PROJECT TITLE

Proposed Incinerator Replacement, Grahamstown, Eastern Cape.

PROJECT DESCRIPTION

The existing incinerator is used for incinerating waste at the Grahamstown Veterinary Laboratory but it is not currently in use as the chimney needs to be replaced due to holes caused by rust. The existing incinerator is more than 30 years old and as a result has become unserviceable. One of the main objectives of the proposed incinerator upgrade is to ensure that the facility complies with the relevant waste legislation.

The Grahamstown Veterinary Laboratory generates organic waste during the conduct of diagnostic and analytical testing of specimen of animal origin. Organic waste, which includes animal carcasses and tissue samples, is disposed of through incineration. Carcasses and animal tissue from private veterinary practices, the SPCA and Rhodes University are also incinerated at this Laboratory. The incineration process is carried out by placing the material in the incinerator, adding diesel and igniting the diesel using an electrical burner. There are two 2,200-liter diesel tanks with high bund walls adjacent to the incinerator. Incineration is usually conducted once a week and carcasses are kept in a cold room until enough material has been gathered for incineration. The resulting ash is placed in containers and will be collected and disposed of via a contractor (e.g. Compass Medical Waste Services) or taken to a suitable waste landfill facility. All other medical wastes, such as petri dishes and sharps, are also collected and disposed of by the approved service provider.

Kindly note that:

1. This application form is current as of 01 April 2014. It is the responsibility of the applicant to ascertain whether subsequent versions of the form have been published or produced by the competent authority.
 2. The application must be typed within the spaces provided in the form. The sizes of the spaces provided are not necessarily indicative of the amount of information to be provided. Spaces are provided in tabular format and will extend automatically when each space is filled with typing.
 3. Where applicable **black out** the boxes that are not applicable in the form.
 4. Incomplete applications may be returned to the applicant for revision.
 5. The use of the phrase "not applicable" in the form must be done with circumspection. Should it be done in respect of material information required by the competent authority for assessing the application, it may result in the rejection of the application as provided for in the Regulations.
 6. This application must be handed in at the offices of the relevant competent authority as determined by the Act and regulations.
 7. Unless protected by law, all information filled in on this application will become public information on receipt by the competent authority. Any interested and affected party should be provided with the information contained in this application on request, during any stage of the application process.
 8. Should a specialist report or report on a specialised process be submitted at any stage for any part of this application, the terms of reference for such report must also be submitted.
 9. The payment of a fee for the processing of environmental impact assessment applications in terms of sections 24(5)(c), 24M and 44 the National Environmental Management Act, 1998 (Act No. 107 of 1998) ("NEMA") will be applicable from July 2012.

2. ACTIVITIES APPLIED FOR TO BE AUTHORISED

2.1 For an application for authorisation that involves more than one listed or specified activity that, together, make up one development proposal, all the listed activities pertaining to this application must be indicated.

Indicate the number and date of the relevant notice:	Activity No (s) (in terms of the relevant notice) :	Describe each listed activity as per project description:	Process indicated by regulations (Scoping or Basic Assessment)
GNR 921 (2013)	Item 7 (Category A)	The incinerator is used for incinerating waste at the Grahamstown State Veterinary Laboratory. Waste that is being incinerated includes organic waste generated during diagnostic and analytical testing of specimens of animal origin and involves mostly animal carcasses and tissue samples. The nature of the waste incinerated can be classified as hazardous and although the current daily throughput of the incinerator is approximately 100 - 300 kg/day, the facility has the capacity to incinerate up to 900 kg/day.	Basic Assessment

Please note that any authorisation that may result from this application will only cover activities specifically applied for.

2.2 Please indicate what process will be followed:

Basic assessment: **Yes**

S&EIR: **No**

2.3 Attach permission to upgrade/downgrade if requested and obtained

Attention: Mr Lucas Mahlangu

Dear Mr Mahlangu,

INCINERATOR REPLACEMENTS – FINANCIAL PROVISIONS

The Department of Rural Development & Agrarian Reform proposes to replace three ageing incinerators with new incinerators of the same capacity at their State Veterinary Laboratories in Queenstown, Grahamstown and Middelburg, Eastern Cape.

The department of Rural Development and Agrarian Reform is committed to the replacement of the incinerators as soon as the specifications are made known. The manufacturers of the incinerators will provide the estimate costs in line with the specifications of the Air Emission licenses which are still to be obtained. Due procurement processes will be followed.

The department will also make provision for Environmental Monitoring after installation in accordance with conditions and fixed tariffs once the constructions is completed from the Department of Environmental affairs or their accredited monitoring agents.
