Appendix H: Announcement Letter for updated Scoping Reports

Appendix I: PowerPoint Presentation

Appendix J: Announcement Letter for the Draft EIA/EMPs

Appendix K: NFMD Petition

1 Introduction

The Public Participation Process (PPP) was developed to ensure compliance with environmental regulatory requirements and to provide Interested and Affected Parties (I&APs) with an opportunity to evaluate the proposed project. During this process stakeholders are able to provide inputs and to receive feedback from the environmental specialists and/or proponent.

The following applications were made to the Department of Mineral Resources (DMR) as competent authority for the proposed project:

- Mining Right amendment in terms of the Minerals and Petroleum Resource Development Act, 2002 (Act No. 28 of 2002) (MPRDA), Department of Mineral Resources;
- National Environmental Management Act, 1998; (Act No. 107 of 1998) (NEMA), Department of Mineral Resources; and
- National Environmental Management: Waste Act (Act No. 59 of 2008), as amended (NEM:WA), Department of Mineral Resources.

In addition, the following applications will be made to the relevant competent authorities:

- National Water Act, 1998 (Act 36 of 1998), as amended (NWA), Department of Water and Sanitation;
- National Heritage Resources Act, 1999 (Act No. 25 of 1999) (NHRA), South African Heritage Resources Agency;
- National Environmental Management: Air Quality Act, 2004 (Act No. 39 of 2004) (NEM:AQA), West Rand District Municipality;
- Spatial Planning and Land Use Management Act, 2013 (Act No 16 of 2013), Merafong City Local Municipality and Westonaria Local Municipality; and
- National Nuclear Regulator Act, 1999 (Act No 47 of 1999), National Nuclear Regulator.

The process is designed to provide I&APs with an opportunity to evaluate the proposed project, to provide the needed inputs and to receive feedback from the project team and/or proponent. As such, the PPP ensured early information availability and also enabled open dialogue with I&APs in an effort to understand I&APs concerns. This Public Participation (PP) report provides an overview of the PPP and describes what activities have been undertaken to date and includes next steps as part of the environmental regulatory process.

1.1 Public Participation Process Objectives

The PPP objectives for the environmental regulatory process have been set out below:

- To ensure that I&APs are informed about the proposed project;
- To provide I&APs opportunity to engage and provide comment on the proposed project;
- To draw on local knowledge by identifying environmental and social concerns associated with the proposed project;
- To involve I&APs in identifying methods in which concerns can be addressed;
- To verify that stakeholder comments have been accurately recorded; and
- To comply with the legal requirements.

As part of the PPP three (3) main phases of consultation with I&APs during the environmental regulatory process is detailed below:

1.1.1 Pre-scoping Phase

As part of the Pre-scoping Phase, the following main PP activities were undertaken:

- Identification of stakeholders;
- Provisioning of project information to I&APs;
- Consultation with I&APs; and
- Obtain comments, suggestions and concerns from I&APs.

1.1.2 Scoping Phase

As part of the Scoping Phase, the following main PP activities were undertaken:

- Distribution and placement of project announcement materials;
- Updating of the stakeholder database;
- Making the relevant environmental reports available for public comment;
- Provided I&APs with further details of the proposed project and associate specialist studies;
- Consultation with I&APs;
- Obtain further comments, suggestions and concerns from I&APs; and
- Inform specialists and the proponent of IA&P comments.

1.1.3 Impact Assessment Phase

During the Impact Assessment Phase the following main PP activities will be undertaken:

- Provide feedback about the specialist studies conducted and mitigation measures proposed by means of consultation with I&APs;
- Making the relevant environmental reports available for public comment;
- Consultation with I&APs;
- Provide opportunity for I&APs to comment on specialist findings, impacts assessments and recommendations;
- Verify that comments raised by I&APs have been accurately recorded; and
- Inform specialists and the proponent of IA&P comments.

1.1.4 Decision-making Phase

With completion of the Impact Assessment Phase process all registered I&APs will be notified of the decision made by the relevant competent authorities about the proposed project.

2 Methodology

The proposed methodology implemented for the PPP is in-line with the prescribed environmental regulatory requirements as described in the Introduction.

2.1 Pre-scoping Phase

2.1.1 Identification of Stakeholders

To ensure a proper representation of all stakeholders, the methods below were utilised to develop a comprehensive stakeholder database.

- Conduct Windeed searches for farm portions in and around the project site to verify land ownership and obtain contact details. A radius of approximately 5 km around the RTSF and 100 m buffer around infrastructure was used.
- Use of existing stakeholder databases available from SGL, Digby Wells and Gold Fields (this also incorporates previous EIA processes completed since end 2008);
- Desktop and online research;
- Stakeholder networking and discussions to source additional stakeholder details. This entailed telephonic discussions and meetings with landowners, Non-governmental Organisations (NGOs) and community representatives; and
- Site visits were also undertaken in an effort to identify landowners / occupiers to which no contact details could be obtained.

Stakeholders identified who are effected by or interested in the proposed project are grouped into the following broad categories:

- **Government:** National, Provincial, District and Local Authorities;
- **Parastatals:** Various semi-Government entities;
- **Landowners:** Directly or indirectly affected and adjacent;
- **Land occupiers:** Directly or indirectly affected and adjacent;
- **Communities:** Directly affected and adjacent communities;
- **Agriculture and Water:** Farmers associations, entities responsible for water management and/or regulation;
- **Non-Governmental Organisations (NGOs):** Environmental organisations, community-based organisations; and
- **Business and industry:** small to medium enterprises, mines, industrial and large business organisations.

A stakeholder database has been compiled in Maximizer 12 which will be updated throughout the environmental regulatory process with new stakeholder details (refer to **Appendix A**). Further details of the key stakeholder categories are provided below.

2.1.1.1 Government

Various Government entities were identified for the project of which the key ones are listed below:

- Department of Mineral Resources (DMR);
- Department of Water and Sanitation (DWS);
- Department of Environmental Affairs (DEA);
- Gauteng Department of Agriculture and Rural Development (GDARD);
- Department of Public Works (DPW);
- Department of Rural Development and Land Reform (DRDLR);
- Department of Agriculture, Forestry and Fisheries (DAFF);
- Department of Health (DOH);
- Department of Labour (DOL);
- Department of Social Development (DSD);
- National Nuclear Regulator (NNR);
- West Rand District Municipality (WRDM) (including the Section 80 Committee: Environmental Management);

- Mogale City Local Municipality (MCLM);
- Merafong Local Municipality (MLM);
- Westonaria Local Municipality (WLM); and
- City of Johannesburg Metropolitan Municipality (CJMM).

2.1.1.2 Landowners and/or Occupiers

Landowners and land occupiers are categorised in three categories namely:

- **Directly affected:** these are landowners / occupiers that reside within an application boundary area or who reside on a property(s) that will contain proposed project infrastructure;
- **Adjacent:** these landowners / occupiers are directly adjacent to an application boundary or property(s) that contains infrastructure. A 100 m buffer zone was used to identify relevant adjacent landowners / occupiers; and
- **Indirectly affected:** these landowners / occupiers are located beyond the 100 m buffer zone or have registered formally as I&APs.

Due to the vast geographical area covered by the proposed project, many of the landowners / occupiers fall within more than one category for example, a landowner (farmer) might own various properties within the project area and also occupy land owned by another entity (mine / industry) within the project area; making the farmer simultaneously a landowner and land occupier. As such, to categorise the exact number of directly affected, adjacent and indirectly affected landowners and/or occupiers would not be sufficiently accurate. However, a list of directly indirectly affected landowners is included as **Appendix A**.

2.1.1.3 Non-governmental Organisations

Although a number of NGOs, and specifically with an environmental focus, are included in the stakeholder database, the following are regarded as key environmental NGOs for the proposed project:

- Federation of Sustainable Environment;
- Endangered Wildlife Trust;
- Wildlife and Environment Society of South Africa.
- Earthlife Africa;
- Vaal Environmental Justice Alliance;
- Randfontein Environmental Forum; and
- Wonderfonteinspruit Forum.

Other prominent NGOs and Community-based Organisations include:

- South African National Civic Organisation;
- Toekomsrus Community Development Forum;
- ActionAid South;
- Great Westonaria Concerned Residents Association; and
- Women Affected by Mining United in Action.

2.1.1.4 Communities

Various communities are located within proximity of the project area. These include, but are not limited to, the following:

- Mohlakeng;
- Toekomsrus;
- Hillshaven;
- Glen Ridge;
- Bekkersdal;
- Simunye;
- Protea Glen; and
- The Village (including East and West).

The node of communities is located toward the north and eastern areas of the project area (see Plan 1). Within the identified communities there exists diversified political, demographic and socio-economic representation.

2.1.1.5 Business and Industry

Stakeholders associated under this sector of society predominantly comprise of mining companies and agriculture / farmers. The stakeholder database includes various companies from the following categories:

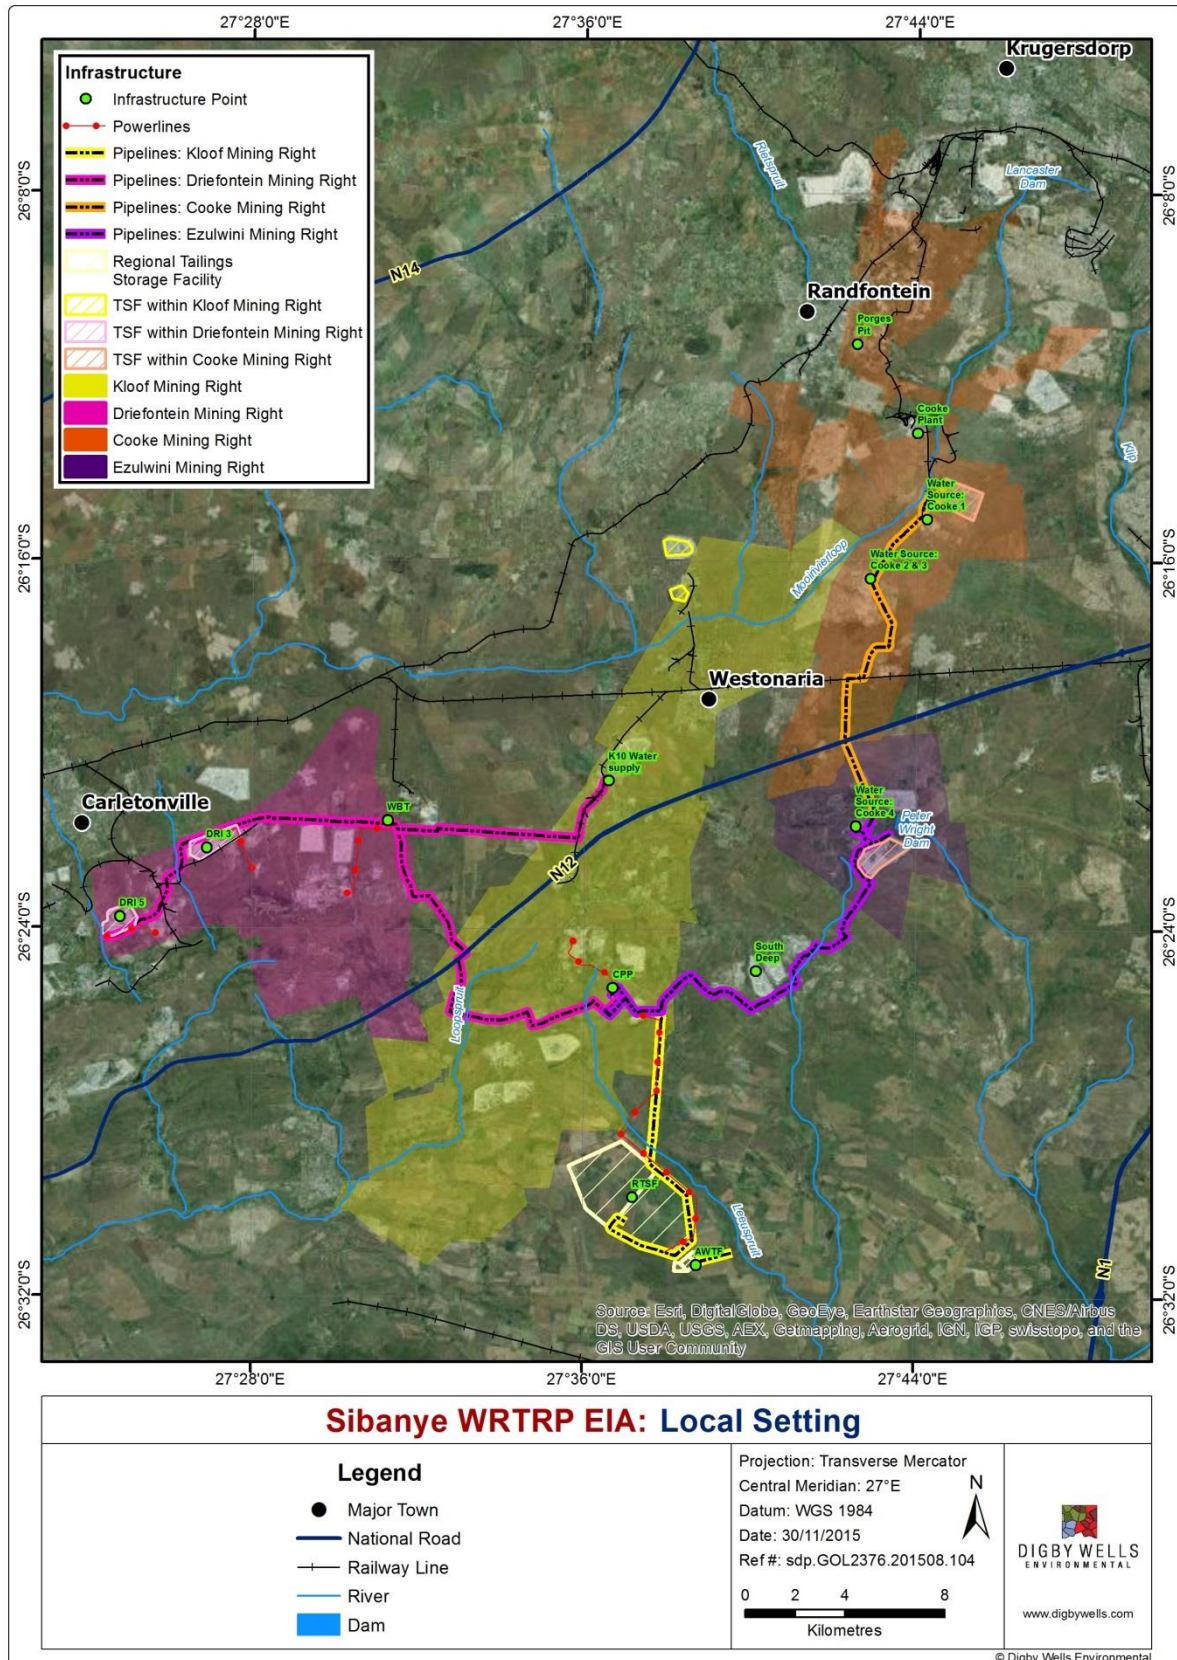

- Mining companies;
- Utility organisations;
- Agricultural holdings; and
- Construction and development.

2.1.2 Land Claimants

A formal enquiry, which contained all the directly and indirectly affected land portions for the project, was submitted via letter to Ms Rachel Masango of the Gauteng Department of Rural Development and Land Reform, Land Claims Commission, on Friday, 13 February 2015. Feedback was received by means of letter on Friday, 13 March 2015 which indicated that no existing land claims reside over the direct affected and adjacent land portions. Further correspondence were received from the land claims office on Monday, 3 August 2015 which also indicated that no existing land claims reside over the direct affected and adjacent land portions.

Correspondence was sent to Jennifer Moeti at the land claims office on 4 June 2015 and Monday 20 July 2015 with additional properties affected. Feedback was received by means of written correspondence on Monday, 3 August 2015 which indicated there is land claims on Driefontein 355-IQ Portion 15 (Merafong Local Municipality); Doornpoort 347 Portion 30, 29, 2, 37 (Westonaria Local Municipality) which reside over the direct affected and adjacent land portions.

Plan 1: WRTRP Local Setting

2.1.3 Information materials

Stakeholders were provided with project information as part of the engagement process which were distributed via email, post and hand delivery or presented at stakeholder meetings. An overview of each are detailed below.

- **Positioning document:** this document was the first piece of information distributed to stakeholders. It contained the project intension, a broad overview of the various components and highlighted project benefits.
- **Letters:** various letters were distributed to stakeholders and were mainly for invitations to meetings and providing brief details about the project and relevant contact details. Letter were also accompanied by meeting agendas where required.
- **Information pack:** the following documents were included as part of the pack:
 - *Project description document:* the project description provided details of the project intention, background and history, regional location by means of a map, various project components, reclamation process with individual components, next steps in the process and contact details. These details were depicted in the text format but also through visual illustrations; and
 - *Invitation letter with registration and comment form and agenda:* information sent to stakeholders via email was provided in print also.
- **Maps:** illustrative maps were displayed at the stakeholder meetings which provided context to the regional setting of the full project. A land tenure map was also made available at the landowners meeting.
- **Animation:** the animation is a dynamic representation of the reclamation process with its associated individual components and infrastructures.
- **Presentations:** the presentation used as part of the various stakeholder meetings varied. The presentation for meetings held in December 2014 included a map detailing the various project components and regional setting. Information contained in the presentations made to the Section 80 Committee were limited to project-only details due to time constraints and the content of the Application presentation included more refined content on the following:
 - Project history and motivation;
 - Overview of full project with various phases;
 - Regional locality of the full project;
 - Different infrastructure and process flow of reclamation;
 - Applicable legislation for the various licence applications;
 - List of specialist studies to be undertaken;
 - Timing of the environmental regulatory process; and

- Contacts details for Digby Wells and SGL Gold.

2.1.4 Consultation with I&APs

A summary of PP activities is provided in Table 1 and provides an overview of the various consultation methods already undertaken as part of the Pre-scoping Phase. Consultation with stakeholders was focussed on one-on-one and Focus Group meetings with authorities, landowners and NGOs.

The needed verbal translation has been and will continue to be given during the various stakeholder meetings. All comments raised by stakeholders during Pre-scoping Phase are captured in the Comment and Response Report (CRR). The CRR was shared with the various specialists to inform studies and their scope of work going forward (this process will continue throughout the EIA process). Responses to comments are provided in line with the overall project scope and available information.

Pre-scoping consultation was aimed at providing stakeholders with an overview of the WRTRP and to obtain comments which will inform specialist studies and project planning. This was one by means of a PowerPoint presentation and various maps. This consultation process was mainly driven by SGL, with support from Digby Wells. One-on-one and Focus Group meetings were held along with telephonic discussions. Engagement with the authorities also aimed to obtain an understanding of the regulatory requirements in lieu of the changes promulgated in December 2014. The table below details activities that formed part of the Pre-scoping Phase.

Table 1: Summary of PP activities during the Pre-scoping Phase

Activity	Details	Reference in PP Report
Pre-scoping Phase		
Identification of stakeholders	Stakeholders, with associated details, were identified by means of Windeed searches, available existing information, stakeholder networking and research for the compilation of a database.	Appendix A Stakeholder database
Identification of land claims	A request to identify potential land claims over affected land portions was submitted to the Development and Land Reform, Land Claims Commission on 13 February 2015 and feedback indicated there are no existing land claims thus far. Further feedback was received by means of written correspondence on Monday, 3 August 2015 which indicated there is land claims on Driefontein 355-IQ Portion 15 (Merafong Local Municipality); Doornpoort 347 Portion 30, 29, 2, 37 (Westonaria Local Municipality) which reside over the direct affected and adjacent land portions.	Appendix B Land claims letters

Activity	Details	Reference in PP Report
Development and distribution of information materials	Various material pieces were developed to be used as part of stakeholder meetings and for ad-hoc requests to provide project details.	Appendix C Pre-scoping information materials
Stakeholder meetings	<p>Meetings with stakeholders were arranged as one-on-one meetings and Focus Group meetings. These are listed below:</p> <ul style="list-style-type: none"> ▪ One-on-one Authorities Meetings <ul style="list-style-type: none"> ▪ Department of Water and Sanitation – 2 & 11 December 2014; ▪ National Nuclear Regulator – 2 December 2014; ▪ Department of Environmental Affairs – 2 December 2014; ▪ Gauteng Department of Agriculture and Rural Development – 3 & 11 December 2014 ; ▪ West Rand District Municipality – 3 December 2014; ▪ Department of Mineral Resources – 10 December 2014; ▪ Department of Water Affairs and Sanitation – 4 June 2015; ▪ Department of Mineral Resources – 13 July 2015; ▪ Section 80 Committee, West Rand District Municipality (Environmental Portfolio) – 3 February 2015 & 15 April 2015; ▪ Focus Group Meeting with Authorities – 16 April 2015; ▪ Focus Group Meeting with Landowners – 16 April 2015; and ▪ Focus Group Meeting with Environmental NGOs – 21 April 2015. <p>A high level overview of the full project was discussed and stakeholder inputs captured. All stakeholder comments have been responded to in the CRR.</p>	Appendix G Comment and Response Report

2.1.5 Consultation during the Scoping Phase

The aim of consultation during the Scoping Phase was centred on the formal EIA process, specialist impact studies and addressing stakeholder comments already submitted. A

combination of Focus Group and Open House meetings were prominent methods to facilitate stakeholder dialogue between the project team and landowners, authorities, NGOs and communities.

Extensive mobilisation was done for Authorities, NGOs, landowners / occupiers and community members / leaders in an effort to promote attendance at the various stakeholder meetings undertaken. This was done by means of telephonic discussions and distribution of emails for the Authorities, NGOs and landowners between two and three weeks prior to each meeting. For communities, physical consultation with councillors, community leaders and CBOs were undertaken for a period of approximately two weeks consecutively (done two weeks prior to the Open Houses).

All comments raised by stakeholders to date are captured in the Comment and Response Report (CRR) (**see Appendix G**). Stakeholder comments has been closely considered and addressed, where applicable, by the project team in order to ensure that the scope for specialist studies to be undertaken is well defined. Responses are provided to the comments raised by stakeholders and included in the CRR throughout the PPP.

During the Scoping Phase of the EIA process Focus Group Meetings were held with the local and provincial authorities and with the directly and indirectly affected landowners and the Environmental Organisations (NGOs). Open House meetings were also convened during this phase on Wednesday, 7 October 2015 at the Westonaria Banquet Hall; and on Thursday, 8 October 2015 at the Carletonville Community Hall. The project scope and anticipated impacts were shared with stakeholders in an informal and open forum. Also, various land tenure maps were available to stakeholder to view the locality of their properties / where they reside in relation to the various project components. This allowed for more detailed discussions with stakeholders which provided for more refined understanding about the proposed project and the current EIA process. More importantly, comments and concerns from stakeholders were obtained and through discussions, local knowledge have been gathered which will inform specialist studies.

The PowerPoint presentation used at the stakeholder meetings as undertaken is included under **Appendix I**. It is noted that the PowerPoint presentation was portrayed as an A3 and A2 poster set, displayed at the halls and used for informal discussions. At all the stakeholder meetings legislation reference materials, CDs containing the Scoping Report and comment sheets were made available. An infrastructure layout map was also available for stakeholders, and specifically landowners, to peruse.

The updated Scoping Reports were available to stakeholders on the Digby Wells website and in public places for a 21 day comment period and notification has been distributed to inform stakeholders. Stakeholders have had the opportunity to verify that their comments were captured and also to review responses provided by the project team.

It is noted that a petition (**see Appendix K**) was received from the No For Mega Dump (NFMD) on 14 December 2015 containing approximately 790 signatures and written comments. The comments are captured and have been responded to in the CRR.

2.1.6 Public Participation Materials

Considering the legislative requirements and good practice the following methods have been implemented to provision information to stakeholders about the proposed project (see Table 2 for further details). The various PP materials used during the Scoping phase have been included as appendices.

- **Background Information Document:** the BID provides a detailed description of the full WRTRP, regional setting map, EIA process, specialist studies to be undertaken, PP process and relevant contact details.
- **Newspaper advertisements:** a newspaper advert has been placed in various local newspapers veering the project area. The advert included a brief project description, information about the required legislation, the competent authorities and details of the appointed EAP.
- **Site notice:** similar to the BID, the site notice provides an overview of the project and highlights the applicable legislation for the EIA process. It also stipulates the competent authority, PP process and where relevant information can be obtained from. Site notices were placed at prominent places in and around the project area.
- **Letter with Registration and Comment Form:** a letter was sent which contained information about the proposed project, applicable legislation and competent authorities. A Registration and Comment Form was also provided for stakeholders to use for formal registration as I&APs or to submit comments.
- **Presentations:** a presentation was used as part of the various Focus Group meetings in October 2015 varied. As noted earlier, the PowerPoint was printed as a A3/A2 poster set and used at the two Open Houses. The following aspects were covered in the presentation below:
 - Company information;
 - Project history and motivation;
 - Project description (various project components) with locality infrastructure and land tenure maps;
 - Reclamation process;
 - RTSF site selection process details;
 - EIA process, legislation and applications;
 - Specialists studies (baseline information, potential impacts identified and plan of study); and
 - Public Participation Process and associated timeframes.

2.2 Public Participation activities summary

In Table 2 below PP activities that have been undertaken as part of the Scoping Phase are detailed.

Table 2: Summary of activities during Scoping Phase

Activity	Details	Reference in PP Report
Scoping Phase		
Update of stakeholder information	The stakeholder database has been updated with new I&APs who formally register, attend stakeholder meetings or submit comments.	Appendix A Stakeholder Database.
Distribution announcement materials	<p>A BID, announcement letter with registration and comment form was email and posted to stakeholders on <i>Tuesday, 1 September 2015</i>.</p> <p>An SMS to announce the project was sent to the full database on <i>Tuesday, 1 September 2015</i>.</p> <p>The Background Information Document was also available on (www.digbywells.com/en/public-documents/sibanye-gold-west-rand-tailings-retreatment-project/).</p> <p>The announcement letter also included information of the stakeholder meetings that will be held, where the Scoping Reports will be available for comment and the allowed public comment period.</p>	Appendix D BID, letter with registration and comment form
Placing of advertisements	<p>Advertisements were placed in the following newspapers:</p> <ul style="list-style-type: none"> ▪ Randfontein Herald (Local Newspaper), Friday 11 September 2015. ▪ Carletonville Herald (Local Newspaper), Thursday, 3 September 2015. ▪ Roodepoort Record (Local Newspaper), Friday, 4 September 2015 	Appendix E Advertisements
Placing of site notices	<p>Site notices were put up at various places within proposed project site, local libraries and publically accessible venues within close proximity of the project area from <i>Tuesday, 1 September 2015</i> – <i>Thursday, 3 September 2015</i>. These places are:</p> <ul style="list-style-type: none"> ▪ City of Johannesburg Metropolitan Library; ▪ Randfontein Public Library; ▪ Westonaria Public Library; ▪ Toekomsrus Public Library; 	Appendix F Site notice report and placement map

Activity	Details	Reference in PP Report
	<ul style="list-style-type: none"> ▪ Fochville Public Library; ▪ Carletonville Public Library; and ▪ Bekkersdal Public Library. <p>A site notice placement report and map has been developed, indicating the exact locations where site notices were placed, with photos and GPS coordinates.</p>	
Announcement of the Scoping Reports	<p>The announcement letter was emailed and posted to the full database on <i>1 September 2015</i> to:</p> <ul style="list-style-type: none"> ▪ Announce availability of the Scoping Reports; ▪ Share information of the Open House meetings; ▪ Where the Scoping Reports will be available for comment; and ▪ Public comment period. <p>The public comment was extended and announcement was done by means of a letter emailed and posted to stakeholders on 15 October 2015.</p> <p><i>SMSs to notify stakeholders that the Scoping Reports are available for comment and about the public comment period extension was sent to the full database.</i></p> <p>The Scoping Reports were available on the Digby Wells website: (www.digbywells.com/en/public-documents/sibanye-gold-west-rand-tailings-retreatment-project/).</p> <p><i>(Public comment period: 15 September to 15 October 2015, extended to 6 November 2015)</i></p>	<p>Appendix D Announcement letter for Scoping Reports</p>
Placement of Scoping Reports	<p>The Scoping Reports have been made available to stakeholders at the following public places:</p> <ul style="list-style-type: none"> ▪ City of Johannesburg Metropolitan Library; ▪ Randfontein Public Library; ▪ Westonaria Public Library; ▪ Toekomsrus Public Library; ▪ Fochville Public Library; ▪ Carletonville Public Library; and ▪ Bekkersdal Public Library. <p>The Scoping Reports were also available on the Digby Wells website: (www.digbywells.com/en/public-documents/sibanye-gold-west-rand-tailings-retreatment-project/).</p>	N/A

Activity	Details	Reference in PP Report
	retreatment-project/ and was available at the various stakeholder meetings.	
Focus Group Meetings	<p>The following Focus Group meetings were held during October and November 2015:</p> <ul style="list-style-type: none"> ▪ Authorities' site visit to key areas of the project was held on Tuesday, 6 October 2015 from 09:00 – 11:00. All the officials met at Lido Sand Works Conference venue and were accompanied from there by SGL and Digby Wells. A route and infrastructure map was also provided. The following authorities attended: DMR, DWS, NNR, WRDM and WLM) ▪ The site visit was followed by the formal Focus Group Meeting from 12:00 – 14:00 at the same venue; ▪ A Focus Group Meeting was held with landowners (occupiers and private) on Tuesday, 6 October from 16:00 – 19:00 at Lido Sand Works Conference venue; ▪ A Focus Group Meeting was held with NGOs and some very technical stakeholders on Tuesday, 13 October 2015 from 10:00 – 12:00 at Oaklands Inn, Randburg; and ▪ A smaller Focus Group with specific landowners (as per their request) close to the Doornpoort farm on 4 November 2015. This meeting was accompanied by SGL, Digby Wells and SLR (consulting engineers). 	<p>Appendix G Comment and Response Report</p> <p>Appendix I PowerPoint Presentation</p>
Open House Meetings	<p>Two Open House meetings were held with communities and all stakeholders scheduled between 15:00 – 19:00 on the following dates and venues:</p> <ul style="list-style-type: none"> ▪ Wednesday, 7 October 2015: Westonaria Banquet Hall; and ▪ Thursday, 8 October 2015: Carletonville Community Hall. 	<p>Appendix G Comment and Response Report</p>
Announcement of the updated Scoping Reports	<p>Announcement letter of availability of the updated Scoping Reports was emailed and posted to the full database on Tuesday 17 November 2015.</p> <p><i>An SMS to notify stakeholders that the updated Scoping Reports are available for comment was sent to the full database on Tuesday, 17 November</i></p>	<p>Appendix H Announcement Letter for updated Scoping Reports</p>

Activity	Details	Reference in PP Report
	<p>2015.</p> <p>These reports were available on (www.digbywells.com/en/public-documents/sibanye-gold-west-rand-tailings-retreatment-project/).</p> <p>(Public comment period: 17 November to 15 December 2015)</p>	
Placement of updated Scoping Reports	<p>The updated Scoping Reports include the amended CRR, which contains new stakeholder comments and responses, and the inclusion of new PP activities undertaken as part of the Scoping phase.</p> <p>The updated Scoping Reports were available on the Digby Wells website (www.digbywells.com/en/public-documents/sibanye-gold-west-rand-tailings-retreatment-project/).</p>	N/A
Impact Assessment Phase		
Announcement of Draft EIA/EMPs	<p>The announcement letter was emailed and posted to the full database on Friday, 22 January 2016 to:</p> <ul style="list-style-type: none"> ▪ Announce availability of the Draft EIA/EMPs and other Reports; ▪ Share information of the Open House meetings; ▪ Location of Draft EIA/EMPs availability; and ▪ Public comment period. <p><i>SMSs to notify stakeholders that the Draft EIA/EMPs are available for comment was sent to the full database on Friday, 22 January 2016.</i></p> <p>(Public comment period: 1 February to 2 March 2016)</p>	<p>Appendix J</p> <p>Announcement Letter for the Draft EIA/EMP Reports</p>
Placement of Draft EIA/EMP Reports	<p>The Draft EIA/EMPs are available to stakeholders at the following public places:</p> <ul style="list-style-type: none"> ▪ City of Johannesburg Metropolitan Library; ▪ Randfontein Public Library; ▪ Westonaria Public Library; ▪ Toekomsrus Public Library; ▪ Fochville Public Library; ▪ Carletonville Public Library; and ▪ Bekkersdal Public Library. <p>The Draft EIA/EMP will also be available on the</p>	N/A

	Digby Wells website: (www.digbywells.com/en/public-documents/sibanye-gold-west-rand-tailings-retreatment-project/) and will be available at the various stakeholder meetings.	
Focus Group Meetings	It is anticipated that various Focus Group Meetings will be held. Stakeholders will be informed of the various meetings via email and telephonic discussions. Additional methods of informing stakeholders of the meetings will be considered and implemented.	Appendix G Comment and Response Report
Open House Meetings	Two Open House Meetings will be held with all stakeholders, and specifically so communities, scheduled between 15:00 – 18:00 as follow: <ul style="list-style-type: none"> ▪ Wednesday, 17 February 2016: Westonaria Banquet Hall; and ▪ Thursday, 18 February 2016: Carletonville Community Hall. 	Appendix G Comment and Response Report
Obtaining comments from stakeholders	Comments, issues and suggestions received from stakeholders will be captured into the Comment and Response Report.	Appendix G Comment and Response Report

3 Stakeholder Comments

A summary of stakeholder comments received thus far is provided below in the Table 3.

Table 3: Summary of stakeholder comments

Category	Comments
Water	<ul style="list-style-type: none"> ▪ Concerns that surface and groundwater resources will be contaminated and water balances will be disturbed. ▪ Clarity required on where impacted water will be discharged to. ▪ Clarity required around where water will be sourced from used in the reclamation process.
Socio-economic	<ul style="list-style-type: none"> ▪ Requirement to provide training to surrounding communities and youth. ▪ Communities specifically requested to understand availability of possible employment opportunities and associated process to apply. ▪ Requirement for community and social investment to uplift existing living standards. ▪ Certain sectors of society, predominantly communities, is requesting for shareholding into the project.

Health and Safety	<ul style="list-style-type: none"> ▪ Negative health impacts, specifically respiratory, as a result of dust fallout. ▪ Safety concerns due to a potential influx of people.
Land Value / Ownership	<ul style="list-style-type: none"> ▪ Uncertainty around the landownership and land use post reclamation and rehabilitation. ▪ Request for the acquisition of farms affected by the proposed project.
Agriculture	<ul style="list-style-type: none"> ▪ Important and good agricultural land will be lost as a result of the RTSF.
Air quality	<ul style="list-style-type: none"> ▪ Concerns around the increase of dust from reclamation activities. ▪ Positive that remaining historical TSFs will be reclaimed and alleviate existing dust impacts.
Heritage	<ul style="list-style-type: none"> ▪ Various heritage areas need to be taken into consideration for specialist studies.
Visual	<ul style="list-style-type: none"> ▪ Visual impact from the RTSF will be negative and the “sense of place” will be lost as a result of the proposed project.
Ecology	<ul style="list-style-type: none"> ▪ Specific rare species will be negatively impacted by the proposed project e.g. Bullfrogs and Duikers.
Rehabilitation and Closure	<ul style="list-style-type: none"> ▪ Specific rehabilitation strategies are proposed in support of proper closure to be done post reclamation e.g. alternatives, liability, long term impacts, financial provisioning etc. ▪ Legislative requirements for rehabilitation and closure needs to be adhered to.
Radiology	<ul style="list-style-type: none"> ▪ The presence of uranium in soils, dust and water sources is a concern; it also affects agriculture. ▪ Communities surrounding TSFs are exposed to radiation and needs to be considered as part of the specialist studies. ▪ Uranium pathways need to be considered as part of specialist studies.
Roads and Transport	<ul style="list-style-type: none"> ▪ Machinery and/or trucks will impact roads negatively.
Environmental Impact Assessment	<ul style="list-style-type: none"> ▪ The various legislative requirements for licences need to be taken into consideration. ▪ Cumulative impacts will need to be considered as part of the studies and EIA Reports compiled.
Public Participation	<ul style="list-style-type: none"> ▪ Stakeholders from all sectors of society must be included as part of the EIA process. ▪ Stakeholders must be provided with a fair opportunity to provide comments.
Need and Desirability for the Project	<ul style="list-style-type: none"> ▪ The project is welcomed because of positive employment creation and economic growth for the West Rand area. ▪ Due to negative environmental and social impacts, the project is not supported.
