

## The KwaZulu-Natal Amafa and Research Institute

---

**Attention: Captain Memela**

**Organisation: Newlands SAPS**

**Topic: Newlands Remains on Inanda Road, opposite Narainsamy Temple**

---

This hereby confirms that the remains found by the Mdubane company while expanding the Inanda road is in fact not human remains. The remains were identified as Faunal (animal) in class Bovid 3 ( cow size).

The company was informed to halt work near the faunal remains and appoint a heritage practitioner to monitor the process to ensure that no human remains, or archaeological material of importance will be damaged.

Kind Regards

Sumeri Uys
