Deals with this matter

Our ref. 18/2/6/R

20 July 2017

Mr. A. Crouse
91 Bernard Road
Port Elizabeth
6070

Attention: Mr. A. Crouse

Request for electrical supply for Erf 4603, Despatch.

I refer to your Email (Despatch Erf 4603 - connection) Dated 18 July 2017.

I advise as follows:

I confirm that at this point in time a 1.718MVA electrical supply can be made available at a cost to be determined once the final layout, erven unit densities, capacities and exact locations of such supplies are confirmed in writing.

A substation will be required that the customer has to build according to Nelson Mandela Bay Municipality (NMBM) specification, at no cost to council and at a position preferred by NMBM. The developer or purchaser must obtain approval from the Executive Director: Electricity & Energy regarding the location of the substations, which must be accessible to municipal staff.

A 75% feasibility costing estimate of R 3 830 000.00 (Excl. Vat) has been determined for the availability of a new 1.718MVA, 11kV electrical connection including associated 11kV switchgear and metering equipment.

I trust that the above will assist you with this project but should you require any further information, please contact Mr R. Prinsloo at telephone number (041) 392-4497.

Yours faithfully

for **Acting Executive Director**
Electricity and Energy Directorate
