File Ref. Rhino Notification Letter\_291 ER KZN

16 October 2015

**ATTENTION: LAND OWNER/STAKEHOLDER**

Dear Sir/Madam

**NOTICE OF APPLICATION FOR ENVIRONMENTAL AUTHORISATION IN SUPPORT OF AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

Please be informed that Rhino Oil and Gas Exploration South Africa (Pty) Ltd has lodged an application for an **exploration right** to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act, 2002. Rhino Oil and Gas proposes to undertake early-phase exploration for oil and gas which may be located underground within suitable geological strata. The purpose is to determine the presence of a petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, seismic surveys and the drilling of less than 10 core boreholes for determining stratigraphy. No hydraulic fracturing or fracking is proposed.

Rhino Oil and Gas is required to make an application for **environmental authorisation** of the exploration activities in terms of Chapter 5 of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). The application must be subject to a scoping and environmental impact assessment process as stipulated in the EIA Regulations (GNR 982, 8 December 2014).

SLR Consulting (South Africa) (Pty) Ltd are appointed as independent environmental consultants responsible for the public participation and environmental assessment required to inform a decision on the environmental authorisation. As part of the initial phase of this work we are distributing information to as many interested or affected parties as possible. Through various resources we have obtained contact details for owners of land and potential stakeholders. We continue to acquire such details. The project is being advertised in local newspapers and through notices placed in towns within the area.

Our information leads us to believe that you may be an owner or occupier of land within the exploration right application area or a stakeholder with interest in the application. We would thus like to notify you of the application and provide you with introductory information on the proposed exploration project. The Background Information Document explains the proposed project, outlines the application process and includes a map and the names of all farms included in the application area.

Please register with the public participation office should you be an interested or affected party. You must register if you wish to participate in the environmental assessment process for the project.

Please also pass this document on to any other persons whom you know reside in or near to the exploration right application area. We welcome any comment or questions.

Please take note of the following public meeting schedule:

Date and Time	Venue
Monday 2 Nov at 09h30	Ashburton Public Hall
Monday 2 Nov at 14h30	Richmond Agricultural Hall
Tuesday 3 Nov at 09h30	Imvunolu Secondary School
Tuesday 3 Nov at 14h30	Lions River Polo Club
Wednesday 4 Nov at 09h30	Colenso Public Hall
Wednesday 4 Nov at 14h30	Mooi River Country Club
Thursday 5 Nov at 09h30	New Hanover Public Hall
Thursday 5 Nov at 14h30	Greytown Lodge Conference Hall
Friday 6 Nov at 09h30	Mthembu Community Hall
Friday 6 Nov at 14h30	V.A Makhoba Hall
Saturday 7 Nov at 09h30	Nkandla Public Hall

Yours faithfully

**Matthew Hemming**

MSc (Conservation Biology)

Environmental Assessment Practitioner

# Rhino Oil and Gas Exploration South Africa (Pty) Ltd

## BACKGROUND INFORMATION ON PROPOSED PETROLEUM EXPLORATION ON VARIOUS FARMS IN KWAZULU-NATAL (291 ER)

October 2015

### INTRODUCTION

Rhino Oil and Gas Exploration South Africa (Pty) Ltd has lodged an application for an exploration right with the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act, 28 of 2002 (MPRDA). Minerals included in the application are oil, gas, condensate, coal bed methane, helium and biogenic gas. The exploration area is broad and encompasses large parts of the central KwaZulu-Natal (see Figure 1).

Rhino Oil and Gas intends to undertake early-phase petroleum exploration, focussing on identifying oil and gas resources which may be located within suitable geological strata. The purpose is to determine the presence of a petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, seismic surveys and the drilling of less than 10 core boreholes. No hydraulic fracturing or fracking is proposed for this exploration.

### ENVIRONMENTAL AUTHORISATION PROCESS

Prior to the granting of an Exploration Right for the proposed project an environmental assessment process must be conducted and approved by PASA in terms of the National Environmental Management Act, 107 of 1998 (NEMA). Rhino Oil and Gas will make an application to PASA for environmental authorisation. The 2014 Environmental Impact Assessment Regulations (GN R982 promulgated in terms of NEMA) are applicable as the application for an exploration right is activity 18 in Listing Notice 2 (GN R984). The EIA Regulations define the assessment process which includes: a scoping phase, environmental impact assessment (EIA) phase and an environmental management programme (EMPr). Public participation is a key component of the environmental assessment process.

SLR Consulting (Africa) (Pty) Ltd (SLR), an independent firm of environmental consultants, has been appointed by Rhino Oil and Gas Exploration South Africa (Pty) Ltd to manage the environmental assessment process. This document has been prepared by SLR to inform you about:

- \* the application and proposed project activities;
- \* the environmental assessment process to be followed;
- \* SLR's understanding of the possible environmental impacts; and
- \* how you can have input into the environmental assessment.

### PROJECT SUMMARY

**Application:** Environmental Authorisation for an Exploration Right in terms of Section 79 of the MPRDA.

**Target Minerals:** oil, gas, condensate, coal bed methane, helium and biogenic gas.

**Locality:** central KwaZulu-Natal. See Figure.

**Properties in the ER:** ~10 000 farms and portions, see list in Appendix 1.

#### **PASA reference number(291 ER)**

Please ensure that this reference number is included on all correspondence.

The following public scoping meetings have been arranged, the details are as follows:

Date and Time	Venue
Monday 2 Nov at 09h30	Ashburton Public Hall
Monday 2 Nov at 14h30	Richmond Agricultural Hall
Tuesday 3 Nov at 09h30	Imvunolu Secondary School
Tuesday 3 Nov at 14h30	Lions River Polo Club
Wednesday 4 Nov at 09h30	Colenso Public Hall
Wednesday 4 Nov at 14h30	Mooi River Country Club
Thursday 5 Nov at 09h30	New Hanover Public Hall
Thursday 5 Nov at 14h30	Greytown Lodge Conference Hall
Friday 6 Nov at 09h30	Mthembu Community Hall
Friday 6 Nov at 14h30	V.A Makhoba Hall
Saturday 7 Nov at 09h30	Nkandla Public Hall

**You are invited to attend.**

### HOW TO RESPOND

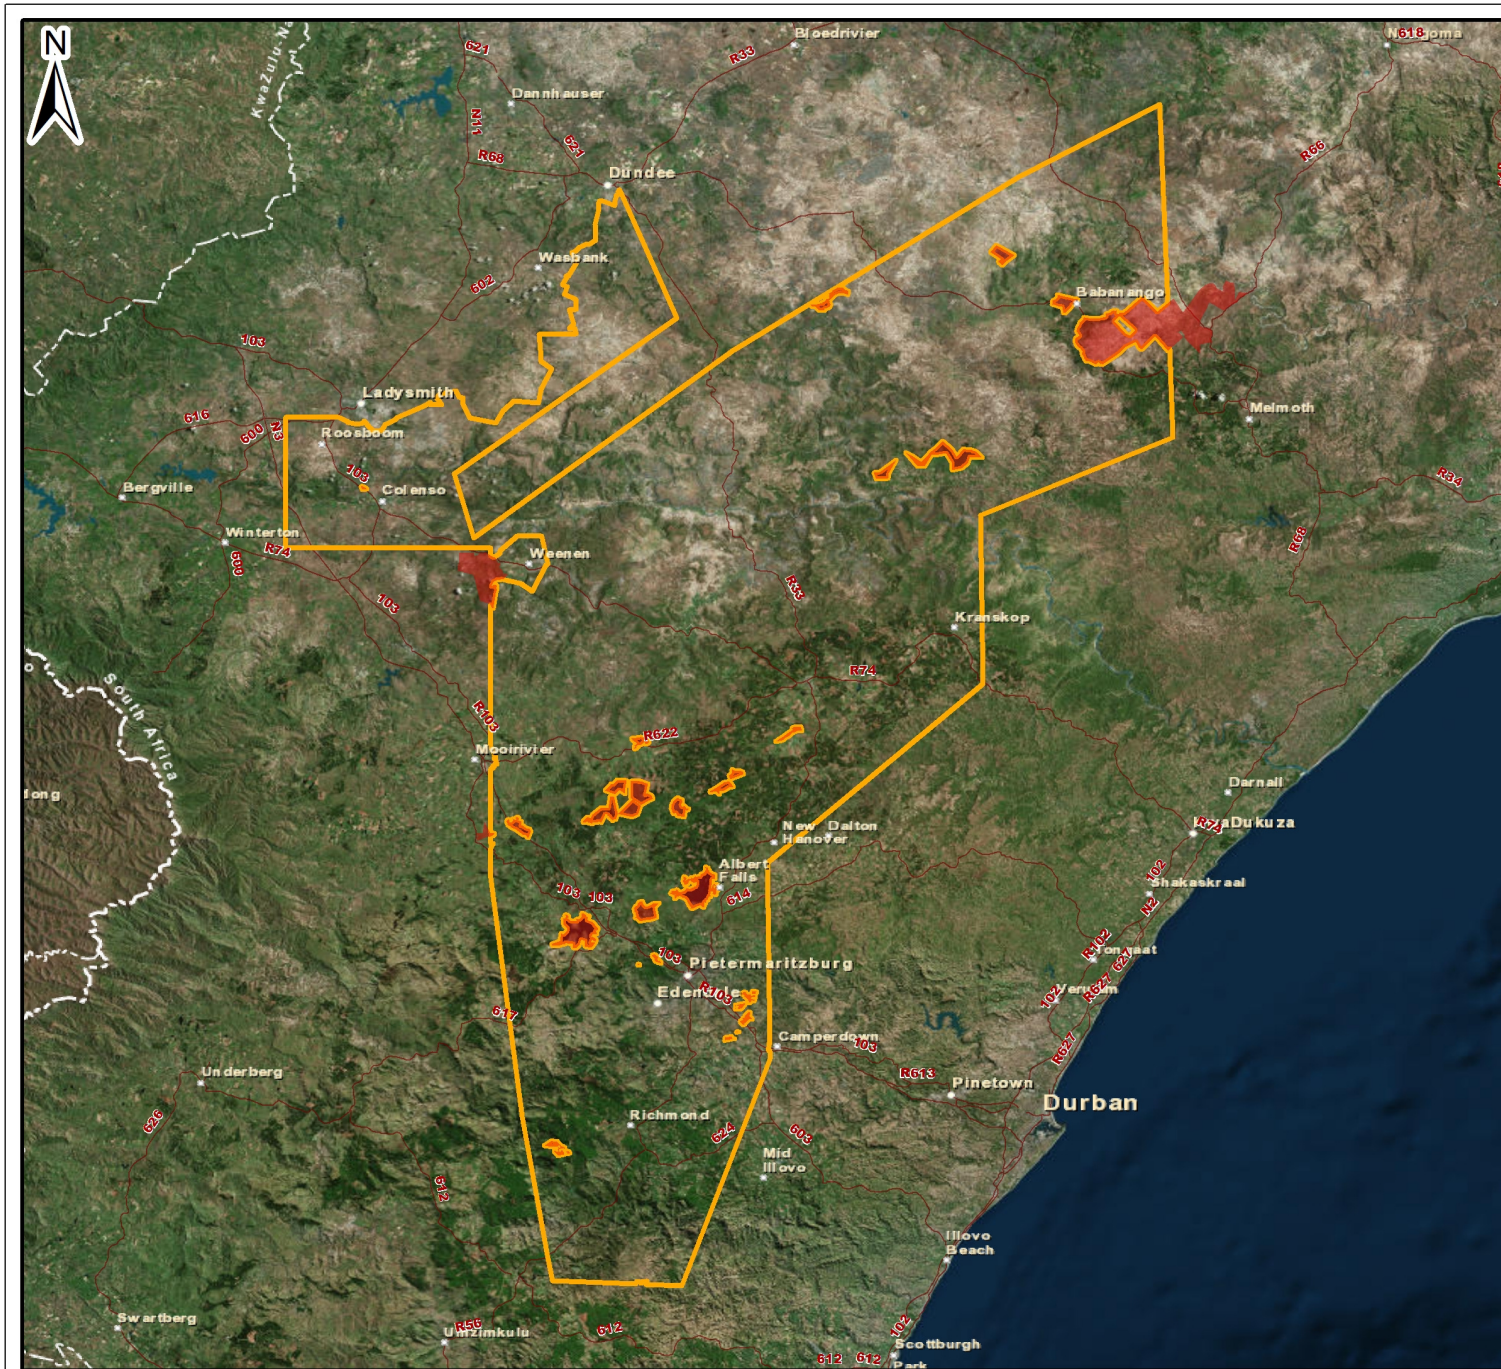

Responses to this document can be submitted by means of the attached comments sheet, at the planned scoping meetings (see detail above) and/or through communication with SLR

### WHO TO CONTACT

Matthew Hemming or Stella Moeketse

## BRIEF OVERVIEW OF PROPOSED EXPLORATION

### APPLICATION

The Petroleum Agency South Africa has accepted the application lodged by Rhino Oil and Gas for an exploration right for petroleum products. Acceptance of the application by PASA only permits the applicant to continue with the necessary process and does not constitute authorisation. The application for environmental authorisation is to be submitted to PASA in November 2015 and thereafter adhere to the timeframes prescribed in the 2014 Environmental Impact Assessment Regulations.

### GENERAL

The 3-year exploration work programme proposed by Rhino Oil and Gas is aimed at determining if there is an oil or gas resource in the area that would warrant further exploration.

**Year 1:** the evaluation of geological data through a comprehensive desk-top study. Much of this data is only available to parties who hold exploration rights. Sub-surface structural features and stratigraphy will be mapped. Data on source-rock geochemistry will be acquired. Geological models may be developed.

**Year 2:** further geochemical data analysis as well as the possible use of apatite fission track analysis and full tensor gradiometry gravity (FTG) surveys.

**Year 3:** purchase and/or undertaking seismic surveys. The final exploration activity would be the drilling of core boreholes at target sites identified from the earlier work.

### LOCATION

In broad terms the exploration right application extends from Richmond in the south to Ladysmith and Dundee in the north-west, passing just eastwards of Mooi River and Estcourt. In the north the area extends east almost to Ulundi and includes the regions around Tugela Ferry and Nkandla. The extent of the area narrows toward the south, including Kranskop, New Hanover and Asburton but being bounded just west of Camperdown. It includes nearly 10 000 farms over an area of ~ 1 500 000 ha. (see attached Figure and list of farms).

Physical, on-the-ground exploration activities will only be undertaken at a limited number of sites. The exact location of the target sites can only be determined once Rhino has completed the initial phases of exploration and examined the available data. Possible techniques include:

### FTG SURVEYS

Full tensor gradiometry gravity (FTG) surveys will be undertaken to image subsurface geology in order to aid exploration. Such surveys will be flown in fixed wing aircraft and require no access to farms.

### SEISMIC SURVEYS

Rhino will purchase seismic data where available and may commission seismic surveys to image subsurface geology. During a survey low frequency acoustic waves are generated and the reflected waves recorded. Analysis of the return waves provides information about rock types and possible

gases or fluids in rock formations.

Rhino is planning up to 100 km of two-dimensional (2D) surveys. Survey teams generate controlled acoustic energy (using explosives, air gun or seismic vibrator) and record the return waves in geophones laid at set spacing in a linear alignment.

Survey teams require short-term access to farms to place survey equipment and record the data. Survey lines will follow existing access roads and disturbances with due consideration of environmental constraints.

### DRILLING

A maximum of 10 core boreholes are planned across the exploration area. Boreholes would be drilled by a truck or trailer mounted, mobile drilling rig very similar in size to a water borehole rig. Drill sites will be accessed using existing roads and farm tracks. The drill rig will be accompanied by supporting equipment (vehicles, trailers, compressors, water tanks, pumps, caravan etc). A typical exploration rig and equipment requires an operating area of approximately 1 000 m<sup>2</sup>. See photos below.

Rock core will be extracted from the target strata and removed to a laboratory. Samples will be examined, described and tested for gas related properties.

Once drilling is completed the rig, all associated equipment and waste products will be removed from site. The borehole will be capped pending further investigation or sealed with cement if not required further.

No water abstraction, pressure testing or hydraulic fracturing of boreholes is included in the proposed work.

### STAFF AND HOUSING

Early phase exploration will create relatively few job opportunities as most work is contracted to specialist service providers. The company will recruit locally as far as possible.

A seismic survey team comprises about 20 staff. A drill-rig is normally manned by a crew of up to 5 persons. No on site housing facilities are planned. Staff will be accommodated in nearby towns or at locations agreed with land owners.

### TIMING

The exploration work programme is planned over a 3 year period. The programme is divided in phases with successful completion of one phase informing the next.

FTG surveys are completed in a matter of hours. Seismic surveys are undertaken over a period of months but the personnel and equipment are on site for short periods. Drilling at each site can take 1 to 3 months to complete.

### ENVIRONMENTAL MANAGEMENT

The establishment, management and rehabilitation of all exploration sites will be done in consultation with land owners. The process of managing the impacts and rehabilitating the exploration sites will be conducted in terms of the environmental management programme produced for the project and approved by PASA.

### LAND ACCESS

Private property will only ever be accessed with prior

consent of the landowner and then in terms of a written agreement. It is likely that access will be required to only a few of the properties within the exploration area.

The locality of exploration sites is largely flexible and can be adapted to minimise disturbance to land owners, occupiers, agriculture and the environment.

**MOTIVATION FOR THE PROPOSED PROJECT**

Petroleum products remain a vital source of energy. Natural gas comprises mostly methane and is a relatively clean, environmentally friendly form of energy. It can be used to generate electricity or provide heat for domestic and industrial purposes. Once extracted gas can be easily contained, transported and safely used in many applications. The type of downstream use is entirely dependent on the commercial scale of the resource.

**FUTURE EXPLORATION OR PRODUCTION**

The current application is only to authorise the work as described above (and in detail in the Scoping Report). Any further exploration work to evaluate an identified resources or a future production would require further approval from PASA. Such approvals will be subject to the relevant legal requirements which include further public consultation and environmental assessment.

Rhino maintains that is not useful to speculate on the possible future direction of the project as the range of options is vast and the available information very limited.

**Rock core recovered for analysis**

## POTENTIAL ENVIRONMENTAL IMPACTS

The following preliminary issues and potential impacts have been identified and will be investigated as part of the environmental assessment process.

**Farm Safety** – Access by unknown persons to farms has the potential to influence security on farms. Operating heavy vehicles and equipment may pose safety risks. Run away fires may present a potential safety risks for both people and livestock.

**Farm Infrastructure** – farms roads, gates and fences may be damaged during exploration activity.

**Soil and land capability**– activities at the seismic and drill sites may affect soils and land capability if poorly regulated and not rehabilitated.

**Biodiversity** – activities at the seismic and drill sites have the potential to disturb and/or destroy vegetation, habitat units and related ecosystem functionality, including the disturbance of protected species.

**Surface water** – The proposed activities at the seismic and drill sites has the potential to pollute surface water resources through consumptive use and the discharge of contaminants.

**Groundwater** – the proposed drilling has the potential to consume and contaminate groundwater resources which could impact availability to other groundwater users and the ecosystem.

**Air** – The proposed project has the potential to contribute to air pollution, particularly through dust emissions from vehicles on gravel roads and the release of gas from boreholes.

**Noise and vibrations** – The proposed project has the potential to cause noise pollution during drilling activities. Seismic surveys may cause damage to structures and disturb livestock and wildlife.

**Visual** – the placement of seismic and drilling equipment has the potential to create short-term visual impacts.

**Heritage resources** – the proposed project has limited potential to damage heritage resources.

**Land use** –The seismic and drill sites may conflict with land use for the duration.

**Socio-economic** – the project has very limited potential to contribute towards socio-economic impacts. Positive impacts include job creation and stimulation of the local and regional economy. Potential negative socio-economic impacts include potential for increased crime, spread of disease and pressure on support services provision.

**Cumulative and future impacts** – although the current work may have limited impacts, a concern is that approval of this work could open the way for future,

larger-scale projects in the area. These may have much greater impact and be difficult to stop if investment has been made.

## ENVIRONMENTAL ASSESSMENT

The assessment process aims to:

- provide information on the project & alternatives
- provide information on the potentially affected environment;
- identify, in consultation with interested and/or affected parties (IAPs), the potential negative as well as positive impacts of the project;
- provide an assessment of the significance of the impacts;
- report on management measures required to mitigate impacts to an acceptable level; and
- ensure informed, transparent and accountable decision-making by the relevant authorities.

### STEPS IN THE ASSESSMENT PROCESS

#### Pre Application phase (September to November 2015)

Identify and inform IAPs & regulatory authorities of the proposed project (via direct consultation, newspaper advertisements, site notices, this document)

Receive issues and responses from IAPs.

Define outstanding issues and terms of reference for work to address potential impacts

Compile scoping report

Submit application to PASA (it0 NEMA)

#### Scoping phase (November – January 2016)

Make draft scoping report available for review by IAPs and other regulatory authorities.

Collect IAP comments, update Scoping Report and forward to decision making Authorities.

#### EIA and EMP phase (February to July 2016)

Undertake any specialist investigations.

Assess impacts of proposed project and compile EIA and EMP report.

Make this available to IAPs and regulatory authorities for review.

Host possible public-feedback meetings.

Collect IAP comments, update EIA and EMPr and forward to decision making Authorities.

#### Decision and Appeal

PASA to review EIA and EMPr and make a decision.

Notify IAPs and regulatory authorities.

Appeal process in terms of Appeal Regulations

## REGISTER AND COMMENT

All stakeholders are invited to register as Interested & Affected Parties (IAP). You must register as an IAP if you would like more information or wish to participate in the environmental assessment of the project. To register, or to raise any environmental issues or concerns regarding the project, please complete the Response Form and return it to SLR at your earliest convenience. IAPs registered on the project's database will receive notification of further meetings, report review periods and the decision.

# I-Rhino Oil and Gas Exploration South Africa (Pty) Ltd

## ULWAZI OLUYISENDLALELO EKHLOLWENI KWEZIMBIWA-PHANSI OKUHLONGOZWAYO EMAPULAZINI AHLUKAHLUKENE KWAZULU-NATALI (291 ER)

Okthoba 2015

### ISETHULO

I-Rhino Oil and Gas Exploration South Africa (Pty) Ltd isifake isicelo selungelo lokuhlola ku-Petroleum Agency South Africa (PASA) ngokwesigaba 79 soMthetho Wokuthuthukiswa Kwezimbiwa-phansi, 28 ka-2002 (MPRDA). Izimbiwa-phansi ezifakiwe esicelweni uwoyela, igesi, i-condensate, i-coal bed methane, iheliyamu negesi i-biogenic. Indawo okuzohlolwa kuyo ibanzi futhi ihlanganisa izingxenye ezinkulu zendawo emaphakathi KwaZulu-Natali (bheka uMfanekiso 1).

I-Rhino Oil and Gas ihlose ukwenza ukuhlola kwesigaba sokuqala kwe-petroleum, igxile ekuhlonzeni imithombo kawoyela negesi engase ibe khona endaweni yemvelo efanele. Injongo ukuthola ukuba khona kwe-petroleum engase icwaningwe kabanzi. Uhlelo lokuhlola lweminyaka engu-3 yokuqala luzogcina ngokusebenzisa amasu angangeni phakathi, izinhlobo-zo zokuma komhlaba nokumbiwa kwemigonqozo engaphansi kwengu-10. Akukho kuqheshulwa kwamadwala okuhlongozwayo ngaloku kuhlola

### INQUBO YESIGUNYAZO SEZEMVELO

Ngaphambi kokunikeza iNgelo Lokuhlola lephrojekthi ehlongozwayo, kumelwe kwenziwe inqubo yokuhlola kwezemvelo evunyelwe yi-PASA in ngokoMthetho Wokulawulwa Kwezemvelo Kuzwelonke, 107 ka-1998 (NEMA). I-Rhino Oil and Gas izokwenza isicelo esiya ku-PASA sesigunyazo sezemvelo. IZiqondiso Zokuhlolwa Komthelela Kwezemvelo zika-2014 (GN R982 ezasatshalaliswa ngokwe-NEMA) ziyasebenza njengoba isicelo selungelo lokumba siwumsebenzi 18 eSazisweni Sohlu 2 (GN R984). IZiqondiso Ze-EIA zichaza inqubo yokuhlola ehlanganisa: Isigaba sokubheka isimo, isigaba sokuhlola umthelela kwezemvelo (EIA) nohlelo lokulawulwa kwezemvelo (EMPr). Ukubamba iqhaza komphakathi kuyisici esiyinhloko kwinqubo yokuhlola kwezemvelo.

I-SLR Consulting (Africa) (Pty) Ltd (SLR), inkampani ezimele yamakhonsalithenti ezemvelo, iye yaqokwa yi-Rhino Oil and Gas Exploration South Africa (Pty) Ltd ukuba ilawule inqubo yokuhlola kwezemvelo. Le ncwadi ilungiselelwe yi-SLR ukuba ikutshelwe:

- \* Ngesicelo nangemisebenzi yale phrojekthi ehlongozwayo;
- \* Inqubo yokuhlola kwezemvelo ezolandelwa;
- \* Ukuqonda kwe-SLR imithelela yezemvelo engase ibe khona; kanye
- \* endlela ongaba neqhaza ngayo ekuhlolweni kwemvelo.

### UKUFINGQWA KWEPHROJEKTHI

**Isicelo:** Isigunyazo Sezemvelo Selungelo Lokuhlola ngokweSigaba 79 se-MPRDA.  
**Izimbiwa-phansi ezisophiwe:** uwoyela, igesi, i-condensate, i-coal bed methane, iheliyamu negesi yemvelo.  
**Indawo:** maphakathi KwaZulu-Natali. Bheka uMfanekiso.  
**Izindawo eziku-ER:** amapulazi neziqephu ezibalelwa ku-10 000, bheka uhlu kuSenezelo 1.  
**Inombolo yerifarensi ye-PASA (291 ER)**  
Sicela uqinisekise ukuthi le nombolo yerifarensi ikhona kuzo zonke izincwadi ezibhalwayo.

**Kuye kwahlelwa le mihlangano yokubhekwa kwesimo elandelayo, imininingwane imi kanje:**

Usuku Nesikhathi	Indawo
UMsombuluko 2 Nov, 09h30	Ashburton Public Hall
UMsombuluko 2 Nov, 14h30	Richmond Agricultural Hall
ULwesibili 3 Nov, 09h30	Imvunolu Secondary School
ULwesibili 3 Nov, 14h30	Lions River Polo Club
ULwesithathu 4 Nov, 09h30	Colenso Public Hall
ULwesithathu 4 Nov, 14h30	Mooi River Country Club
ULwesine 5 Nov, 09h30	New Hanover Public Hall
ULwesine 5 Nov, 14h30	Greytown Lodge Conference Hall
ULwesihlanu 6 Nov, 09h30	Mthembu Community Hall
ULwesihlanu 6 Nov, 14h30	V.A Makhoba Hall
UMgqibelo 7 Nov, 09h30	Nkandla Public Hall

**Uyamenywa ukuba ube khona.**

### INDLELA YOKUPHENDULA

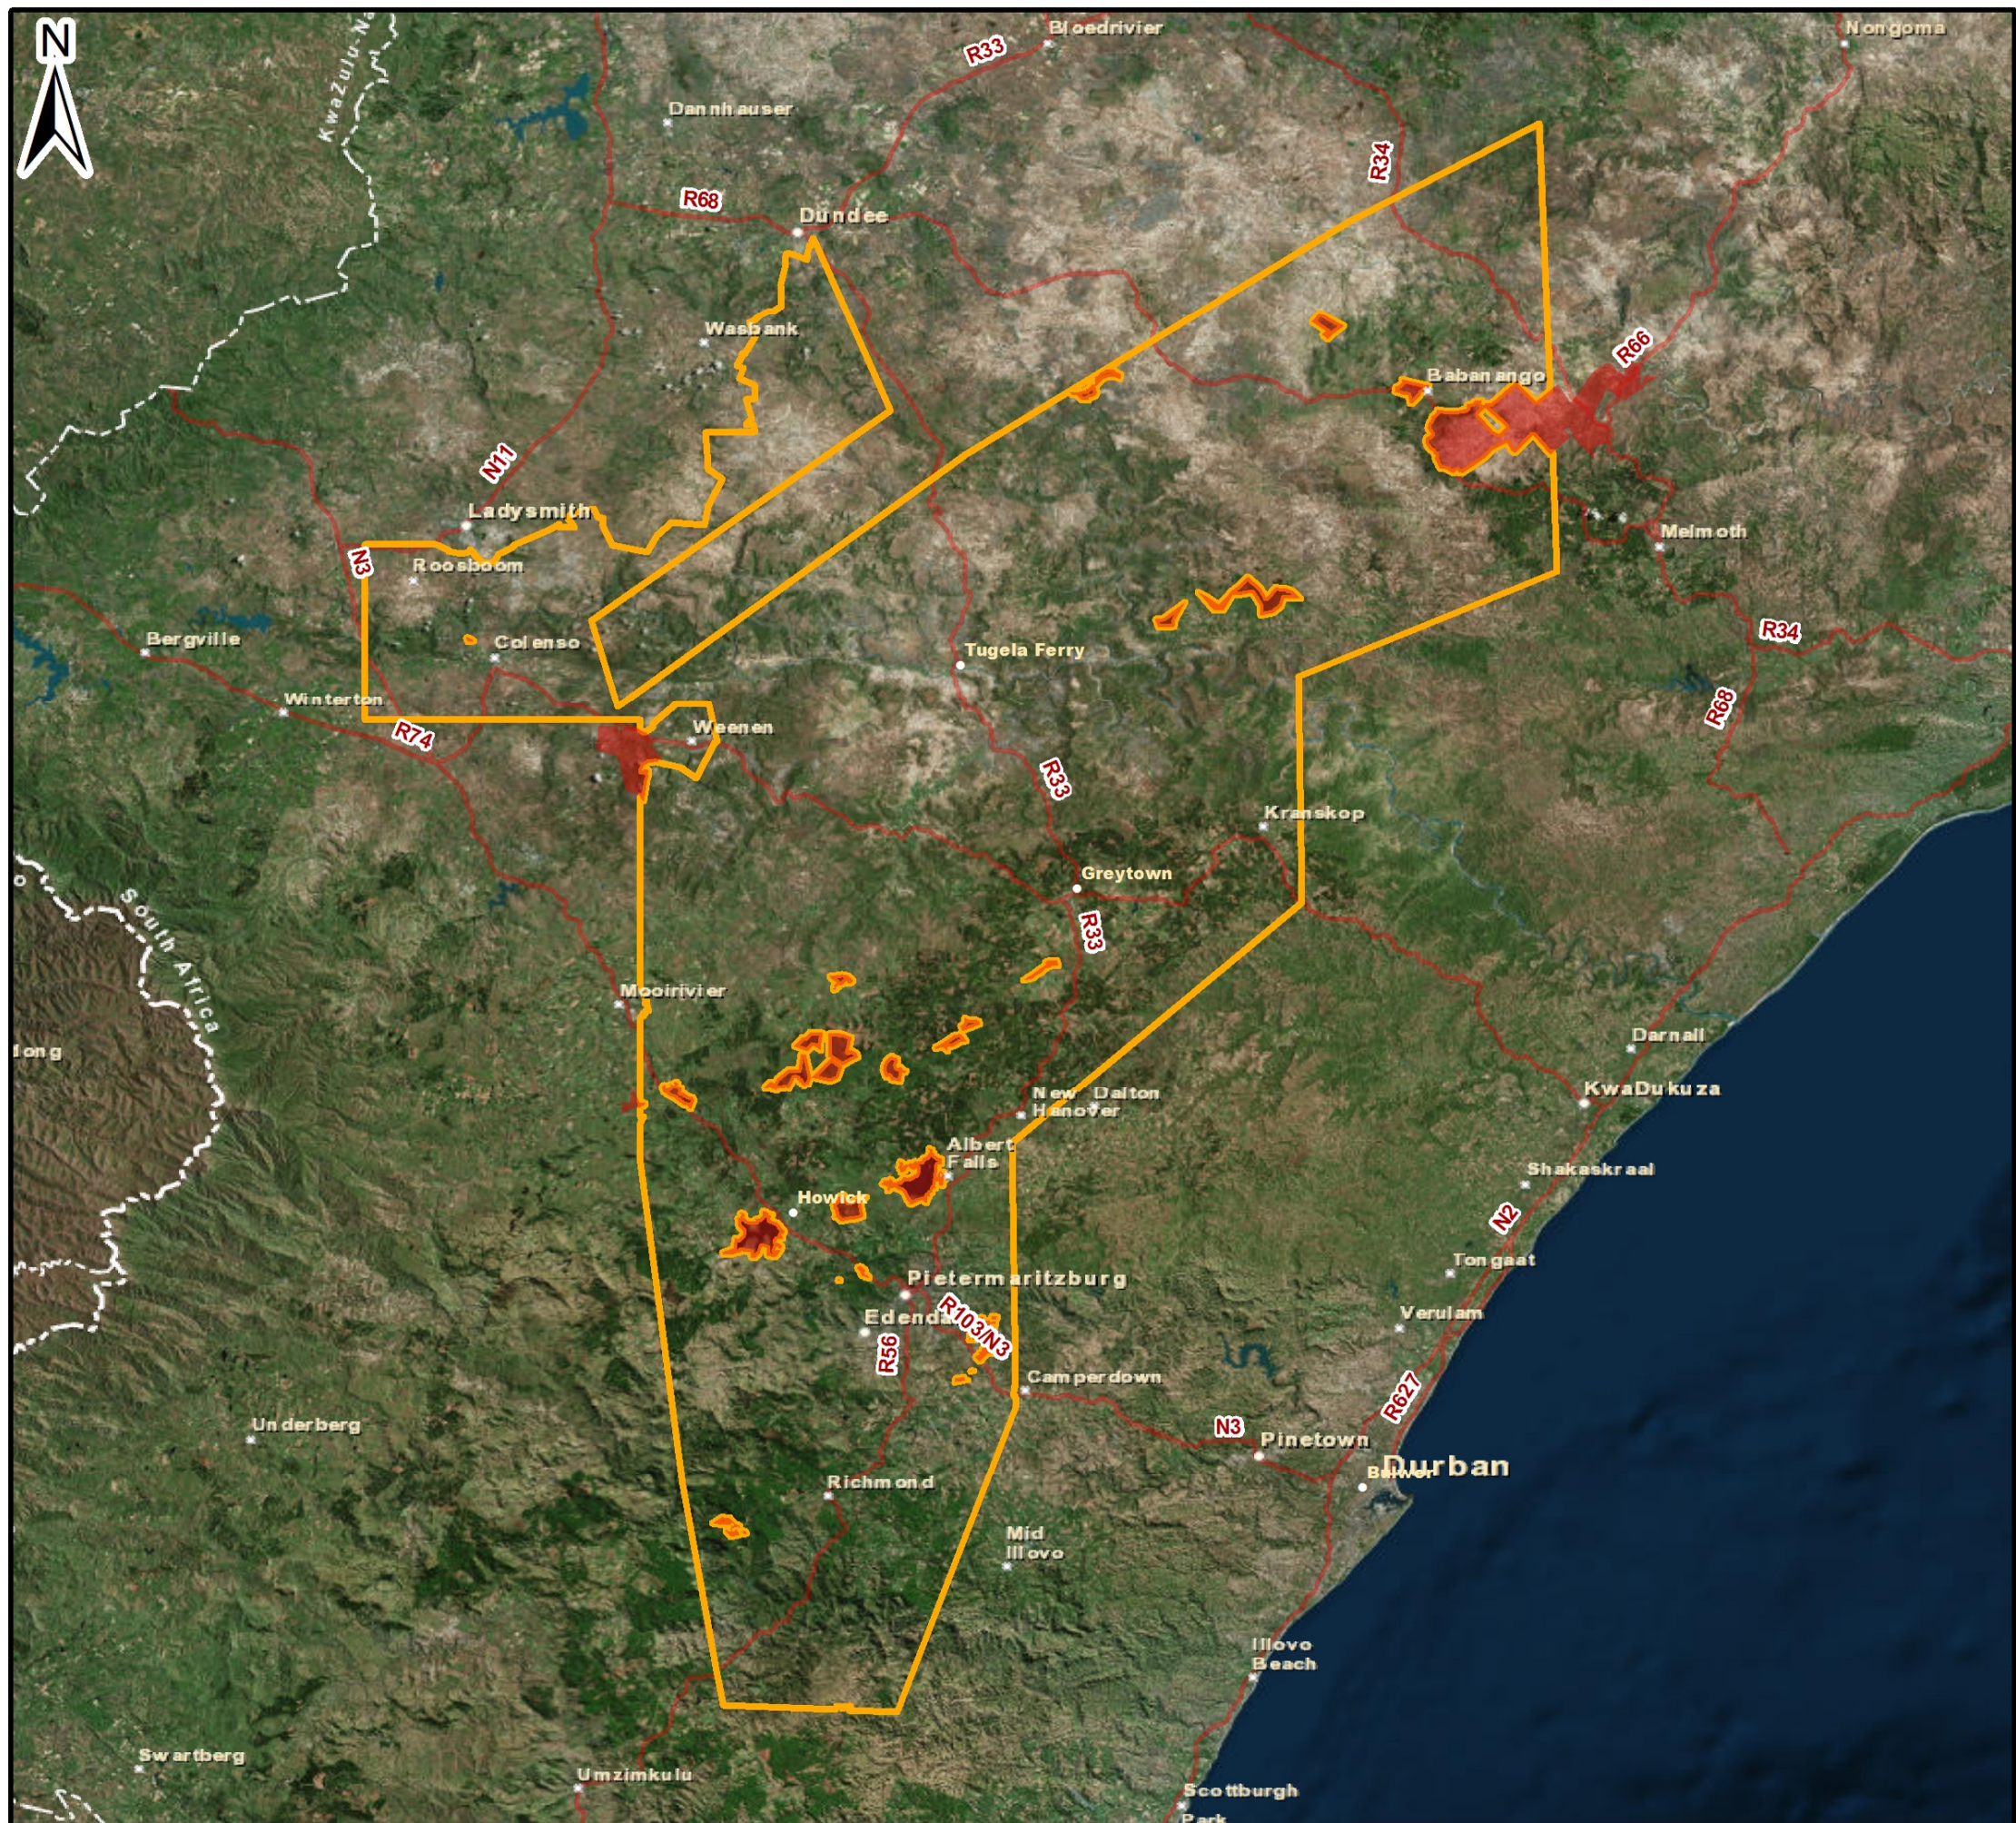

Izimpendulo zale ncwadi zingathunyelwa ngephepha lezimvo elifakiwe emihlanganweni yokubheka isimo ehleliwe (bheka imininingwane ngenhla) kanye/noma ngokuxhumana ne-SLR

### UBANI ONGAXHUMANA NAYE

## UKUFINGQWA KWESICLO SOKUHLOLA

### OKUHLONGOZWAYO

I-Petroleum Agency South Africa isisamukele isicelo esifakwe i-Rhino Oil and Gas selungelo lokuhlola imikhiqizo ye-petroleum. Ukwamukela kwe-PASA isicelo kuvumela kuphela ukuba ofake isicelo aqhubeke nenqubo edingekayo, akusho ukuthi iyamgunyaza.

Isicelo sesigunyazo sezemvelo sizohanjiswa ku-PASA ngo-Novemba 2015 bese ngemva kwalokho kulandelwe isikhathi esibekiwe eZiqondisweni Zokuhlolwa Komthelela Kwezemvelo zika-2014.

### OKUVAMILE

Umsebenzi wokuhlola ozothatha iminyaka engu-3 ohlongozwe i-Rhino Oil and Gas uhlokelwe ukuthola ukuthi ukhona yini umthombo kawoyela noma igesi kule ndawo ongenza ukuba kuqhutshekwe nokuhlola.

**Unyaka 1:** ukuhlolwa kolwazi lokuma komhlaba ngocwaningo olubanzi. Oluningi lwalo lwazi lutholakala kuphela kulabo abanamalungelo okuhlola. Kuyokwenziwa ibalazwe lezimo zangaphansi komhlaba nokuma kwamadwala. Kuyotholakala ulwazi mayelana nokuma kongqimba lomhlaba. Kungase kwenziwe izindlela zokuhlola isimo somhlaba ngezobuchwepheshe.

**Unyaka 2:** ukuhlaziywa kolwazi lwesimo somhlaba olwengeziwe kanye namathuba okusetshenziswa kokuhlaziya kwezinhlobo-vo ze-apatite fission track analysis ne-full tensor gradiometry gravity (FTG).

**Unyaka 3:** ukuthengwa kanye/noma ukwenziwa kwezinhlobo-vo zokuma komhlaba. Umsebenzi wokuhlola wokugcina kuzoba ukumbiwa kwemigonqozo.

### INDAWO

Ngamagama abanzi isicelo selungelo lokuhlola sisuka e-Richmond eningizimu yaseMnambithi naseDundee enyakatho-ntshonalanga, sidlule empumalanga ye-Mooi River naseMtshezi. Enyakatho le ndawo idlulela empumalanga ize icishe ifike Olundi futhi ihlanganisa izindawo ezizungeze i-Tugela Ferry neNkandla. Le ndawo iyancipha ngaseningizimu, ihlanganise neNtunjambili, uMshwathi ne-Asburton kodwa ibe nomngcele osentshonalanga ye-Camperdown. Ihlanganisa amapulazi abalelwa ku-10 000 ebangeni elingamahektha angu-1 500 000. (bheka uMfanekiso ofakiwe nohlu lwamapulazi).

Imisebenzi yokuhlola umhlaba ngokoqobo iyokwenziwa emasayithini athile abaliwe kuphela. Indawo enembile yezindawo ezisophiwe ingatholakala kuphela uma i-Rhino isisiqedile isigaba sokuqala sokuhlola futhi yahlaziya ulwazi olukhona. Amasu angase asetshenziswe ahlanganisa:

### IZINHLOLO-VO ZE-FTG

Kuzokwenziwa izinhlobo-vo ze-full tensor gradiometry gravity (FTG) ukuze kuvezwe izithombe zengaphansi komhlaba ukuze zisize ukuhlola. Izinhlobo-vo ezinjalo ziyokwenziwa endizeni futhi ngeke zidinge ukuba kungenwe emapulazini.

### IZINHLOLO-VO ZOKUMA KOMHLABA

I-Rhino izothenga ulwazi lokuma komhlaba lapho lutholakala khona futhi ingase icele izinhlobo-vo zokuma komhlaba ukuba ziveze izithombe zokuma komhlaba. Lapho kunefrikhwensi ephansi kwenzeka amaza omsindo bese

kurekhodwa amaze avelayo. Ukuhlaziywa kamaza abuyayo kunikeza ulwazi ngezinhlobo zamadwala nemagesi noma uketshezi olungase lube khona ekwakhekeni kwamadwala.

I-Rhino ihlela izihlobo-vo ezingafika ku-100 km zezinhlangothi ezimbili (2D) surveys. Amathimba ezinhlobo-vo aphelela amandla amaza omsindo (esebenzisa iziqhumane, isibhamu somoya noma izinto ezindindizelisa umhlaba) bese erekhoda amaze abuyayo kuma-geophone abekwe ebangeni elithile.

Amathimba ezinhlobo-vo adinga ukukwazi ukungena emapulazini isikhashana ukuze afeka imishini yezinhlobo-vo bese erekhoda ulwazi. Olayini bezinhlobo-vo bayolandela imigwaqo yokungena ekhona futhi ukuphazamiseka kuyocabangela imingcele yemvelo ekhona.

### UKUBHOLA

Kuhlelwe ukuba kumbiwe imigonqozo engengaphezu kuka-10 kuyo yonke indawo yokuhlola. Imigonqozo iyombiwa umshini wokubhola okwazi ukuhamba nawo obekwe elolini noma enqoleni elinganayo nomshini wokumba umgonqozo. Kuyongenwa ezindaweni okuyombiwa kuzo ngemigwaqo ekhona nezindlela zasemapulazini. Umshini wokubhola uyobe uhambisana nezinto zakhona (izimoto, izinqola, amakhompresa, amathangi amanzi, amaphaphu, omahambanendlwana, njll.) Umshini wokuhlola ovamile nezinto zakhona udinga indawo yokusebenzela elinganiselwa ku-1 000 m<sup>2</sup>. Bheka izithombe ngezansi.

Into ephakathi emadwaleni iyokhishwa bese iyiswa elabhorethri. Amasampula ayahlolwa, achazwe bese ethestwa igesi, nezici ezihlobene nazo.

Uma ukubhola sekuqediwe, umshini wokubhola nazo zonke izinto ohamba nazo nezinto eziwudoti kuyokhishwa esayithini. Umgonqozo uyombozwa kuye ngocwaningo oluqhubekayo noma umbozwe ngosimende uma ungasadingeki.

Akukho ukudonswa kamanzi, ukuhlola ngomfutho noma ukuqhunyiswa kwemigonqozo okufakiwe kulo msebenzi ohlongozwayo.

### ABASEBENZI NENDAWO YOKUHLALA

Ukuhlola kokuqala kuyokwakha amathuba emisebenzi embalwa ngoba umsebenzi omningi unikezwe ochwepheshe ngezinkontileka. Inkampani iyoqasha abantu basendaweni ngezinga okungenzeka ngalo.

Ithimba lenhlolo-vo yokuma komhlaba lakhiwa abasebenzi abangaba ngu-20. Umshini wokubhola uvame ukulawulwa abantu abangafika ku-5. Alukho uhlelo lokuba kube nezindawo zokuhlala esayithini. Abasebenzi bayohlala emadolobheni aseduze noma ezindaweni okuvunyelwene ngazo nabanini-mhlaba.

### ISIKHATHI

Uhlelo lomsebenzi wokuhlola luhlelwe inkathi yeminyaka engu-3. Loluhlelo luhlukaniswe ngezigaba, futhi lapho kuphela ngempumelelo isigaba esisodwa, ludlulela kwesinye. Izinhlobo-vo ze-FTG ziqedwa ngamahora nje embalwa. Izinhlobo-vo zokuma komhlaba zenziwa inkathi yezinyanga ezithile kodwa abasebenzi nemishini baba sesayithini inkathi emfushane. Ukumba esayithini ngayinye kungathatha izinyanga ezingu-1 kuya ku-3 ukuphela.

## UKULAWULWA KWEMVELO

Ukusungulwa, ukulawulwa nokuhlunyeleliswa kwawo wonke amasayithi okuhlola kuyokwenziwa ngokuxoxisana nabanikazi bomhlaba. Inqubo yokulawula umthelela nokuhlumelelisa amasayithi okuhlola iyokwenziwa ngokuvumelana nohlelo lokulawulwa kwemvelo olwenziwele le projekthi futhi lwavunyelwa i-PASA.

## UKUNGENA ENDAWENI

Umhlaba okungwabantu kuyongenwa kuwo kuphela uma kutholakale imvume yabanikazi bawo kusengaphambili kanye nangokwesivumelwano esibhalwe phansi. Kungenzeka ukuba kidingeke kungekwe ezindaweni ezimbalwa kuphela ezisendaweni ehlolwayo.

Indawo okuzohlolwa kuyo ingashintshwa ukuze kuncishiswe ukuphazamiseka kubanikazi bomhlaba, abahlala kuyo, ezolimo nemvelo.

## ISIZATHU SALE PHROJEKTHI EHLONGOZWAYO

I-petroleum isalokhu iwumthombo obalulekile wamandla. Igesi yemvelo yakhiwa ngokuyinhloko i-methane futhi iwuhlobo lwamandla ahlanzekile ngokwezinga elithile, angayiphazamisi imvelo. Ingasetshenziselwa ukuphehla ugesi noma ukunikeza ukushisa ngezinjongo zasemakhaya noma ezimbonini. Yigesi ekhishwe phansi kuphela engafakwa kalula entweni, ithuthwe iyiswe kwenye indawo futhi isetshenziswe ngokuphepha ezintweni eziningi. Uhlobo lolusetshenziswa luncike ekuthengisweni kwayo.

## UKUHLOLWA KWESIKHATHI ESIZAYO NOMA UMKHIQIZO

Ukusetshenziswa kwamanje kwenzelwa kuphela ukugunyaza umsebenzi njengoba kuchazwe ngenhla (futhi kuchazwe kabanzi eMbikweni Wokubheka Isimo). Any further exploration work to evaluate an identified resources or a future production would require further approval from PASA. Izimvume ezinjalo kuyodingeka zibe nezimfuneko ezingokomthetho ezifanele ezihlanganisa ukuba kuphinde kuxoxiswane nomphakathi futhi kube khona ukuhlola kwezemvelo. I-Rhino imi kwelokuthi akasizi ukuqagela ukuthi esikhathini esizayo le phrojekthi izoya ngakuphi ngoba kuningi okungase kwenzekwe kanti ulwazi esinalo luncane kakhulu.

## IZITHOMBE

## Inhlolo-vo evamile ye-FTG

SLR Consulting (Africa) (Pty) Ltd

## Inhlolo-vo yokuma komhlaba ngaphansi

## Umshini wokubhola

## Ingaphakathi ledwala likhishiwe ukuze lihlaziywe

## IMITHELELA YEZEMVELO ENGASE IBE KHONA

Lezi zinkinga eziyisandulela ezilandelayo nemithelela engase ibe khona ziye zahlonzwa futhi zizophenywa njengengxenye yenqubo yokuhlola kwezemvelo.

**Ukuphepha Epulazini** – Ukungena kwabantu abangaziwa emapulazini kungase kube nomthelela ekuvikelekeni kwamapulazi. Ukusebenzisa izinqola nemishini emikhulu kungase kube nezingozi ezithile kwezokuphepha. Imililo yequbulo ingase ibe nomthelela oyingozi kwezokuphepha kokubili kubantu nezilwane.

**Inggalasizinda Yepulazi** – imigwaqo yamapulazi, amasango nothango kungase kulimale phakathi nomsebenzi wokuhlola.

**Amandla enhlabathi nomhlaba**– imisebenzi ezindaweni zomhlaba nokubhola ingase ibe nomthelela emandleni enhlabathi nomhlaba uma ingalawulwa kahle futhi unghlunyelelwa kabusha umhlaba.

**Izinhlombo zezidalwa eziphilayo** – imisebenzi ezindaweni zomhlaba nokubhola ingase iphazamise kanye/noma ilimaze izitshalo, izindawo zezilwane kanye nokusebenza kwemvelo okuhlobene nazo, kuhlangukise nokuphazamisa izinhlobo zezitshalo nezilwane ezivikelwe.

**Amanzi aphezulu** – Imisebenzi ehlongozwayo ezindaweni zomhlaba nokubhola ingase ingcolise imithombo yamanzi aphezulu ngokusebenzisa noma ngokukhipha izinto ezingcolisayo.

**Amanzi angaphansi komhlaba** – ukubhola okuhlongozwayo kungase kusebenzise futhi kungcolise imithombo yamanzi angaphansi komhlaba, okuyinto engase ibe nomthelela ekubeni khona kwabanye abasebenzisi bamanzi angaphansi komhlaba nesimiso sezinto eziphilayo.

**Umoya** – Le phrojekthi ehlongozwayo ingase ibe nomthelela ekungcoleni komoya, ikakhulukazi ngokukhipha uthuli ezimotweni emigwaqweni yobhuqu nokukhipha igesi emigonqozweni.

**Umsindo nokundizela** – Le phrojekthi ehlongozwayo ingase ibangele umsindo ngesikhathi kubholwa. Izinhlobo-vo zezindawo zokuma komhlaba zingase zibangele ukulimala ezinhlakeni futhi ziphazamise imfundo nezilwane zasendle.

**Ukubukeka** – ukubekwa kwemishini ezindaweni zomhlaba nokubhola kungase kube nomthelela ekubukekeni kwendawo okwesikhashana.

**Amagugu esizwe** – le phrojekthi ehlongozwayo inomthelela olinganiselwe wokulimaza amagugu esizwe.

**Ukusetshenziswa komhlaba** – Izindawo zomhlaba nokubhola zingase ziphazamisane nokusetshenziswa komhlaba ngalesi sikhathi.

**Ezenhlalo nezomnotho** – le phrojekthi inomthelela olinganiselwe kakhulu wokuba neqhaza emitheleleni yezenhlalo nezomnotho. Imithelela emihle ihlanganisa ukwakhiwa kwemisebenzi nokufukulwa komnotho wendawo nowesifunda. Imithelela yezenhlalo nezomnotho engase ibe khona ihlanganisa amathuba okwanda kobugebengu, ukusabalala kwezifo nengcindezi ezinsizakalweni zokusekela.

**Imithelela eyandayo neyisikhathi esizayo** – nakuba umsebenzi wamanje ungase ube nemithelela elinganiselwe, ukukhathazeka okukhona ukuthi ukuvunywa kwalo msebenzi kungase kuvule indlela yamaphrojekthi esikhathi esizayo, amakhulu kule ndawo. Loku kungase kube nomthelela omkhulu futhi kube nzima ukukumisa uma ukutshalwa kwemali sekwenziwe.

## UKUHLOLWA KWEZEMVELO

Inqubo yokuhlola ihlose:

- ukunikeza ulwazi ngephrojekthi nangezindlela ezihlukile
- ukunikeza ulwazi ngendawo yemvelo engase ithintekile;
- ukuhlolwa, ngokuxoxisa nabanomdlandla kanye/noma abathintekile (IAPs), imithelela emibi kanye nemihle engase ibe khona ngale phrojekthi;
- ukunikeza ukuhlola kokubaluleka kwemithelela;
- ukubika ngezinyathelo zokulawula ezidingekayo ukuze kuncishiswe imithelela ibe sezingeni elamukelekayo, kanye
- Ukuqinisekisa ukwenziwa kwezinqumo okunolwazi, okusobala nokulandisayo ngamagunya afanele.

### IZINYATHELO KWINQUBO YOKUHLAZIYA

#### Isigaba Sangaphambi Kokufaka Isicelo (Septemba kuya ku-Novemba 2015)

Hlonza futhi utshele wonke ama-IAP namagunya alawulayo ngephrojekthi ehlongozwayo (ngezingxoxo eziqondile, ukukhangisa kumaphephandaba, izaziso zasesayithini, yile ncwadi)

Kutholwe izinkinga nezimpendulo ezivela kuma-IAP. Kuchazwe izinkinga ezisele nezikhombo zomsebenzi ukuze kubhekane nemithelela engase ibe khona Kwakhiwe umbiko wokubheka isimo Kuhanjisewe isicelo ku-PASA (ku-NEMA)

#### Isigaba sokubheka isimo (Novemba – Januwari)

Kwenziwe uhlobo lombiko wokubheka isimo utholakale ukuze ubuyezwe ama-IAP namanye amagunya alawulayo.

Kuqoqwe izimvo zama-IAP, kufakwe ulwazi lwamuvu eMbikweni Wokubheka Isimo bese kuthunyelwa eMagunyeni enza isinqumo.

#### Isigaba Se-EIA ne-EMP (Febhuwari kuya ku-Julayi 2016)

Ukwenziwa kwanoma yiluphi ucwaningo lochwepheshe.

Kuhlolwe imithelela yephrojekthi ehlongozwayo bese kwenziwa umboko we-EIA ne-EMP.

Yenziwe itholakale kuma-IAP namagunya alawulayo ukuze ayibuyezwe.

Kubanjwe imihlangano yemibiko yomphakathi engase ibe khona.

Kuqoqwe izimvo zama-IAP, kufakwe ulwazi lwamuvu ku-EIA ne-EMPr bese kuthunyelwa eMagunyeni enza isinqumo.

#### Isinqumo Nokufaka Isikhalazo

I-PASA izobuyezeka i-EIA ne-EMPr bese yenza isinqumo.

Yazise ama-IAP namagunya alawulayo.

Inqubo yokufaka izikhalazo ngokweziqondiso Zokufaka Isikhalazo

I-Rhino Oil and Gas Exploration South Africa (Pty) Ltd

File Ref. Rhino Notification Letter\_291 ER KZN

PASA Ref: 12/3/291 ER

Week of 18 January 2016

**ATTENTION: LAND OWNER/STAKEHOLDER/IAP**

Dear Sir/Madam

**UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

**Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

---

Directors: K Pietersen, B Stobart

**SABS**  
ISO 9001

**Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at <ftp.slrconsulting.co.za>

username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

**Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

**Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate

on in this letter<sup>1</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>2</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the

---

<sup>1</sup> All comments and issues that are submitted by IAPs are being captured and will be contained in the scoping report.

<sup>2</sup> The schedule for a scoping and EIA process is constrained by timeframes detailed in Part 3 of the EIA Regulations (GNR 982, 8 December 2014)

scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

#### **Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any land being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the Minister by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

Yours faithfully

**Matthew Hemming**

MSc (Conservation Biology)

Environmental Assessment Practitioner

# I-Rhino Oil and Gas Exploration South Africa (Pty) Ltd

## ULWAZI OLUYISENDLALELO MAYELANA NOKUHLOLWA KWE-PETROLEUM EMAPULAZINI AHLUKAHLUKENE KWAZULU-NATAL (291 ER)

Uhlelo 2 - Januwari 2016

### ISETHULO

I-Rhino Oil and Gas Exploration South Africa (Pty) Ltd isifake isicelo selungelo lokuhlola ku-Petroleum Agency South Africa (PASA) ngokwesigaba 79 soMthetho Wokuthuthukiswa Kwezimbiwa-phansi, 28 ka-2002 (MPRDA). Izimbiwa-phansi ezifakiwe esicelweni uwoyela, igesi, *i-condensate*, *i-coal bed methane*, iheliyamu negesi *i-biogenic*. Indawo okuzohlolwa kuyo ibanzi futhi ihlanganisa izingxenye ezinkulu zendawo emaphakathi KwaZulu-Natali (bheka uMfanekiso 1).

Kulesi sicelo i-Rhino Oil & Gas ifake kuphela isicelo semvume yokwenza isigaba sokuqala sokuhlola uwoyela negesi engase ibe khona endaweni yemvelo efanele. Injongo yalo msebenzi kuyoba kuphela ukuthola ukuba khona kwanoma yimuphi umthombo *we-petroleum* ongase ucwaningwe kabanzi. Uhlelo lokuhlola lweminyaka engu-3 yokuqala luzogcina ngokusebenzisa amasu angangeni phakathi, izinhlobo-vo zokuma komhlaba nokumbiwa kwemigonqozo engaphansi kwengu-10.

### INQUBO YESIGUNYAZO SEZEMVELO

Ngaphambi kokunikeza iNgelo Lokuhlola lephrojekthi ehlongozwayo, kumelwe kwenziwe inqubo yokuhlola kwezemvelo evunyelwe yi-PASA in ngokoMthetho Wokulawulwa Kwezemvelo Kuzwelonke, 107 ka-1998 (NEMA). I-Rhino Oil and Gas yenze isicelo esiya ku-PASA sesigunyazo sezemvelo. IZiqondiso Zokuhlolwa Komthelela Kwezemvelo zika-2014 (GN R982 ezasatshalaliswa ngokwe-NEMA) ziyasebenza njengoba isidingo selungelo lokumba siqalisa umsebenzi 18 eSazisweni Sohlu 2 (GN R984). IZiqondiso Ze-EIA zichaza inqubo yokuhlola ehlanganisa: Isigaba sokubheka isimo, isigaba sokuhlola umthelela kwezemvelo (EIA) nohlelo lokulawulwa kwezemvelo (EMPr). Ukubamba iqhaza komphakathi kuyisici esiyinhloko kwinqubo yokuhlolwa kwezemvelo.

I-SLR Consulting (Pty) Ltd (SLR), inkampani ezimele yamakhonsalithenti ezemvelo, iye yaqokwa yi-Rhino Oil and Gas ukuba ilawule inqubo yokuhlolwa kwezemvelo. Le ncwadi ilungiselelwe yi-SLR ukuba ikutshelwe:

- \* ngesicelo nangemisebenzi yale phrojekthi ehlongozwayo;
- \* ngenqubo yokuhlolwa kwezemvelo ezolandelwa; kanye
- \* nendlela ongaba neqhaza ngayo ekuhlolweni kwezemvelo.

Injongo eyinhloko yenqubo yokubhekwa kwesimo ukuthola izinkinga eziyinhloko okudingeka zibhekwe esigabeni sokuhlola esizolandela.

### KUZOQHUNYISWA NOMA CHA?

Akukho ukuqhumisa okufakiwe ohlelweni lokuhlola lweminyaka engu-3 oluhlongozwayo. I-Rhino Oil & Gas isishilo ukuthi okwamanje alukho ulwazi olwanele lokuthola ukuthi yimaphi amasu angase adingekayo lapho kukhishwa igesi esikhathini esizayo.

Uma umthombo watholakala futhi kwabonakala ukuthi uzoba nenzuzo, ukubhola ngokusebenzisa amanzi kungase kube amanye amasu azosetshenziswa ekukhiqizeni igesi. Kodwa-ke, kuyodingeka uphenyo olunzulu, ukuhlaziywa kwezemvelo okuningana nemvume evela emagunyeni ukuze kufinyelelwe kuleso sinqumo. Lokhu kuhlanganisa:

1. Ukuhlolwa kwesigaba sokuqala okuphelele njengoba kuhlongozwayo futhi kwavunywanga ngalesi sicelo.
2. Uma ukuhlolwa kwesigaba sokuqala kuqinisekisa ukuthi ukhona umthombo ongase ube yinzuzo, i-Rhino Oil & Gas iyofuna imvume eyengeziwe ku-PASA yomsebenzi wokuhlola owengeziwe odingekayo ukuze kuphenywe lokhu. Noma yikuphi okunye ukuvunywanga okwengeziwe kuyodinga inqubo yokuhlolwa kwezemvelo kanye nokuxhumana nomphakathi. Kungenzeka futhi izimvume zidingwe eminye imithetho.
3. Ukwenza izigaba ezibanzi zokuhlola njengoba kuvunyiwe.
4. Uma ukuhlola okubanzi kwaholela ekutholeni umthombo ongaba nenzuzo ofanele ukuthuthukiswa, i-Rhino Oil & Gas kuyodingeka ithole ilungelo lokukhiqiza ku-PASA. Noma yisiphi isicelo selungelo lokukhiqiza kufanele sibe nenqubo yokuhlola kwezemvelo kanye nokunye ukuxoxisana nomphakathi. Kungenzeka futhi izimvume zidingwe eminye imithetho.
5. Ukuthuthukisa iphrojekthi yokukhiqiza.

Ngakho-ke yonke imisebenzi yokuhlola noma yokukhiqiza esikhathini esizayo engase iphakame uma kutholakala imithombo ayingeni kule nqubo yamanje yokubheka isimo neye-EIA.

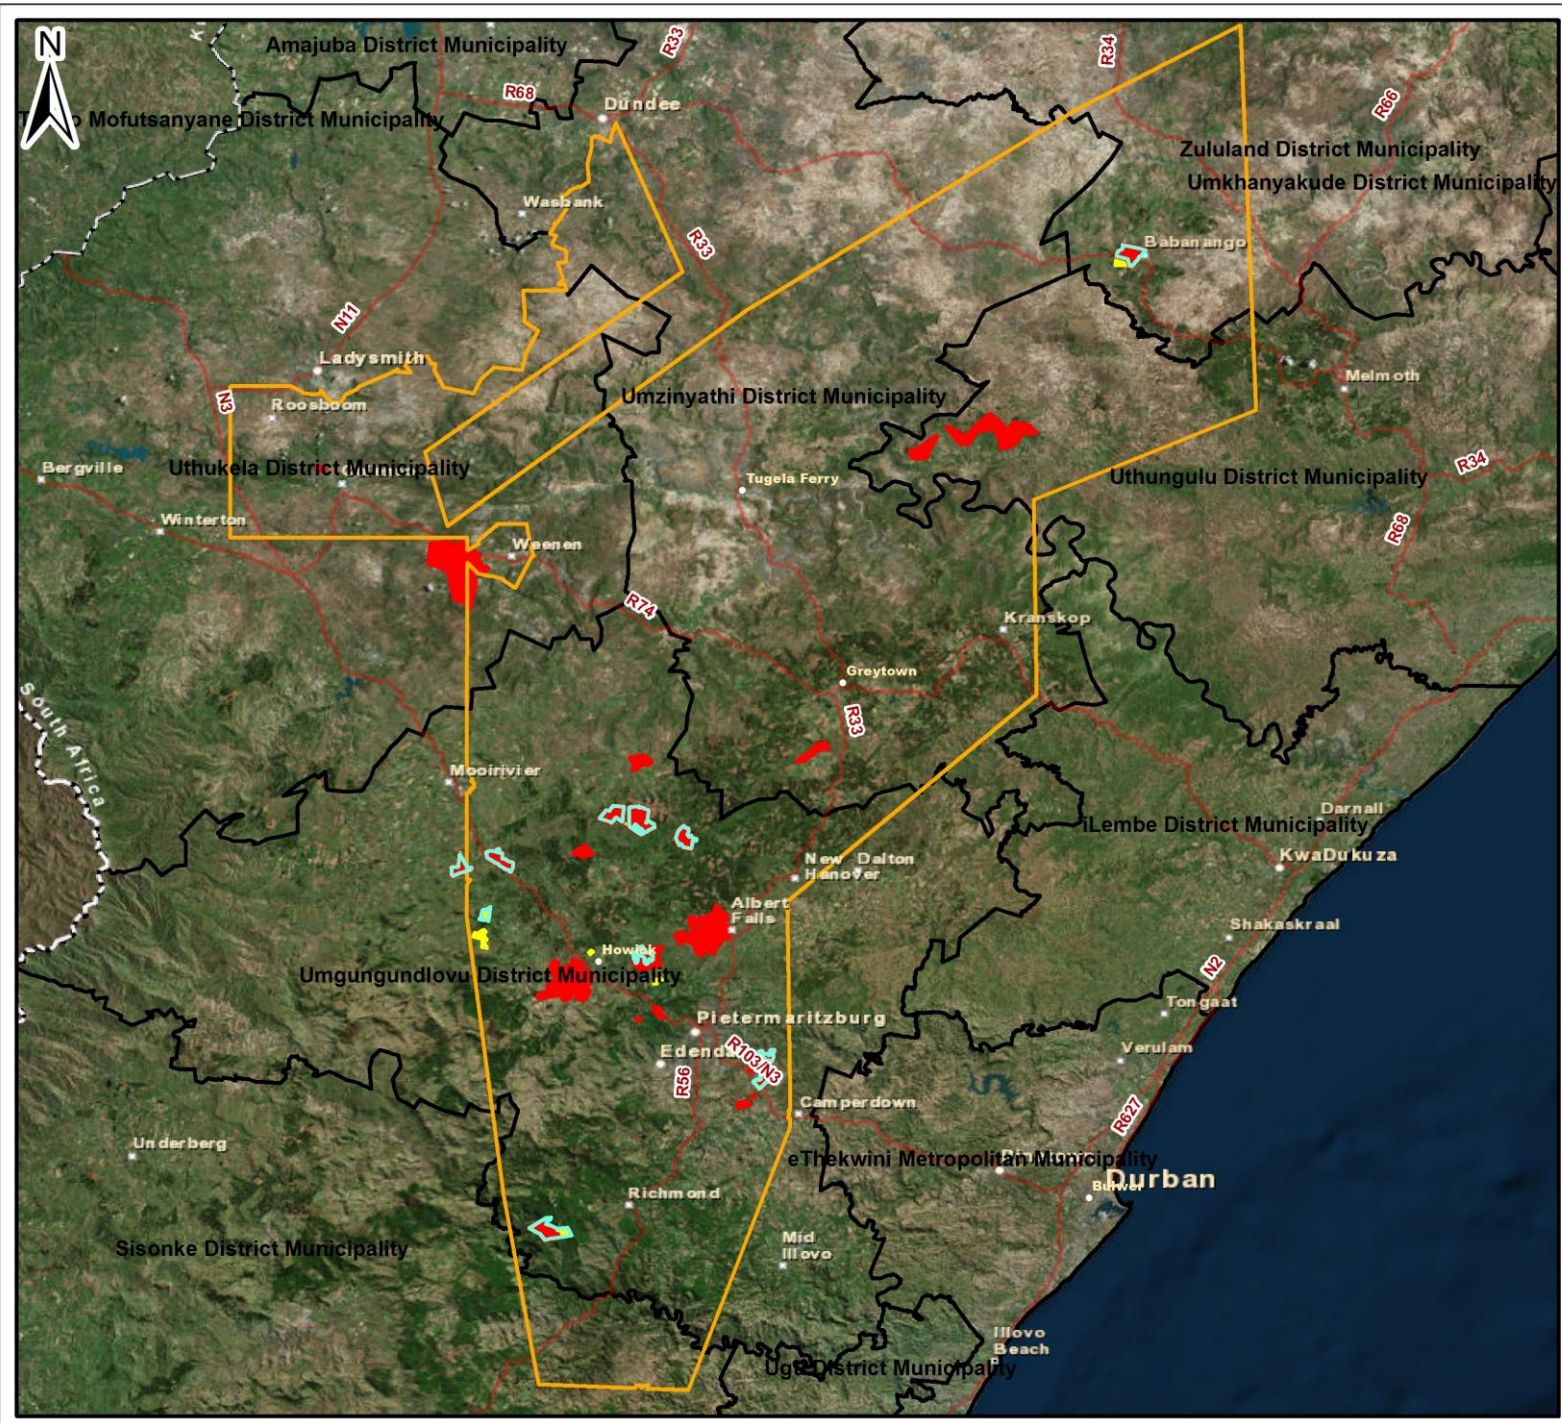

### INDLELA YOKUPHENDULA

Izimpendulo zale ncwadi zingathunyelwa ngephepha lezimvo elifakwe lapha, ngokuzihambisa ngokuqondile kanye/noma ngokuxhumana ne-SLR.

## UKUFINGQWA KWESICELO SOKUHLOLA

### OKUHLONGOZWAYO

I-Petroleum Agency South Africa isisamukele isicelo esifakwe i-Rhino Oil and Gas selungelo lokuhlola imikhiqizo ye-petroleum. Ukvamukela kwe-PASA isicelo kuvumela kuphela ukuba ofake isicelo aqhubeke nenqubo edingekayo, akusho ukuthi iyamgunyaza.

Isicelo sesigunyazo sezemvelo sahanjiswa ku-PASA ngo-Novemba 2015. Inqubo yokubheka isimo neye-EIA ibekelwe isikhathi eZiqondisweni Zokuhlolwa Komthelela Kwezemvelo zika-2014.

### OKUVAMILE

Umsebenzi wokuhlola ozothatha iminyaka engu-3 ohlongozwe i-Rhino Oil and Gas uhloselwe ukuthola ukuthi ukhona yini umthombo kawoyela noma igesi kule ndawo ongenza ukuba kuqhutshekwe nokuhlola.

**Unyaka 1:** ukuhlolwa kolwazi lokuma komhlaba ngocwaningo olubanzi. Oluningi lwalo lwazi lutholakala kuphela kulabo abanamalungelo okuhlola. Kuyokwenziwa ibalazwe lezimo zangaphansi komhlaba nokuma kwamadwala. Kuyotholakala ulwazi mayelana nokuma kongqimba lomhlaba. Kungase kwenziwe izindlela zokuhlola isimo somhlaba ngezobuchwepheshe.

**Unyaka 2:** ukuhlaziya kolwazi lwesimo somhlaba olwengeziwe kanye namathuba okusetshenziswa kokuhlaziya kwezinhlobo-vo ze-apatite fission track analysis ne-full tensor gradiometry gravity (FTG).

**Unyaka 3:** ukuthengwa kanye/noma ukwenziwa kwezinhlobo-vo zezimbangela zokuzamazama komhlaba. Umsebenzi wokuhlola wokugcina kuzoba ukumbiwa kwemigonqozo.

Akukho ukuhlola ngomfutho, ukuqhunyiswa kwemigonqozo noma ukudonswa kwamanzi okufakiwe kulo msebenzi ohlongozwayo.

### INDAWO

Uma senaba, isicelo selungelo lokuhlola sisuka e-Richmond eningizimu yaseMnambithi nase-Dundee enyakatho-ntshonalanga, sidlule empumalanga ye-Mooi River naseMtshezi. Enyakatho le ndawo idlulela empumalanga ize icishe ifike Olundi futhi ihlanganisa izindawo ezizungeze i-Tugela Ferry neNkandla. Le ndawo iyancipha ngaseningizimu, ihlanganise neNtunjambili, uMshwathi ne-Asburton kodwa ibe nomngcele osentshonalanga ye-Camperdown. Ihlanganisa amapulazi abalelwa ku-10 000 ebangeni elingamahektha angu-1 500 000. (bheka uMfanekiso ofakiwe nohlu lwamapulazi).

Imisebenzi yokuhlola umhlaba ngokoqobo iyokwenziwa emasayithini athile abaliwe kuphela. Indawo enembile yezindawo ezisophiwe ingatholakala kuphela uma i-Rhino isisiqedile isigaba sokuqala sokuhlola futhi yahlaziya ulwazi olukhona.

Indawo efakelwa isicelo ayihlanganisi zonke izindawo lapho ukunikizwa kwelungelo lokuhlola kuvinjelwe khona iSigaba 48 se-MPRDA. Zonke ezinye izindawo zifakiwe, ngisho nakuba kungase kube nesithiyo esithile esivimba umsebenzi wokuhlola. I-Rhino Oil & Gas iyoqinisekisa ukuthi imisebenzi yayo yenziwa ezindaweni ezifanele ngokomthetho nangokwemvelo

### IZINHLOLO-VO ZE-FTG

Kuzokwenziwa izinhlobo-vo ze-full tensor gradiometry gravity (FTG) ukuze kuvezwe izithombe zengaphansi komhlaba ukuze zisize ukuhlola. Izinhlobo-vo ezinjalo ziyokwenziwa endizeni futhi ngeke zidinge ukuba kungenwe emapulazini.

### IZINHLOLO-VO ZEZIMBANGELA ZOKUZAMAZAMA KOMHLABA

I-Rhino izothenga ulwazi lwembangela yokuzamazama komhlaba lapho lutholakala khona futhi ingase icele izinhlobo-vo zembangela yokuzamazama komhlaba ukuba ziveze izithombe zokuma

komhlaba. Lapho kunefrikhwensi ephansi kwenzeka amaza omsindo bese kurekhodwa amaza avelayo. Ukuhlaziya kamaza abuyayo kunikeza ulwazi ngezinhlobo zamadwala nemagesi noma uketshezi olungase lube khona ekwakhekeni kwamadwala.

I-Rhino ihlela izihlobo-vo ezingafika ku-100 km zezinhlangothi ezimbili (2D). Amathimba ezinhlobo-vo aphehla amandla amaza omsindo (esebenzisa iziqhumane, isibhamu somoya noma izinto ezindindizelisa umhlaba) bese erekhoda amaza abuyayo kuma-geophone abekwe ebangeni elithile.

Amathimba ezinhlobo-vo adinga ukukwazi ukungena emapulazini isikhashana ukuze afake imishini yezinhlobo-vo bese erekhoda ulwazi. Olayini bezinhlobo-vo bayolandela imigwaqo yokungena ekhona futhi ukuphazamiseka kuyocabangela imingcele yemvelo ekhona.

### UKUBHOLA

Kuhlelwe ukuba kumbiwe imigonqozo engengaphezu kuka-10 kuyo yonke indawo yokuhlola. Lena imigonqozo ezohambisana nongqimba lomhlaba, ehloselwe ukuhlola nje kuphela. Imigonqozo iyombiwa umshini wokubhola okwazi ukuhamba nawo obekwe elolini noma enqoleni elinganayo nomshini wokumba umgonqozo. Kuyongenwa ezindaweni okuyombiwa kuzo ngemigwaqo ekhona nezindlela zasemapulazini. Umshini wokubhola uyobe uhambisana nezinto zakhona (izimoto, izinqola, amakhompresa, amathangi amanzi, amaphaphu, omahamba-nendlwana, njll.) Umshini wokuhlola ovamile nezinto zakhona udinga indawo yokusebenzela elinganiselwa ku-1 000m<sup>2</sup>. Bheka izithombe ngezansi.

Into ephakathi emadwaleni iyokhishwa bese iyiswa elabhorethri. Amasampula ayahlolwa, achazwe bese ethestwa igesi, nezici ezihlobene nazo.

Uma ukubhola sekuqediwe, umshini wokubhola nazo zonke izinto ohamba nazo nezinto ezizudoti kuyokhishwa esayithini. Umgonqozo uyombozwa kuye ngocwaningo oluqhubekayo noma umbozwe ngosimende uma ungasadingeki.

### ABASEBENZI NENDAWO YOKUHLALA

Ukuhlola kokuqala kuyokwakha amathuba emisebenzi embalwa ngoba umsebenzi omningi unikezwe ochwepheshe ngezinkontileka. Inkampani iyoqasha abantu basendaweni ngezinga okungenzeka ngalo.

Ithimba lenhlalo-vo yokuma komhlaba lakhiwa abasebenzi abangaba ngu-20. Umshini wokubhola uvame ukulawulwa abantu abangafika ku-5. Alukho uhlelo lokuba kube nezindawo zokuhlala esayithini. Abasebenzi bayohlala emadolobheni aseduze noma ezindaweni okuvunyelwene ngazo nabanini-mhlaba.

### ISIKHATHI

Uhlelo lomsebenzi wokuhlola luhlelelwe inkathi yeminyaka engu-3. Lolu hlelo luhlukaniswe ngezigaba, futhi lapho kuphela ngempumelelo isigaba esisodwa, ludlulela kwesinye.

Izinhlobo-vo ze-FTG ziqedwa ngamahora nje embalwa. Izinhlobo-vo zokuma komhlaba zenziwa inkathi yezinyanga ezithile kodwa abasebenzi nemishini baba sesayithini inkathi emfushane. Ukumba esayithini ngayinye kungathatha izinyanga ezingu-1 kuya ku-3 ukuphela.

### UKULAWULWA KWEMVELO

Kuyobhalwa uhlelo lokulawulwa kwemvelo ukuze luchaze ukuzobophezela okudingekayo ukuqinisekisa ukuze kusetshenzwa ngendlela ebhekelela imvelo. Isici esiyinhloko salokho kuyoba ukubekelwa imingcele noma ukuvinjelwa kwemisebenzi yokuhlola kumasayithi aye ahlonzwa njengangakufanele ukuhlolwa.

Ukusungulwa, ukulawulwa nokuhlunyelelwa kwawo wonke amasayithi okuhlola kuyokwenziwa ngokuxoxisana nabanikazi bomhlaba. Inqubo yokulawula ukusebenza, imithelela ekhona nokuhlumelelisa amasayithi okuhlola iyokwenziwa ngokuvumelana

ne-EMPr evunywe i-PASA.

### UKUNGENA ENDAWENI

Kungenzeka ukuba kudingeke kungekwe ezindaweni ezimbalwa kuphela ezisendaweni ehlolwayo futhi nakhona kuyoba yisikhashana. Umhlaba okungowabantu kuyongenwa kuwo kuphela uma kutholakale imvume yabanikazi bawo kusengaphambili futhi kunesivumelwano esibhalwe phansi. Indawo okuzohlolwa kuyo ingashintshwa ukuze kuncishiswe ukuphazamiseka kubanikazi bomhlaba, abahlala kuyo, ezolimo nemvelo.

### ISIZATHU SALE PHROJEKTHI EHLONGOZWAYO

Imikhiqizo ye-petroleum isalokhu iwumthombo obalulekile wamandla. Igesi yemvelo yakhiwa ngokuyinhloko i-methane futhi iwuhlobo lwamandla ahlanzekile ngokwezinga elithile, angayiphazamisi imvelo. Ingasetshenziselwa ukuphepha ugesi noma ukunikeza ukushisa ngezinjongo zasemakhaya noma ezimbonini. Yigesi ekhishwe phansi kuphela engafakwa kalula entweni, ithuthwe iyiswe kwenye indawo futhi isetshenziswe ngokuphepha ezintweni eziningi. Uhlobo lokusetshenziswa luncike ekuthengisweni kwayo.

### UKUHLOLWA KWESIKHATHI ESIZAYO NOMA UMKHIQIZO

Isicelo samanje senzela kuphela ukugunyaza umsebenzi njengoba kuchazwe ngenhla (futhi kuchazwe kabanzi eMbikweni Wokubheka Isimo). Noma yimuphi umsebenzi wokuhlola owengeziwe wokuhlaziya umthombo okhonjiwe noma umkhiqizo wesikhathi esizayo, uyodinga enye imvume evela ku-PASA ngokuvumelana ne-MPRDA & NEMA. Izimvume ezinjalo kuyodingeka zibe nezimfuneko ezingokomthetho ezifanele ezihlanganisa ukuba kuphinde kuxoxiswane nomphakathi futhi kube khona ukuhlola kwezemvelo.

I-Rhino imi kwelokuthi akusizi ukuqagela ukuthi esikhathini esizayo le phrojekthi izoya ngakuphi ngoba kuningi okungase kwenzeke kanti ulwazi esinalo luncane kakhulu.

### IZITHOMBE

Indawo Okungenzelwa Kuyo Inhlolo-vo Ye-FTG

Umfanekiso wezinhlolo-vo zokuma komhlaba

Isibonelo semisebenzi yokubhola

Okungaphakathi edwaleni kukhishiwe ukuze kuhlaziywe

## UKUSABELA KOMPHAKATHI OSEKUBE KHONA

Isaziso nokuxoxisana nama-IAP kwaqala ngo-Okthoba 2015. Kwabanjwa imihlangano yomphakathi kuzo zonke izindawo okufakwe isicelo sazo ngo-Novemba 2015. Inqubo yokubamba iqhaza komphakathi kuze kube manje isiyi yaba nokusabela okusemqoka esicelweni. Ukusabela komphakathi **kumelene kakhulu nesicelo selungelo lokumba** futhi lokhu kuye kwabhalwa phansi.

Izinkinga eziye zaphakanyiswa ziningi kakhulu ukuba singazichaza lapha, kodwa zihlanganisa izicelo zokuba kuphinde kuxoxiswane futhi kube khona isikhathi esiningi ohlelweni lokubheka isimo ne-EIA. I-SLR yaxhumana ne-PASA ezindabeni ezisemqoka ezinhlanu ezaziphathelene nesicelo sonkana nenqubo ye-EIA. Lapha ngezansi kunikezwe ukufingqwa kodaba ngalunye nempendulo evela ku-PASA.

**Udaba 1:** Iningi labantu ababamba iqhaza kwinqubo ye-EIA bathi bamelene nale phrojekthi noma bafaka isicelo sokuphikisana nayo. Abanengi ababephikisana nayo babeka izizathu ezihlobene nokukhiqiza nokuqhumisa. Kusobala ukuthi inqubo ye-EIA ngeke ikwazi ukuxazulula lokhu kuphikisa. Iyiphi indlela ekhona yokubhekana naloku kuphikisa? I-PASA: *"Ayikho indlela ngaphansi kwe-NEMA yokubhekana nokuphikisa, kodwa-ke, njengegxenye yenqubo ye-EIA, i-EAP kumelwe icabangele izindaba ezaphakanyiswa futhi ixoxe nalabo abafanele ukuze ixazulule noma icacise izindaba ezaphakanyiswa. ISigaba 10 se-MPRDA sinikeza i-Regional Mining Development and Environmental Committee ukuba icabangele ukuphikisa okutholakele mayelana nezicelo futhi yeluleke uNgqongqoshe."*

**Udaba 2:** Ama-IAP amaningi afune ukuba inqubo ye-EIA yamanje inikeze imininingwane mayelana nokukhiqiza futhi yenze ukuhlola kwemithelela ehlobene nokukhiqiza engase ibe khona (kuhlanganise nokuqhumisa), ngisho nakuba isicelo samanje singahlanganisi ukuhlola okwengeziwe noma ukukhiqiza. Siyini isiqondiso se-PASA mayelana nesimo se-EIA yamanje?

I-PASA: *"I-EIA yamanje ihambisana nezinhlelo zomsebenzi wokuhlola ezihlongozwayo ezahanjiswa kanye nesicelo selungelo lokumba. Uma umfaki sicelo ayefuna ukwenza noma yimiphi imisebenzi engale kwesimo sohlelo lomsebenzi ohlongozwayo, isigunyazo sezemvelo semisebenzi enjalo kuyodingeka sitholakale. Le nqubo inikeza ukuxoxisana okwengeziwe nama-IAP kanye nokuhlola okubanzi kwezinto ezihlobene."*

**Udaba 3:** Ama-IAP amaningi aye abuza ukuthi kungani i-Karoo Strategic Environmental Assessment (SEA) yamanje ingasebenzi kuzo zonke izindawo zaseNingizimu Afrika. Ngaphezu kwalokho, ama-IAP aye afuna ukuba zonke izicelo zelungelo lokumba nezinqubo ezihlobene ne-EIA zimise kuze kuqedwe i-SEA. Yaphendula yathini i-PASA kulokhu?

I-PASA: *"Isimo nalokho okubhekiselwa kukho ku-SEA kuyaphothulwa futhi ukuhlola sekuqalile. Imibuzo ku-SEA SLR Consulting (Africa) (Pty) Ltd*

*kufanele iqondiswe eMnyangweni Wezemvelo njengomqondisi waleyo nqubo."*

**Udaba 4:** Ama-IAP amaningi aye aphikisa ngokuthi isikhathi esikhona ohlelweni lwe-EIA lwamanje asanele ukuvumela ukuxoxisana komphakathi okudingekayo endabeni yesicelo esikhulu kangaka. Ingabe i-PASA iyonikwandisa isikhathi senqubo ye-EIA ukuze ivumele le phrojekthi isabele kulezi zindaba futhi ishintshe inqubo yokubamba iqhaza komphakathi ngendlela efanele?

I-PASA: *"I-Ejensi ingazicabanagela izicelo ezitholakele ezibhalweni phansi ezivela ku-EAP noma ofake isicelo sokwandiswa kwesikhathi uma lezo zicelo zihambisana nalokho okushiwo eZiqondisweni Ze-EIA."*

Ukuze ifake ukuxoxisana komphakathi okwengeziwe nophenyo ukuze ikhulise inqubo yokubheka isimo, i-SLR yafaka isicelo ku-PASA sokwandiswa kwesikhathi. Ngo-Disemba 2015, i-PASA yanikeza isikhathi esengeziwe kwinqubo yokubhekwa kwesimo, okwakhambisana nemfuneko yokuthi umbiko wokubhekwa kwesimo wokucina ube usuhanjisiwe ku-PASA ngomhla ka-20 Ephreli 2016.

**Udaba 5:** Ama-IAP aye aphakamisa ukukhathazeka mayelana nokuthi izindawo/amasayithi amaningi asezindaweni okufakwe isicelo sazo avikelwe ngokuqondile noma awahambisani nokuhlola kanye/noma ukukhiqizwa kukawoyela negesi. Kwezinye izimo umthetho uyawuvimbela umsebenzi wokuhlola ukuba wenzeke kulezi zindawo. Kuye kwabuzwa umbuzo wokuthi "kungani wenza i-EIA ukuze uthole amalungelo okuhlola ezindaweni lapho noma iyiphi igesi, uma ibingatholakala, ingeke ikwazi ukumbiwa ngenxa yemigoqo ebekwe umthetho wendawo evikelwe neSiqondiso 122 seZiqondiso Ze-Petroleum (GN R 466 of 2015) ehlobene nendawo yemithombo?" Bafuna ukuba lesi sicelo simiswe, futhi zonke izindawo ezingahambisani nokufanele/ezingekho emthethweni zisuswe futhi kuqaliswe i-EIA entsha yale ndawo ebuyekeziwe. Yaphendula yathini i-PASA kulokhu?

I-PASA: *"I-EAP inesibopho sokuhlonza izici zemvelo, sokuhlola izingozi nomthelela futhi inikeze izinyathelo ezifanele zokudambisa imithelela emibi. Ekwenzeni kanjalo, i-EAP inesibopho sokucabangela nokusebenzisa lokho okushiwo eziqondisweni zezemvelo ezifanele. I-PASA, njengomlawuli, ayinalo igunya lokuqondisa i-EAP noma ofake isicelo ukuba amise i-EIA ukuba ikhiphe izindawo ezingafanele. Isicelo siyohlaziywa ngokuvumelana nalokho okushiwo i-NEMA neminye imithetho esebenzayo. Le Ejensi iyokwenza iziphakamiso eziyohambisana namalungiselelo afanele okuqinisekisa ukuthi imvelo eshiwo ithola ukuvikeleka okudingekayo."*

Lesi sicelo kanye nenqubo yokubheka isimo ne-EIA kukozwenziwa ngokuvumelana nesiqondiso se-PASA.

## IMITHELELA YEZEMVELO ENGASE IBE KHONA

Lezi zindaba ezilandelayo nemithelela kuyizibonelo zokukhathazeka okuhlobene nokuhlola. Ukufakwa kwazo kulo luhla akuhlobene namathuba okuba khona noma akukhombisi ukubaluleka okungase kube khona. Izindaba ezifanele ezatholakala phakathi nokubhekwa kwesimo zizophenywa njengengxenye yenqubo ye-EIA.

**Ukuphepha Epulazini** – Ukungena kwabantu abangaziwa emapulazini kungase kube nomthelela ekuvikelekeni kwamapulazi. Ukusebenzisa izinqola nemishini emikhulu kungase kube nezingozi ezithile kwezokuphepha. Imililo yequbulo ingase ibe nomthelela oyingozi kwezokuphepha kokubili kubantu nezilwane.

**Inggalasizinda Yepulazi** – imigwaqo yamapulazi, amasango nothango kungase kulimale phakathi nomsebenzi wokuhlola.

**Amandla enhlabathi nomhlaba**– imisebenzi ezindaweni ezibangelwa ukuzamazama komhlaba nokubhola ingase ibe nomthelela emandleni enhlabathi nomhlaba uma ingalawulwa kahle futhi ungahlunyelelisa kabusha umhlaba. **Izinhlobonhlobo zezidalwa eziphilayo** – imisebenzi ezindaweni ezibangelwa ukuzamazama komhlaba nokubhola ingase iphazamise kanye/noma ilimaze izitshalo, izindawo zezilwane kanye nokusebenza kwemvelo okuhlobene nazo, kuhlanganise nokuphazamisa izinhlobo zezitshalo nezilwane ezivikelwe.

**Amanzi aphezulu** – Imisebenzi ehlongozwayo ezindaweni ezibangelwa ukuzamazama komhlaba nokubhola ingase ingcolise imithombo yamanzi aphezulu ngokusebenzisa noma ngokukhipha izinto ezingcolisayo.

**Amanzi angaphansi komhlaba** – ukubhola okuhlongozwayo kungase kusebenzise futhi kungcolise imithombo yamanzi angaphansi komhlaba, okuyinto engase ibe nomthelela ekubeni khona kwabanye abasebenzisi bamanzi angaphansi komhlaba nesimiso sezinto eziphilayo.

**Umoya** – Le phrojekthi ehlongozwayo ingase ibe nomthelela ekungcoleni komoya, ikakhulukazi ngokukhipha uthuli ezimotweni emigwaqweni yobhuqu nokukhipha igesi emigonqozweni.

**Umsindo nokundizela** – Le phrojekthi ehlongozwayo ingase ibangele umsindo ngesikhathi kubholwa. Izinhlobo-vo zezindawo ezibangelwa ukuzamazama komhlaba zingase zibangele ukulimale ezinhlobo futhi ziphazamise imfundo nezilwane zasendle.

**Ukubukeka** – ukubekwa kwemishini ezindaweni ezibangelwa ukuzamazama komhlaba nokubhola kungase kube nomthelela ekubukekeni kwendawo okwesikhashana.

**Amagugu esizwe** – le phrojekthi ehlongozwayo inomthelela olinganiselwe wokulimaza amagugu esizwe.

**Ukusetshenziswa komhlaba** – Izindawo ezibangelwa ukuzamazama komhlaba nokubhola zingase ziphazamisa nokusetshenziswa komhlaba ngalesi sikhathi.

**Ezenhlalo nezomnotho** - Imithelela emihle ihlanganisa ukwakhiwa kwemisebenzi nokufukulwa komnotho wendawo nowesifunda. Imithelela emibi kwezenhlalo nakwezomnotho engase ibe khona ihlanganisa amathuba okwanda kobugebengu, ukusabalala kwezifo nengcindezi ezinsizakalweni zokusekela.

**Imithelela eyandayo neyesikhathi esizayo** – nakuba umsebenzi wamanje ungase ube nemithelela elinganiselwe, ukukhathazeka okukhona ukuthi ukuvunywa kwalo msebenzi kungase kuvule indlela yamaphrojekthi esikhathi esizayo, amakhulu kule ndawo. Kunokukhathazeka kokuthi lokhu

kungase kube nomthelela omkhulu. Kungase kube nzima ukumisa imvume uma kakade bese kutshalwe imali.

## UKUHLOLWA KWEZEMVELO

Inqubo yokuhlola iyohlosa ukwenza lokhu:

- ukunikeza ulwazi ngephrojekthi nangezindlela ezihlukile
- ukunikeza ulwazi ngendawo yemvelo engase ithintekwe;
- ukunikeza ukuhlola kokubaluleka kwemithelela ekhonjiwe;
- ukubika ngezinyathelo zokulawula ezidingekayo ukuze kuncishiswe imithelela ibe sezingeni elamukelekayo, kanye
- nokuvumela ukuba kwenziwe izinqumo ezisekelwe olwazini, ezisobala kanye nokulandisa kwamagunya afanele.

### IZINYATHELO KWINQUBO YOKUHLAZIYA

#### Isigaba Sangaphambi Kokufaka Isicelo (Septemba kuya ku-Novemba 2015)

Hlonza futhi utshele wonke ama-IAP namagunya alawulayo ngephrojekthi ehlongozwayo (ngezingxoxo eziqondile, ukukhangisa kumaphephandaba, izaziso zasesayithini, yile ncwadi)

Kutholwe izinkinga nezimpendulo ezivela kuma-IAP. Kuhnjiswe isicelo ku-PASA (ku-NEMA)

#### Isigaba Sokubhekwa Kwesimo (Novemba 2015 kuya ku-Ephreli 2016)

Ukuqhubeka nezingxoxo nokuthola izimpendulo.

Ukuhlonzwa kwezindaba okufanele zibhekelelwe.

Kuchazwe izinkinga ezisele nezikhombo zomsebenzi ukuze kubhekane nemithelela engase ibe khona

Kwakhiwe umbiko wokubheka isimo

Kwenziwe uhlaka lombiko wokubheka isimo utholakale ukuze ubuyekwe ama-IAP namanye amagunya alawulayo.

Kuqoqwe izimvo zama-IAP, kufakwe ulwazi lwamuva eMbikweni Wokubheka Isimo bese kuthunyelwa eMagunyeni enza isinqumo (engakedluli umhla ka-20 Ephreli).

#### Isigaba Se-EIA ne-EMP (ngoMeyi kuya kuSeptemba 2016)

Ukwenziwa kwanoma yiluphi ucwaningo lochwepheshe.

Kuhlolwe imithelela yephrojekthi ehlongozwayo bese kwenziwa umboko we-EIA ne-EMP.

Yenziwe itholakale kuma-IAP namagunya alawulayo ukuze ayibuyekeze.

Kubanjwe imihlangano yemibiko yomphakathi engase ibe khona. Kuqoqwe izimvo zama-IAP, kufakwe ulwazi lwamuva ku-EIA ne-EMP bese kuthunyelwa eMagunyeni enza isinqumo.

#### Isinqumo Nokufaka Isikhalazo

I-PASA izobuyekisa i-EIA ne-EMP bese yenza isinqumo.

Yazise ama-IAP namagunya alawulayo.

Inqubo yokufaka izikhalazo ngokweZiqondiso Zokufaka Isikhalazo

### BHALISA BESE UVEZA UVO

Bonke abaneqhaza bayamenywa ukuba babhalise njengeBanomdlandla Nabathintekayo (IAP). Kumelwe ubhalise njenge-IAP uma ungathanda ukuthola ulwazi olwengeziwe noma ufisa ukubamba iqhaza ekuhlolweni kwezemvelo kwephrojekthi. Ukuze ubhalise, noma uveze noma yiziphi izinkinga ezithinta ezemvelo ezimayelana nale phrojekthi, sicela ugcalise iFomu Lokuphendula bese ulibuyisela ku-SLR ngokushesha. Ama-IAP abhalisiwe enqolobaneni yale phrojekthi ayothola izaziso mayelana nemihlangano eyengeziwe, izinkathi zokubuyekweza kwemibiko nezinqumo.

# Rhino Oil and Gas Exploration South Africa (Pty) Ltd

## BACKGROUND INFORMATION ON PROPOSED PETROLEUM EXPLORATION ON VARIOUS FARMS IN KWAZULU-NATAL (291 ER)

Version 2 - January 2016

### INTRODUCTION

Rhino Oil and Gas Exploration South Africa (Pty) Ltd has lodged an application for an exploration right with the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act, 28 of 2002 (MPRDA). Minerals included in the application are oil, gas, condensate, coal bed methane, helium and biogenic gas. The exploration area is broad and encompasses large parts of the central KwaZulu-Natal (see Figure 1).

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

### ENVIRONMENTAL AUTHORISATION PROCESS

Prior to the granting of an Exploration Right for the proposed project an environmental assessment process must be conducted and approved by PASA in terms of the National Environmental Management Act, 107 of 1998 (NEMA). Rhino Oil and Gas has made an application to PASA for environmental authorisation. The 2014 Environmental Impact Assessment Regulations (GN R982 promulgated in terms of NEMA) are applicable as the need for an exploration right triggers activity 18 in Listing Notice 2 (GN R984). The EIA Regulations define the assessment process which includes: a scoping phase, environmental impact assessment (EIA) phase and an environmental management programme (EMPr). Public participation is a key component of the environmental assessment process.

SLR Consulting (Pty) Ltd (SLR), an independent firm of environmental consultants, has been appointed by Rhino Oil & Gas to manage the environmental assessment process. This document has been prepared by SLR to inform you about:

- \* the application and proposed project activities;
- \* the environmental assessment process to be followed; and
- \* how you can have input into the environmental assessment.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow.

### FRACKING or NOT?

No hydraulic fracturing (fracking) is included in the 3-year exploration programme proposed. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction.

If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point. This includes:

1. Complete the early phase exploration as proposed and approved through this application.
2. If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.
3. Undertake the detailed phases of exploration as approved.
4. If the detailed exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.
5. Develop the production project.

All future exploration or production activities that may arise if resources are discovered are therefore beyond the scope of the current scoping and EIA process.

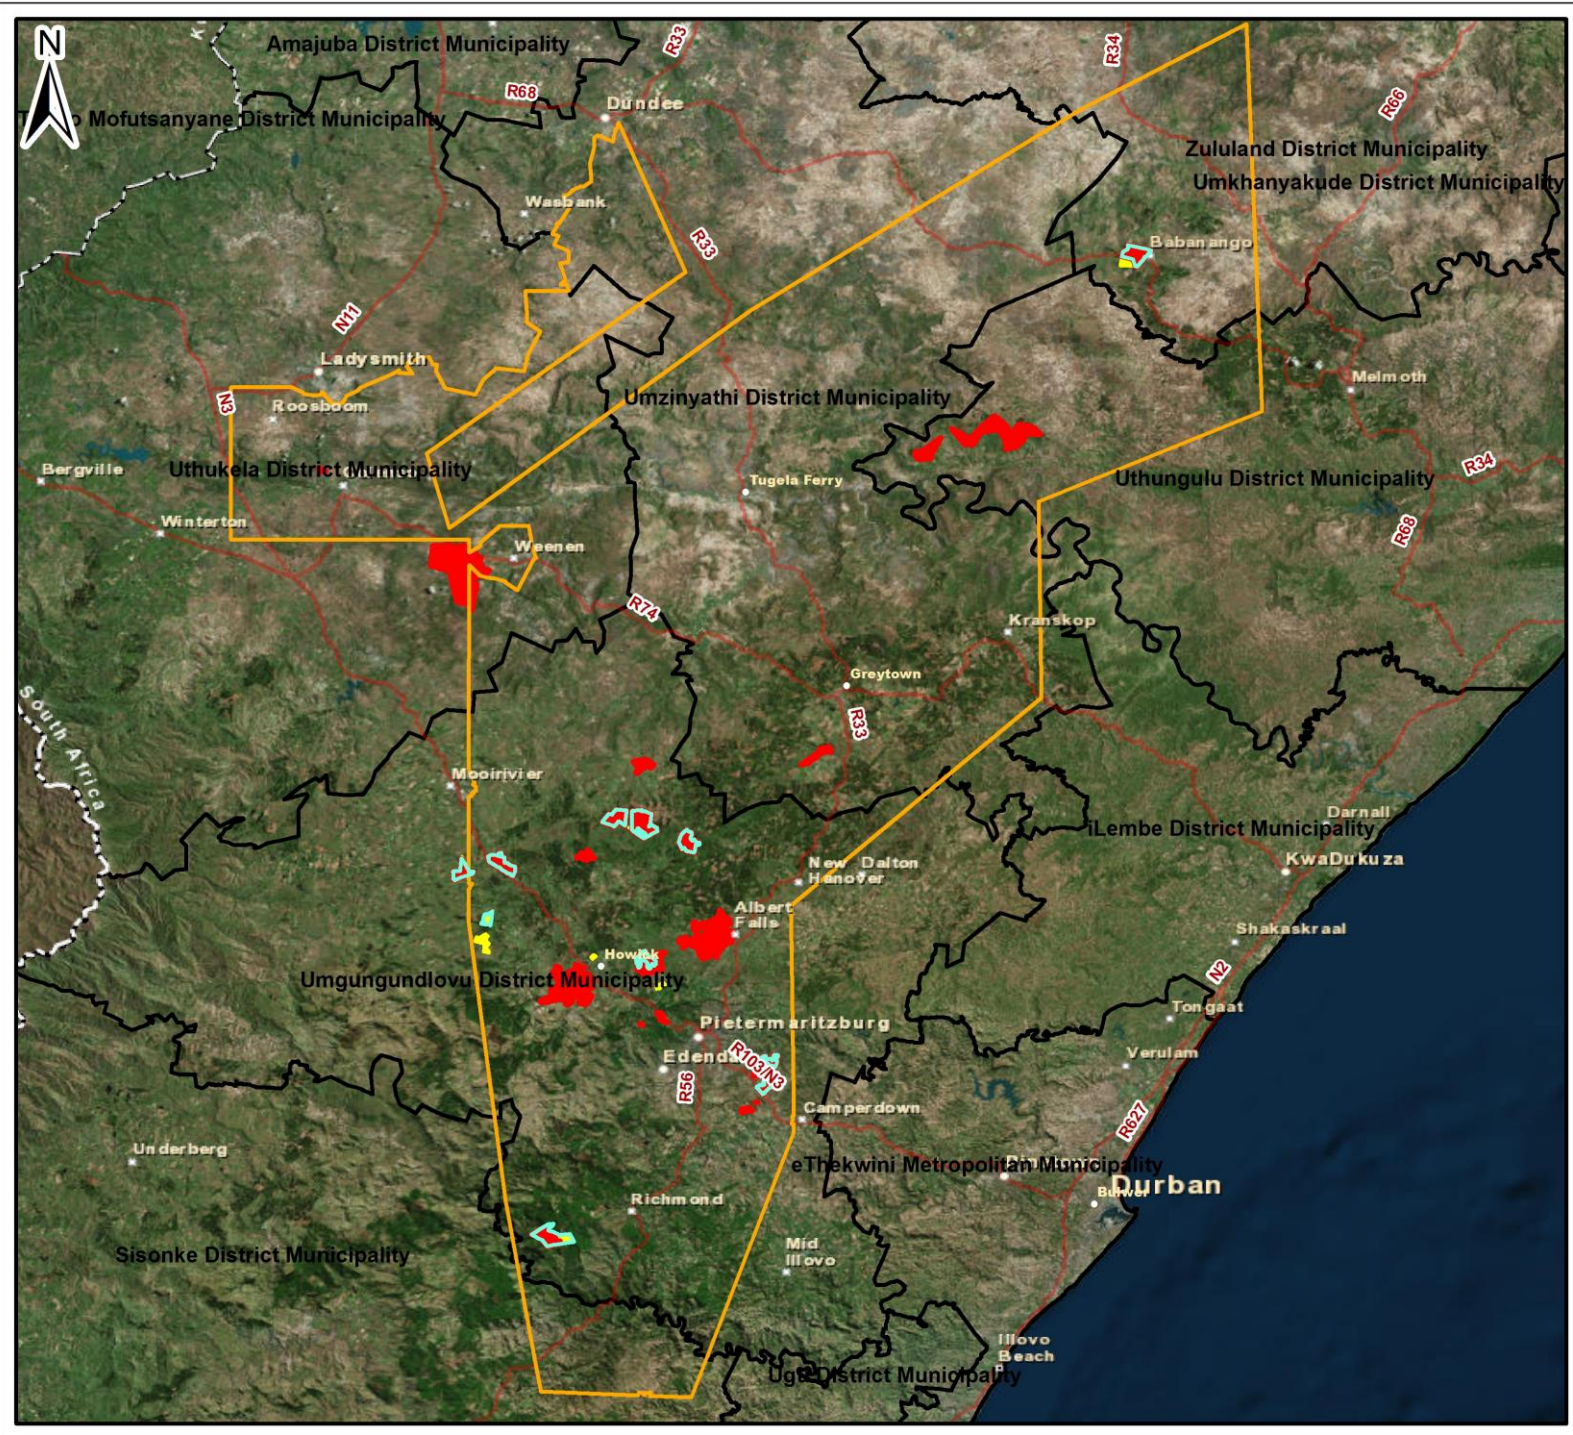

### HOW TO RESPOND

Responses to this document can be submitted by means of the attached comments sheet, by direct submission and/or through communication with SLR.

<p><b>BRIEF OVERVIEW OF PROPOSED EXPLORATION</b></p>	<p>exploration. Such surveys will be flown in fixed wing aircraft and require no access to farms.</p>
<p><b>APPLICATION</b></p> <p>The Petroleum Agency South Africa has accepted the application lodged by Rhino Oil and Gas for an exploration right for petroleum products. Acceptance of the application by PASA only permits the applicant to continue with the necessary process and does not constitute authorisation. An application for environmental authorisation was submitted to PASA in November 2015. The scoping and EIA process is subject to the timeframes prescribed in the 2014 Environmental Impact Assessment Regulations.</p>	<p><b>SEISMIC SURVEYS</b></p> <p>Rhino will purchase seismic data where available and may commission seismic surveys to image subsurface geology. During a survey low frequency acoustic waves are generated and the reflected waves recorded. Analysis of the return waves provides information about rock types and possible gases or fluids in rock formations.</p> <p>Rhino is planning up to 100 km of two-dimensional (2D) surveys. Survey teams generate controlled acoustic energy (using explosives, air gun or seismic vibrator) and record the return waves in geophones laid at set spacing in a linear alignment.</p> <p>Survey teams require short-term access to farms to place survey equipment and record the data. Survey lines will follow existing access roads and disturbances with due consideration of environmental constraints.</p>
<p><b>GENERAL</b></p> <p>The 3-year exploration work programme proposed by Rhino Oil and Gas is aimed at determining if there is an oil or gas resource in the area that would warrant further exploration.</p> <p><b>Year 1:</b> the evaluation of geological data through a comprehensive desk-top study. Much of this data is only available to parties who hold exploration rights. Sub-surface structural features and stratigraphy will be mapped. Data on source-rock geochemistry will be acquired. Geological models may be developed.</p> <p><b>Year 2:</b> further geochemical data analysis as well as the possible use of apatite fission track analysis and full tensor gradiometry gravity (FTG) surveys.</p> <p><b>Year 3:</b> purchase and/or undertaking seismic surveys. The final exploration activity would be the drilling of core boreholes at target sites identified from the earlier work.</p> <p>No pressure testing, hydraulic fracturing or water abstraction is included in the proposed exploration work.</p>	<p><b>DRILLING</b></p> <p>A maximum of 10 core boreholes are planned across the exploration area. These are stratigraphic wells with no purpose beyond exploration. Boreholes would be drilled by a truck or trailer mounted, mobile drilling rig very similar in size to a water borehole rig. Drill sites will be accessed using existing roads and farm tracks. The drill rig will be accompanied by supporting equipment (vehicles, trailers, compressors, water tanks, pumps, caravan etc). A typical exploration rig and equipment requires an operating area of approximately 1 000 m<sup>2</sup>. See photos below.</p> <p>Rock core will be extracted from the target strata and removed to a laboratory. Samples will be examined, described and tested for gas related properties.</p> <p>Once drilling is completed the rig, all associated equipment and waste products will be removed from site. The borehole will be capped pending further investigation or sealed with cement if not required further.</p>
<p><b>LOCATION</b></p> <p>In broad terms the exploration right application extends from Richmond in the south to Ladysmith and Dundee in the north-west, passing just eastwards of Mooi River and Estcourt. In the north the area extends east almost to Ulundi and includes the regions around Tugela Ferry and Nkandla. The extent of the area narrows toward the south, including Kranskop, New Hanover and Asburton but being bounded just west of Camperdown. It includes nearly 10 000 farms over an area of ~ 1 500 000 ha. (see attached Figure and list of farms).</p> <p>Physical, on-the-ground exploration activities will only be undertaken at a limited number of sites. The exact location of the target sites can only be determined once Rhino has completed the initial phases of exploration and examined the available data.</p> <p>The application area excludes all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA. All other properties are included, even where a constraint may restrict exploration activity. Rhino Oil &amp; Gas will ensure that their activities are only undertaken at sites where it is lawful and environmentally responsible to do so.</p>	<p><b>STAFF AND HOUSING</b></p> <p>Early phase exploration will create relatively few job opportunities as most work is contracted to specialist service providers. The company will recruit locally as far as possible.</p> <p>A seismic survey team comprises about 20 staff. A drill-rig is normally manned by a crew of up to 5 persons. No on site housing facilities are planned. Staff will be accommodated in nearby towns or at locations agreed with land owners.</p>
<p><b>FTG SURVEYS</b></p>	<p><b>TIMING</b></p> <p>The exploration work programme is planned over a 3 year period. The programme is divided in phases with successful completion of one phase informing the next.</p> <p>FTG surveys are completed in a matter of hours. Seismic surveys are undertaken over a period of months but the personnel and equipment are on site for short periods. Drilling at each site can take 1 to 3 months to complete.</p>
<p>Full tensor gradiometry gravity (FTG) surveys will be undertaken to image subsurface geology in order to aid</p>	<p><b>ENVIRONMENTAL MANAGEMENT</b></p> <p>An environmental management programme will be written</p>

to prescribe commitments needed to ensure environmentally responsible operations. A key aspect will be the restriction or prohibition of exploration activities at sites which have been identified to be incompatible with exploration.

The establishment, management and rehabilitation of all exploration sites will be done in consultation with land owners. The process of managing the operations, the impacts thereof and rehabilitating the exploration sites will be conducted in terms of the EMP approved by PASA.

**LAND ACCESS**

It is likely that access will be required to only a few of the properties within the exploration area and then for a short period. Private property will only ever be accessed with prior consent of the landowner and then in terms of a written agreement..

The locality of exploration sites is largely flexible and can be adapted to minimise disturbance to land owners, occupiers, agriculture and the environment.

**MOTIVATION FOR THE PROPOSED PROJECT**

Petroleum products remain a vital source of energy. Natural gas comprises mostly methane and is a relatively clean, environmentally friendly form of energy. It can be used to generate electricity or provide heat for domestic and industrial purposes. Once extracted gas can be easily contained, transported and safely used in many applications. The type of downstream use is entirely dependent on the commercial scale of the resource.

**FUTURE EXPLORATION OR PRODUCTION**

The current application is only to authorise the work as described above (and in detail in the Scoping Report). Any further exploration work to evaluate an identified resource or a future production would require further approval from PASA in terms of the MPRDA & NEMA. Such approvals will be subject to the relevant legal requirements which include further public consultation and environmental assessment.

Rhino maintains that is not useful to speculate on the possible future direction of the project as the range of options is vast and the available information very limited.

## PUBLIC RESPONSE TO DATE

Notification to and consultation with IAPs commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the application. Overall the public response is very much **opposed to the exploration right application** and this has been documented.

The issues that have been raised are too numerous to elaborate on here, but included calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule. SLR consulted with PASA on five key issues that were material to the overall application and the EIA process. A summary of each issue and an extract of the response from PASA are provided below :

**Issue 1:** Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

PASA: *"There is no mechanism under NEMA to address objections, however as part of the EIA process the EAP must consider issues raised and engage with respective parties to resolve or provide clarity on issues raised. Section 10 of the MPRDA provides for the Regional Mining Development and Environmental Committee to consider and advise the Minister on objections received in respect of applications."*

**Issue 2:** Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

PASA: *"The current EIA is aligned with the proposed exploration work programme submitted with the application for an exploration right. If the applicant wanted to pursue any activities beyond the scope of the proposed work programme then environmental authorisation for such activities would have to be obtained. This process provides for further engagement with IAPs and in-depth assessment of the associated issues."*

**Issue 3:** Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

PASA: *"The scope and terms of reference for the SEA are finalised and the assessment has commenced. Queries on the SEA should be directed to the Department of Environmental Affairs as the driver of that process."*

**Issue 4:** Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

PASA: *"The Agency can consider requests received in writing from the EAP or applicant to extend the timeframe provided that the requests comply with the provisions of the EIA Regulations."*

In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20th of April 2016.

**Issue 5:** IAPs have raised the concern that many properties/sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas. In some instances legislation prevents exploration work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

PASA: *"The EAP has the responsibility to identify environmental attributes; to assess the risks and impacts and provide appropriate mitigation measures. In doing so the EAP has the obligation to consider and apply the provisions of the relevant environmental legislation. PASA, as the regulator, has no authority to direct the EAP or applicant to stop the EIA to remove incompatible areas. The application will be evaluated in line with the provisions of NEMA and other relevant legislation. The Agency will make recommendations that will be aligned with the relevant provisions to ensure that specified environment receives the necessary protection."*

The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA.

## POTENTIAL ENVIRONMENTAL IMPACTS

The following issues and impacts are examples of concerns related to exploration. Their inclusion in this list is no relation to the probability of occurrence nor an indication of possible significance. Relevant issues identified during scoping will be investigated as part of the EIA process.

**Farm Safety** – Access by unknown persons to farms has the potential to influence security on farms. Operating heavy vehicles and equipment may pose safety risks. Run away fires may present a potential safety risks for both people and livestock.

**Farm Infrastructure** – farms roads, gates and fences may be damaged during exploration activity.

**Soil and land capability**– activities at the seismic and drill sites may affect soils and land capability if poorly regulated and not rehabilitated.

**Biodiversity** – activities at the seismic and drill sites have the potential to disturb and/or destroy vegetation, habitat units and related ecosystem functionality, including the disturbance of protected species.

**Surface water** – The proposed activities at the seismic and drill sites has the potential to pollute surface water resources through consumptive use and the discharge of contaminants.

**Groundwater** – the proposed drilling has the potential to consume and contaminate groundwater resources which could impact availability to other groundwater users and the ecosystem.

**Air** – The proposed project has the potential to contribute to air pollution, particularly through dust emissions from vehicles on gravel roads and the release of gas from boreholes.

**Noise and vibrations** – The proposed project has the potential to cause noise pollution during drilling activities. Seismic surveys may cause damage to structures and disturb livestock and wildlife.

**Visual** – the placement of seismic and drilling equipment has the potential to create short-term visual impacts.

**Heritage resources** – the proposed project has limited potential to damage heritage resources.

**Land use** –The seismic and drill sites may conflict with land use for the duration.

**Socio-economic** – Positive impacts include limited job creation and stimulation of the local and regional economy. Potential negative socio-economic impacts include potential for increased crime, spread of disease and pressure on support services provision.

**Cumulative and future impacts** – although the current work may have limited impacts, a concern is that

approval of this work could open the way for future, larger-scale projects in the area. There is concern that these may have much greater impact. Approval might be difficult to stop if investment has been made.

## ENVIRONMENTAL ASSESSMENT

The assessment process will aim to:

- provide information on the project & alternatives
- provide information on the potentially affected environment;
- provide an assessment of the significance of the identified impacts;
- report on management measures required to mitigate impacts to an acceptable level; and
- allow for informed, transparent and accountable decision-making by the relevant authorities.

### STEPS IN THE ASSESSMENT PROCESS

#### Pre Application phase (September to November 2015)

Identify and inform IAPs & regulatory authorities of the proposed project (via direct consultation, newspaper advertisements, site notices, this document)  
Receive issues and responses from IAPs.  
Submit application to PASA (ito NEMA)

#### Scoping phase (November 2015 to April 2016)

Continued consultation and receipt of responses.  
Identify issues that need to be addressed.  
Define outstanding issues and terms of reference for work to address potential impacts  
Compile scoping report  
Make draft scoping report available for review by IAPs and other regulatory authorities.  
Collect IAP comments, update Scoping Report and forward to decision making Authorities (by 20 April).

#### EIA and EMP phase( May to September 2016)

Undertake any specialist investigations.  
Assess impacts of proposed project and compile EIA and EMP report.  
Make this available to IAPs and regulatory authorities for review.  
Host possible public-feedback meetings.  
Collect IAP comments, update EIA and EMP and forward to decision making Authorities.

#### Decision and Appeal

PASA to review EIA and EMP and make a decision.  
Notify IAPs and regulatory authorities.  
Appeal process in terms of Appeal Regulations

## REGISTER AND COMMENT

All stakeholders are invited to register as Interested & Affected Parties (IAP). You must register as an IAP if you would like more information or wish to participate in the environmental assessment of the project.

To register, or to raise any environmental issues or concerns regarding the project, please complete the Response Form and return it to SLR at your earliest convenience. IAPs registered on the project's database will receive notification of further meetings, report review periods and the decision.

# Rhino Oil and Gas Exploration South Africa (Pty) Ltd

## BACKGROUND INFORMATION ON PROPOSED PETROLEUM EXPLORATION ON VARIOUS FARMS IN KWAZULU-NATAL (291 ER)

### **ATTENTION: LAND OWNER**

Dear Sir/Madam

**NOTICE OF APPLICATION FOR ENVIRONMENTAL AUTHORISATION IN SUPPORT OF AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT,**

**GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

Please be informed that Rhino Oil and Gas Exploration South Africa (Pty) Ltd has lodged an application for an **exploration right** to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act, 2002. Rhino Oil and Gas proposes to undertake early-phase exploration for oil and gas which may be located underground within suitable geological strata. The purpose is to determine the presence of a petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, seismic surveys and the drilling of less than 10 core boreholes for determining stratigraphy. No hydraulic fracturing or fracking is proposed.

Rhino Oil and Gas is required to make an application for **environmental authorisation** of the exploration activities in terms of Chapter 5 of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). The application must be subject to a scoping and environmental impact assessment process as stipulated in the EIA Regulations (GNR 982, 8 December 2014).

SLR Consulting (South Africa) (Pty) Ltd are appointed as independent environmental consultants responsible for the public participation and environmental assessment required to inform a decision on the environmental authorisation. As part of the initial phase of this work we are distributing information to as many interested or affected parties as possible. Through various resources we have obtained contact details for owners of land and potential stakeholders. We continue to acquire such details. The project is being advertised in local newspapers and through notices placed in towns within the area.

Our information leads us to believe that you may be an owner or occupier of land within the exploration right application area or a stakeholder with interest in the application. We would thus like to notify you of the application and provide you with introductory information on the proposed exploration project. The Background Information Document explains the proposed project, outlines the application process and includes a map and the names of all farms included in the application area.

Please register with the public participation office should you be an interested or affected party. You must register if you wish to participate in the environmental assessment process for the project.

Please also pass this document on to any other persons whom you know reside in or near to the exploration right application area. We welcome any comment or questions.

Please take note of the following public meeting schedule:

<b>Date and Time</b>	<b>Venue</b>
Monday 2 Nov at 09h30	Ashburton Public Hall
Monday 2 Nov at 14h30	Richmond Agricultural Hall
Tuesday 3 Nov at 09h30	Imvunolu Secondary School
Tuesday 3 Nov at 14h30	Lions River Polo Club
Wednesday 4 Nov at 09h30	Colenso Public Hall
Wednesday 4 Nov at 14h30	Mooi River Country Club
Thursday 5 Nov at 09h30	New Hanover Public Hall
Thursday 5 Nov at 14h30	Greytown Lodge Conference Hall
Friday 6 Nov at 09h30	Mthembu Community Hall
Friday 6 Nov at 14h30	V.A Makhoba Hall

Yours faithfully

### **ATTENTION: REGULATORY AUTHORITY**

Dear Sir/Madam

**UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

#### **Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

**Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at <ftp.slrconsulting.co.za>  
username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

**Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

**Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The

issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number

of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

**Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

Yours faithfully

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further.

The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

### **Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

### **Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

**Issue 1:** Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

**Issue 2:** Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

**Issue 3:** Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right

applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

### **Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

### **Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. ## **ATTENTION: LAND OWNER**

Dear Sir/Madam

### **UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

#### **Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

#### **Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at <ftp.slrconsulting.co.za>

username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

#### **Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

### **Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an

extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked “why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?”. The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA’s response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

**Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

Yours faithfully

### **ATTENTION: LAND OWNER**

Dear Sir/Madam

### **UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

#### **Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

#### **Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at [ftp.slrconsulting.co.za](http://ftp.slrconsulting.co.za)

username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further.

The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

### **Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

### **Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right

applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

### **Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

### **Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. **ATTENTION: STAKEHOLDER/IAP**

Dear Sir/Madam

**UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)****Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

### **Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at <ftp.slrconsulting.co.za>

username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

### **Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

### **Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA

process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

**Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the

issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

Yours faithfully

**ATTENTION: STAKEHOLDER/IAP**

Dear Sir/Madam

**UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)****Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

### **Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at <ftp.slrconsulting.co.za>

username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

### **Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

### **Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA

process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

**Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the

issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

Yours faithfully

**Matthew Hemming**

**ATTENTION: STAKEHOLDER/IAP**

Dear Sir/Madam

**UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

**Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in

KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

**Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at <ftp.slrconsulting.co.za>  
username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

**Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

**Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

**Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum

Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

Yours faithfully

**Matthew Hemming**

**ATTENTION: STAKEHOLDER/IAP (COMMUNITY REPRESENTATIVE)**

Dear Sir/Madam

**UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION  
WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN**

## **REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

### **Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

### **Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at <ftp.slrconsulting.co.za>

username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

### **Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application

for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

### **Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

**Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting

of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

**ATTENTION: REGULATORY AUTHORITY**

Dear Sir/Madam

**UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)**

**Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

### **Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at [ftp.slrconsulting.co.za](http://ftp.slrconsulting.co.za)  
username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

### **Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

## **Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked "why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?". The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA's response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Claughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

**Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum

Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

Yours faithfully

**Delivery****ATTENTION: LAND OWNER**

Dear Sir/Madam

**UPDATE ON SCOPING AND EIA PROCESS: APPLICATION FOR ENVIRONMENTAL AUTHORISATION WITH REGARDS AN EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN REGISTRATION DIVISIONS ET, FT, GS, GT, GU & GV IN THE MAGISTERIAL DISTRICT OF PIETERMARITZBURG, KWAZULU-NATAL PROVINCE (12/3/291 ER)****Introduction:**

As you are aware Rhino Oil and Gas Exploration South Africa (Pty) Ltd (Rhino Oil & Gas) has lodged an application for an exploration right to the Petroleum Agency South Africa (PASA) in terms of section 79 of the Minerals and Petroleum Resources Development Act (28 of 2002) (MPRDA) over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER). Rhino Oil & Gas subsequently made an application to PASA for environmental authorisation of exploration activities as set out in Listing Notice 2 (GN R 984), made in terms of Section 24(5) of the National Environmental Management Act (107 of 1998) (NEMA).

SLR Consulting (Pty) Ltd has been appointed as the independent environmental assessment practitioner and is undertaking the required environmental assessment and public participation process. The application is subject to a scoping and Environmental Impact Assessment (EIA) process that is being undertaken in terms of the EIA Regulations 2014 (GNR 982, 8 December 2014).

**Proposed Exploration Activities:**

Details of the proposed exploration work programme, a map of the exploration area, list of included farms and information on the scoping and EIA process are included in the project's Background Information Document which is publically available at <ftp.slrconsulting.co.za>

username: 723.18034.00004 password: hy578ht4 or on request from SLR.

In this application Rhino Oil & Gas has only applied for approval to undertake early-phase exploration for oil and gas which might be located within suitable geological strata. The purpose of the work would be solely to determine the presence of any possible petroleum resource which could be investigated further. The initial 3-year exploration work programme will be restricted to non-invasive techniques, as well as seismic surveys and the drilling of less than 10 core boreholes.

**Fracking or Not?**

No hydraulic fracturing (fracking) is proposed in the 3-year exploration work programme. Rhino Oil & Gas have stated that there is not currently enough information to determine what techniques might be required for future gas extraction. If a resource was identified and subsequently proven to be commercial, then hydraulic fracturing could be one of the potential techniques for gas production. However, a lot of investigation, multiple environmental assessments and authority approvals would be required before reaching that point.

If the early-phase exploration were to confirm the presence of a potential resource, then Rhino Oil & Gas would need to seek further approval from PASA for the additional exploration work required to investigate this. Any further approval would be subject to an additional environmental assessment process with further public consultation. Similarly if the later exploration led to the discovery of a commercial resource suitable for development then Rhino Oil & Gas would need to secure a production right from PASA. Any application for a production right has to be subject to an environmental assessment process with further public consultation. Approvals are also likely to be required other legislation.

All future exploration work or production operations that may arise, if resources are discovered, is therefore beyond the scope of the current scoping and EIA process.

### **Notification and Consultation:**

Notification to and consultation with interested and affected parties (IAPs) commenced in October 2015. A series of public meetings were held across the application area in November 2015. The public participation process to date has elicited significant response to the exploration right application. Overall the public response was very much opposed to the exploration right application and this has been documented. The issues that have been raised are too numerous to elaborate on in this letter<sup>[1]</sup>, but included various calls for further consultation and a demand that more time be allowed in the scoping and EIA schedule<sup>[2]</sup>. SLR consulted with PASA on five key issues that were material to the overall application and the scoping and EIA process. These are summarised below:

Issue 1: Most persons participating in the EIA process stated their opposition or lodged an objection. Many of the objections were made with reasons relating to production and fracking. It is clear that the EIA process will not be able to resolve such objections. What mechanisms exist for these objections to be addressed?

Issue 2: Most IAPs have demanded that the current EIA process present details on production and undertakes an assessment of potential production (including fracking) related impacts, even though the current application does not cover further exploration or production. What is PASA's instruction with regards the scope of the current EIA?

Issue 3: Many IAPs have asked why the current Karoo Strategic Environmental Assessment (SEA) is not applicable to all areas of South Africa. Moreover, the IAPs have demanded that all exploration right applications and related EIA processes be stopped until the SEA is complete. What is PASA's response in this regard?

Issue 4: Most IAPs have argued that the time available in the current EIA schedule is insufficient to allow for the required public consultation for an application area of such large extent. Will PASA grant an

extension of time within the EIA process to allow the project to respond to these issues and adjust the public participation process accordingly?

Issue 5: IAPs have raised the concern that many sites within the application areas are either protected outright or incompatible with exploration and/or the production of oil and gas and that legislation prevents such work from taking place in these areas. The question has been asked “why undertake an EIA to obtain exploration rights in areas where any gas, if it were to be found, would not be able to be extracted because of the restrictions imposed by protected area legislation and Regulation 122 of the Petroleum Regulations (GN R 466 of 2015) relating to the location of wells?”. The demand is that the application be stopped, all of the future non-compatible/unlawful areas removed and then a new EIA be commenced for the revised area. What is PASA’s response in this regard?

The response received from PASA to the queries is attached to this letter. The application and the scoping and EIA process will be undertaken in accordance with the guidance from PASA. In order to incorporate further public interaction and investigation to augment the scoping process, SLR applied to PASA for an extension of time. In December 2015 PASA granted an extension for the scoping process, with the requirement that the final scoping report be submitted to PASA by the 20<sup>th</sup> of April 2016.

SLR is currently busy with various activities to augment notification of and consultation with stakeholders and elicit responses from interested and affected parties whom are representative of the application area. The objective is to ensure that the consultation is broad enough to produce a draft scoping report that identifies the key issues that will need to be addressed in the assessment phase. In this regard a number of the public meetings that did not take place previously are being repeated, this time in larger venues. The meeting details are as follows:

Date	Venue	Time
Tuesday 2 February 2016	Howick West Community Hall	2:30pm
Wednesday 3 February 2016	Mooi River Town Hall, 10 Cloughton Terrace	2:30pm
Thursday 4 February 2016	Greytown Community Hall, 61 Cathcart Street	2:30pm

In addition to the public meetings detailed above, SLR is also consulting with other stakeholders through a range of focussed meetings, additional communications and information sharing. Meetings are being arranged with the district municipalities, traditional authorities and other land owner representatives.

Interested and affected parties are advised that the draft scoping report will be made available for a 30 day review period. A further notice in this regard will be distributed when the report is available. All comments and issues raised by IAPs as well as minutes of all the public meetings that were held will be included in the scoping report.

**Application area:**

SLR has been advised by Rhino Oil & Gas that they are revising the application area (currently under revision by their surveyors). The revision will exclude all properties where the granting of an exploration right is prohibited by Section 48 of the MPRDA including:

- ,as per section 48 of the Protected Areas Act (57 of 2003), special nature reserves, national parks, nature reserves, protected areas or protected environments (including world heritage sites, marine protected areas, specially protected forest areas, forest nature reserves and forest wilderness areas)
- land comprising a residential area;
- any public road, railway or cemetery;
- any [land](#) being used for public or government purposes or reserved in terms of any other law; or
- areas identified by the [Minister](#) by notice in the Gazette in terms of section 49.

Rhino Oil & Gas has also advised SLR that they will not be excluding properties or areas where a constraint may restrict exploration activity (current or future), but does not specifically prohibit the granting of an exploration right. Rhino Oil & Gas will, however, ensure that all of their activities are undertaken in a lawful and environmentally responsible manner. It is the role of the environmental process to identify all such constraints and restrict or prohibit exploration activities through documented management commitments. An example of a constraint which prohibits specific exploration activities in certain areas, but does not prohibit the granting of a right is Sections 122 (2) and (3) of the Regulations on Petroleum Exploration and Production (GN R 466, June 2015). SLR will identify and document these constraints in the EIA.

**Summary:**

The environmental assessment process of the application for an exploration right by Rhino Oil & Gas over a substantial area in KwaZulu-Natal (Ref: 12/3/291 ER) is still in the scoping phase. To date, IAPs have raised many issues and strong objection to the project. The scoping and EIA process is adapting to these responses and the guidance from PASA on the key issues. Consultation with potentially interested and affected parties is ongoing and work to augment notification of and consultation with stakeholders is being undertaken.

The primary objective of the scoping process is to identify the key issues that need to be addressed in the assessment phase that will follow. It is not the purpose of the scoping phase to provide answers to the issues that arise, but rather to document these and ensure that the level of assessment required will be undertaken in the EIA. The results of the current process, including details of the issues and objections will be documented in a scoping report. Once completed, a draft scoping report will be made available to interested and affected parties for a 30 day review period.

Please pass this letter onto any other persons whom you know may have an interest in the project. We welcome any comment or questions. Thank you for your ongoing involvement in the scoping and EIA process.

Yours faithfully
