Attention: Mr Gavin Anderson

Dear Sir

PROPOSED IN-SITU HOUSING PROJECTS WITHIN HERITAGE SENSATIVE AREAS

Reference is made to the proposed Mbono Rural Housing Development, Dukuza Rural Housing Development and to the Umzumbe Cluster A Rural Housing Development.

The proposed rural housing projects are in-situ, which means that the development will take place within the footprint of the existing households. There will be no disturbances of any graves or areas of heritage importance as the beneficiaries will indicate where graves are placed.

Furthermore, we as K2M Environmental will conduct the ECO duties for these projects during the construction phase. It should be noted that the trenches will not exceed 1.5m in depth. Should any graves or heritage artefacts be unearthed, all construction activities will be ceased and AMAFA KZN will be contacted.

Should you require any further information, please contact the undersigned.

Yours faithfully

Ms. Simitha Bechan
