional or new activities not specified herein must be applied for by the holder and authorised by the competent authority in the form of an amendment to the aforesaid EMPr before such activities may be commenced with. This condition is also applicable in the case of the amendment, addition, substitution, correction, and removal or updating of any detail in the aforesaid EMPr.
- 4.30 Rehabilitation of the disturbed surface caused by operation at all times must comply with the approved EMPr.
- 4.31 Rehabilitation must be applied on an on-going basis and no sites must be left exposed for more time than necessary to obtain the necessary data.
- 4.32 The Holder of EA must ensure that the name and contact details of the ECO is made available to the Regional Manager within 30 days of commencement. The holder of EA must also ensure that an ECO is available on site to ensure that activity (ies) at all times comply with the issued EA and approved EMPr.
- 4.33 The ECO must:
- 4.33.1 Keep and maintain a detailed incidents register including any spillages of fuels, chemicals or any other material.
- 4.33.2 Keep a complaint register on site indicating the complaint and how the issues were addressed, what measures were taken and what the preventative measures were implemented to avoid re-occurrence of complaints.
- 4.33.3 Keep records relating to monitoring and auditing on site and avail them for inspection to any relevant authorised officials.
- 4.33.4 Keep copies of all environmental reports submitted to the Department.
- 4.33.5 Keep the records of all permits, licences and authorisations required by the operation.
- 4.33.6 Compile a monthly monitoring report and make it available to the Department if requested.
- 4.34 The duties and responsibility of the ECO should not be seen as exempting the holder of the EA from the legal obligations in terms of NEMA.

5. REPORTING TO THE DEPARTMENT

5.1 The holder of EA must:

- 5.1.1 Submit and Environmental Audit Report and Environmental Assessment Report to the Regional Manager and such report must be done by qualified Environmental Assessment Practitioner and must the audit report must specify whether conditions of this environmental authorisation and EMPr are adhered to;
- 5.1.2 Identify and assess any new impacts and risks as a result of undertaking the activity/ies, if applicable;
- 5.1.3 Identify shortcomings in the EMPr , if applicable;

- 5.1.4 Identify the need, if any, for any changes to the management, avoidance and mitigation measures provided for in the EMP/closure plan;
- 5.1.5 if applicable, specify that the corrective action/s taken for the previous audit's non-conformities, was adequate;
- 5.1.6 Specify the name of the auditor and
- 5.1.7 Be submitted by the holder to the competent authority within 30 days from the date on which the auditor finalised the audit.
- 5.2 Should any shortcomings in terms of regulation 34(4) of the EIA Regulations be identified, the holder must submit recommendation to amend the EMP in order to rectify any shortcomings identified with the aforementioned audit report.
- 5.3 Any complaint received from the I&AP during all phases of the operation must be attended to as soon as possible and addressed to the satisfaction of all concerned interested and affected parties.
- 5.4 The holder of the EA must annually assess the environmental liabilities of the operation as contemplated in the Financial Provisioning Regulations, 2015 and address the shortfall on the financial provision submitted in terms of section 24P of NEMA.
- 5.5 The holder of the EA must, within 24 hours of incidents occurring, notify the Competent Authority of the occurrence or detection of any incident on the site, or incidental to the operation of the site, which has the potential to cause, or has caused pollution of the environment, health risks, nuisance conditions or water pollution.
- 5.6 The holder of the EA must, within 14 days, or a shorter period of time, if specified by the Competent Authority from the occurrence or detection of any incident referred to in condition 5.5, submit an action plan, which must include a detailed time schedule, and resource allocation and measures taken to the satisfaction of the Competent Authority of measures taken to
- 5.6.1.1 Correct the impact resulting from the incident;
- 5.6.1.2 Prevent the incident from causing any further impact; and
- 5.6.1.3 Prevent a recurrence of a similar incident.
- 5.7 In the event that measures have not been implemented within 21 days of the incident referred to in condition 5.6, or measures which have been implemented are inadequate, the Competent Authority may implement the necessary measures at the cost of the holder of the EA.

6. SITE SECURITY AND ACCESS CONTROL

- 6.1 The holder of the EA must ensure effective access control on the site to reasonably prevent unauthorised entry. Signs indicating the risks involved in unauthorised entry must be displayed at each entrance.
- 6.2 Weather proof, durable and legible notices in at least three official languages applicable in the area must be displayed at each entrance to the Site. These notices must prohibit unauthorised entry and state the hours of operation, the name, address and telephone number of the holder of the EA and the person responsible for the operation of the site.

7. EMERGENCY PREPAREDNESS PLAN

7.1 The holder of the EA must maintain and implement an emergency preparedness plan and review it biennially when conducting audit and after each emergency and or major accident. The plan must, amongst others, include:

- 7.1.1 Site Fire
- 7.1.3 Spillage
- 7.1.3 Natural disasters such as floods
- 7.1.4 Industrial action
- 7.1.5 Contact details of police, ambulances and any emergency centre closer to the site.

7.2 The holder of EA must ensure that an up to date emergency register is kept during all phases of the operation. This register must be made available upon request by the department.

8. INVESTIGATIONS

- 8.1 If, in the opinion of the Competent Authority, nuisances or health risks may be or is occurring on the site, the holder of the EA must initiate an investigation into the cause of the problem or suspected problem.
- 8.2 If, in the opinion of the Competent Authority, pollution may be or is occurring, the holder of the EA must initiate an investigation into the cause of the problem or suspected problem. Such investigation must include the monitoring of the water quality variables, at those monitoring points and such frequency as may be specified by the Competent Authority.
- 8.3 Investigations carried out in terms of conditions 8.1 and 8.2 above must include the monitoring of the relevant environmental pollution, nuisance and health risk variables, at those monitoring points and such frequency to be determined in consultation with the Competent Authority.
- 8.4. Should the investigation carried out as per conditions 8.1 and 8.2 above reveal any unacceptable levels of pollution, the holder of the EA must submit mitigation measures to the satisfaction of the Competent Authority.

9. COMMISSIONING AND DECOMMISSIONING

9.1 The commissioning and decommissioning of individual activity within the overall listed prospecting activity must take place within the phases and timeframes as set out in the MPRDA.

10. SITE CLOSURE

10.1 The holder of EA must apply for a closure certificate in terms of section 43 of the MPRDA within 180 days of occurrence of lapsing, abandonment, cancellation, cessation, termination and completion of development.

10.1.1 The application for closure indicated above must be submitted together with all relevant documents as indicated in section 43 of the MPRDA.

10.1.2 Vegetation growth must be retained around the proposed prospecting areas to protect the soil

10.1.3 No exotic plants may be used for rehabilitation purposes only indigenous plant can be utilized for rehabilitation purposes.

- 10.1.4 The holder of EA remains responsible for any environmental liability, pollution or ecological degradation, the pumping and treatment of extraneous water, compliance with the conditions of EA and the management and sustainable closure thereof until the Minister has issued a closure certificate in terms of Section 43 of the MPRDA. Where necessary the Minister may retain certain portion of financial provision for residual, health or environmental impacts that might be known in future.
- 10.1.5 The following must also be implemented as per the EIAR and EMPr:
- 10.1.5.1 Removal of infrastructures (drill rig, mobile diesel tank, mobile water tank and chemical toilet).
 - 10.1.5.2 Capping boreholes as per legal requirements.
 - 10.1.5.3 Ensure that no foreign matter is left behind on the drill site.
 - 10.1.5.4 Refilling the sump required for the drilling activities, the plastic lining will be removed and disposed of in a registered landfill site and the soil returned for rehabilitation purposes.
 - 10.1.5.5 The drill sites will be inspected for any signs of hydrocarbon pollution.
 - 10.1.5.6 Any identified soil polluted will be removed and disposed of in an environmental friendly manner.
 - 10.1.5.7 Any area compacted as a result of the drilling will be ripped and any ruts created by accessing or leaving the site for the drilling activity will be filled in to prevent erosion.
 - 10.1.5.8 Re-vegetation in the affected areas, and
 - 10.1.5.9 The applicable land owners will be requested to inspect the rehabilitated sites.

11. NEMA PRINCIPLES

The NEMA Principles (set out in Section 2 of NEMA, which apply to the actions of all organs of state) serve as guidelines by reference to which any organs of state must exercise any function when taking any decision, and which must guide the interpretation, administration and implementation of any other law concerned with the protection or management of the environment), *inter alia*, provides for:

- the effects of decisions on all aspects of the environment to be taken into account;
- the consideration, assessment and evaluation of the social, economic and environmental impacts of activities (disadvantages and benefits), and for decisions to be appropriate in the light of such consideration and assessment;
- the co-ordination and harmonisation of policies, legislation and actions relating to the environment;
- the resolving of actual or potential conflicts of interest between organs of state through resolution procedures; and
- the selection of the best practicable environmental option.

12. DISCLAIMER

The Department, in terms of the conditions of this environmental authorisation shall not be responsible for any damages or losses suffered by the holder, developer or his/her successor in any instance where construction or operation subsequent to construction is temporarily or permanently stopped for reasons of non-compliance with the conditions as set out herein or any other subsequent document or legal action emanating from this decision.

13. RECOMMENDATIONS

In view of the above, the NEMA principles, compliance with the conditions stipulated in this EA, and compliance with the EMP, the competent authority is satisfied that the proposed listed activity/ies will not conflict with the general objectives of Integrated Environmental Management stipulated in chapter 5 of NEMA, and that any potentially detrimental environmental impacts resulting from the listed activity/ies can be mitigated to acceptable levels. The authorisation is accordingly **granted**.

Your interest in the future of our environment is appreciated.

Yours Faithfully
