## Annexure 1: Reasons for Decision

### 1. Key factors considered in making the decision

In reaching its decision, the Department took, *inter alia*, the following into consideration -

- a) The information contained in the BAR dated June 2012 and Addendum to the BAR dated September 2012;
- b) The comments received from the organs of state and interested and affected parties as included in the BAR dated June 2012 and Addendum to the BAR dated September 2012;
- c) Mitigation measures as proposed in the BAR dated June 2012 and Addendum to the BAR dated September 2012 and the draft EMPr;
- d) The information contained in the specialist studies contained within Appendix D of the BAR; and
- e) The objectives and requirements of relevant legislation, policies and guidelines, including section 2 of the National Environmental Management Act, 1998 (Act 107 of 1998).

### 2. Key factors considered in making the decision

After consideration of the information and factors listed above, the Department made the following findings -

- a) The findings of all the specialist studies conducted and their recommended mitigation measures.
- b) The need for the proposed project stems from the provision of electricity to the national grid in terms of the REFIT programme and the provision of electricity from Independent Power Producers as required by the Department of Energy.
- c) The BAR dated June 2012 and Addendum to the BAR dated September 2012 identified all legislation and guidelines that have been considered in the preparation of the BAR dated June 2012 and Addendum to the BAR dated September 2012.
- d) The identification and assessment of impacts are detailed in the BAR dated June 2012 and Addendum to the BAR dated September 2012 and sufficient assessment of the key identified issues and impacts have been completed.

Department of Environmental Affairs  
Environmental Authorisation Reg. No. 14/12/16/3/3/1/553  
NEAS Reference Number: DEA/NEAS/0001173/2012

- e) The methodology used in assessing the potential impacts identified in the BAR dated June 2012 and Addendum to the BAR dated September 2012 and the specialist studies have been adequately indicated.
- f) A sufficient public participation process was undertaken and the applicant has satisfied the minimum requirements as prescribed in the EIA Regulations, 2010 for public involvement.

In view of the above, the Department is satisfied that, subject to compliance with the conditions contained in the environmental authorisation, the proposed activity will not conflict with the general objectives of integrated environmental management laid down in Chapter 5 of the National Environmental Management Act, 1998 and that any potentially detrimental environmental impacts resulting from the proposed activity can be mitigated to acceptable levels. The application is accordingly granted.
