

## To whom it may concern

It has come to our attention that proposed mining licences have been applied for on the farms of Colin Stirk and Peter Keeton.

We would like to note that we are vehemently opposed to these applications. We run a hunting lodge and reserve on a neighbouring farm and the impact on the ecology as well as our business would be devastating. We cannot begin to list the ecological damage that would be done, not to mention that no overseas visitors would be willing to visit a game farm located next to a mining site. Which in turn would destroy our business and livelihood as well as being detrimental to the tourism industry of the Eastern Cape.

The above is just the beginning of our concerns and once again assert that we are totally opposed to these applications.

Yours faithfully
