

- 2.5.1 Name of the holder (entity) of this EA
- 2.5.2 Name of the responsible person for this EA
- 2.5.3 Postal address of the holder;
- 2.5.4 Telephonic and fax details of the holder and
- 2.5.5 E-mail address of the holder if any.

3. COMMENCEMENT OF THE ACTIVITY (IES)

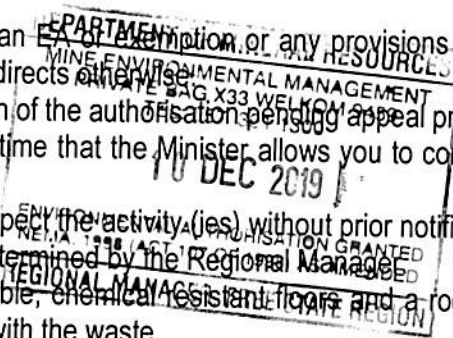

- 3.1 The site establishment and drilling must not exceed an area of 0.64ha per drill site.
- 3.2 All the mitigation matters to prevent negative environmental impacts must be implemented as per the BAR and EMPr.
- 3.3 No activity is to occur within wetlands and their 100m buffer zones, within rivers and their 100m buffer zones/ 1: 100 year flood line without the necessary authorization under NEMA and NWA.
- 3.4 Protected species must remain in situ until the necessary permits are obtained under NEM: BA.
- 3.5 Heritage sites and 50m buffer zones will be preserved at all times unless the necessary permits are obtained under SAHRA.
- 3.6 Heritage studies must be conducted by a specialist once prospecting sites are identified, before a specialist conduct heritage assessment the holder is permitted to commence with the non-invasive prospecting activities only. Invasive prospecting can commence after a heritage impact assessment has been conducted on the proposed sites.
- 3.7 In order to ensure safety, all employees must be given the necessary personnel protective equipment (PPE).
- 3.8 This EA must be provided to the site operator and the requirements thereof must be made fully known to him or her.
- 3.9 Access routes for prospecting vehicles and machinery must be clearly marked and appropriate signalling must be posted to that effect. Furthermore, movement of prospecting vehicles and machinery must be restricted to areas outside of the drainage line or wet areas.
- 3.10 Appropriate notification sign must be erected at the prospecting site, warning the public (residents, visitors etc.) about the hazard around the prospecting area and presence of heavy vehicles and machinery.
- 3.11 Prospecting and all related activities must be limited to daytime hours on Mondays to Saturdays and no work must be undertaken on Sundays as indicated in your report.
- 3.12 Noise abatement equipment such as mufflers on diesel engines must be maintained in good condition.
- 3.13 Prospecting must include design measures that allow surface and subsurface movement of water along the drainage lines so as not to impede natural surface and subsurface water flow, and drainage measures must promote the dissipation of storm water runoff.
- 3.14 Vegetation clearance is not permitted, and mitigation measures must be implemented to reduce the risk of erosion and alien species invasion.
- 3.15 The holder of the EA must note that in terms of the National Forest Act, 1998 (Act No.84 of 1998) protected plant species, also listed in must not be cut, disturbed, damaged, destroyed and their products must not be possessed, collected, removed, transported, exported, donated, purchased or sold unless permission is granted by the Department of Agriculture, Forestry and fisheries.
- 3.16 Construction of storage areas is not permitted onsite, topsoil and subsoil must be protected from contamination or pollution.
- 3.17 All prospecting activities must occur in the low flow season, during the drier months.
- 3.18 An active search for floral and faunal Species of Conservation Concern (SCC) must be conducted in areas where prospecting activities are planned prior to such activities taking place, the anticipated prospecting footprint along with all access roads and the immediate vicinity must be investigated.

- 3.19 Any activity proposed within the water courses and associated buffer zones, including rehabilitation must be authorized by the DWS in terms of section 21 (c) & (i) of the National Water Act, 1998 (Act 36 of 1998).
- 3.20 The prospecting activity foot print must fall outside the 1:100 year flood line of the watercourse or 100m from the edge of the feature, whichever distance is the greatest.
- 3.21 Prospecting activities must not take place on sensitive areas as indicated on the sensitivity map, the sensitivity map must be considered when selecting prospecting areas.
- 3.22 The construction of site camp is not permitted.
- 3.23 If any soil contamination is noted at any phase of the proposed activity (ies), the contaminated soil must be removed to a licensed waste disposal facility and the site must be rehabilitated to the satisfaction of the Department and Department of Water and Sanitation. The opportunity for the onsite remediation and re-use of contaminated soil must be investigated prior to the disposal and this Department must be informed in this regard.
- 3.24 An integrated waste management approach must be implemented that is based on waste minimization and must incorporate avoidance, reduction, recycling, treatment, reuse and disposal where appropriate. Uncontaminated rubble generated on the premises can be re-used as back filling material on site. Ensure that no refuse or rubble generated on the premises is placed, dumped or deposited on the adjacent properties or public places and open space.
- 3.25 In terms of sections 28 and 30 of NEMA, and sections 19 and 20 of the NWA, any costs incurred to remedy environmental damage must be borne by the person responsible for the damage. It is therefore imperative that the holder of the EA reads through and understand the legislative requirements pertaining to the project. It is the holder of EA responsibility to take reasonable measures which include informing and educating contractors and employees about environmental risks of their work and training them to operate in an environmentally acceptable manner.
- 3.26 Heritage remains be exposed during operation or any actions on the site, these must, immediately prospecting vehicle must be serviced and maintained in the manner whereby no excessive smokes are produced and noise production is reduced to acceptable levels, and to prevent oil leaks. Contaminated soil must be remediated on site or removed to an authorized landfill site.
- 3.27 Residents (if any) on the property (ies) and surrounding areas must be notified if any unusual noisy activities are planned.
- 3.28 Dust suppression measures must be implemented on all exposed surface to minimize and control airborne dust.
- 3.29 Mixing of cement, concrete, paints, solvent, sealants and adhesive must be done in specified areas on concrete aprons or on protected plastic linings to contain spillage or overflow onto soil to avoid contamination of underground water and environmental damage.
- 3.30 Maintenance and refuelling of machineries must be done at specified areas to minimize soil contamination.
- 3.31 Drilling muds must be contained in lined drill sumps, and the material must be removed from site and disposed in an environmental friendly manner.
- 3.32 Spill kit must be available on each site where prospecting activities will be taking place.
- 3.33 Should any be reported to the South African Heritage Resource Agency (SAHRA) and (in accordance with the applicable legislation). Heritage remains uncovered or disturbed during earthworks must not be further disturbed until the necessary approval has been obtained from SAHRA. The Department must also be informed about such exposure in writing. Heritage remains include: archaeological remains (including fossil bones and fossil shells); coins; middens, indigenous and/or colonial ceramics; any articles of value or antiquity; marine shell heaps; stone artefacts and bone remains; structures and other built features; rock art and rock engravings; shipwrecks; and graves or unmarked human burials. A qualified archaeologist must be contracted where necessary (at the expense of the applicant and in consultation with the relevant authority) to remove any human remains in accordance with the requirements of the relevant authority.
- 3.24 Hydraulic fluid or chemicals required during construction must be stored in a concrete lined surface with bund walls and shall be designed in such a manner that any spillage can be contained and reclaimed

DEPARTMENT OF MINERAL RESOURCES
 MINE ENVIRONMENTAL MANAGEMENT
 PRIVATE SITE X-BASE, KENNERLEY, 7459
 TEL: 057 391 1300
 16 DEC 2019
 ENVIRONMENTAL AUTHORISATION (GENERAL)
 (ACT 107 OF 1998) AS AMENDED
 REGIONAL MANAGER: FREE STATE REGION

without any impact on the surrounding environment. Should any spills occur it should be cleaned immediately by removing spillage together with the polluted solids and dispose it in the authorised disposal site permitted of such waste. The regional office of the Department of Water and Sanitation must be notified within 24 hours of an incident that may pollute surface and underground water resources.

- 3.25 Chemical sanitation facilities or system such as toilets that do not rely on the seepage of liquids must be provided with a ratio of 1 for every 15 workers. These must be placed such that they prevent spills or leaks to the environment and must be maintained according to the operating instructions and the content thereof must be disposed of at an authorised waste water treatment works.
- 3.26 The holder of EA must ensure that any water uses listed in terms of section 21 of National Water Act must get authorization from Department of Water and Sanitation prior to the commencement of such activity (ies).
- 3.27 This EA does not purport to absolve the holder of EA from its common law obligations towards the owner of the surface of land affected.
- 3.28 The holder of EA must ensure that rehabilitation of the disturbed areas caused by operation at all times comply with the approved EMPr.
- 3.29 This EA may be amended or withdrawn at any stage for non-compliance and provides no relief from the provisions of any other relevant statutory or contractual obligations.
- 3.30 The holder of EA must note that in terms section 43A of NEMA: WA, residue deposit and residue deposit must be deposited and managed in a prescribed manner on any site demarcated for that purpose in the Environmental Management Plan or EMPr. No person may temporary or permanently deposits residue stockpile or residue deposit on any area or site other than on site indicated on the Environmental Management Plan or EMPr.
- 3.31 The holder of EA must note that in terms section 20 of the NEMA: WA, no person may commence, undertake or conduct a waste management activity, except in accordance, with the requirements of norms and standards determined in terms of Section 19 (3) for that activity or a waste management license is issued in respect of that activity if license is required.
- 3.32 An appeal under Section 43 (7) of NEMA suspend an EA or exemption or any provisions of conditions attached hereto, or any directive unless the Minister directs otherwise.
- 3.33 Should you be notified by the Minister of a suspension of the authorisation pending appeal procedure, you may not commence with the activity (ies) until such time that the Minister allows you to commence with such activity (ies) in writing.
- 3.34 The Department reserves the right to audit and/or inspect the activity (ies) without prior notification at any reasonable time and at such frequency as may be determined by the Regional Manager.
- 3.35 The waste storage site must have a firm, impermeable, chemical resistant floors and a roof to prevent direct sunlight and rain water from getting in contact with the waste.
- 3.36 The storage of hydrocarbons must have bund walls with adequate capacity to contain the maximum volume that is stored in the area. Uncontaminated storm water must be prevented from coming into contact with the waste and must be diverted away from the storage site.
- 3.37 Subject to the commencement and duration requirements of the MPRDA and NEMA for the listed Prospecting activity is valid for the period for which the aforesaid Right is granted provided that this activity must commence within 10 years. If the commencement of the proposed activity does not occur within the specified period, the EA lapses and a new application for EA in terms of the NEMA and the EIA Regulations should be made for the activity to be undertaken.
- 3.38 This EA will only be effective on the event that a corresponding Permits or rights is issued in terms of MPRDA as amended and none of the activities listed in this EA may commence without permit.
- 3.39 The listed activity (ies), including site preparation, must not commence within 20 (twenty) calendar days of the date of the notification of the decision being sent to the registered I&APs. In the event that an appeal is lodged with the appeal administrator, the effect of this environmental authorisation is suspended until such time as the appeal is decided.

- 3.40 Should there be any conflicting conditions between this EA and other approval granted by other authorities, it is the EA holder's responsibility to bring it to the attention of the Department for resolution.
- 3.41 Should any Species of Conservation Concern (SCC) or other protected floral and faunal species be encountered within the study area, the following must be done
- ❖ If any threatened species will be disturbed, ensure effective relocation of individuals to suitable offset areas
 - ❖ Permit applications must be obtained from the relevant authorities where applicable; and
 - ❖ A suitable qualified specialist must oversee all rescue and relocation plans.

4. MANAGEMENT OF ACTIVITY (IES)

- 4.1 A copy of the EA and EMPr must be kept at the property or on site office where the activity (ies) will be undertaken. The EA and EMPr must be produced to any authorised officials of the Department who request to see it and must be made available for inspection by any employee or agent of the holder of the EA who works or undertakes work at the property (ies).
- 4.2 The content of the EMPr and its objectives must be made known to all contractors, subcontractors, agent and any other people working on the site, and any updates or amendments to the EMPr must be submitted to the Department for approval.
- 4.4 Regular monitoring and maintenance of storm water drainage facilities must be conducted at all times, if damaged as directed by the Department or any other relevant authority.
- 4.5 A buffer zone of 100 metres between the activity (ies) and the residential areas, cemeteries or burial grounds, Eskom power lines and the fuel pipe line must be clearly demarcated and maintained.
- 4.6 The holder of the EA must prevent nuisance conditions or health hazards, or the potential creation of nuisance conditions or health hazards.
- 4.7 The holder of the EA must ensure that all non-recyclable waste are disposed of at waste management facilities licenced to handle such wastes and all recyclable waste are collected by licenced waste management facilities for recycling, reuse or treatment.
- 4.8 All watercourses are off-limits to all prospecting vehicles and personnel
- 4.9 All sanitary facilities provided onsite must be emptied on a weekly basis and be maintained in a good hygienically condition.
- 4.10 No fire is permitted in or near the prospecting area
- 4.11 Alien and invasive vegetation control must take place throughout the duration of the prospecting activities
- 4.12 Alien species must be eradicated and controlled to prevent their spread beyond the footprint area.
- 4.13 Alien and weed species encountered within the footprint area must be removed to comply with the existing legislation (amendments to the regulations under the Conservation of Agricultural Resources Act, 1983 and section 28 of the National Environmental Management Act, 1996)
- 4.14 Collection of plant material for any purpose is prohibited.
- 4.15 No hunting or trapping of fauna is allowed.
- 4.16 Existing farm roads must be utilised, no new access roads must be established
- 4.17 All vehicles must be regularly inspected for leaks
- 4.18 Refuelling of vehicles and machineries must take place on a sealed surface area to prevent soil contamination.

- 4.19 The footprint of the activity (ies) must be limited on the areas authorised for the actual construction works and operational activities and all areas outside of the footprint must be regarded as a "no go" areas.
- 4.20 Erosion and soil loss must be prevented by minimizing the construction site exposed to surface water run-off. Where necessary erosion stabilizing action such as gabions or re-vegetation must be implemented to prevent further habitat deterioration.
- 4.21 The holder of the EA must ensure that all personnel who work with hazardous waste are trained to deal with these potential hazardous situations so as to minimize the risk involved. Records of training and verification of competence must be kept by the holder EA.
- 4.22 In order to prevent nuisance conditions, the holder of the EA must ensure that all storage skips and bins are not overfilled.
- 4.23 In the event of vehicle breakdown, maintenance must be done with care. Drip trays must be used to control oil spillages.
- 4.24 All oil spillages must be immediately cleaned up and treated accordingly.
- 4.25 Sheet runoff from access roads must be slowed down by the strategic placement of berms
- 4.26 The holder of the EA must ensure that all liquid wastes, whose emissions to water or land could cause pollution are diverted to sewer, after testing water quality and receiving written approval from the relevant local authority.
- 4.27 All alien vegetation in the vicinity of the study area should be removed regularly and reseeded with indigenous grasses and sedges throughout the life cycle of the of the prospecting activities
- 4.28 Non-compliance with any condition of this EA or EMPr may result in the issuing of a directive in terms of section 28 and or a compliance notice in terms of section 31L of NEMA.
- 4.29 Only listed activities that are expressly specified in the EMPr that forms part of this EA may be conducted, and additional or new activities not specified herein must be applied for by the holder and authorised by the competent authority in the form of an amendment to the aforesaid EMPr before such activities may be commenced with. This condition is also applicable in the case of the amendment, addition, substitution, correction, and removal or updating of any detail in the aforesaid EMPr.
- 4.30 Rehabilitation of the disturbed surface caused by operation at all times must comply with the approved EMPr.
- 4.31 Rehabilitation must be applied on an on-going basis and no sites must be left exposed for more time than necessary to obtain the necessary data.
- 4.32 The Holder of EA must ensure that the name and contact details of the ECO is made available to the Regional Manager within 30 days of commencement. The holder of EA must also ensure that an ECO is available on site to ensure that activity (ies) at all times comply with the issued EA and approved EMPr.
- 4.33 The ECO must:
- 4.33.1 Keep and maintain a detailed incidents register including any spillages of fuels, chemicals or any other material.
- 4.33.2 Keep a complaint register on site indicating the complaint and how the issues were addressed, what measures were taken and what the preventative measures were implemented to avoid re-occurrence of complaints.
- 4.33.3 Keep records relating to monitoring and auditing on site and avail them for inspection to any relevant authorised officials.
- 4.33.4 Keep copies of all environmental reports submitted to the Department.
- 4.33.5 Keep the records of all permits, licences and authorisations required by the operation.
- 4.33.6 Compile a monthly monitoring report and make it available to the Department if requested.
- 4.34 The duties and responsibility of the ECO should not be seen as exempting the holder of the EA from the legal obligations in terms of NEMA.

5. REPORTING TO THE DEPARTMENT

5.1 The holder of EA must:

- 5.1.1 Submit and Environmental Audit Report to this Department annually and such report must be done by qualified Environmental Assessment Practitioner and must the audit report must specify whether conditions of this environmental authorisation and EMPr are adhered to;
- 5.1.2 Identify and assess any new impacts and risks as a result of undertaking the activity/ies, if applicable;
- 5.1.3 Identify shortcomings in the EMPr , if applicable;
- 5.1.4 Identify the need, if any, for any changes to the management, avoidance and mitigation measures provided for in the EMPr/closure plan;
- 5.1.5 if applicable, specify that the corrective action/s taken for the previous audit's non-conformities, was adequate;
- 5.1.6 Specify the name of the auditor and
- 5.1.7 Be submitted by the holder to the competent authority within 30 days from the date on which the auditor finalised the audit.

5.2 Should any shortcomings in terms of regulation 34(4) of the EIA Regulations be identified, the holder must submit recommendation to amend the EMPr in order to rectify any shortcomings identified with the aforementioned audit report.

5.3 Any complaint received from the I&AP during all phases of the operation must be attended to as soon as possible and addressed to the satisfaction of all concerned interested and affected parties.

5.4 The holder of the EA must annually assess the environmental liabilities of the operation as contemplated in the Financial Provisioning Regulations, 2015 and address the shortfall on the financial provision submitted in terms of section 24P of NEMA.

5.5 The holder of the EA must, within 24 hours of incidents occurring, notify the Competent Authority of the occurrence or detection of any incident on the site, or incidental to the operation of the site, which has the potential to cause, or has caused pollution of the environment, health risks, nuisance conditions or water pollution.

5.6 The holder of the EA must, within 14 days, or a shorter period of time, if specified by the Competent Authority from the occurrence or detection of any incident referred to in condition 5.5, submit an action plan, which must include a detailed time schedule, and resource allocation signed off by top management, to the satisfaction of the Competent Authority of measures taken to –

5.6.1.1 Correct the impact resulting from the incident;

5.6.1.2 Prevent the incident from causing any further impact; and

5.6.1.3 Prevent a recurrence of a similar incident.

5.7 In the event that measures have not been implemented within 21 days of the incident referred to in condition 5.6, or measures which have been implemented are inadequate, the Competent Authority may implement the necessary measures at the cost of the holder of the EA.

6. SITE SECURITY AND ACCESS CONTROL

- 6.1 The holder of the EA must ensure effective access control on the site to reasonably prevent unauthorised entry. Signs indicating the risks involved in unauthorised entry must be displayed at each entrance.
- 6.2 Weather proof, durable and legible notices in at least three official languages applicable in the area must be displayed at each entrance to the Site. These notices must prohibit unauthorised entry and state the hours of operation, the name, address and telephone number of the holder of the EA and the person responsible for the operation of the site.

7. EMERGENCY PREPAREDNESS PLAN

7.1 The holder of the EA must maintain and implement an emergency preparedness plan and review it biennially when conducting audit and after each emergency and or major accident. The plan must, amongst others, include:

- 7.1.1 Site Fire
- 7.1.3 Spillage
- 7.1.3 Natural disasters such as floods
- 7.1.4 Industrial action

7.1.5 Contact details of police, ambulances and any emergency centre closer to the site.

7.2 The holder of EA must ensure that an up to date emergency register is kept during all phases of the operation. This register must be made available upon request by the department.

8. INVESTIGATIONS

- 8.1 If, in the opinion of the Competent Authority, nuisances or health risks may be or is occurring on the site, the holder of the EA must initiate an investigation into the cause of the problem or suspected problem.
- 8.2 If, in the opinion of the Competent Authority, pollution may be or is occurring, the holder of the EA must initiate an investigation into the cause of the problem or suspected problem. Such investigation must include the monitoring of the water quality variables, at those monitoring points and such frequency as may be specified by the Competent Authority.
- 8.3 Investigations carried out in terms of conditions 8.1 and 8.2 above must include the monitoring of the relevant environmental pollution, nuisance and health risk variables, at those monitoring points and such frequency to be determined in consultation with the Competent Authority.
- 8.4 Should the investigation carried out as per conditions 8.1 and 8.2 above reveal any unacceptable levels of pollution, the holder of the EA must submit mitigation measures to the satisfaction of the Competent Authority.

9. COMMISSIONING AND DECOMMISSIONING

- 9.1 The commissioning and decommissioning of individual activity within the overall listed prospecting activity must take place within the phases and timeframes as set out in EMPr.

10. SITE CLOSURE

- 10.1 The holder of EA must apply for a closure certificate in terms of section 43 of the MPRDA within 180 days of occurrence of lapsing, abandonment, cancellation, cessation, relinquishment and completion of development.
- 10.1.1 The application for closure indicated above must be submitted together with all relevant documents as indicated in section 43 of the MPRDA.
- 10.1.2 Vegetation growth must be retained around the proposed prospecting areas to protect the soil
- 10.1.3 No exotic plants may be used for rehabilitation purposes only indigenous plant can be utilized for rehabilitation purposes.
- 10.1.4 The holder of EA remains responsible for any environmental liability, pollution or ecological degradation, the pumping and treatment of extraneous water, compliance with the conditions of EA and the management and sustainable closure thereof until the Minister has issued a closure certificate in terms of Section 43 of the MPRDA. Where necessary the Minister may retain certain portion of financial provision for residual, health or environmental impacts that might be known in future.
- 10.1.5 The following must also be implemented as per the EIAR and EMPr:
- 10.1.5.1 Removal of infrastructures (drill rig, mobile diesel tank, mobile water tank and chemical toilet).
- 10.1.5.2 Capping boreholes as per legal requirements.
- 10.1.5.3 Ensure that no foreign matter is left behind on the drill site.
- 10.1.5.4 Refilling the sump required for the drilling activities, the plastic lining will be removed and disposed of in a registered landfill site and the soil returned for rehabilitation purposes.
- 10.1.5.5 The drill sites will be inspected for any signs of hydrocarbon pollution.
- 10.1.5.6 Any identified soil polluted will be removed and disposed of in an environmental friendly manner.
- 10.1.5.7 Any area compacted as a result of the drilling will be ripped and any ruts created by accessing or leaving the site for the drilling activity will be filled in to prevent erosion.
- 10.1.5.8 Re-vegetation in the affected areas, and
- 10.1.5.9 The applicable land owners will be requested to inspect the rehabilitated sites.

DEPARTMENT OF MINERAL RESOURCES
MINE ENVIRONMENTAL MANAGEMENT
PO BOX 33 WELKOM 9459
TEL: 057 391 1300

13 DEC 2015

ENVIRONMENTAL AUTHORISATION GRANTED
NEMA, 1996 (ACT 107 OF 1996) AS AMENDED
REGIONAL MANAGER: FREE STATE REGION

11. NEMA PRINCIPLES

The NEMA Principles (set out in Section 2 of NEMA, which apply to the actions of all organs of state) serve as guidelines by reference to which any organs of state must exercise any function when taking any decision, and which must guide the interpretation, administration and implementation of any other law concerned with the protection or management of the environment), *inter alia*, provides for:

- the effects of decisions on all aspects of the environment to be taken into account;

- the consideration, assessment and evaluation of the social, economic and environmental impacts of activities (disadvantages and benefits), and for decisions to be appropriate in the light of such consideration and assessment;
- the co-ordination and harmonisation of policies, legislation and actions relating to the environment;
- the resolving of actual or potential conflicts of interest between organs of state through conflict resolution procedures; and
- the selection of the best practicable environmental option.

12. DISCLAIMER

The Department, in terms of the conditions of this environmental authorisation shall not be responsible for any damages or losses suffered by the holder, developer or his/her successor in any instance where construction or operation subsequent to construction is temporarily or permanently stopped for reasons of non-compliance with the conditions as set out herein or any other subsequent document or legal action emanating from this decision.

13. RECOMMENDATIONS

In view of the above, the NEMA principles, compliance with the conditions stipulated in this EA, and compliance with the EMPr, the competent authority is satisfied that the proposed listed activity/ies will not conflict with the general objectives of Integrated Environmental Management stipulated in chapter 5 of NEMA, and that any potentially detrimental environmental impacts resulting from the listed activity/ies can be mitigated to acceptable levels. The authorisation is accordingly **granted**.

Your interest in the future of our environment is appreciated.

Yours Faithfully

.....
K. KEWUTI
ACTING REGIONAL MANAGER: MINERAL REGULATION
FREE STATE REGION
 DATE 10/12/2019.....
