

APPENDIX C2
SITE NOTICES AND NEWSPAPER ADVERTISEMENTS

SITE NOTICES

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT AND PUBLIC PARTICIPATION PROCESSES

18MW HARMONY JOEL SOLAR PV FACILITY, THEUNISSEN, FREE STATE PROVINCE

Applicant: Free Gold Harmony (Pty) Ltd

Activity: Development of the Harmony Joel Solar PV Facility, grid connection and other associated infrastructure, with a contracted capacity of up to 18MW. The on-site infrastructure includes:

- » PV modules and mounting structures
- » Inverters and transformers a SCADA room, and maintenance room
- » Cabling between the project components, to be laid underground where practical
- » Access roads, internal roads and fencing around the development area.
- » Temporary and permanent laydown areas and O&M buildings.
- » Overhead Power Lines (OHPL)
- » Grid connection solution which will tie-in to Shafts 1 & 2 HJ Joel Mining (6.6/132 kV), via a 1.2km South West overhead line with a capacity of 44 kV.

Project Location: North East of the Harmony Joel operations, approximately ~20km north east of the town of Theunissen within the Masilonyana Local Municipality and within the Lejweleputswa District Municipality, Free State Province. The PV facility is located on Portion 0 of the Farm Leeuwbult 580, over 36ha in extent.

Environmental Assessment Process: Separate applications for Environmental Authorisation in terms of the National Environmental Management Act (No. 107 of 1998) and the Environmental Assessment Regulations, 2014, as amended, (GNR 326) are required to be submitted for the project. This application is being supported by a separate Scoping and Environmental Impact Assessment process. Savannah Environmental is undertaking the required environmental assessment and public participation process for the project. An application will be lodged with the Department of Small Business Development, Tourism and Environmental (DESTE), as the competent authority.

Public Participation Process: Savannah Environmental (Pty) Ltd has been appointed as the environmental consultant responsible for undertaking the Scoping Assessment and Public Participation process in support of the application for EA. To obtain further information on the project and to register on the project database, please submit your name, contact information and interest in the project, in writing, to:

Nicolene Venter at Savannah Environmental

P.O. Box 148, Sunninghill, 2157

August 2022

This notice is **not** for **job applications** but rather an opportunity to **register/comment** on the project.
Should you know of any **vulnerable person** that needs to be informed of and be part of this proposed project, please contact us.

PROOF OF SITE NOTICES (Date placed: 18 August 2022)

ADVERTISEMENTS

NOTICE OF ENVIRONMENTAL IMPACT ASSESMENT AND PUBLIC PARTICIPATION PROCESS

HARMONY JOEL SOLAR PV FACILITY, THEUNISSEN, FREE STATE PROVINCE

Applicant: Freegold Harmony (Pty) Ltd

Activity: The development of a solar photovoltaic (PV) facility with a generating capacity of up to 18MW and associated infrastructure, including:

- » PV modules and mounting structures.
- » Inverters and transformers a SCADA room, and maintenance room.
- » Cabling between the project components, to be laid underground where practical.
- » Access roads, internal roads and fencing around the development area.
- » Temporary and permanent laydown areas.
- » Grid connection infrastructure including an on-site facility substation and a switching substation which will tie-in to Shafts 1 & 2 HJ Joel Mining via a power line.

Project Location: ~20km north east of the town of Theunissen within the Masilonyana Local Municipality and within the Lejweleputswa District Municipality, Free State Province. The PV facility is located on the Remainder of the Farm Leeuwbult 580 and is owned by the Mine.

Scoping & Environmental Impact Assessment (S&EIA) Processes: In terms of Sections 24 & 24D of the National Environmental Management Act (No 107 of 1998), as read with Government Notice R324 – R327, as amended, a S&EIA process is required, and Savannah Environmental is undertaking the required S&EIA and public participation process for this project.

Scoping Report available for Review & Comment: The Scoping Report is available for review and comment and can be downloaded from the Savannah Environmental website (savannahsa.com/public-documents/energy-generation/). The 30-day review and comment period of the Scoping Report is from **14 November 2022 to 14 December 2022**.

SLAAN 3 KEER IN 10 DAE TOE

Diewe teiken Bfn-substasie

Marietjie Gericke

'n Dik elektriese kabel is drie keer in tien dae by die Vierperdewa-mini-substasie in Pellissier, Bloemfontein, gesteel. Dit het veroorsaak dat 'n groot aantal huise elke keer vir bykans 24 uur sonder krag was.

So lyk die elektrisiteitskabel van 64 m lank wat al drie keer in Pellissier gesteel is. Foto: VERSKAF

Die DA-raadslid Rossouw Botes het elke keer saam met Centlec, elektrisiteitsverskaffer van die Mangaung-metromunisipaliteit, gewerk om die probleem op te los.

Botes moes ook bontstaan om vrae van die inwoners te beantwoord. "Omdat die inwoners reeds onder beurtkrag ly, is die bykomende ongerief bykans ondraaglik," sê hy.

Dit is 'n simptoom van 'n groter kwessie. "Met hoër werkloosheid in Mangaung, stygende kospryse, en munisipale wanbestuur, word die inwoners die slagoffers van diegene wat gedwing word om alternatiewe werk te soek," sê Botes.

Goeie regering, laer kospryse en oorhoofse ekonomiese groei is die enigste antwoord om onnodige skade in gemeenskappe te voorkom, sê hy.

Die kabel wat vervang moes word, is 64 m lank en die koste was telkens sowat R110 000. Dit word maar net weer van die belastingbetalers verhaal.

Botes sê die kabeldiefstal wys dat mense die werk dophou. Net nadat dit die eerste keer vervang en herstel is, is

dit weer 'n keer gesteel. Die algehele koste van die drie diefstalle is sowat R330 000.

"Die omliggende bome is nou skoon gesny sodat Centlec 'n spreiklig kon monteer op een van die straatligte wat direk op die mini-substasie skyn. Van die sekerheidsfirmas patrolleer ook die gebied meer gereeld."

Botes was beïndruk deur die wyse waarop Centlec die hele saak hanteer en 'n span uitgestuur het om telkens die kabel te vervang. Baie personeellede het ook saam beraadslaag oor hoe die probleem opgelos kan word.

"Van die sekerheidsfirmas in die omgewing het ook aangebied om meer gereeld daar 'n draai te maak."

Botes sê die diefstalle het tussen 31 Oktober en 9 No-

vember voorgekom. Dit moes diewe gewees het wat weet wat hulle doen.

Die substasies word gesluit, maar deure word oopgebreek. Botes sê nadat die kragkabel by die substasie ontkoppel is, word 'n gat 'n ent verder in die grond gegrawe om die kabel daar af te kap en uit die grond te haal.

"Die vermoede is dat bakkes gebruik word om die kabel uit die grond uit te trek omdat dit baie swaar is en nie sommer deur mense self gedoen kan word nie. Die kables word stuk vir stuk weggegrê."

Lele Mamutu, woordvoerder van Centlec, het by navraag gesê dat kabeldiefstal 'n enorme probleem vir Centlec is en dat die entiteit se skade jaarliks om en by R50 miljoen in dié verband beloop.

Polisie stel veldtog teen misdaad in Koffiefontein bekend 5 jaar ná moord op lede

Alet van der Walt

Die veldtog vir 'n veiliger Kerstyd is spesiaal in Koffiefontein bekend gestel om mense daaraan te herinner dat die polisie steeds op soek is na die moordenaars van twee polisielede van die dorp.

Dit was Vrydag die boodskap van lt.genl. Baile Motswenyane,

Vrystaatse polisiekommissaris, toe die polisie dié provinsie se jaarlikse veldtog vir 'n veiliger Kerstyd op die Dithakeng-sportterrein van stapel gestuur het.

Die tema van vanjaar se veldtog is "meer voete op die grond om sigbare polisiëring uit te lig en te verbeter".

TJ Sebeela, voorsitter van Kof-

fiefontein se gemeenskapspoliëeringsforum (GPF), het in sy spreekbeurt aan die polisie gesê die gemeenskap sal die polisie in sy stryd teen misdaad bystaan.

Sebeela het egter by Motswenyane gepleit om korrupsie in die polisie uit te roei omdat dit die beeld van die polisie skaad.

Sebeela het die gemeenskap ge-

vra om met die GPF saam te werk om 'n einde aan gendergeweld te bring.

Op 29 Junie 2017 is konstabels Obert Mekoa en Mzonani Majo by die polisiekantoor doodgeskiet en die vuurwapens van een van hulle is geroof.

Niemand is nog weens dié moorde aangekeer nie.

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT AND PUBLIC PARTICIPATION PROCESSES

HARMONY GOLD PHASE 2 RENEWABLE ENERGY FACILITIES PROJECTS, FREE STATE PROVINCE

Proposed Activity:

Harmony Gold Mining Company (Ltd) is looking to supplement its energy supply by implementing PV generation, aiding their transition to a more sustainable and environmentally friendly energy mix through the construction and operation of 3 solar PV facilities located on 3 different Harmony Gold Mine sites within the Free State Province. The project entails the development of three (3) separate solar PV facilities, each including grid connection and other associated infrastructure.

Details Of Projects in the Free State Province:

- » Freegold Harmony (Pty) Ltd (a subsidiary of Harmony Gold Mining Company Ltd) aims to develop the Harmony One Plant Solar PV Facility which is located on the Remaining Extent of the Farm Marmageli 20 and Remaining Extent of the Farm Welkom 80, near Welkom, within the Matjhabeng Local Municipality and Lejweleputswa District Municipality. The PV facility will have a generation capacity of up to 30MW and will tie into the Brand Gold Substation via a 2km power line.
- » Freegold Harmony (Pty) Ltd (a subsidiary of Harmony Gold Mining Company Ltd) aims to develop the Harmony Joel Solar PV Facility located on portion 0 of the Farm Leeuwbult 580, near Theunissen, within the Matjhabeng Local Municipality, and the Lejweleputswa District Municipality. The PV facility will have a generation capacity of up to 18MW and will Tie-in to Shafts 1 & 2 HJ Joel Mining Substation, via a 1.2km power line.
- » Avgold (Pty) Ltd (a subsidiary of Harmony Gold Mining Company Ltd) aims to develop the Harmony Target Solar PV Facility, located on portion 0 of Farm Kromdraai 386, near Allanridge, within the Matjhabeng Local Municipality, and the Lejweleputswa District Municipality. The PV facility will have a generation capacity of up to 30MW and will Tie-in to the Avgold Substation via a 2km power line.

The onsite infrastructure for all sites includes:

- » PV modules and mounting structures.
- » Inverters and transformers a SCADA room, and maintenance room.
- » Cabling between the project components, to be laid underground where practical.
- » Access roads, internal roads and fencing around the development area.
- » Temporary and permanent laydown areas and O&M buildings.
- » Grid connection solution which will facility substation, switching station and an overhead power line.

Each renewable energy facility will be constructed as a separate stand-alone project and therefore a separate Scoping and Environmental Impact Assessment (S&EIA) process is being undertaken for each facility. The public participation process for the projects is being run concurrently.

Environmental Impact Assessment Processes: In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with Government Notice R324 – R327, as amended, an EIA process is required for each renewable energy facility. Savannah Environmental is undertaking the required EIA, and public participation processes for these projects. A Background Information Document (BID) providing further information on the projects is available on the Savannah Environmental website at <https://savannahsa.com/public-documents/energy-generation>.

Scoping Reports available for review & comment: The Scoping Report for each project is available for download, review & comment from the Savannah Environmental website. The 30-day review & comment period for the Scoping Reports is from **24 August 2022** to **23 September 2022**. The final day for written comment to be submitted is **23 September 2022**.

To obtain further information and register on the project database and submit comments or queries, please refer to the contact information:

environmental

SLUITING IN SA:

Zwelinzima Vavi, hoofsekretaris van Saftu

Optog in Bloemfontein
Vakbondede sal om 07:00 by die Batho-lokasiesaal bymekaarkom en vanaf 10:00 na die premier se kantoor in die O.R. Tambo-gebou stap.

Dís waar vakbonde vandag marsjeer

William Horne

Vakverbonde en hul lede beplan om die land vandag met hul afwesigheid tot stilstand te bring, maar sommiges gaan ook die strate invaar.

Die vakverbond Saftu gaan saam met sy mededinger Cosatu in ses provinsies marsjeer en optogte reël.

Zwelinzima Vavi, hoofsekretaris van Saftu, het egter Maandag op 'n mediakonferensie in Johannesburg beklemtoon hul lede sal nie in massas byeenkom nie omdat die werklike doel van die dag is om die ekonomie te strem en die mag van die werkersklas te illustreer.

Die optogte is dus meer 'n bykomende seremoniële optrede tot die wegby-aksie.

Ontwrigting kan egter steeds plaasvind nadat albei vakverbonde hul lede opge-ru het oor die "kapitaliste"

se "aanslag" op die werkersklas wat hulle "woedend behoort te maak".

Vavi se mees onheilspelelende uitlating was egter dat die twee vakverbonde mik om die uitvoerende gesag van die regering deur hul massa-aksieplan te "ont-troon".

Pres. Cyril Ramaphosa en sy kabinet is dus die teiken. Dr. Theuns Eloff, onafhanklike kommentator, reken dié dreigement dra nie meer dieselfde gewig as wat dit in vorige jare sou gedra het nie.

Volgens hom is die drie-party-alliansie nie meer so belangrik as wat dit voorheen was nie.

"Cosatu self het nie meer die miljoene lede wat hy voorheen gehad het nie. Sy mag is 'n fraksie van wat dit was," het Eloff verduidelik.

In daardie opsig is dit vir

hom duidelik wat eintlik aangaan.

"Cosatu en Saftu het gedoen wat mode is: Vir Cyril (Ramaphosa) te kap in 'n desperate poging om lede te werf en hul magsgreep te herstel."

Eloff reken dit is meer 'n noodkreet van die vakverbonde as 'n behoorlike poging om sy gelede onder die wapen te roep.

Tog sit wetstoepassings-agentskappe oorgehaal om ontwrigting hok te slaan.

Maar oor die poging om die uitvoerende gesag te ont-troon is Eloff nie te bekomerd nie. "Dit gaan heel waarskynlik misluk."

Waar gaan Saftu marsjeer?
In Bloemfontein gaan Saftu vanaf die Batho Lokasiesaal in Mangaung tot by die kantoor van die premier in die O.R. Tambo-gebou stap.

Daar sal ook in vyf ander provinsies, naamlik Gauteng, die Wes-Kaap, Limpopo, Mpumalanga en die Oos-Kaap, optogte wees.

Saftu het beklemtoon dat net tot 1 000 lede per stad sal deelneem. Maar met die vakverbonde se beroep op selfs werklodse om deel te neem, kan dit dalk meer word.

Sanparke het reeds aangedui dat voortydige en opportunistiese optogte rondom die Krugerwildtuin begin kop uitsteek het en reisigers moontlik in gevaar kan stel.

"Daarom kan die situasie dalk eskaleer," het Sanparke op Facebook gesê.

Dit is veral die Numbi-hek, die Paul Kruger-hek en die Phabeni-hek wat geraak word.

Sanparke raai reisigers aan om baie versigtig te wees en ten minste verdragings te vermag.

Weerkundiges afgedank ná 'misleidende' weervoorspelling

Twee van Hongarye se topweerkundiges is afgedank weens 'n onakkurate weervoorspelling wat 'n opbare herrie veroorsaak het.

Die BBC berig die weerdieners het Saterdag, slegs ure voor die reusviering vir St. Stephen's-dag, streng weerwaarskuwings uitgereik wat gelei het tot die regering se besluit om die vieringe die aand uit te stel.

Die weerstoestand op die nasionale vakansiedag het egter kalm en matig gebly, wat gevolglik daartoe gelei het dat die land se weerhoof, Kornelia Radics, en adjunkhoof, Gyula Horvath, in die

pad gesteeke is.

Meer as 40 000 vuurwerk is voorberei om Saterdagmiddag om 240 punte langs die Donau-rivier in Budapest afgevuur te word vir 'n skouspel wat deur meer as 2 miljoen mense aanskou sou word.

Volgens *The Guardian* het die weerdieners donderstorms en stormsterk windde voorspel, maar dié storms het die hoofstad gemis.

Die weerdieners het Sondag om verskoning gevra vir die voorspelling en dit toegeskryf aan die onvoorspelbaarheid wat deel is van die beroep.

AFP berig die opposisie het aange-

dring dat die byeenkomste rondom die vakansiedag gekanselleer word en dit as 'n "nuttelose mors van geld" bestempel. Hulle sê verder dit is onnodig om die uitgawes aan te gaan terwyl die land se ekonomie gebuk gaan onder die nagevolge van die oorlog tussen Rusland en Oekraïne.

Die weerkantoor is landwyd gekritiseer vir sy glips-voorspelling.

In 2006 het 'n storm tydens die vieringe tot die dood van vyf mense gelei en honderde is beseer.

Vanjaar se skouspel is tot later die week uitgestel.

The PV facility will have a generation capacity of up to 30MW and will tie-in to the Avgold Substation via a 2km power line.
- Avgold (Pty) Ltd (a subsidiary of Harmony Gold Mining Company Ltd) aims to develop the Harmony Target Solar PV Facility, located on portion 0 of Farm Kromdraai 386, near Allanridge, within the Matjhabeng Local Municipality and the Lejweleputswa District Municipality. The PV facility will have a generation capacity of up to 30MW and will tie-in to the Avgold Substation via a 2km power line.

The onsite infrastructure for all sites includes:

- PV modules and mounting structures;
- Inverters and transformers a SCADA room, and maintenance room;
- Cabling between the project components, to be laid underground where practical;
- Access roads, internal roads and fencing around the development area;
- Temporary and permanent laydown areas and O&M buildings;
- Grid connection solution which will facility substation, switching station and an overhead power line.

Each renewable energy facility will be constructed as a separate stand-alone project and therefore a separate Scoping and Environmental Impact Assessment (SEIA) process is being undertaken for each facility. The public participation process for the projects is being run concurrently.

Environmental Impact Assessment Processes: In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with Government Notice R324 – R327, as amended, an EIA process is required for each renewable energy facility. Savannah Environmental is undertaking the required EIA, and public participation processes for these projects. A Background Information Document (BID) providing further information on the projects is available on the Savannah Environmental website at <https://savannahsa.com/public-documents/energy-generation>.

Scoping Reports available for review & comment: The Scoping Report for each project is available for download, review & comment from the Savannah Environmental website. The 30-day review & comment period for the Scoping Reports is from 24 August 2022 to 23 September 2022. The final day for written comment to be submitted is 23 September 2022.

To obtain further information and register on the project database and submit comments or queries, please refer to the contact information:
