Re: Acceptance of hazardous waste at the Aloes HH disposal site

Dear Angela

As per my e-mail dated 22 October 2012, EnviroServ is awaiting our waste management license for the Aloes 2 extension, which will have an airspace capacity of approximately 19 years. Once the waste license has been received, we will then be able to go ahead with the construction of our new Aloes facility, which will have more than sufficient capacity to accept the types and volumes of hazardous waste you mentioned, namely used oil, chemical waste, and manganese mud.

Please contact the undersigned for any further information in this regard.

Yours faithfully

Susan Alcock
Operations Manager
