To whom it may concern

RE: NOTICE OF APPLICATIONS IN TERMS OF SECTION 27 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS OF 2014.

CP Concrete (Pty) Ltd intends to apply for a mining permit to mine 4.9 ha of a portion of Portion 3 of Klaas Voogds Rivier 37, Robertson, Western Cape Province.

SITE DESCRIPTION

Portion 3 of Klaas Voogds Rivier 37, Robertson, Western Cape Province is situated approximately 12 km east of Robertson and 10 km north west from Ashton. The area earmarked for the proposed mining falls on a section of the farm previously used for vegetable farming purposes. The GPS coordinates of the proposed mining is as follows:

<ul style="list-style-type: none"> ■ A 33,797653°S; 20,016437°E ■ B 33,798153°S; 20,017637°E ■ C 33,800661°S; 20,015956°E ■ D 33,80005°S; 20,014148°E ■ A 33,797653°S; 20,016437°E 	<ul style="list-style-type: none"> ■ A 33°47'51,551"S; 20°0'59,173"E ■ B 33°47'53,351"S; 20°1'3,493"E ■ C 33°48'2,38"S; 20°0'57,442"E ■ D 33°48'0,18"S; 20°0'50,933"E ■ A 33°47'51,551"S; 20°0'59,173"E

LEGAL COMPLIANCE

An application for a mining permit in terms of Section 27 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) will be submitted to the Department of Mineral Resources.

The proposed project triggers the following listed activities in terms of the National Environmental Management Act, 1998 (Act 107 of 1998) and the Environmental Impact Assessment Regulations as amended 2014 and therefore requires a basic assessment process to obtain environmental authorisation:

- GNR 983 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 21:

Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, 2002 (act No. 28 of 2002), including associated infrastructure, structures and earthworks directly related to the extraction of a mineral resource, including

the goal isn't to live forever, it is to protect a planet that will

BACKGROUND INFORMATION DOCUMENT

activities for which an exemption has been issued in terms of section 106 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002).

- **GNR 983 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 22:**
The decommissioning of any activity requiring a closure certificate in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002).
- **GNR 983 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 28:**
Commercial developments where such land was used for agriculture or afforestation on or after 01 April 1998 and where such development (ii) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare.

PROJECT DESCRIPTION

CP Concrete (Pty) Ltd identified a stockpile area on Portion 3 of Klaas Voogds Rivier 37, Robertson, Western Cape Province and intends to remove the stone / rocks, stockpiled by Altus Malherbe Familie Trust, and sell as a mineral to clients.

The proposed area from which CP Concrete Pty Ltd will remove the stockpiled stone aggregate is 4.9 ha in extent. The stone aggregate will be loaded with an excavator onto trucks that will transport it to the clients. No washing, screening or crushing will be needed. The applicant intends to sell stone aggregate from the mining area for at least three years with a possibility of a two year extension.

THE MINING ACTIVITIES WILL CONSIST OF THE FOLLOWING:

- Stripping and stockpiling of topsoil
- Stockpiling of stone aggregate
- Loading and transportation of mineral to clients
- Sloping and landscaping upon closure of the site
- Replacing the topsoil and vegetating the disturbed area

THE MINING SITE WILL CONTAIN THE FOLLOWING:

- Excavation Equipment
- ADT trucks
- Chemical toilet to be used by employees

BACKGROUND INFORMATION DOCUMENT

DUST:

- ▀ Speed on the access road will be limited to 40km/h to prevent the generation of excess dust.
- ▀ Roads will be sprayed with water or an environmentally friendly dust-allaying agent that contains no PCB's (e.g. DAS products) if dust is generated above acceptable limits.

NOISE:

- ▀ It will be ensured that employees and staff conduct themselves in an acceptable manner while on site.
- ▀ All mining vehicles will be equipped with silencers and maintained in a road worthy condition in terms of the Road Transport Act.

ACCESS ROUTE:

- ▀ The existing farm road to the area will be used to provide the applicant with access,

SURFACE AND GROUND WATER:

- ▀ The proposed activities are not expected to have a negative impact on any surface and ground water of the area.
- ▀ The Martienskloof River borders the proposed mining area approximately 120m to the east.
- ▀ Two storage dams are located 100m to the east and north east of the stockpile area.

VEGETATION

- ▀ The site earmarked for the proposed mining activity has previously been used for crop farming purposes.
- ▀ No red data or protected plants could be identified in the proposed footprint area of the mining area.

GEOLOGY & SOILS

- ▀ Clays and loams mostly derived from Bokkeveld and some Witteberg Group shales as well as Porterville Formation phyllite shale of the Malmesbury Group (Namibian Erathem) in the northwest. Glenrosa and Mispah forms are dominant. Land types mainly Fb, Fa and Ic.

BACKGROUND INFORMATION DOCUMENT

CLIMATE

- MAP 210 – 610 mm (mean 370 mm), peaking from May to August. Mean daily maximum and minimum temperatures 29.3°C and 4.8°C for February and July, respectively. Frost incidence 3 – 8 days per year.

SENSITIVE LANDSCAPES

- No sensitive landscapes under statutory protection occur on the site.

SITES OF ARCHAEOLOGICAL AND CULTURAL INTEREST

- No sites of archaeological or cultural importance were identified during the site inspection as the site has been extensively used for agricultural purposes.

FAUNA:

- The fauna at the site will not be impacted by the proposed mining activity as they will be able to move away or through the site, without being harmed. Workers should be educated and managed to ensure that no fauna at the site is harmed.

VISUAL EXPOSURE:

- The mining area was identified to constitute the lowest possible visual impact on the surrounding environment. The surrounding area has previously been disturbed by agricultural activities, and this application entails the mechanical winning of gravel from the area. No quarry pit with high walls will be created that will negatively impact on the visual exposure of the area.
- The mining area will not be visible from any public road or area.
- The applicant should however ensure that housekeeping is managed to standard, as this will mitigate the visual impacts during the operational phase of the mine.
- Upon closure the site will be rehabilitated and sloped to insure that the visual impact on the aesthetic value of the area is kept to a minimum.
- The site will have a neat appearance and be kept in good condition at all times.

BACKGROUND INFORMATION DOCUMENT

ABLUTION, WASTE WATER & WASTE DISPOSAL:

- Ablution facilities will consist of chemical toilets hired from a contractor and serviced regularly.
- Any effluents containing oil, grease or other industrial substances will be collected in a suitable receptacle and removed from the site, either for resale or for appropriate disposal at a recognised facility.
- Spills will be cleaned up immediately to the satisfaction of the Regional Manager by removing the spillage together with the polluted soil and by disposing of them at a recognised facility.
- Non-biodegradable refuse such as glass bottles, plastic bags, metal scrap, etc., will be stored in a container at a collecting point and collected on a regular basis and disposed of at a recognised landfill site.
- Biodegradable refuse generated will be handled as indicated above.
- No waste will be burned or buried on site.

FINAL REHABILITATION:

- Rehabilitation of the surface area shall entail landscaping, levelling, top dressing, land preparation, seeding (if required), and weed / alien clearing.
- All infrastructures, equipment, and other items used during the mining period will be removed from the site (section 44 of the MPRDA).
- Waste material of any description, including receptacles, scrap, rubble and tyres, will be removed entirely from the mining area and disposed of at a recognized landfill facility. It will not be permitted to be buried or burned on the site.
- Weed / alien clearing will be done in a sporadic manner during the life of the mining activities. Species regarded as Category 1 weeds according to CARA (Conservation of Agricultural Recourses Act, 1983 – Act 43; Regulations 15 & 16 (as amended in March 2001) need to be eradicated from the site on final closure.
- Final rehabilitation shall be completed within a period specified by the Regional Manager.

CP Concrete Pty Ltd will make use of temporary infrastructure during the mining operations. Workers will be transported to and from the site daily.

BACKGROUND INFORMATION DOCUMENT

PUBLIC INVOLVEMENT

This document is to inform you about the proposed activity and to determine whether there are any concerns or objections from interested and affected parties (I&AP's) that need to be considered.

As interested and affected party you are kindly requested to complete the comments form and give any comment/concern or input with regard to the current land use of the area, the environment as well as socio-economic conditions that you feel might be affected by the proposed activity. When submitting response please provide suggestions to mitigate the anticipated impact of each identified activity.

Please contact Sonette Smit at the contact details as presented in the letterhead or at sonette.s@greenmined.co.za through any means should you need more information, have concerns or comments that need to be considered or if you want to be registered as an interested and/or affected party and would like to receive a copy of the Draft Basic Assessment Report (DBAR) on or before **7 September 2015**. If we do not receive any comments from you within 30 days of receipt of this notice, it will be accepted that you do not have any objections/comments with regard to the project.

A register of interested and affected parties (I&AP's) will be opened and maintained containing the names, contact details and address of all persons who have submitted written comments, attended meetings or have in writing requested to be registered and all organs of state which have jurisdiction in respect of the activity. Please note that only registered I&AP's and stakeholders will be entitled to comment on reports and plans to be submitted to the Department provided that the party provide its name, contact details and address and discloses any direct business, financial, personal or other interest which he/she may have in the approval or refusal of the applications.

The DBAR will be submitted to the Department of Mineral Resources – WC for review purposes. This report will also be made available to the public for a 30 days review period. An electronic copy of the report will be published on the Greenmined Environmental website (www.greenmined.com).

The DBAR will then be updated to reflect the comments received during the public commenting period. Upon which, the final basic assessment report (FBAR) will be submitted to the DMR for its consideration as part of the authorization process in terms of the NEMA regulation. A copy of the final report will be made available on the Greenmined Environmental website (www.greenmined.com). All registered I&AP's and stakeholders will be notified in writing within 14 days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal.
