65 Phakamile Mabija, 1st Floor Permanent Building, Kimberley 8300

ENVIRONMENTAL AUTHORISATION

Reference number: NC 30/5/1/1/2 (11815) EM
Last amended: First issue
Holder of authorisation: Wepex Trading (Pty) Ltd
Location of activities: Remaining extent of the farm Gloucester No.674 in the magisterial district of Kuruman.

DECISION

ACRONYMS

NEMA: The National Environmental Management Act, 1998 (Act 107 of 1998), as amended
DEPARTMENT: Department of Mineral Resources.
EA: Environmental Authorisation.
EMPr: Environmental Management Programme
BAR: Basic Assessment Report
I&AP: Interested and Affected Parties
ECO: Environmental Control Officer
SAHRA: South African Heritage Resources Agency
EIA REGULATIONS: EIA Regulations, 2014
MPRDA: Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002), as amended
EIA: Environmental Impact Assessment.

The Department is satisfied, on the basis of information availed to it and subject to compliance with the conditions of this environmental authorisation, that the applicant should be authorised to undertake **NEMA** and **EIA** listed activities specified below. Details regarding the basis on which the Department reached this granting decision are set out in Annexure "I" of this integrated environmental authorisation.

ACTIVITY APPLIED FOR

By virtue of the powers conferred on it by NEMA and NEMWA, the Department hereby grant an application for EA by **Wepex Trading (Pty) Ltd** with the following contact details –

Mr. Thabo Mafoko

24 Nanyuki Road, Sunninghill Brooke Estates Sunninghill, 2157

Postnet Suit 246

Private Bag X43

Sunninghill

2157

Tel no: (060) 377 3891

Email address: Thabo.mafoko887@yahoo.com

To undertake the following activities listed in the NEMA and EIA Regulation.

NEMA: LISTED ACTIVITIES:

Listed activities on listing notice 1 of the EIA Regulations R. 983 of 2014 as:-

Activity 20 – “Any activity including the operation of that activity which requires a prospecting right in terms of section 16 of the Mineral and Petroleum resources Development Act, 2002 (Act No. 28 of 2002), including associated infrastructure, structures and earthworks, directly related to prospecting of a mineral resource, including activities for which an exemption has been issued in terms of section 106 of Mineral and Petroleum resources Development Act, 2002 (Act No. 28 of 2002).

Activity 27 – The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation, expect where such clearance of indigenous vegetation is required for -

- (i) The undertaking of a linear activity; or
- (ii) Maintenance purpose undertaken in accordance with maintenance management plan.

The proposed prospecting right application entails the following activities:

- Geological Surface Mapping
- Geophysical Surveys
- Geochemical Surveys
- Invasive Prospecting activities
- 30 boreholes will be drilled in total.

Detailed specifications of the activity are as follows:

Prospecting Method will be as follows.
The prospecting method of a programme of the thirty surface diamond drill holes are planned, comprising HQ and NQ size core at depths of 50m to 100m, thus production drilled cores. The drilling location are selected based on the previous phase of exploration in which data acquisition and interpretations of the ore body have resulted in the delineation of target areas for subsurface drilling exploration. The drilling programme consists of the following: <ul style="list-style-type: none"> ➤ 20 drill holes allocated to delineating the shallow pockets of manganese ore. ➤ 10 drill holes allocated for deeper drilling for duplicate material.
Borehole Depth: 50m to 100m
Footprint of boreholes will be : 0.3 ha
Land to be prospecting application is : 1165.8 ha
Coordinates: (of the remaining extent of Gloucester 674)

A: -23027223 S 28.060606 E
B: -23.048549 S 28.053379 E
C: 23.041868 S 28.130278 E
D: -23.038769 S 28.131084 E

EA SITE SPECIFIC CONDITIONS

1. Protected plant species must not be removed (disturbed, cut and destroy their products which may not be possessed, collected, removed, transported, exported, donated, purchased or sold) unless the necessary permission is granted by the Department of Agriculture, Forestry and Fisheries (DAFF).
2. All development footprint areas and areas affected by the proposed development must remain as small as possible and must not encroach onto the surrounding sensitive areas and the associated buffer zones
3. An Integrated Water Use License (IWUL) must be obtained from the Department of Water and Sanitation (DWS) prior commencement of activity.
4. Wetland and riverine areas are to be considered as no go zones unless authorisation is obtained. Ensure that construction activities are outside the demarcated wetland area. No activity should be allowed to encroach on to wetland system.

ANNEXURE 1: REASONS FOR THE DECISION

1. Background

Wepex Trading (Pty) Ltd submitted an application for an EA for activities listed in the EIA Regulations and NEMWA Listed Activities.

NEMA: LISTED ACTIVITIES:

Listed activities on listing notice 1 of the EIA Regulations R. 983 of 2014 as:-

Activity 20 – “Any activity including the operation of that activity which requires a prospecting right in terms of section 16 of the Mineral and Petroleum resources Development Act, 2002 (Act No. 28 of 2002), including associated infrastructure, structures and earthworks, directly related to prospecting of a mineral resource, including activities for which an exemption has been issued in terms of section 106 of Mineral and Petroleum resources Development Act, 2002 (Act No. 28 of 2002).”

Activity 27 – The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation, except where such clearance of indigenous vegetation is required for -

Wepex Trading (Pty) Ltd appointed Wadala Prospecting and Consulting (Pty) Ltd to undertake the Basic Assessment and Environmental Management Programme Report process as required by Regulation 19 of the EIA Regulations

2. Information considered in making the decision

In reaching its decision, the Department took, *inter alia*, the following into consideration -

- a) The information contained in the application form received by the Department on 05th July 2016;
- b) The information contained in the BAR received by the Department on 05th September 2016.
- c) The objectives and requirements of the applicable and relevant legislation, policies and guidelines and the EIA Regulations of 2014;
- d) Public Participation Process (PPP) attached on BAR and online;
- e) Terrestrial Ecological Assessment Report attached on BAR and online
- f) Heritage assessment report attached on BAR and online

3. Key factors considered in making the decision

All the information presented to the Department ~~was taken into account~~ upon the Department's consideration of the application. A summary of the issues which, in the Department's view, were of the most significance are set out below.

- a. A sufficient Public Participation Process (PPP) was undertaken and the applicant has satisfied the minimum requirements as prescribed in the EIA Regulations R 982 of 2014 for public involvement
- b. The environmental impacts associated with the proposed activity will be addressed by the proposed mitigation measures outlined in the EMPr compiled by Roelien Henriette Oosthuizen of Wadala Prospecting and Consulting (Pty) Ltd
- c. Terrestrial Ecological Assessment Report (Fauna and Flora) compiled by Boscia Ecology consulting indicates that the proposed prospecting activities are located in areas of indigenous vegetation that provide habitat for a rich assemblage of fauna and flora, several of which, are species conservation importance. The transformation of the site will also negatively affect the habitat connectivity of the immediate surrounding landscape, which impede fauna movement and dispersal. It is thus imperative that careful and diligent environmental planning and management be undertaken during all phases of the prospecting operations;
- d. Heritage Impact assessment of August 2010; compiled by Dr A.C Van Vollenhoven (L.AKAD.SA.) and J .Pelsler states that conservation management plan for on-going protection of unaffected graveyards and graves be included on the Environmental Management Plan for the mine. All graveyards and graves be considered to be of high significance and are protected by various laws. Legislation with regard to graves includes Section 36 of the National Heritage Resource Act (NHRA), 1999 (Act no. 25 of 1999) whenever graves are older than sixty years. None of the graves is furnished with a date which gives an accurate date when the deceased were buried. However, it seems as if all the graves may be older than sixty years of age. Consequently all graves should be treated as if they are sixty years old. Graveyards and graves will be demarcated with

fences or with walls and should be fitted with access gates and regular monitoring will be implemented in every three months period.

- e. Financial provision to the value of **R289, 166 .00** for operational and/or management of negative environmental impacts that will be resulted from these proposed prospecting activities submitted in a form of bank guarantee which was issued by Lombard Insurance Company Limited.

4. Findings

After consideration of the information and factors listed above, the Department made the following findings –

- a) The potential impacts on the proposed site were clearly investigated and mitigation measures outlined.
- b) Public Participation Process (PPP) attached in *BAR* included, *inter-alia*, the following:
- A newspaper advertisement was placed in the local newspaper;
 - Notices were placed at the project site;
 - Notices were sent to all key stakeholders and the registered interested and affected parties;
 - Authorities meetings (attendance register and minutes of the meetings attached);
 - No objection was received from the consulted interested and affected parties;

Public meetings were held on 11th August 2016, and comments and issues raised by interested and affected parties were adequately addressed.

ANNEXURE 2

DEPARTMENTAL STANDARD CONDITIONS

1. SCOPE OF AUTHORISATION

- 1.1. The holder of EA shall be responsible for ensuring compliance with the conditions contained in the EA. This includes any person acting on the holder's behalf, including but not limited to an agent, servant, contractor, subcontractor, employee, consultant or any person rendering a service to the holder of EA.
- 1.2. Any changes to, or deviation from the project description set out in this EA must be approved in writing by this Department before such changes or deviation may be effected. In assessing whether to grant such approval or not, the Department may request such information as is deems necessary to evaluate the significance and impacts of such changes or deviation and it may be necessary for the holder of the EA to apply for further authorisation in terms of the EIA Regulations.
- 1.3. The activities, which are authorised, may only be carried out at the property indicated in the EA and or on the approved EMPr.
- 1.4. Where any of the holder of the EA contact details change including name of the responsible person, physical or postal address/ or telephonic details, the holder of the EA must notify the Department as soon as the new details become known to the holder of the EA.
- 1.5. The EA does not negate the responsibility of the holder to comply with any other statutory requirements that may be applicable to the undertaking of such activities.
- 1.6. The holder of EA must ensure that all areas where the authorised activities occur have controlled access to ensure safety of people and animals.

2 APPEAL OF AUTHORISATION

2.1 The holder of EA must in writing, within 14 (fourteen) calendar days from the date of this decision and in accordance with EIA Regulation 4(2) do the following:

2.2 Notify all registered I&APs of –

2.2.1. The outcome of the application;

2.2.2. The date of the decision;

2.2.3. The date of issue of the decision and;

2.2.4. The reasons for the decision as included in Annexure 1 and Departmental Standard Conditions on Annexure 2.

2.3 Draw the attention of all registered I&APs to the fact that an appeal may be lodged against the decision in terms of the National Appeals Regulations,

2.4 Draw the attention of all registered I&APs to the manner in which they may access the decision.

2.5 Provide the registered I&APs with:

2.5.1. Name of the holder (entity) of this EA

2.5.2. Name of the responsible person for this EA

2.5.3. Postal address of the holder;

2.5.4. Telephonic and fax details of the holder and

2.5.5. E-mail address of the holder if any.

3. COMMENCEMENT OF THE ACTIVITY (IES)

3.1. In order to ensure safety, all employees must be given the necessary personnel protective equipment (PPE).

3.2. This EA must be provided to the site operator and the requirements thereof must be made fully known to him or her.

- 3.3. Hauling routes for construction vehicles and machinery must be clearly marked and appropriate signalling must be posted to that effect. Furthermore, movement of construction vehicles and machinery must be restricted to areas outside of the drainage line or wet areas.
- 3.4. Appropriate notification sign must be erected at the construction site, warning the public (residents, visitors etc.) about the hazard around the construction site and presence of heavy vehicles and machinery.
- 3.5. Construction must include design measures that allow surface and subsurface movement of water along the drainage lines so as not to impede natural surface and subsurface water flow, and drainage measures must promote the dissipation of storm water runoff.
- 3.6. Vegetation clearance must be limited areas where the individual activities will occur, and mitigation measures must be implemented to reduce the risk of erosion and alien species invasion.
- 3.7. The holder of EA must note that in terms of the National Forest Act (Act No.84 of 1998) protected plant species, must not be cut, disturbed, damaged, destroyed and their products must not be possessed, collected, removed, transported, exported; donated, purchased or sold unless permission is granted by the Department of Agriculture, Forestry and fisheries.
- 3.8. Construction areas (e.g. material lay down areas), topsoil and subsoil must be protected from contamination or pollution. Stockpiling must not take place in drainage lines or areas where it will impede surface water runoff.
- 3.9. If any soil contamination is noted at any phase of the proposed activities the contaminated soil must be removed to a licensed waste disposal facility and the site must be rehabilitated to the satisfaction of the Department and Department of Water and Sanitation. The opportunity for the onsite remediation and re-use of contaminated soil must be investigated prior to the disposal and this Department must be informed in this regard.

- 3.10. An integrated waste management approach must be implemented that is based on waste minimization and must incorporate avoidance, reduction, recycling, treat, reuse and disposal where appropriate. Uncontaminated rubble generated on the premises can be re-used as back filling material on site. Ensure that no refuse or rubble generated on the premises is placed, dumped or deposited on the adjacent properties or public places and open space.
- 3.11. In terms of sections 28 and 30 of NEMA, and sections 19 and 20 of the National Water Act, 1998 (Act No. 36 of 1998), any costs incurred to remedy environmental damage must be borne by the person responsible for the damage. It is therefore imperative that the holder of the EA reads through and understand the legislative requirements pertaining to the project. It is the Applicant's responsibility to take reasonable measures which include informing and educating contractors and employees about environmental risks of their work and training them to operate in an environmentally acceptable manner.
- 3.12. Construction vehicle must be serviced and maintained in the manner whereby no excessive smokes and noise production is reduced to acceptable levels, and to prevent oil leaks. Contaminated soil must be remediated on site or removed to an authorized landfill site.
- 3.13. Residents (if any) on the property and surrounding areas must be informed if any unusually noisy activities are planned.
- 3.14. Dust suppression measures must be implemented on all exposed surface to minimize and control airborne dust.
- 3.15. Mixing of cement, concrete, paints, solvent, sealants and adhesive must be done in specified areas on concrete aprons or on protected plastic linings to contain spillage or overflow onto soil to avoid contamination of underground water and environmental damage.
- 3.16. The protection of all historical and pre-historical cultural resources must remain on site and no mining activities are allowed within 100 diameters from those resources. Should any heritage remains be exposed during operation or any actions on the site, these must immediately be reported to the

South African Heritage Resource Agency (SAHRA) and (in accordance with the applicable legislation). Heritage remains uncovered or disturbed during earthworks must not be further disturbed until the necessary approval has been obtained from the South African Heritage Resource Agency (SAHRA) .

Heritage remains include: archaeological remains (including fossil bones and fossil shells); coins; maddens, indigenous and/or colonial ceramics; any articles of value or antiquity; marine shell heaps; stone artifacts and bone remains; structures and other built features; rock art and rock engravings; shipwrecks; and graves or unmarked human burials. A qualified archaeologist must be contracted where necessary (at the expense of the applicant and in consultation with the relevant authority) to remove any human remains in accordance with the requirements of the relevant authority.

- 3.17. Care must be taken to ensure that the material and excavated soil required for backfilling are free of contamination from hydrocarbons.
- 3.18. Hydraulic fluid or chemicals required during construction must be stored in a concrete lined surface with bund walls and shall be designed in such a manner that any spillage can be contained and reclaimed without any impact on the surrounding environment. Should any spills occur it should be cleaned immediately by removing spillage together with the polluted solids and dispose it in the authorised disposal site permitted of such waste. The regional office of the Department of Water and Sanitation must be notified within 24 hours of an incident that may pollute surface and underground water resources.
- 3.19. Chemical sanitation facilities or system such as toilets that do not rely on the seepage of liquids must be provided with a ratio of 1 for every 15 workers. These must be placed such that they prevent spills or leaks to the environment and must be maintained according to the operating instructions and the content thereof must be disposed of at an authorised waste water treatment works.
- 3.20. The holder of EA must ensure that any water uses listed in terms of Section 21 of National Water Act must get authorization from Department of Water and Sanitation prior to the commencement of such activities.

3.21. This EA does not purport to absolve the holder of EA from its common law obligations towards the owner of the surface of land affected.

3.22. The holder of EA must ensure that rehabilitation of the disturbed areas caused by operation at all times comply with the approved EMP.

3.23. This EA may be amended or withdrawn at any stage for non-compliance and provides no relief from the provisions of any other relevant statutory or contractual obligations.

3.24. The holder of EA must note that in terms Section 43A of the National Environmental Management: Waste Act, 2008 (Act No.59 of 2008), residue deposit and residue deposit must be deposited and managed in a prescribed manner on any site demarcated for that purpose in the Environmental Management Plan or Environmental Management Programme. No person may temporary or permanently deposits residue stockpile or residue deposit on any area or site other than on site indicated on the Environmental Management Plan or Environmental Management Programme.

3.25. The holder of EA must note that in terms Section 20 of the National Environmental Management: Waste Act, 2008 (Act No.59 of 2008), no person may commence, undertake or conduct a waste management activity, except in accordance, with the requirements of norms and standards determined in terms of Section 19 (3) for that activity or a waste management licence is issued in respect of that activity if license is required.

3.26. An appeal under Section 43 (7)of the National Environmental Management Act (NEMA), Act 107 of 1998 (as amended) suspend an IEA or exemption or any provisions of conditions attached hereto, or any directive unless the Minister directs otherwise.

3.27. Should you be notified by the Minister of a suspension of the authorisation pending appeal procedure, you may not commence with the activities until such time that the Minister allows you to commence with such activities in writing.

- 3.28.** The Department reserves the right to audit and/or inspect the activities without prior notification at any reasonable time and at such frequency as may be determined by the Regional Manager.
- 3.29.** The waste storage site must have a firm, impermeable, chemical resistant floors and a roof to prevent direct sunlight and rain water from getting in contact with the waste.
- 3.30.** The storage of hydrocarbons must have ~~bund walls with adequate~~ capacity to contain the maximum volume that is stored in the area. Uncontaminated storm water must be prevented from coming into contact with the waste and must be diverted away from the storage site.
- 3.31.** Subject to the commencement and duration requirements of the MPRDA and NEMA for the listed mining activity is valid for the period for which the aforesaid right is granted provided that this activity must commence within 10 years. If the commencement of the proposed activity does not occur within the specified period, the EA lapses and a new application for EA in terms of the NEMA and the EIA Regulations should be made for the activity to be undertaken.
- 3.32.** The commissioning and decommissioning of individual activity within the overall listed mining activity must take place within the phases and timeframes as set out in EMP or EMPr.
- 3.33.** This EA will only be effective on the event that a corresponding right is issued in terms of MPRDA as amended and none of the activities listed in this EA may commence without right.
- 3.34.** The listed activities, including site preparation, must not commence within 20 (twenty) calendar days of the date of the notification of the decision being sent to the registered I&APs. In the event that an appeal is lodged with the appeal administrator, the effect of this environmental authorisation is suspended until such time as the appeal is decided.
- 3.35.** Should there be any conflicting conditions between this EA and other approval granted by other authorities, it is upon the holder of EA to bring it to the attention of the Department for resolution.

4. MANAGEMENT OF ACTIVITIES

- 4.1.** A copy of the EA and EMPr must be kept at the property or on site office where the activities will be undertaken. The EA and EMPr must be produced to any authorised officials of the Department who request to see it and must be made available for inspection by any employee or agent of the holder of the EA who works or undertakes work at the properties.
- 4.2.** The content of the EMPr and its objectives must be made known to all contractors, subcontractors, agent and any other people working on the site, and any updates or amendments to the EMPr must be submitted to the Department for approval.
- 4.3.** Regular monitoring and maintenance of storm water drainage facilities must be conducted at all times, if damaged as directed by the Department or any other relevant authority.
- 4.4.** A buffer zone of 100 metres between the activities and the residential areas, cemeteries or burial grounds must be clearly demarcated and maintained.
- 4.5.** The holder of the EA must prevent nuisance conditions or health hazards, or the potential creation of nuisance conditions or health hazards.
- 4.6.** The holder of the EA must ensure that all non-recyclable waste are disposed of at waste management facilities licensed to handle such wastes and all recyclable waste are collected by licenced waste management facilities for recycling, reuse or treatment.
- 4.7.** The holder of the EA must ensure that all liquid wastes, whose emissions to water or land could cause pollution are diverted to sewer, after testing water quality and receiving written approval from the relevant local authority.
- 4.8.** Non-compliance with any condition of this EA or EMPr may result in the issuing of a directive in terms of section 28 and or a compliance notice in terms of section 31L of NEMA.

- 4.9.** This EA only authorizes activities specified in the EMPr /closure plan and a new authorisation must be applied for in respect of any new activity not specified as part of the EMPr.
- 4.10.** Only listed activities that are expressly specified in the EMPr that forms part of this IEA may be conducted, and additional or new activities not specified herein must be applied for by the holder and authorised by the competent authority in the form of an amendment to the aforesaid EMPr before such activities may be commenced with. This condition is also applicable in the case of the amendment, addition, substitution, correction, and removal or updating of any detail in the aforesaid EMPr.
- 4.11.** Rehabilitation of the disturbed surface caused by operation at all times must comply with the approved EMPr.
- 4.12.** The Holder of EA must ensure that the name and contact details of the ECO is made available to the Regional Manager within 30 days of commencement. The holder of EA must also ensure that an ECO is always available on-site to ensure that activities at all times comply with the issued EA and approved EMPr.

4.13. The ECO must:

- 4.13.1.** Keep and maintain a detailed incidents register (including any spillages of fuels, chemicals or any other material)
- 4.13.2.** Keep a complaint register on site indicating the complaint and how the issues were addressed, what measures were taken and what the preventative measures were implemented to avoid re-occurrence of complaints.
- 4.13.3.** Keep records relating to monitoring and auditing on site and avail them for inspection to any relevant authorised officials.
- 4.13.4.** Keep copies of all environmental reports submitted to the Department.
- 4.13.5.** Keep the records of all permits, licences and authorisations required by the operation.
- 4.13.6.** Compile a monthly monitoring report and make it available to the Department if requested.

4.13.7. The duties and responsibility of the ECO should not be seen as exempting the holder of the EA from the legal obligations in terms of the NEMA

4.14. The footprint of the activities must be limited on the areas authorised for the actual construction works and operational activities and all areas outside of the footprint must be regarded as a “no go” areas.

4.15. Erosion and soil loss must be prevented by minimizing the construction site exposed to surface water run-off. Where necessary erosion stabilizing action such as gabions or re-vegetation must be implemented to prevent further habitat deterioration.

4.16. The holder of the EA must ensure that all personnel who work with hazardous waste are trained to deal with these potential hazardous situations so as to minimise the risk involved. Records of training and verification of competence must be kept by the holder EA.

4.17. In order to prevent nuisance conditions, the holder of the EA must ensure that all storage skips and bins are not overfilled.

5 REPORTING TO THE DEPARTMENT

5.1. The holder of EA must:

5.1.1. submit and Environmental Audit Report to this Department bi-annually and such report must be done by qualified Environmental Assessment Practitioner and must the audit report must specify whether conditions of this environmental authorization and EMPr/closure plan are adhered to;

5.1.2. identify and assess any new impacts and risks as a result of undertaking the activities, if applicable;

5.1.3. identify shortcomings in the EMPr/closure plan, if applicable;

- 5.1.4. identify the need, if any, for any changes to the management, avoidance and mitigation measures provided for in the EMP/closure plan;
- 5.1.5. if applicable, specify that the corrective action/s taken for the previous audit's non-conformities, was adequate;
- 5.1.6. Specify the name of the auditor and
- 5.1.7. Be submitted by the holder to the competent authority within 30 days from the date on which the auditor finalised the audit.
- 5.2. Should any shortcomings in terms of Regulation 34(4) be identified, the holder must submit recommendation to amend the EMP/closure plan in order to rectify any shortcomings identified with the aforementioned audit report.
- 5.3. Any complaint received from the I&AP during all phases of the operation must be attended to as soon as possible and addressed to the satisfaction of all concerned interested and affected parties.
- 5.4. The holder of the EA must annually assess the environmental liabilities of the operation by using the master rates in line with the applicable Consumer Price Index (CPI) at the time and address the shortfall of the financial provision submitted in terms of section 24P of NEMA.
- 5.5. The holder of the EA must, within 24 hours of incidents occurring, notify the Competent Authority of the occurrence or detection of any incident on the site, or incidental to the operation of the site, which has the potential to cause, or has caused pollution of the environment, health risks, nuisance conditions or water pollution.
- 5.6. The holder of the EA must, within 14 days, or a shorter period of time, if specified by the Competent Authority from the occurrence or detection of any incident referred to in condition 5.5, submit an action plan, which must include a detailed time schedule, and resource allocation signed off by top management, to the satisfaction of the Competent Authority of measures taken to –

- 5.6.1. Correct the impact resulting from the incident;
 - 5.6.2. Prevent the incident from causing any further impact; and
 - 5.6.3. Prevent a recurrence of a similar incident.
- 5.7. In the event that measures have not been implemented within 21 days of the incident referred to in condition 5.6, or measures which have been implemented are inadequate, the Competent Authority may implement the necessary measures at the cost of the holder of the EA.

6. SITE SECURITY AND ACCESS CONTROL

- 6.1. The holder of the EA must ensure effective access control on the site to reasonably prevent unauthorised entry. Signs indicating the risks involved in unauthorised entry must be displayed at each entrance.
- 6.2. Weather proof, durable and legible notices in at least three official languages applicable in the area must be displayed at each entrance to the Site. These notices must prohibit unauthorised entry and state the hours of operation, the name, address and telephone number of the holder of the EA and the person responsible for the operation of the site.

7. EMERGENCY PREPAREDNESS PLAN

- 7.1. The holder of the EA must maintain and implement an emergency preparedness plan and review it biennially when conducting audit and after each emergency and or major accident. The plan must, amongst others, include:
- 7.1.1. Site Fire
 - 7.1.2. Spillage
 - 7.1.3. Natural disasters such as floods
 - 7.1.4. Industrial action
 - 7.1.5. Contact details of police, ambulances and any emergency centre closer to the site.

7.2. The holder of EA must ensure that an up to date emergency register is kept during all phases of the operation. This register must be made available upon request by the department.

8. INVESTIGATIONS

8.1. If, in the opinion of the Competent Authority, nuisances or health risks may be or is occurring on the site, the holder of the EA must initiate an investigation into the cause of the problem or suspected problem.

8.2. If, in the opinion of the Competent Authority, pollution may be or is occurring, the holder of the EA must initiate an investigation into the cause of the problem or suspected problem. Such investigation must include the monitoring of the water quality variables, at those monitoring points and such frequency as may be specified by the Competent Authority.

8.3. Investigations carried out in terms of conditions 8.1 and 8.2 above must include the monitoring of the relevant environmental pollution, nuisance and health risk variables, at those monitoring points and such frequency to be determined in consultation with the Competent Authority.

8.4. Should the investigation carried out as per conditions 8.1 and 8.2 above reveal any unacceptable levels of pollution, the holder of the EA must submit mitigation measures to the satisfaction of the Competent Authority.

9. COMMISSIONING AND DECOMMISSIONING

9.1. The commissioning and decommissioning of individual activity within the overall listed mining activity must take place within the phases and timeframes as set out in EMP or EMPr.

10. SITE CLOSURE

10.1. The holder of EA must apply for a closure certificate in terms of Section 43 of Mineral and Petroleum Resources Development Act (Act 28 of 2002), as

amended within 180 days of occurrence of lapsing, abandonment, cancellation, cessation, relinquishment and completion of development.

- 10.2.** The application for closure indicated above must be submitted together with all relevant documents as indicated in Section 43 of Mineral and Petroleum Resources Development Act (Act 28 of 2002), as amended.
- 10.3.** No exotic plants may be used for rehabilitation purposes only indigenous plant can be utilized for rehabilitation purposes.
- 10.4.** The holder of EA remains responsible for any environmental liability, pollution or ecological degradation, the pumping and treatment of extraneous water, compliance with the conditions of EA and the management and sustainable closure thereof until the Minister has issued a Closure Certificate in terms of Section 43 of Mineral and Petroleum Resources Development Act (Act 28 of 2002). Where necessary the Minister may retain certain portion of financial provision for residual, health or environmental impacts that might be known in future.

11. NEMA PRINCIPLES

The NEMA Principles (set out in Section 2 of NEMA, which apply to the actions of all Organs of State, serve as guidelines by reference to which any Organ of State must exercise any function when taking any decision, and which must guide the interpretation, administration and implementation of any other law concerned with the protection or management of the environment), *inter alia*, provides for:

- the effects of decisions on all aspects of the environment to be taken into account;
- the consideration, assessment and evaluation of the social, economic and environmental impacts of activities (disadvantages and benefits), and for decisions to be appropriate in the light of such consideration and assessment;
- the co-ordination and harmonisation of policies, legislation and actions relating to the environment;

- the resolving of actual or potential conflicts of interest between Organs of State through conflict resolution procedures; and
- the selection of the best practicable environmental option.

12. DISCLAIMER

The Department of Mineral Resources in terms of the conditions of this environmental authorisation shall not be responsible for any damages or losses suffered by the holder, developer or his/her successor in any instance where construction or operation subsequent to construction is temporarily or permanently stopped for reasons of non-compliance with the conditions as set out herein or any other subsequent document or legal action emanating from this decision.

13. RECOMMENDATIONS

In view of the above, the NEMA principles, compliance with the conditions stipulated in this EA, and compliance with the EMP/closure plan, the competent authority is satisfied that the proposed listed activities will not conflict with the general objectives of Integrated Environmental Management stipulated in Chapter 5 of NEMA, and that any potentially detrimental environmental impacts resulting from the listed activities can be mitigated to acceptable levels. **The authorisation is accordingly granted.**

Your interest in the future of our environment is appreciated.

Kind Regards
