
RECORD OF TELEPHONE DISCUSSION

To: Conrad Cloete **Tel No.:** 073-240-1383

Farm: Arundel 216
Adjacent Landowner

From: Thalita Botha **Date:** 09/10/2017

Project: Access Roads and Watercourse Crossings within the Authorised Iziduli Emoyeni Wind Energy Facility, Eastern Cape Province (SE1940)

Subject: Public Participation Process – Consultation with Landowners

Thalita Botha of Savannah Environmental contacted Mr Cloete to inform him that Savannah Environmental is undertaking the Basic Assessment (BA) process for the proposed access roads and watercourse crossings for the Iziduli Emoyeni Wind Energy Facility. Thalita Botha explained that the Environmental Authorisation (EA) for the project had expired and therefore a new BA process is required to be undertaken. She noted that the footprint of the roads will remain as it was in the previous process. She then asked whether he had any issues or concerns regarding the project, and whether he would like a one-on-one consultation meeting to be arranged.

Mr Cloete informed her that he has no issues regarding the project and that there is no need for a meeting. He then requested that he be registered as an Interested and Affected Party (I&AP) on the project database.

Thalita Botha confirmed that Mr Cloete is registered as an adjacent landowner on the project's database. She thanked Mr Cloete for his time and stated that any issues or concerns regarding the project must be submitted to Savannah Environmental.

Thalita Botha confirmed that Mr de Klerk is registered as an adjacent landowner on the project's database. She thanked Mr de Klerk for his time and stated that any issues or concerns regarding the project must be submitted to Savannah Environmental.

12 December 2017

Dear Stakeholder

**ENVIRONMENTAL BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS
ACCESS ROADS AND WATERCOURSE CROSSINGS WITHIN THE AUTHORISED IZIDULI EMOYENI
WIND ENERGY FACILITY, EASTERN CAPE PROVINCE**

NOTICE OF ENVIRONMENTAL BASIC ASSESSMENT PROCESS

Windlab Developments South Africa (Pty) Ltd (Windlab) received an Environmental Authorisation (EA) for the proposed Iziduli Emoyeni Wind Energy Facility (previously known as Amakhala Emoyeni Phase 4) on 28 August 2012 from the National Department of Environmental Affairs (DEA Ref: 12/12/20/1754/4). The proposed Wind Energy Facility (WEF) was previously part of the greater project concept known as the Amakhala Emoyeni Wind Energy Facility. In order to align with the Renewable Energy Independent Power Producer Procurement Programme requirements, restricting a project size to 140MW, the project was split into four phases.

A previous basic assessment application was submitted by Savannah Environmental Consultants in May 2015. The application was issued an environmental authorisation in July 2015 (Eastern Cape DEDEAT Ref: EC02/C/LN1&3/M/75-2014), however the construction did not commence within the 24 months from the date of issue and the EA subsequently lapsed. As such, Savannah Environmental (Pty) Ltd has been appointed by Emoyeni Wind Farm Renewable Energy (Pty) Ltd to obtain an environmental authorisation in terms of the EIA Regulations, 2014 (as amended in April 2017).

Emoyeni Wind Farm Renewable Energy (Pty) Ltd is now applying for authorisation for identified Listed Activities in terms of the EIA Regulations, 2014 (as amended in April 2017). The activities entails the infilling and deposition of material within a watercourse (the widening of existing watercourse crossings!), the construction of access roads and widening of the existing on-site access roads within the authorised Iziduli Emoyeni Wind Energy Facility project site from the authorised width of 6m to 9m in width.

The proposed development will entail the following:

- » the construction of a new access roads ~18km in length and ~9m wide;
- » the widening of existing roads from 6m to 9m, ~7,5km in length; and
- » the widening and upgrading existing four (4) watercourse crossings.

¹ Listed Activity 19 of GN R326 of the 2014 EIA Regulations as amended on 07 April 2017, is applied for to allow for excavation and/or infill of material exceeding 10m³ for the construction of watercourse crossings.

The proposed Iziduli Emoyeni Wind Energy Facility is located ~26km south of Bedford and ~36km south east of Cookhouse within the Blue Crane Route Local Municipality which falls within the jurisdiction of the Sarah Baartman District Municipality, Eastern Cape Province. The following farms were authorised for the siting of the wind farm:

- » Remainder of the Farm Brakke Fontein No 218;
- » Remainder of Portion 1 of the Farm Brakke Fonteyn No 218;
- » Portion 2 (a Portion of Portion 1) of the Farm Brakke Fonteyn No 218;
- » The Farm Vogel Fonteyn No 219; and
- » Remainder of the Farm Brakfontein No 220.

BASIC ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Windlab Developments South Africa (Pty) Ltd requires authorisation from the Eastern Cape Department of Economic Development, Environmental Affairs and Tourism (DEDEAT), the Competent Authority (CA) for the undertaking of the proposed project. In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with the amended EIA Regulations of GN R 326, R327, GN R325 and R324, a Basic Assessment process is required to be undertaken for the proposed project.

Savannah Environmental (Pty) Ltd has been appointed as the independent environmental consultant, to undertake the required Basic Assessment to identify and assess all the potential environmental impacts associated with the proposed project and propose appropriate mitigation and management measures in an Environmental Management Programme (EMPr). The public participation process, which forms part of the overall Basic Assessment process, will also be undertaken by Savannah Environmental.

You and/or the organisation which you represent has been identified as an I&AP for the proposed project. Should you have an interest in this project, please register yourself as an I&AP by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will receive all information relating to the project and will be provided with an opportunity to provide comment and input into the Basic Assessment process.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project. Our team welcomes your participation and looks forward to your involvement throughout this process.

Kind regards

Gabriele Stein

Dear Stakeholder

**ENVIRONMENTAL BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS
ACCESS ROADS AND WATERCOURSE CROSSINGS WITHIN THE AUTHORISED IZIDULI EMOYENI
WIND ENERGY FACILITY, EASTERN CAPE PROVINCE**

NOTICE OF ENVIRONMENTAL BASIC ASSESSMENT PROCESS

Windlab Developments South Africa (Pty) Ltd (Windlab) received an Environmental Authorisation (EA) for the proposed Iziduli Emoyeni Wind Energy Facility (previously known as Amakhala Emoyeni Phase 4) on 28 August 2012 from the National Department of Environmental Affairs (DEA Ref: 12/12/20/1754/4). The proposed Wind Energy Facility (WEF) was previously part of the greater project concept known as the Amakhala Emoyeni Wind Energy Facility. In order to align with the Renewable Energy Independent Power Producer Procurement Programme requirements restricting a project size to 140MW), the project was split into four phases.

A previous basic assessment application was submitted by Savannah Environmental Consultants in May 2015. The application was issued an environmental authorisation in July 2015 (Eastern Cape DEDEAT ref: EC02/C/LN1&3/M/75-2014), however the construction did not commence within the 24 months from the date of issue and the EA subsequently lapsed. As such, Savannah Environmental (Pty) Ltd has been appointed by Emoyeni Wind Farm Renewable Energy (Pty) Ltd to obtain an environmental authorisation in terms of the EIA Regulations, 2014 (as amended in April 2017).

Emoyeni Wind Farm Renewable Energy (Pty) Ltd is now applying for authorisation for identified Listed Activities in terms of the EIA Regulations, 2014 (as amended in April 2017). The activities entails the infilling and deposition of material within a watercourse (the widening of existing watercourse crossings¹), the construction of access roads and widening of the existing on-site access roads within the authorised Iziduli Emoyeni Wind Energy Facility project site from the authorised width of 6m to 9m in width.

¹ Listed Activity 19 of GN R326 of the 2014 EIA Regulations as amended on 07 April 2017, is applied for to allow for excavation and/or infill of material exceeding 10m³ for the construction of watercourse crossings.

The proposed development will entail the following:

- » the construction of a new access roads ~18km in length and ~9m wide;
- » the widening of existing roads from 6m to 9m, ~7,5km in length; and
- » the widening and upgrading existing four (4) watercourse crossings

The proposed Iziduli Emoyeni Wind Energy Facility is located ~26km south of Bedford and ~36km south east of Cookhouse within the Blue Crane Route Local Municipality which falls within the jurisdiction of the Sarah Baartman District Municipality, Eastern Cape Province. The following farms were authorised for the siting of the wind farm:

- » Remainder of the Farm Brakke Fontein No 218;
- » Remainder of Portion 1 of the Farm Brakke Fonteyn No 218;
- » Portion 2 (a Portion of Portion 1) of the Farm Brakke Fonteyn No 218;
- » The Farm Vogel Fonteyn No 219; and
- » Remainder of the Farm Brakfontein No 220.

BASIC ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Windlab Developments South Africa (Pty) Ltd requires authorisation from the Eastern Cape Department of Economic Development, Environmental Affairs and Tourism (DEDEAT), the Competent Authority (CA) for the undertaking of the proposed project. In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with the amended EIA Regulations of GN R 326, R327, GN R325 and R324, a Basic Assessment process is required to be undertaken for the proposed project.

Savannah Environmental (Pty) Ltd has been appointed as the independent environmental consultant, to undertake the required Basic Assessment to identify and assess all the potential environmental impacts associated with the proposed project and propose appropriate mitigation and management measures in an Environmental Management Programme (EMPr). The public participation process, which forms part of the overall Basic Assessment process, will also be undertaken by Savannah Environmental.

You and/or the organisation which you represent have been identified as a directly affected or adjacent property owner that could be impacted by the proposed project. The EIA Regulations require that the owner or person in control of the land as well as occupiers of the affected and adjacent properties, which could be impacted by the project, are informed of the environmental assessment process in writing. In this regard, please could you kindly inform any other persons (tenants, employees, farm managers and workers etc.) residing on your property of this Basic Assessment process.

Should you or any other occupier of your property have an interest in this project, please register yourselves as Interested and Affected Parties (I&APs) by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will receive all

information relating to the project and will be provided with an opportunity to provide comment and input into the Basic Assessment process.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project. Our team welcomes your participation and looks forward to your involvement throughout this process.

Kind regards

**ENVIRONMENTAL BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS
ACCESS ROADS AND WATERCOURSE CROSSINGS WITHIN THE AUTHORISED IZIDULI EMOYENI
WIND ENERGY FACILITY, EASTERN CAPE PROVINCE**

NOTICE OF ENVIRONMENTAL BASIC ASSESSMENT PROCESS

Dear Willem Petrus van Aardt

Windlab Developments South Africa (Pty) Ltd (Windlab) received an Environmental Authorisation (EA) for the proposed Iziduli Emoyeni Wind Energy Facility (previously known as Amakhala Emoyeni Phase 4) on 28 August 2012 from the National Department of Environmental Affairs (DEA Ref: 12/12/20/1754/4). The proposed Wind Energy Facility (WEF) was previously part of the greater project concept known as the Amakhala Emoyeni Wind Energy Facility. In order to align with the Renewable Energy Independent Power Producer Procurement Programme requirements restricting a project size to 140MW), the project was split into four phases.

A previous basic assessment application was submitted by Savannah Environmental Consultants in May 2015. The application was issued an environmental authorisation in July 2015 (Eastern Cape DEDEAT ref: EC02/C/LN1&3/M/75-2014), however the construction did not commence within the 24 months from the date of issue and the EA subsequently lapsed. As such, Savannah Environmental (Pty) Ltd has been appointed by Emoyeni Wind Farm Renewable Energy (Pty) Ltd to obtain an environmental authorisation in terms of the EIA Regulations, 2014 (as amended in April 2017).

Emoyeni Wind Farm Renewable Energy (Pty) Ltd is now applying for authorisation for identified Listed Activities in terms of the EIA Regulations, 2014 (as amended in April 2017). The activities entails the infilling and deposition of material within a watercourse (the widening of existing watercourse crossings¹), the construction of access roads and widening of the existing on-site access roads within the authorised Iziduli Emoyeni Wind Energy Facility project site from the authorised width of 6m to 9m in width.

The proposed development will entail the following:

- » the construction of a new access roads ~18km in length and ~9m wide;
- » the widening of existing roads from 6m to 9m, ~7,5km in length; and
- » the widening and upgrading existing four (4) watercourse crossings

The proposed Iziduli Emoyeni Wind Energy Facility is located ~26km south of Bedford and ~36km south east of Cookhouse within the Blue Crane Route Local Municipality which falls within the jurisdiction of the Sarah Baartman District Municipality, Eastern Cape Province. The following farms were authorised for the siting of the wind farm:

- » Remainder of the Farm Brakke Fontein No 218;
- » Remainder of Portion 1 of the Farm Brakke Fonteyn No 218;
- » Portion 2 (a Portion of Portion 1) of the Farm Brakke Fonteyn No 218;
- » The Farm Vogel Fonteyn No 219; and
- » Remainder of the Farm Brakfontein No 220.

BASIC ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Windlab Developments South Africa (Pty) Ltd requires authorisation from the Eastern Cape Department of Economic Development, Environmental Affairs and Tourism (DEDEAT), the Competent Authority (CA) for the undertaking of the proposed project. In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with the amended EIA Regulations of GN R 326, R327, GN R325 and R324, a Basic Assessment process is required to be undertaken for the proposed project.

Savannah Environmental (Pty) Ltd has been appointed as the independent environmental consultant, to undertake the required Basic Assessment to identify and assess all the potential environmental impacts associated with the proposed project and propose appropriate mitigation and management measures in an Environmental Management Programme (EMPr). The public participation process, which forms part of the overall Basic Assessment process, will also be undertaken by Savannah Environmental.

You and/or the organisation which you represent have been identified as a directly affected or adjacent property owner that could be impacted by the proposed project. The EIA Regulations

¹ Listed Activity 19 of GN R326 of the 2014 EIA Regulations as amended on 07 April 2017, is applied for to allow for excavation and/or infill of material exceeding 10m³ for the construction of watercourse crossings.

require that the owner or person in control of the land as well as occupiers of the affected and adjacent properties, which could be impacted by the project, are informed of the environmental assessment process in writing. In this regard, please could you kindly inform any other persons (tenants, employees, farm managers and workers etc.) residing on your property of this Basic Assessment process.

Should you or any other occupier of your property have an interest in this project, please register yourselves as Interested and Affected Parties (I&APs) by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will receive all information relating to the project and will be provided with an opportunity to provide comment and input into the Basic Assessment process.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project. Our team welcomes your participation and looks forward to your involvement throughout this process.

NOTICE OF ENVIRONMENTAL BASIC ASSESSMENT PROCESS

Dear Frederick Johannes De Klerk

Windlab Developments South Africa (Pty) Ltd (Windlab) received an Environmental Authorisation (EA) for the proposed Iziduli Emoyeni Wind Energy Facility (previously known as Amakhala Emoyeni Phase 4) on 28 August 2012 from the National Department of Environmental Affairs (DEA Ref: 12/12/20/1754/4). The proposed Wind Energy Facility (WEF) was previously part of the greater project concept known as the Amakhala Emoyeni Wind Energy Facility. In order to align with the Renewable Energy Independent Power Producer Procurement Programme requirements restricting a project size to 140MW), the project was split into four phases.

A previous basic assessment application was submitted by Savannah Environmental Consultants in May 2015. The application was issued an environmental authorisation in July 2015 (Eastern Cape DEDEAT ref: EC02/C/LN1&3/M/75-2014), however the construction did not commence within the 24 months from the date of issue and the EA subsequently lapsed. As such, Savannah Environmental (Pty) Ltd has been appointed by Emoyeni Wind Farm Renewable Energy (Pty) Ltd to obtain an environmental authorisation in terms of the EIA Regulations, 2014 (as amended in April 2017).

Emoyeni Wind Farm Renewable Energy (Pty) Ltd is now applying for authorisation for identified Listed Activities in terms of the EIA Regulations, 2014 (as amended in April 2017). The activities entails the infilling and deposition of material within a watercourse (the widening of existing watercourse crossings²), the construction of access roads and widening of the existing on-site access roads within the authorised Iziduli Emoyeni Wind Energy Facility project site from the authorised width of 6m to 9m in width.

The proposed development will entail the following:

- » the construction of a new access roads ~18km in length and ~9m wide;
- » the widening of existing roads from 6m to 9m, ~7,5km in length; and
- » the widening and upgrading existing four (4) watercourse crossings

The proposed Iziduli Emoyeni Wind Energy Facility is located ~26km south of Bedford and ~36km south east of Cookhouse within the Blue Crane Route Local Municipality which falls within the jurisdiction of the Sarah Baartman District Municipality, Eastern Cape Province. The following farms were authorised for the siting of the wind farm:

- » Remainder of the Farm Brakke Fontein No 218;
- » Remainder of Portion 1 of the Farm Brakke Fonteyn No 218;
- » Portion 2 (a Portion of Portion 1) of the Farm Brakke Fonteyn No 218;
- » The Farm Vogel Fonteyn No 219; and
- » Remainder of the Farm Brakfontein No 220.

BASIC ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Windlab Developments South Africa (Pty) Ltd requires authorisation from the Eastern Cape Department of Economic Development, Environmental Affairs and Tourism (DEDEAT), the Competent Authority (CA) for the undertaking of the proposed project. In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with the amended EIA Regulations of GN R 326, R327, GN R325 and R324, a Basic Assessment process is required to be undertaken for the proposed project.

Savannah Environmental (Pty) Ltd has been appointed as the independent environmental consultant, to undertake the required Basic Assessment to identify and assess all the potential environmental impacts associated with the proposed project and propose appropriate mitigation and management measures in an Environmental Management Programme (EMPr). The public participation process, which forms part of the overall Basic Assessment process, will also be undertaken by Savannah Environmental.

You and/or the organisation which you represent have been identified as a directly affected or adjacent property owner that could be impacted by the proposed project. The EIA Regulations

² Listed Activity 19 of GN R326 of the 2014 EIA Regulations as amended on 07 April 2017, is applied for to allow for excavation and/or infill of material exceeding 10m³ for the construction of watercourse crossings.

require that the owner or person in control of the land as well as occupiers of the affected and adjacent properties, which could be impacted by the project, are informed of the environmental assessment process in writing. In this regard, please could you kindly inform any other persons (tenants, employees, farm managers and workers etc.) residing on your property of this Basic Assessment process.

Should you or any other occupier of your property have an interest in this project, please register yourselves as Interested and Affected Parties (I&APs) by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will receive all information relating to the project and will be provided with an opportunity to provide comment and input into the Basic Assessment process.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project. Our team welcomes your participation and looks forward to your involvement throughout this process.

Kind regards

Gabriele Stein

**ENVIRONMENTAL BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS
ACCESS ROADS AND WATERCOURSE CROSSINGS WITHIN THE AUTHORISED IZIDULI EMOYENI
WIND ENERGY FACILITY, EASTERN CAPE PROVINCE**

NOTICE OF ENVIRONMENTAL BASIC ASSESSMENT PROCESS

Dear Adeline Bester

Windlab Developments South Africa (Pty) Ltd (Windlab) received an Environmental Authorisation (EA) for the proposed Iziduli Emoyeni Wind Energy Facility (previously known as Amakhala Emoyeni Phase 4) on 28 August 2012 from the National Department of Environmental Affairs (DEA Ref: 12/12/20/1754/4). The proposed Wind Energy Facility (WEF) was previously part of the greater project concept known as the Amakhala Emoyeni Wind Energy Facility. In order to align with the Renewable Energy Independent Power Producer Procurement Programme requirements restricting a project size to 140MW), the project was split into four phases.

A previous basic assessment application was submitted by Savannah Environmental Consultants in May 2015. The application was issued an environmental authorisation in July 2015 (Eastern Cape DEDEAT ref: EC02/C/LN1&3/M/75-2014), however the construction did not commence within the 24 months from the date of issue and the EA subsequently lapsed. As such, Savannah Environmental (Pty) Ltd has been appointed by Emoyeni Wind Farm Renewable Energy (Pty) Ltd to obtain an environmental authorisation in terms of the EIA Regulations, 2014 (as amended in April 2017).

Emoyeni Wind Farm Renewable Energy (Pty) Ltd is now applying for authorisation for identified Listed Activities in terms of the EIA Regulations, 2014 (as amended in April 2017). The activities entails the infilling and deposition of material within a watercourse (the widening of existing watercourse crossings³), the construction of access roads and widening of the existing on-site access roads within the authorised Iziduli Emoyeni Wind Energy Facility project site from the authorised width of 6m to 9m in width.

The proposed development will entail the following:

- » the construction of a new access roads ~18km in length and ~9m wide;
- » the widening of existing roads from 6m to 9m, ~7,5km in length; and
- » the widening and upgrading existing four (4) watercourse crossings

The proposed Iziduli Emoyeni Wind Energy Facility is located ~26km south of Bedford and ~36km south east of Cookhouse within the Blue Crane Route Local Municipality which falls within the jurisdiction of the Sarah Baartman District Municipality, Eastern Cape Province. The following farms were authorised for the siting of the wind farm:

- » Remainder of the Farm Brakke Fontein No 218;
- » Remainder of Portion 1 of the Farm Brakke Fonteyn No 218;
- » Portion 2 (a Portion of Portion 1) of the Farm Brakke Fonteyn No 218;
- » The Farm Vogel Fonteyn No 219; and
- » Remainder of the Farm Brakfontein No 220.

BASIC ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Windlab Developments South Africa (Pty) Ltd requires authorisation from the Eastern Cape Department of Economic Development, Environmental Affairs and Tourism (DEDEAT), the Competent Authority (CA) for the undertaking of the proposed project. In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with the amended EIA Regulations of GN R 326, R327, GN R325 and R324, a Basic Assessment process is required to be undertaken for the proposed project.

NOTICE OF ENVIRONMENTAL BASIC ASSESSMENT PROCESS

Dear Conrad Cloete

Windlab Developments South Africa (Pty) Ltd (Windlab) received an Environmental Authorisation (EA) for the proposed Iziduli Emoyeni Wind Energy Facility (previously known as Amakhala Emoyeni Phase 4) on 28 August 2012 from the National Department of Environmental Affairs (DEA Ref: 12/12/20/1754/4). The proposed Wind Energy Facility (WEF) was previously part of the greater project concept known as the Amakhala Emoyeni Wind Energy Facility. In order to align with the Renewable Energy Independent Power Producer Procurement Programme requirements restricting a project size to 140MW), the project was split into four phases.

A previous basic assessment application was submitted by Savannah Environmental Consultants in May 2015. The application was issued an environmental authorisation in July 2015 (Eastern Cape DEDEAT ref: EC02/C/LN1&3/M/75-2014), however the construction did not commence within the 24 months from the date of issue and the EA subsequently lapsed. As such, Savannah Environmental (Pty) Ltd has been appointed by Emoyeni Wind Farm Renewable Energy (Pty) Ltd to obtain an environmental authorisation in terms of the EIA Regulations, 2014 (as amended in April 2017).

Emoyeni Wind Farm Renewable Energy (Pty) Ltd is now applying for authorisation for identified Listed Activities in terms of the EIA Regulations, 2014 (as amended in April 2017). The activities entails the infilling and deposition of material within a watercourse (the widening of existing watercourse crossings⁸), the construction of access roads and widening of the existing on-site access roads within the authorised Iziduli Emoyeni Wind Energy Facility project site from the authorised width of 6m to 9m in width.

The proposed development will entail the following:

- » the construction of a new access roads ~18km in length and ~9m wide;
- » the widening of existing roads from 6m to 9m, ~7,5km in length; and
- » the widening and upgrading existing four (4) watercourse crossings

The proposed Iziduli Emoyeni Wind Energy Facility is located ~26km south of Bedford and ~36km south east of Cookhouse within the Blue Crane Route Local Municipality which falls within the jurisdiction of the Sarah Baartman District Municipality, Eastern Cape Province. The following farms were authorised for the siting of the wind farm:

- » Remainder of the Farm Brakke Fontein No 218;
- » Remainder of Portion 1 of the Farm Brakke Fonteyn No 218;
- » Portion 2 (a Portion of Portion 1) of the Farm Brakke Fonteyn No 218;
- » The Farm Vogel Fonteyn No 219; and
- » Remainder of the Farm Brakfontein No 220.

BASIC ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Windlab Developments South Africa (Pty) Ltd requires authorisation from the Eastern Cape Department of Economic Development, Environmental Affairs and Tourism (DEDEAT), the Competent Authority (CA) for the undertaking of the proposed project. In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with the amended EIA Regulations of GN R 326, R327, GN R325 and R324, a Basic Assessment process is required to be undertaken for the proposed project.

Savannah Environmental (Pty) Ltd has been appointed as the independent environmental consultant, to undertake the required Basic Assessment to identify and assess all the potential environmental impacts associated with the proposed project and propose appropriate mitigation and management measures in an Environmental Management Programme (EMPr). The public participation process, which forms part of the overall Basic Assessment process, will also be undertaken by Savannah Environmental.

You and/or the organisation which you represent have been identified as a directly affected or adjacent property owner that could be impacted by the proposed project. The EIA Regulations

⁸ Listed Activity 19 of GN R326 of the 2014 EIA Regulations as amended on 07 April 2017, is applied for to allow for excavation and/or infill of material exceeding 10m³ for the construction of watercourse crossings.

require that the owner or person in control of the land as well as occupiers of the affected and adjacent properties, which could be impacted by the project, are informed of the environmental assessment process in writing. In this regard, please could you kindly inform any other persons (tenants, employees, farm managers and workers etc.) residing on your property of this Basic Assessment process.

Should you or any other occupier of your property have an interest in this project, please register yourselves as Interested and Affected Parties (I&APs) by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will receive all information relating to the project and will be provided with an opportunity to provide comment and input into the Basic Assessment process.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project. Our team welcomes your participation and looks forward to your involvement throughout this process.

Kind regards

**ENVIRONMENTAL BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS
ACCESS ROADS AND WATERCOURSE CROSSINGS WITHIN THE AUTHORISED IZIDULI EMOYENI
WIND ENERGY FACILITY, EASTERN CAPE PROVINCE**

NOTICE OF ENVIRONMENTAL BASIC ASSESSMENT PROCESS

Dear Donald Houston

Windlab Developments South Africa (Pty) Ltd (Windlab) received an Environmental Authorisation (EA) for the proposed Iziduli E moyeni Wind Energy Facility (previously known as Amakhala E moyeni Phase 4) on 28 August 2012 from the National Department of Environmental Affairs (DEA Ref: 12/12/20/1754/4). The proposed Wind Energy Facility (WEF) was previously part of the greater project concept known as the Amakhala E moyeni Wind Energy Facility. In order to align with the Renewable Energy Independent Power Producer Procurement Programme requirements restricting a project size to 140MW), the project was split into four phases.

A previous basic assessment application was submitted by Savannah Environmental Consultants in May 2015. The application was issued an environmental authorisation in July 2015 (Eastern Cape DEDEAT ref: EC02/C/LN1&3/M/75-2014), however the construction did not commence within the 24 months from the date of issue and the EA subsequently lapsed. As such, Savannah Environmental (Pty) Ltd has been appointed by E moyeni Wind Farm Renewable Energy (Pty) Ltd to obtain an environmental authorisation in terms of the EIA Regulations, 2014 (as amended in April 2017).

Emoyeni Wind Farm Renewable Energy (Pty) Ltd is now applying for authorisation for identified Listed Activities in terms of the EIA Regulations, 2014 (as amended in April 2017). The activities entails the infilling and deposition of material within a watercourse (the widening of existing watercourse crossings⁹), the construction of access roads and widening of the existing on-site access roads within the authorised Iziduli Emoyeni Wind Energy Facility project site from the authorised width of 6m to 9m in width.

The proposed development will entail the following:

- » the construction of a new access roads ~18km in length and ~9m wide;
- » the widening of existing roads from 6m to 9m, ~7,5km in length; and
- » the widening and upgrading existing four (4) watercourse crossings

The proposed Iziduli Emoyeni Wind Energy Facility is located ~26km south of Bedford and ~36km south east of Cookhouse within the Blue Crane Route Local Municipality which falls within the jurisdiction of the Sarah Baartman District Municipality, Eastern Cape Province. The following farms were authorised for the siting of the wind farm:

- » Remainder of the Farm Brakke Fontein No 218;
- » Remainder of Portion 1 of the Farm Brakke Fonteyn No 218;
- » Portion 2 (a Portion of Portion 1) of the Farm Brakke Fonteyn No 218;
- » The Farm Vogel Fonteyn No 219; and
- » Remainder of the Farm Brakfontein No 220.

BASIC ASSESSMENT PROCESS

In terms of the Environmental Impact Assessment (EIA) Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No. 107 of 1998), Windlab Developments South Africa (Pty) Ltd requires authorisation from the Eastern Cape Department of Economic Development, Environmental Affairs and Tourism (DEDEAT), the Competent Authority (CA) for the undertaking of the proposed project.
