Electricity Supply to Seaview

Dear Sir

The Electricity and Energy directorate (E&E) has installed off grid PV systems on the individual informal structures in Seaview. This system provides a lighting and cell phone charging facilities to the informal homes.

It is understood that the Seaview area is in the process of being formalised i.e. formal housing structures will be built on demarked erven. The E&E will then install formal electrical services in these homes once construction has been completed.

Yours faithfully

MR PETER NEILSON
ACTING EXECUTIVE DIRECTOR
ELECTRICITY AND ENERGY
