Dear Dr Ragna Redelstorff,

I would like to thank you for your recent approval of our permit application to excavate at the Kromdraai National Heritage site within the Cradle of Humankind World Heritage Site.

We take note of the conditions detailed in the new permit that has been issued (under Permit ID 3035) to allow Dr Francis Thackeray (Evolutionary Studies Institute, University of the Witwatersrand) and myself to work at Kromdraai until the 31th of December 2020.

After recent discussions about the planning for the Kromdraai Research Project in terms of management, development and integration, we think that Dr. Bernhard Zipfel (Evolutionary Studies Institute, University of the Witwatersrand) could also be involved as a co-permit holder. We would like to work in collaboration with Dr. Bernhard Zipfel at the Kromdraai site as soon as 2020.

I am therefore asking whether Permit ID 3035 could be amended in order to add Dr. Bernhard Zipfel as a co-permit holder. I hope that this change will not be of too much inconvenience.

Please do not hesitate to ask in case you would need any further information from me.

With my sincere appreciation,

José Braga
