INTRODUCTION

Umlando was appointed by Tronox KZN Sands (Pty) Ltd to undertake the heritage management of the Fairbreeze mine during the operational phase. Part of the EMPR is that monthly surveys of the mine are undertaken regardless of progress of the mine.

RESULTS

Umlando undertook a survey on the 19 December 2017.

The mine had not progressed further in distance. A small section of had been cleared of vegetation and this was inspected north of TRON03. No artefacts were noted.

Amafa KZN Built Environment requested a photograph of the pipe attachments for the historical steel bridge. These photographs were taken and have been submitted to the relevant department. Figures 1 - 2 show these photographs.
