Sir/Madam/Gentlemen/Ladies

RE: NOTICE OF AN APPLICATION FOR A MINING PERMIT FOR GOLD CONTEMPLATED IN SECTION 27 OF THE MINERAL AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002, COVERING A CERTAIN PORTION OF PORTION 4 OF THE FARM ZUIKERBOSCHFONTEIN 151 IQ, MAGISTERIAL DISTRICT OF KRUGERSDORP , SUBMITTED BY ELMA MINING CONSULTANTS CC (REG NO: 2005/163904/23)

The purpose of this notice, which is served in terms of section 27(4)(b) of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002), is to inform you/your concern, in your/its capacity as a possible affected party, that my client, namely **ELMA MINING CONSULTANTS CC (REG NO: 2005/163904/23)** submitted an application for a mining permit for gold contemplated in section 27 of the Mineral the said Act, 2002, situated within the prospecting area of Prospecting Right No 354/2006, held by the said Corporation and in respect of which it recently applied for renewal of same for another period of three years contemplated in section 18 of the said Act, covering a certain portion of Portion 4 of the farm Zuikerboschfontein 151 IQ, Magisterial District of Krugersdorp. In terms of the said Act the Corporation has the exclusive right to either apply for a mining permit in terms of section 27 or a mining right in terms of section 22 of the said Act. You/your concern is hereby invited to a public meeting on Monday 6 August 2012 at 17h00 at the Magaliesburg Hotel. The closing date for receiving your registration, comments, concerns and objections is 10 August 2012. The locality of the mining area is depicted on the Regulation 2(2) attached hereto). The sole land owner directly affected by the proposed mining venture is Goldkoppie (Pty) Ltd.

The opencast mining method (bench mining) will be applied. Blasting by means of explosives will be conducted, but will be outsourced to an outside consultant, which means that there will not be any explosives magazine on site. As the pit is not expected to be deeper than 20 metres vertically below surface, the water table is very unlikely to be intersected.

It is important to note that no beneficiation will take place on the mining area, but will take place elsewhere. This will minimise the environmental impacts dramatically.
