provide that 10 lanes? Remember I said Summet road is in here, unfortunately it's off my lap now in this sketch.

Kristin Kallesen: It is presuming the all of the development plan of this area it becomes high density etc.

Francois van Rensburg: Well not high density, the density is being proposed by Steyn City and Helderfontein, it being approved by Diepsloot and also the Lanseria road.

Kristin Kallesen: I don't know if you have information for the Sinigin infrastructure, all of that. Where does that put in, who funds it and how is it going to implement? City doesn't have money for the infrastructure.

Francois van Rensburg: It is the developer that wants to develop, and willing to fore cloud the additional capital cost and subs device that on behalf of the City, if the developer is willing to do that and then they will continue with the development. The northern France and Diepsloot development is in the Government related development, so obviously the Governments are fighting with each other and they will do that. As soon as that is resolved, then it will be done.

Chris de Villiers: How do the people on this side of the road access the road?

Francois van Rensburg: The basic planning does have detail of how the existing road should be rebuilt and realign to join up with this plan details.

Chris de Villiers: So this existing road becomes a service road or is the service road been planned?

Francois van Rensburg: All service roads and will slight realignments of existing roads to accommodate that.

Chris de Villiers: I think the point of the question is that that that road is not the total wit of the developer? There should be service roads.

Francois van Rensburg: The whole area what you see here is a total wit.

Chris de Villiers: With the service roads?

Francois van Rensburg: There is not service roads no longer, that is why I say current roads like this one, will be slightly be realign just link up.

Chris de Villiers: Do you have any idea of the time frame?

Francois van Rensburg: K56 in my honest opinion, at least 18 months to finalise the EIA Process. I'm not going to do any detail design on risk unless we have a good idea that the EIA is going to be approved. I mean, I'm going to spend 3million Rand fee just to do a detail design on this. After that we going to the detail design phase which will be probably going to take a 6 – 9

months to resolve all their aspects, then we will start with the construction, then a periof of a month or 2, so we talk about 3 years from now.

Chris de Villiers: How long time frame can the people leave the property?

Francois van Rensburg: As soon as they have been expropriated.

Chris de Villiers: Do you know when that will happen?

Francois van Rensburg: If they not were expropriated, they will be done after the EIA Process if it is completed and then the other guys will get notification with at least 3months before we start with construction.

John Mendelsohn: Still on the subject of the alternatives, it is being proposed by Mark Mackenzie and reported by me that the Environmental might being built with respect to the Wetlands. If you are not able to the alternatives digestion is at the traffic, north up to the 511, upgrade that section. Along the Manali Road on to the 562, which is already partially upgraded and there is large road reserves and onto that side of the Midrand CBD. What is your plan B if the Environmental is not aloud?

Francois van Rensburg: Can I be honest with you, if you get a total negative ROD on that. Look there is alternatives how to cross a wetland as well, we first want to look at those alternatives and we will do in that conjunction of the wetland specialist as well, if that is not boarding by the authorities which is GDARD. In my honest opinion is that this road is dead, and then GAUTRANS have to go back to the drawing board on that. All that I can say is, that this 4 – 6 lanes, that's needed here must be replaced somehow and this is not going to count, that's what I'm trying to say earlier.

But just look at the detour that you must take to get here from there, what is happening in the end and I work for 11years at Tshwane Municipality, and I know exactly where the people come from and the big thing is rat running through residential areas, if you don't provide main roads then you do get rat running. So, build the Main roads then we get rid of the rat running.

Chris de Villiers: You actually put your finger on one of our concerns you raised already, if you get a fatal flaw there, then it affects the whole road. What if there are fatal flaws elsewhere and you build the section already, so you get the ROD and fix up the wetlands you do all the issues, and there is another fatal flaw elsewhere and in that section.

Francois van Rensburg: You see that's only why we doing the section up to here, you must look at the network and what can function independently. In this section up to here that can function independently from the rest of the road because at least this section provides you with East-West linkage from that road to here.

Chris de Villiers: I don't like that but I hear what you saying.

Lizelle Gregory: When we do the EIA's, they request that the section you look at, it must be function on its own, because there is a possibility that sometimes you must construct the remainder of the road, in a few years bullfrogs whatever could have moved into that area and can identify it as an area that is suitable but the Environment has changed, species that move and settle themselves in areas where you think they going to construct around.

Kristin Kallesen: The K71 needs to be in credited as part of this, because if this does come through and bring more traffic onto the K71.

Francois van Rensburg: It is part of our traffic report.

Kristin Kallesen: Is it? This is where we came across, the funding first provided by this you going to aggravate the problem and although your study was for Steyn City and what's happening on this side, this road is really much part of it.

Anette Deppe: Mister Duvali was been out for a site visit this week, he have seen the road and knows that it is a priority, so if he got budget or not, he hasn't got budget to do it. If it is in your report then I'm happy to hear that, because it's got to be done correct, like I said with regarding your concerns about the area and the wealth and the horse industry, those inputs are going to be vital and a have been submitted by John and myself is the GBS document. We have made an presentation for the residents in that document with regarding the horse industry, if the City and the Province want communicating about the different land use management of this road, in conjunction with the roads and the problem we know they work in silos, you know Francois?

Francois van Rensburg: Yes, in some extent.

Anette Deppe: In some extent, that is a big concern and most reasons. We have the presentation and I have communicated with Ghecko Services, that it's going to be vitally important now for the residents that they come together yet, that they come together now and brand the conservancy. Ones the conservancy is branded by a branding house or a company like Sasol or Steyn City, maybe they are interested in branding into this conservancy. They need to do social responsibilities too in this area, but if this area gets branded as a conservancy in the Province then the Province have to look at the alternatives. So, your branding needs to take place first, before they start planning the roads, once that branding is done and then the conservancy has established in the Province, they have to move the roads.

John Mendelsohn: One last thing, before you go Francois. There is now a new constitutional court decision which informs us that you may have the Environmental blessing and you may have the information of the road, but you now have to go through the process that getting the Municipal land use zoning, every piece.

Francois van Rensburg: It is not applicable.

Chris de Villiers: Yes it is.

John Mendelsohn: It is applicable.

Francois van Rensburg: Is it about a land use?

John Mendelsohn: It is land use, it is roads and it is everything.

Kristin Kallesen: I can consider an article on it.

John Mendelsohn: No, I've got the decision.

Kristin Kallesen: Francois before you go, your detailed assessment, do you know how many lanes this road will have double lanes or 4 lane road and is the buffer on either side?

Francois van Rensburg: I don't know exactly where the buffer is, the yellow line that you see there, is where the road is. What I will do is I will leave the map here, it's not mine it's one of my clients, it was quite a challenge to get this 2 Reports, so what I will do is on these 2 reports I will get somebody to exactly your question Chris, how all these little roads going to be realigned and change to access that. We will not look currently at driveways, obviously driveways we will assess to the detail design and will have constipation. I will make you copy of that section there.

Chris de Villiers: It's not like Main road, where every property in the area has access to the road, this road in this section comes down to an existing road with driveways at every point.

Francois van Rensburg: We do not following an existing road.

Chris de Villiers: Sorry, I see your point. You say either you take sections if it is an affected driveway there. Sorry, it's just me.

Francois van Rensburg: I need to show you how we going to give you access to that property.

Chris de Villier: No, no.

Francois van Rensburg: I obviously need to address.

Kristin Kallesen: This is the alignment, and nothing has been changed in the original surrounding. This is the original alignment.

Francois van Rensburg: What I will do after this meeting, I will make a scan of this section specifically. I can get this from Mark in the background, and I can give it to you electronically to print it in your will. Okay, I'm going to leave this

map with you guys and these 2 reports will also be scanned on a dvd and we can distribute it.

Chris de Villiers: Thanks a lot.

Kristin Kallesen: I would like to see the EIA Report of Steyn City and see the documentation.

Francois van Rensburg: Yes, it's fine.

Kristin Kallesen: Let me give you my card with all my details.

Anette Deppe: I continue that I saw the date of that meeting with Steyn City and if I recall back when the Public Meetings were on I sent out an invitation to all the rate payers in the area to attend those Public Meetings.

Kristin Kallesen: Because it was out of the Gecko area.

Anette Deppe: I know, but I'm just saying. Somebody send it to me, in fact I think that the Environmental Company sent it to me and I sent it to all the rate payers, if I recall back I think I have still have the email I've sent out to all the rate payers.

Kristin Kallesen: I don't know who they are; I'm looking outside I don't see any of the information.

Anette Deppe: From my side as a Councillor, Steyn City's social responsibility to the area, they coming, if we like it or not. We know Steyn, we know what he done in the past. We know what he's doing in the future and he has a social responsibility to the area, but he got to show the residents. The horse industry it's going to be now severely to apply this road.

Michael Drenman: I don't work for Steyn City Properties, we the project managers of the development. We can send you what they doing in terms of social responsibilities.

Kristin Kallesen: At the end of the day it's not good for them, because their lifestyle by doing it, they actually destroying someone else's lifestyle.

Michael Drenman: It's not Steyn City's decision to do this, as Francois mentioned, Steyn City have to upgrade the road to do the developments and they are informed and told by Gautrans and GIA where and when to do it. Steyn City has absolutely no influence over which road gets the upgrading.

Kristin Kallesen: Sales people out there telling how centuries moving the road, I mean the developments may have a misperception on themselves.

Anette Deppe: Sorry just off the record, the fact remains if this building high density development and a high density development is what are going to

be using this road to get access to the East of Midrand, so he is impacting on other peoples lifestyles.

Michael Drenman: Yes.

Anette Deppe: He is supporting in his responsibilities and only the people from Diepsloot area, we want to see other social responsibilities to the people.

Lizelle Gregory: Do you maybe have a suggestion?

Anette Deppe: I would like to see him do the horse senses for us, paying for the horse senses in that area.

Michael Drenman: If you can send some suggestions, we will give it to our clients.

Anette Deppe: We want a detailed senses of the horse industry in this area, in the conservancy area, work force, labour, feed, plots, because Century also have on their management estate a horse industry so on the Polo fields in Sunninghill and in fact they are bringing in the Polo Event from Plettenbergbay, they bringing up to the Polo fields in Sunninghill which is on the R55 and that's going to redone by the Miors and Century. I would like to think that the horse industry should be the number 1 on their priority for the lifestyle that they are building, because they are building lifestyles for people that they selling houses to.

Shiree Darley: Can I also just explain, just to understand how it cuts the horse industry in half. Our major competition grounds are obviously that's 1 and that is the other one, all this area participating competitions here, probably once - twice per month and then everybody comes.

Anette Deppe: That north eastern bloc they have the Gauteng Schools events is for horse riding, one of the 7 of 14 codes of the City of Johannesburg is Equestria, so it is high for the code. What we would like to see in social responsibility for this Project for Steyn City and I said we would like to request for the social responsibility of the development that they are involved.

John Mendelsohn: And mitigation measures.

Lizelle Gregory: Is it possible for you in the horse industry, is it possible for you to maybe give me a map, exactly what boundaries of the horse industry is and where your conflicts are. If you can show it to me to get there, you have to go and divided it. If you can explain it to me, what the impact of the road is, then I can address it. From your side, because I can see your problems what you've got and it's something we have to look at. You can give it to me in writing and map and say what you do there and also your everyday movement in the corridors like for example from School to the Horse grounds, just do something like that and we will have a look at it.

Shiree Darley: There are a lot of people coming in and riding their horses on a daily period, you have also the instructors.

Lizelle Gregory: You must also give the main roads the people travel on and just the community. If I can just understand the main circulation and the tour area and the main facilities, how they fit in the area. Then we can start looking at that and how it actually has impacts on it.

Chris de Villiers: There is another issue which means, I'm not sure if you captured it enough string on the submission about how the sub this road drives our suburb, you need anything on that. I mean you can't see on the map how Glenferness for example or other suburbs in the same way, for example – this road bi sets Glenferness and destroy it as a suburb, never mind the horse industry, it will cut through in the community and the social aspects of living together as a community.

Lizelle Gregory: If you can do the similar thing, just show this is your suburb and it is cutting through this section of the suburb and whatever is on the other side of the road, if I can have those issues in more written detail it will make it a bit stronger.

Chris de Villiers: I can go to the Kyalami Councillor.

Lizelle Gregory: Yes all the suburbs that are interested to give me that information.

Anette Deppe: The other thing you should note is that the schools of Gauteng that provide equestrian curriculum, there main curriculum to pass matric and I think the School needs to be also given input on this.

Juanita De Beer: Cedarwood as well.

Anette Deppe: Yes and Cedarwood, and I know it's considered a rich man's sport and it is considered mighty meters, but there are Schools all over northern suburb – Bryanston, Lonehill and everywhere - that send children for riding lessons in this area.

John Mendelsohn: The Soweto Equestrian Academy.

Anette Deppe: The Soweto Equestrian Academy and they get funding from City of Johannesburg.

John Mendelsohn: Yes.

Anette Deppe: They got to bring their horses in and lot of things.

Lizelle Gregory: I think the horse industry, it cannot be moved anywhere because if you look at the industry as it is now, it is something that must be also again highlighted to the local authority of the area is that it has got a

very important function and it is a unique composition of the Equestrian facilities. The one problem at the moment is that there is no sewerage with the hospitals, but there will be a sewer line permitted in the area because sewers are permeable, but if this entire horse industry is going to be moved out of the city, then it will just be another area that will be disturbed, because the Horse Industry disturbs the top soil. I have looked at the area, there are areas that are sensitive but where the horses walk there is almost no vegetation, it's an area you going to move it out and it's going to be disturbed again, in a way some exotic plants and stuff that are settled in the area around this and maybe fairly sustainable. So, it will be difficult to move out this entire industry that you've got here.

Kristin Kallesen: It will be a good case study, it wasn't an equestrian are basically and now it's degraded.

John Mendelsohn: Just one thing Lizelle, the brief in my letter is, traces and by lifestyle of diversity, it is as much as a Horse Industry and it is unique, it takes another thing out of diversity and make the choices of the lifestyle.

Kristin Kallesen: In regard of the exotic and operating as the Green Lung and a cooling area etc.

Lizelle Gregory: Yes, definitely.

Anette Deppe: This is why the City of Johannesburg declared that a non-development area in that Northern development framework. In matters of interest they moved the boundary; they moved the Urban Edge to accommodate Century Development so that they could save the middle part.

John Mendelsohn: Yes that is very true.

Anette Deppe: So it was done by the City of Johannesburg in that Northern Development Framework.

Kristin Kallesen: Can I just add, the sewerage line coming through where is that?

Michael Drenman: I don't know about the rest of the area but we upgraded the area that comes through Glenfair.

Anette Deppe: Can I please talk to guys quickly about plan B for Ghecko. If PWV5 and PWV9in the Urban Edge, that plan B gets put together now already for this area, considering when it gets broken up in 4 blocks then you obviously going through a whole EIA Process and all those things and when it is approved, then you sit with 4 different blocks. Everyone have to make a decision at that point, what they going to do with these 4 blocks and how they going to fit this blocks to each other so that the area can operate in a sustainable way. They have to do the 2 in the same time, your overall picture

and the plan B. I'm not saying this to be funny, I'm just saying what his telling us they need this roads. So plan B needs to be start looking at, what you going to develop and what you want for each block then they can connect the linkages.

WAY FORWARD

There will be a next Public Meeting for the Draft EIA Process.

CLOSING

Meeting ends.

-Forum Meeting-

The design and construction of Erling Road between the K46 and the K56 and the K56 between the K46 and Main Road (R71) including all required access roads and infrastructure.

DATE: WEDNESDAY, 6 NOVEMBER 2013
PLACE: KYALAMI EQUESTRIAN PARK CLUBHOUSE
ADDRESS: 1 DAHLIA ROAD, KYALAMI A.H
TIME: 18:00 – 20:00

Contact Details from Environmental Consultants:

Agenda

1. **Welcoming and Introduction**
2. **Purpose of the Meeting and Background regarding the EIA Process**
3. **Notification of Interested and Affected Parties and Issues Register**
4. **Description of Project**
   - The role of the proposed K56 within the Larger Gauteng Road Network System; and
   - The discussion of the involved section of the road
4. **The Status of the Application**
5. **Way Forward**
6. **5 Minute Presentation by Mr. Paul Fairall**
7. **Questions, Comments & Issues**

Bokamoso Environmental

Project Description

Role of the Road within the Larger Gauteng Road Network System:

- On the Gauteng Road Network Maps since the early 1970's;
- Revised network – Strategic Review

Description of the involved section of the Road:

- At this stage only a line within a 200m corridor and will be refined during the EIA process;
- Alignment alternatives must be investigated and added;
- I & AP's mentioned that they want to table alternatives and project team to investigate such alternatives;
- Various ecological, hydrological and socio-economical issues;
- Alternatives were discussed and compared (preliminary comparison) in the Draft Scoping Report, which was available for 40 days for public comment.

Public Participation Scoping Phase

1. Notices regarding the project were distributed via registered mail, e-mail and fax to al the surrounding land-owners and to a list of identifies stakeholders	√
2. Site notices were erected on 22 February 2012.	√
3. Advertisements were placed in 'Fourways Review' Newspaper on 22 February 2012.	√
4. Scoping Public Meeting - 7 March 2012	√
5. Draft Scoping Report and Plan of Study for EIA Available for Public and Authority Review ± 27 June - 23 August 2013	√
6. Submission of Final Scoping Report (will also be supplied to I&AP's) – date to be determined	

Public Participation EIA Phase

1. Site notices to be erected	
2. Distribution of notices to surrounding land-owners and tenants	
3. Advertisement to be placed in the 'Fourways Review' Newspaper	
4. EIA Public Meeting	
5. Draft EIA Report Available for Public and Authority Review	
6. Submission of Final EIA Report (will also be supplied to I&AP's	

Preliminary Issues Identified

- Impacts on tranquil and rural lifestyle;
- Impacts on fauna and flora;
- Impacts on wetlands and ecosystems;
- Impacts on hydrology;
- Impacts on services and infrastructure;
- Loss of jobs;
- Traffic congestion;
- Why not upgrade the existing sub-standard roads?;
- The road cuts across various private properties; Questions regarding expropriation, remuneration, negotiations etc.;
- Impacts on prime equestrian areas; and
- Impacts on property values.

Bokamoso ENVIRONMENTAL

Way Forward

- Comments from Stakeholders and I&APs are included and addressed in Draft Reports
- Draft Report to be finalised
- Draft Reports available to I&APs and Stakeholders for comment
- Final Report to be submitted
- EIA Process

AGENDA		
1	Welcoming/Introduction	Lizelle Gregory (LG) Bokamoso Environmental Consultants
2	Purpose of the Meeting	Lizelle Gregory Bokamoso Environmental Consultants
3	Background regarding EIA Process	Lizelle Gregory Bokamoso Environmental Consultants
4	Affected Parties' Preliminary Issues as Categorized	Lizelle Gregory Bokamoso Environmental Consultants
5	The Way Forward	Lizelle Gregory Bokamoso Environmental Consultants
6	Questions, Comments & Issues	

Summary of K56 Forum Meeting presented by Lizelle Gregory:

Fourteen parties attended the K56 Forum Meeting on 6 November 2013 at the Kyalami Equestrian Park.

The purpose of the Forum Meeting was to establish a K56 Forum that is representative of the different groups in the community and surrounding environment; to obtain issues from the different groups represented in the K56 Forum; and to categorize issues obtained from the different groups in the K56 Forum. Lizelle Gregory stated that a K56 Forum would allow better communication to the community. In future, Forum Meetings will be held prior to Public Meetings. This would enable Bokamoso to present information to Forum Members for feedback prior to presenting this information to the public.

During the Forum Meeting background was supplied on the Scoping and EIA Process and the Way Forward was discussed. It was confirmed that the Final Scoping Report will be available for review by I & APs over December but that additional days will be allowed for comment in line with the Regulations.

The community was requested to assist in the compilation of a site specific issues map. The proposed alignments of the K56 will be superimposed onto this map which will be available to the community for review.

Members of the community stated that due to the diverse nature of the equine industry it is very difficult to find one representative for this industry. It is a challenge to

get hold of people in the equine industry and to get information through to them due to their working hours. It was requested that a Master Plan of the Equine Industry be compiled and Lizelle Gregory indicated that Bokamoso is trying to do that.

A member of the community made the suggestion that the community supply Bokamoso with information on the Sport Impact, Business Impact and Social Impact from the proposed K56. They will be able to give a holistic overview of these impacts and make a conclusion. Bokamoso can then look at the individual impacts. This suggestion was welcomed by Bokamoso.

It was mentioned that horses support the biodiversity of the area. Members of the community emphasized that the proposed K56 will result in the fragmentation of the equine industry and will result that the whole area will be lost. The question was asked: "Where will they go?"

A member of the community wanted to know how you weight the concerns i.e. alternative routes. Lizelle Gregory responded that there are different opinions in the assessment of impacts and that it is not exact. The comparative impact assessment of alternatives will take the social, economical, institutional and ecological impacts into account. Specialist studies will be required.

Bokamoso will conduct the Social Impact Assessment based on the information received from the community. It was requested that the Schools and Churches also supply input. Cllr. Depp (Ward 93) offered to be the representative of the residents and stated that Wards 94 and 112 are currently being profiled.

Bokamoso undertook to compile a list of representatives as supplied in the Forum Meeting.

Bokamoso ENVIRONMENTAL

MINUTES OF THE CEDARWOOD SCHOOL MEETING FOR THE EIA K56 PROJECT 16TH OF JULY 2014

ATTENDANTS TO THE MEETING:
BOKAMOSO ENVIRONMENTAL:

Bianca Reyneke.
Mary-Lee van Zyl.

Other Attendants:

Roy Lindemann.
Jayne Eurelle.
Lara Weissenberge.
Francois van Rensberg.

INTRODUCTION:

The meeting at Cedarwood School started at 09h00 – 11h00 on the 16th July 2014. Mrs Jayne Eurelle, preparatory School Headmistres welcomed all attendants.

Francois: I brought the WSP maps with the 3 alignments on. What I also did was to zoom in on the actual school site. So when I look at this, this is where the school sits.it basically nicks around that northern side.

Francois shows the attendants where the road will affect the property. He also stated that the blue road/alignment is the proposed centre line for the proposed alignment and the black lines on the outer side of the blue line that is the actual road reserve. The magenta line was discussed at the last public meeting. (Jayne prefers this line.) The colour line is just the centre line.

Francois indicated were the PWV9 is. The school will lose up to the southern black line.

Roy indicated to Francois up until where the school property is on the map.
Roy also indicated the all wetland area and stated that they don't use the wetland area at all.

Roy: This is an old picture. None of our buildings is there and this was before we even build the soccer field, which is 4/5 years ago. We bought this piece of land (Roy indicated on the map where the land is) and this is where the collage is now.

Jayne: So what we need from you is to go and look and see exactly the actual portion of ground the will be taken away so that we can see what is on that ground, we know that it is a soccer field, but we are not sure because it is not indicated on the aerial photograph here.

Bianca gives an update map from Bokamoso's side. The map has the collage on, the soccer field and also the double storey building.

Francois: You must always be careful with aerial photographs. I will have to check because I probably printed the wrong one. We have a digital aerial photo for the area and that is a proper survey photo.

Roy: Is the pink line still on the table or has that been taken off?

Francois: Bianca will advise you whether they received the final wetland delineation, but from our perspective it is a much more expensive option first of all and secondly it is not the optimum solution. So they prefer the blue line but if the environmental issues are so sensitive the pink will be an engineering option.

Roy: So Bianca from an environmental, has that report come out? Is there any significance?

Bianca: Yes, we have received the Wetland report and we are still working through it and it will be in the EIA.

Francois indicated that 60% will prefer the blue line because they knew about the alignment when they bought the property. The challenge come if you move this

alignment then you start to affect total different people that hasn't known about this road.

Roy showed Helderfonteins brochure where they planned for the road.

Jayne indicated that if the map given by Bokamoso is accurate then they are okay.

Francois: The right thing to be is to get a proper survey drawing out.

Roy: At the end of the day if we can get that digitized image and say this is exactly where the road will be, then we can start making plans. If the Bokamoso map's alignment is the correct one then we would be happy with the fact that we are not losing most of the school, but still unhappy that the road is going through.

Jayne: The good thing is that one of the entrances to the road is very close by for us. One of the access points to the road from what we gathered from the last meeting is quite close to us.

Francois: Our proposal to the provincial government for now is not to do an access road on the southern side, but just in the northern side.

Francois indicated to everyone the wetland areas and the flood lines.\

Francois: There is an idea form the Glenference horse society to have underpasses through the road and to combine this with the wetland areas. (Agricultural underpasses.)

Roy: Is it possible for you to get us the digital map on that.

Francois: I will see what our digital photo shows.

Roy: The PWV9 intersection, what do you think the timing will be, it is going to happen. What I heard and this is rumours, I heard that Century is trying to get Lopal Prisons in terms of that land. I feel if they do that they will pay for the intersection.

Francois: The issue regarding PWV9, I was in a meeting yesterday again at Sanral regarding a total different project. The problem with the Gauteng fee improvement scheme as we use to call them, the thing was designed basically fund the initial phase of the road. There is not enough money in that scheme now subsidise future expansion. What I normally say and also to my other clients is if you think about this, it add best and Bianca can tell you, it add best to get a EIA done in 18 months. So if somebody pushes the button tomorrow we are talking about 2-

3 years for the EIA proses, you talk about a another year for the detailed design proses because Gautrans will not so a detailed design unless they got a EIA, and appointment of the contractor. So we are talking at least 4 years from now. And then the construction of this is 4-5 years.

Jayne: And the K56, were time wise?

Francois: We have instruction as soon as that EIA comes out to finalize our detailed design. We said we would put a team on it to do it in 3-4 months. The intension is to start construction as soon as we've got an EIA.

Jayne: So when is this EIA going to be ready?

Francois: I will have the discussion again with Lizelle but the intension is to have the EIA completed middle end of August. Hopefully by the end of the year.

Francois stated that the yellow line was an alternative to miss some of the wetlands.

Jayne: All our re-zoning has been put on hold.

Francois: The right thing to do is to get a survey done for you and point out where exactly the road will be.

Roy: Is it possible to do that?

Francois: I can give you the line and you can speak to them to do the survey.

All of the attendances took a walk outside to get more clearances on were the road will be.

Bokamoso ENVIRONMENTAL

MINUTES OF THE FORUM MEETING FOR THE EIA K56 PROJECT 8TH OF MAY 2014

ATTENDANTS TO THE MEETING:
BOKAMOSO ENVIRONMENTAL:

Lizelle Gregory.
Mientjie Coetzee.
Juanita de Beer.

Other Attendants:

Gill Whitbread.
Malcolm Mackenzie.
Jassy Mackenzie.
Dion de Jong.

INTRODUCTION:

The meeting at Jill Whitbread's House started at 18h00 – 20h00 on the 8th May 2014. Mrs Lizelle Gregory, Manager of Bokamoso Environmental welcomed all attendants. She said that this forum meeting will be the last Public Meeting.

LG: She mentioned the map that Bokamoso Environmental would have compiled. Bokamoso Environmental's purpose is to go to all the agriculture holdings in the area, to determine what land-uses are on every agricultural holding.
Also to determine what impact roads will have through the area's different land-uses. She mentioned the input Margie Donde gave. Though Bokamoso Environmental compiled all the maps, we thought it all not to be sufficient. Bokamoso Environmental's consultants went out to the study area, drove down the roads and every plot and take note of what is happening on all the holdings.

It is important to know where all the activities with horses are, as well as all other different activities and how it all interlinks. The impacts are quite far away because of the fact that the study area, which is rural environment, is situated in the middle of an urban area. If any relocation has to be done, it should be on the green field's area outside of the urban area. The ecology in this study area is disturbed and has no unique character as the plants are not indigenous. A way must be found to accommodate people's lifestyle and how areas will be able to function with whatever will be done.

At this stage it is not imperative to engage an urban Economist to determine the demography. Rather investigate peoples' activities and what they engage in.

Bokamoso Environmental compiled many maps and we made copies of these. Study our material and if there are any areas of disagreement, or you would like to add more land-uses, provide us with your suggestions, it would be much appreciated.

The bridal parks that had been mentioned, are not exactly in the area of the road alignment. The aerial maps do not show any of these parks. Lizelle assumed that people usually use roads where the low road alignment is.

Gill Whitbread: Unfortunately, all their bridal parks had been cut off because of security reasons. People were allowed to ride across their land. She mentioned that before they bought their property, the bottom part of their property was open and one could ride through their land to Helderfontein.

The problem is that people built and closed up their properties by security fencing, so there is no more riding across.

LG: Mentioned that one of the issues is, that a section of the community gets cut off, looking at the roads. The engineers' inputs show that where your alignment is at the bottom, it is right in the middle of the equestrian activities. More areas are not interrupted.

Gill Whitbread:

Explained that LG's explanation is not correct: 'Let me show you here, this is where the big equestrian area is and here.' (referred to a map). This is not an Equestrian area. This is largely Helderfontein and Treesbank. There are horses up here, but not nearly as many. This is your density of Glenferness and this is the Kyalami area. '

She declared that Malcolm Mackenzie is much more versed than what she is. The problem with the Zinnia Road is already a federal affair and it is really a very busy road. She referred to losing her tortoise but could not cross the road to go and look for it, because of the early morning traffic rush.

owner's alternative

Malcolm Mackenzie: He said that the whole theory is not to make it into a K56 Road, but to improve the Zinnia road. At the moment it is a two lane road and one could make it more adequate and controlled by circles. The four ways stop is according to him pointless and otherwise the traffic can be controlled. The main traffic comes down into Fourways where the main traffic flow is.

LG: Explained that what might be of assistance, is that the Wetland delineation is there. Bokamoso Environmental received the wetland delineation and the preferred alignment would be mainly on the wetland. We are still waiting for more detail.

Gill Whitbread: Asked by whom is the alignment preferred: the engineers?

LG: Answered of 'yes' and explained it is the published alignment. It has been on the maps since 1970 and is cutting across the wetland.

Malcolm Mackenzie: Asked what the reason could be. He also said that 'they' only looked at the topography and put it through the valley. As there were no bridges they took it through the valleys.

Gill Whitbread: Said that in 1956 or whenever it was proposed no one knew what the plans were and did not care. In those days one could ride from Rivonia to Summit Road without crossing a road.

Malcolm Mackenzie: Told the meeting that they got a very interesting apply from the Roads Engineer of Pretoria about the PWV9. He said logistically they may still concern that PWV9 is part of their route. Now they are looking at all the other possible alternatives. Bridle path is mainly affected by the PWV5 and PWV9, but not by the K56.

LG: She explained that we make a summary of all the issues listed, but it is not really new issues. She suggested that we should categorise these, according to

the first meeting, the second meeting and the third meeting. To tabulate these issues.
Bokamoso Environmental will make an effort to simplify issues which were written in a different way, but have the same meaning. Lizelle suggested that the attendants should study the maps provided, and are welcome to add anything else of importance.

Malcolm Mackenzie: Asked whether the maps were in there.

LG: Encouraged the attendants to take these maps Bokamoso Environmental provided. She also mentioned that these maps could be sent electronically to make it easy. She also said they could write onto these maps and hand it back for our attention. They can also take maps to distribute it among the people not attending the meeting. She mentioned that the maps are based on the inputs from Margie Donde as well. Lizelle mentioned that there is still something to be added to the maps, concerning land-use and a development or something. Francois van Rensburg will be able to provide the information.

Mientjie Coetzee: Asked whether it could be the development that Margie Donde put in? It is an industrial development. It could maybe River Sands Farm.

LG: Agreed that it is possible, it could be.

Gill Whitbread: She thinks it is over the road from the River Sands Farm. She is not sure whether it is on the River Sands Farm property itself or whether it is at the opposite of the Fourways Equitation and where the Driving Range is.

LG: Requested of the attendants to give feedback on the maps during the next two weeks and also to provide us with any other additional issues. There will be a Public Meeting and then maps will also be made available.

Juanita de Beer: The public meeting is on the 27th May 2014. The invitations will be sent out 2 weeks before the time.

LG: Said that Bokamoso Environmental will provide the necessary maps at the Public Meeting. Hopefully by that time we would have received the wetland study.

Mientjie Coetzee: Referred to the fact that we are also awaiting the Fauna and Flora studies/investigations.

Malcolm Mackenzie: Asked whether the meeting will be at the church again.

Juanita de Beer: Confirmed that the venue for the meeting will be at the Gracepoint Church.

LG: Assured the attendants that the updated maps will then be ready as well.

Gill Whitbread: Inquired about the way forward, as they have now 2 proposals: Alternative 1 and Alternative 2. The question is what choice should they make and also how to go about it.

LG: Lizelle answered by saying that Bokamoso Environmental now has to compile the Fauna and Flora studies, the wetland survey and to look at every route and peruse it intensively. In order to apply buffers the ecological environment, the social environment as well as the economic environment have to be taken in consideration.

Malcolm Mackenzie: Replied in other words the study will be done in a period of twelve months in order to observe the effects on the environment.

LG: Asked whether he is referring to the Fauna and Flora studies and also said that it is not necessarily so.

Malcolm Mackenzie: Answered positively of yes.

LG: Explained that the Fauna And Flora Studies can only be done in a certain time of the year to enable the specialists to gather all information in connection with the species to be found growing in a specific area.

Gill Whitbread: Added that some people have the opinion that the fact that there are bullfrogs in the area could maybe a savings factor. Others do not care about the development.

LG: Declared that according to the latest biodiversity requirements, the bullfrogs are not protected anymore. Bullfrogs had been taken off the biodiversity list for endangered species especially in urban areas. These requirements change every year. It is now possible to get a permit to relocate bullfrogs. She mentioned that there are other things more sensitive: A buffer area around wetlands, depending on the sensitivity and the value of the wetland. The habitat of the grass owl has to be encircled with a buffer area of 3km. This buffer area had also been reduced. Then there are other species where their buffer areas had been increased. We are waiting for the complete Fauna and Flora studies which will include these.

Gill Whitbread: Asked how Bokamoso Environmental comes to this conclusion: She told how Century Estates set the property alight last year and that the grass owls perished because of the fire. She saw them often as she rode past them for years.

LG: Explained that if a field is set alight, the vegetation that grows anew will be even better for grass owls. It can be compared to re grass.

Gill Whitbread: Answered that could not be if the grass owls perished.

LG: Explained about a specific habitat like red grass where they make tunnels in the grass. Apparently the grass owls go away and come back again. The new plants come up and the grass that grows then is of a better quality, the biodiversity is higher and of a better quality and is a suitable habitat for the grass owls.

Jassy Mackenzie: Asked whether there will be more endangered species when the biodiversity becomes higher.

LG: It is a known fact that the biodiversity becomes definitely higher after a veldfire. It is a certain type of vegetation which is the suitable habitat for the grass owl. It is also close to a wetland area. These are the factors that will be looked at.

Dion de Jong: Referred to the map and asked whether Lizelle mentioned a 200m buffer.

LG: The width and size of the buffer zone depends on what kind of species are to be found in a specific area. She referred to the specific species found in Centurion where the pollination of the species had been taken into consideration. In normal circumstances it would be a 200m buffer zone, but is not always the case.

Dion de Jong: Asked why a buffer zone of 32m had been indicated on the map.

LG: This is so in terms of the Regulations. According to the National Environmental Act there should be a 32m buffer around the water course. Falling within the 32m buffer zone, an EIA Process has to be followed. Bokamoso can make a better interpretation once we received all the reports. Bokamoso Environmental expects the delineation first.

Gill Whitbread: Asked who is going to study these reports. She also inquired about the grass owls.

LG: Answered that Bokamoso Environmental appointed highly qualified specialists to do the surveys. An insect specialist for instance will not be appointed to do a study on grass owls. This is an acquirement of the Gauteng Department of Environmental Affairs. Bokamoso appointed 10 or so specialists, each a specialist in his own field: to do a study of the grass owls, bullfrogs, mammals, insects and wetlands and also the red data plants.

Malcolm Mackenzie: Asked who will be paying for this EIA Report.
LG: Explained that GAUTRANS will be paying the account. For all the country roads as well as roads in Gauteng, engineering firms get appointed to tender for the road projects. Bokamoso Environmental also tendered for the appointment as Environmentalists to do the EIA Report. Lizelle emphasized the fact that Bokamoso Environmental had not been involved with the negotiations. We have no knowledge of Steyn City and also do not know anyone involved there.

Gill Whitbread: Stressed the fact that there is a huge horse community in their area. What alarmed her is the fact of moving the road. She mentioned that there are a few stable yards in Treesbank that will not be affected by the moving of the road. They are concerned for their own quality of life and purposes. To be cut in half by the road would mean they cannot survive. People on the one side will be like in a no man's land. She also expects a rise in rates. The pressure to subdivide will be huge. They see this as the biggest problem and suggest that an upgrading of Zinnia Road will be a good solution as there is already a lot of traffic. She described the taxis making two lanes. If that can be controlled everybody's life will be improved.

Mientjie Coetzee: Added that the colours on the maps are confusing.

Gill Whitbread: She explained that they made the whole of Saddle Brook a horse area, where only 3 horses per property are allowed, though everybody does not own horses there. They have 24 horses on their property of 8 hectares in size. There is a high density of horses in their area, as the stables down the road have many horses. Ascot has stables for 60 – 80 horses and the Glenfox stables have 100 horses.

LG: Asked the attendants to indicate on the map the area GW was referring to. She asked whether the area was on the bottom section of the map.

Gill Whitbread: Said that people being only difficult. She and another lady, Margie worked extensively on surveying how many grooms are employed on each property and how many horses they have on their property, but had difficulty in finding out exactly.

Jassy Mackenzie: Said the reason for that is because half of the grooms are legally employed and people do not want to make known how many horses they have.

Dion de Jong: Thought that the obvious answer is to only upgrade an existing road.

LG: Explained that it is not that obvious. The engineers must be convinced of the right answer as well as GAUTRANS who seems not to think that is the best alternative. A K road is needed here and it does not have to be a service road. In a K road one will have access to the road only every 600 meters. It will then not be upgraded as a local authority standard road, but it will be operated as a K road.

Every possible aspect and alternative of this road project has to be investigated to come up with the best possible solution.

Malcolm Mackenzie: Said that according to his understanding there will be no K56 road.

LG: Answered that she understood. She discussed the situation with the engineers. According to the studies they did, the road can also be upgraded. There is though a road network system to consider as well as to determine where the K route should come.

Malcolm Mackenzie: His biggest query is that he cannot understand why only a part of the K56 had been done, why not the whole of the K56 road. He fears that the EIA Report could be a failure if the proposed road gets the go ahead.

LG: Answered that it never works that way. They have limited funds available. What they normally do is to let the road terminate into a road where it continues. If it does not continue, it stops there and it also can become another road. Different sections of roads get allocated to different engineering companies. These companies then tender for the contracts. Gautrans had a lecture a while ago about their way of method and strategies. Lizelle actually does not agree with it.

Dion de Jong:

Said assuming they cannot put the roads through the wetlands and also because of the challenges, then they have to go for the purple or the green. All those properties falling in the purple or the green then have to be purchased. The question is will it not be far too costly.

LG: Explained that once the alignment had been decided on, the preferred alignment, they will actually go out to value the different properties. People get paid for their properties according to the market value. If the decision makers are serious about the road, they will purchase these properties.

Dion de Jong: Thought that it will be hundreds of millions to purchase these properties.

LG: Thought definitely so too.

Gill Whitbread: Added that this is the very thing they cannot understand. She understands what Lizelle is saying about the problem with the K route. The upgrading of the Zinnia Road to a K Road is still the better option. In the latter case properties with houses on will not be destroyed and there is still access to the road.

LG: Answered that this is the option to give to them. Lizelle referred to the maps and explained how the different roads link up: the diametrical way they have to take out, the different standards of K routes and their radius.

Dion de Jong: Asked whether the 511 was built there as part of a K route.

LG: Answered positively of yes.

Gill Whitbread: Asked Lizelle to go back, (On the map), because she thought Lizelle said there already is a road reserve.

LG: Where Maroon Square is going to be built at Dainfern, The K56 is already open there in that area where the reserve is being kept open.

Malcolm Mackenzie: Asked how far the servitude goes.

LG: Answered quite far.

Malcolm Mackenzie: Asked whether it goes as far as Cedar Road.

LG: Declared that she does not know yet, but will have the knowledge at the next Public Meeting.

Gill Whitbread: Asked what will be the outcome if they come through a property, for instance going through the bottom part of a property. Will the owner be refunded for that part only or do they purchase the whole property.

Malcolm Mackenzie: Answered that the owner will only be refunded for the part taken.

LG: Referred to the fact that in some cases it is better if the planned road goes through the owner's house: then they have to be refunded for the whole property.

Jassy Mackenzie: Asked what are they going to do then.

LG: Said as one does not want the road going right passed your house, the better option is to align the road right across one's house.

Malcolm Mackenzie: Mentioned the traffic coming from the Lonehill and Fourways areas and then coming along this road and it does not pass through Steyn City. According to the budgets of Gautrans and Gauteng, not one cent is allocated to the development of new roads for the next 5 years.

LG: Added one will not believe what a struggle it is to get funds to complete all these processes. Bokamoso Environmental had been stopped and then had to request more funds. Chris Buitendag was the person who had been a great help at Gautrans, but passed away. The person now appointed feels responsible for signing application forms of which he knows nothing. He could be held responsible if anything goes wrong. Apparently he would like discussions with Lizelle, before attending any meetings.

Dion de Jong: Asked who will make the final decisions.

LG: It will be GDARD and possibly in conjunction with Gautrans.

Jassy Mackenzie: Asked what GDARD stands for.

LG: Explained that GDARD stands for Gauteng Department of Environmental Affairs. DWA stands for the Department of Water Affairs. A water licence application is necessary where there is construction within 500 meters from a wetland according Section 21 of the Water License Act. She also mentions that sometimes it could be a political decision. She mentioned the Gautrain project which the construction thereof was a political decision. It went through sensitive areas.

Dion de Jong: A political decision could mean it is really about getting traffic from Diepsloot through this way.

Gill Whitbread: Said she thinks of not political in that way but it is something to do with Steyn, as he contributes so much money to the development of roads.

Dion de Jong: Added that it does not really matter to Steyn where the road comes.

LG: Answered that she thinks it also does not matter for Gautrans where the road comes, because of the lack of funds. If there is any other way to get the road constructed, thy may allocate the money for the road to be constructed. Therefore we have to make the correct recommendations in order for them to make right decisions.

Gill Whitbread: Asked about expropriation. Do the owners get paid out before the development of the road?

LG: Answered of yes.

Malcolm Mackenzie: Added that the proclamation of a proposed road follows a very lengthy process.

LG: The road developers have to go to every affected owner to discuss these details and any other alternative with them. This will be one of the conditions the developer has to submit in order to obtain authorization from GDARD. The developer has to submit proof of the fact that they negotiated with all involved in a satisfactorily way.

Dion de Jong: Asked whether the wetland follows a course and if there is maybe a river course somewhere.

LG: Answered and explained that it is actually a drainage line. They are man-made dams which are not licensed and therefore are illegal. These are mostly manmade wetlands.

Jassy Mackenzie: Added that these wetlands are now there the same as any other wetland.

LG: Explained that though it is a man-made wetland, sensitive eco systems had been created around these wetlands that cannot be ignored.

Gill Whitbread: Referred to the bird sanctuary and Bealieu. It is all one system.

LG: Said that it is a water course and the wetlands are associated with the water course.

Dion de Jong: Asked what the next step would be.

LG: Said that the next step would be the Public Meeting to be held on the 27th May 2014. The maps will then also be ready and presented. Bokamoso Environmental will write and compile the DRAFT EIA Report. The latter will be made available for public comment. All the specialist reports will be included in this Report and the public can then comment on it.

Dion de Jong: Asked whether there will be an EIA Report done for every alternative.

LG: Replied that Bokamoso Environmental's EIA Report will include and compare all alternatives. There might even be another alternative proposed.

Malcolm Mackenzie: Asked whether the timeframe of completion for this whole process is 18 months.

LG: Replied that it will be finalised quite soon.

Mientjie Coetzee: Asked whether Malcolm means the whole outcome.

Malcolm Mackenzie: Answered Yes.

LG: Added the outcome would take about 6-7months, also to complete the EIA Report.

Gill Whitbread: Asked when the development of the road will start, after the authorization came through.

LG: Answered that from what she gathered, the developers would like to start in 2015 or 2016.

Malcolm Mackenzie: Asked how it will be funded.

LG: Could not answer this question as she does not know. Once again she referred to the DRAFT EIA Report which will contain all the specialists' reports. The people involved can peruse these, comment on it, after which Bokamoso Environmental will address these and do the FINAL Report.

Dion de Jong: Said that if one looks at the blue road which actually has no intersections, it could be easily made into a K road. The residents could do without a road with intersections fanning out from it.

Gill Whitbread: Mentioned that there are potholes everywhere in these roads.

LG: Said that looking at blue route and bending it back it will show the fixed alignment. She said that what does not make sense is that it ends at the wrong place.

Dion de Jong: Told the meeting that some developer bought all the land there.

Gill Whitbread: Mentioned Peter Gillespie. She indicated on the map to the area. Apparently Peter Gillespie plans the development of a school there. She can provide the name of the people doing the EIA Report.

Mientjie Coetzee: Presumed that almost all of these properties belong to PG.

Gill Whitbread: Agreed that that he bought everything in the area.

Dion de Jong: Thought that maybe a deal could be made there with PG. He referred to the entrance gate there entering into 2 sections of these proposed developments. It could be beneficial.

Gill Whitbread: Thought that PG wants the road to have access to the squatter camp. Something else that was over looked, is the pylon of the Eskom Servitude going through there where properties already had been expropriated.

Malcolm Mackenzie: said what one can maybe do now to protect that, is to take it to there. (Indicating to the map?).

LG: Said that it must be a geometrical angle. She added what she convinced them to do, where the owners would like it to be, is to create small parks underneath the road where they can walk their horses. On the other hand they could create small entrances still linking it to this area.

Gill Whitbread: Told of an interesting thing in Waterfall Estate: She described it as overpass structures that go under the roads. It is almost like a big bridge but it is completely grassed over.

LG: Added that is what the engineers proposed in doing when they had a meeting. It could look very good.

Gill Whitbread: Meant it should wide enough though.

LG: Answered that they should look at such an alternative and suggest where they want access. Then the road can be planned in such a way that people can still walk their horses. Some landscaping can be done to enhance the project. Then they still have the local function of the road to upload on, as it has a more regional function.

LG added that if they want to develop a property where the K route has to go through, the opportunity is there for them to open their land. She added that it will be less costly for the engineers for not going over the wetlands.

Gill Whitbread: Said she would prefer the area to be untouched and that the roads to go right around the outside.

LG: Explained that the engineers are willing and that there should still be more negotiations. She told them about the N1 Freeway separating their suburb. People drive underneath the freeway and it does not give the feeling of a separated suburb. It was done in a very stylish way and one can shop at the other side of the freeway. Motorists drive over the N1 Freeway. LG promised to mention this alternative at the meeting as well. She will also discuss this with the engineers.

Malcolm Mackenzie: Asked whether it is necessary to do an EIA Report.

LG: Said The EIA Report must be submitted and also has to include the alternative as part of the report.

Dion de Jong: Suggested they have to take the green one away.

LG: Answered that they all have to be kept. Then she can motivate which one to keep. All 4 of them have to be compared. She mentioned the link with Erling Road.

Bokamoso ENVIRONMENTAL

MINUTES OF THE PUBLIC MEETING FOR THE EIA K56 PROJECT 27TH OF MAY 2014

ATTENDANTS TO THE MEETING:
BOKAMOSO ENVIRONMENTAL:

Lizelle Gregory.
Mientjie Coetzee.
Juanita de Beer.

Other Attendants:

IAP's/Public Meeting:

INTRODUCTION:

The meeting was held at the Grace Point Church 18h00 – 20h00 on the 27th May 2014. Mrs Lizelle Gregory, Manager of Bokamoso Environmental welcomed all attendants. She introduced herself, Mientjie Coetzee and Juanita de Beer of Bokamoso Environmental. She asked the attendants to the meeting to fill in and the attendance register.

LG: She mentioned that Bokamoso Environmental had been appointed by WSP Engineers to assist with the EIA Application as for the road paper 36, which is for the attendants' area. Lizelle added that Bokamoso Environmental actually had come a long way and made many friends as we moved around in this area. She said that this meeting concerns the EIA Application. Bokamoso Environmental

completed the Scoping Phase. The Scoping Report had been completed and so we have the go ahead to commence with the EIA Process. We are in the Public Participation Phase now and Lizelle would like to give an update to where we are now. Bokamoso Environmental would like the attendants at the meeting to participate and come forth with their inputs. She stated that these people are all familiar with the road under discussion. It accesses street just from William Nichol Drive to Main Road. There is a section for Erling Road.

Through the 2nd slide of the slide show Lizelle indicated to the traffic alignment. Bokamoso Environmental invited Mr Eric Coetzee to give an overview of the road network. LG introduced Mr. Eric Coetzee from Gautrans to the meeting and also thanked him for his willingness to attend the meeting and to explain how the road network will be implemented. It is important to understand where the road fits into the network.

LG: Again referred to the attendance register to be filled in – all the attendants detail, also the questions they have as it could all assist us in our studies. Lizelle mentioned Mr Francois van Rensburg from WSP Engineers who also attended previous Public Participation meetings with Bokamoso Environmental. He will discuss the alternatives to this road in more detail to give an overview thereof. He also had discussions with Gautrans. Members of the public requested that someone representing Gautrans should also attend this meeting, so Mr Eric Coetzee was invited to do so.

The purpose of the meeting is to discuss the EIA Phase of the EIA Application for this road development. LG explained that there are two phases in the EIA Process: The first phase is the Scoping Process, which had been completed. In the first phase all the issues had to be identified and to be addressed in the EIA Phase. In the EIA Phase these issues had to be investigated or alternatives have to be put in place. The DRAFT SCOPING PROCESS had been approved.Bokamoso Environmental recommended in the SCOPING REPORT that the PUBLIC PARTICIPATION PROCESS will be repeated in the EIA PROCESS. This is the reason for this meeting to take place.

LG: Said she will introduce Mr Eric Coetzee after discussing the agenda. A discussion of the identified alternatives put on the table, will then be discussed. The SCOPING REPORT includes four alternatives that had been identified. These alternatives will be investigated in the EIA PHASE. One of these alternatives changes slightly, but will be discussed.

The EIA process allows for a 200m corridor along from the original alignment. The alignment is repeated in terms of the Public Roads Act, Actually a Provincial Act to protect the road eco. (It was on the table since the 1970's)She referred to a road on a map and said that it is on the maps for almost 30 years. She also referred to

the alternatives and the preliminary sensitive issues indicated on the map on the screen. Lizelle also mentioned that we are still waiting for the results of some studies. Lizelle explained that these studies will be part of the EIA Report. The comments on these will also be perused.

LG: Said that the list of issues will be made available to all attendants at the meeting. All the issues received had been classified. She mentioned that Bokamoso Environmental received numerous comments. These issues and comments can also be e-mailed to the I&AP's, therefore their feedback will be much appreciated.

LG: Mentioned that a forum had been established consisting of the representatives of the area and that discussions had been held with the members of this forum. The social impact here is actually a community impact, according to all the information/inputs received. It will be an interruption of national events taking place in this area. Lizelle also mentioned people coming from other parts of the country into this area every now and then.

Lizelle added that the main problem would be the possible fragmentation of the area. The movement of horses and people through this area will most definitely be affected. There is a major concern because of the cutting off of the movement corridors. Another issue Lizelle mentioned and she agrees with all who are concerned, is that this is actually an equestrian area and all the horse events take place in this area. Through road development this whole area could suffer loss, therefore people are sceptical about road developments in this area.

Once a road is approved of, subdivision starts to take place and then this entire area might get lost. A long time ago this area was outside the urban area, but development takes place around this area now. When one drives on the roads, especially the R55 road, the roads are very congested. The entire area cannot be protected by an environmental consultant or by the road developers.

Maybe the community together with the Department of Agriculture and Rural Development can find an acceptable solution to this problem. In this way the area could obtain legal status. The Tender Department must be involved according to the regulations. Apart from objecting the proposed road development, it is still going to proceed and this area will be unprotected. The negative aspect is that if this area falls away, it will have to be established somewhere else. It might be the Greenfields area which is a very sensitive area. These are the main issues of concern apart of the ecological issues that have to be addressed.

This is also a very emotional thing: people love the place where they are living and enjoy the tranquillity of their environment. There is understanding for the latter

mentioned. Bokamoso Environmental will try to understand and listen to what residents have to say. Whatever is going to happen, mitigation measures will be put in to place. Though these measures will be addressed and recommendations will be made, it is still a political decision.

If the road is required and there is a need for it to be developed, Bokamoso Environmental can only assist the residents of the area affected by this development, through our recommendations. Therefore all have to co-operate in this instance to see if these roads can go through this area of discussion.

LG: Now asked Mr Eric Coetzee of Gautrans to give background of the road development involved.

Mr Eric Coetzee: He greeted all in attendance and said that he would like to provide some background details concerning the road development. He made use of a slide presentation. He said that he would like to address the history and background of the road network. The network (or plans of) had been there for years.

He mentioned Midrand review and that started to plan a network in Gauteng – what will be the penury in 50 years' time. Gautrans will need more land. He mentioned the early 1950's to 1960's and the high gold price at that time and all the developments in the PWV area of that time. He also referred to the 3000 township settlements and the long process to have these approved of. There were also no proper roads to and from these settlements. Thus there had to be looked into other strategies and solutions.

Possible solutions: Appointed Engineers and a Town Planner to investigate what would be the best strategy to follow in the Province. These Professionals investigated the area and compiled many studies and made certain decisions. He mentioned a transportation study where one has to look at the network. The volume of traffic: what volume of traffic will there be in 10 years' time. The following network was published in 1974: the freeways and gateways had been planned. The k56 is to be part of a gateway.

Networks for different years to come had been established. The base year was 1975. Then the road developers envisaged what should be developed by the year 1985 and then the year 2000 and so on. All planning was done according to this road network. All policies, designs, planning, impact and land uses and standards were looked at. That is the basic part of the network.

Eric referred back to the 1980's and 1999 and added that they did a transport focussed study. He mentioned the transport modelling: 1995 the toll structures had been looked at for the province, but was never approved. The politicians

declared at that time that no existing freeways should be tolled. The construction of highways in Gauteng then came. 1994 Came with the change of policies and it was quite a challenge for the road developers to keep their network going. The success thereof speaks of improved ability. Development in certain areas got more focussed and expanded. There was also a movement of development to new areas. This is happening all over and also in the area of discussion.

In the early stages there was no co-operation with the local authorities. Land had to be bought from the local authorities. It hampered the development of the traffic ways. All the acts had to be taken into consideration. He added that we are a third world country, but would like to have first world standards: (their standards had been under attack). One of the challenges was to get past the planning of the apartheid era before 1994.

The road developers reviewed the whole network in Gauteng to see where changes need to be made. Gauteng's contribution - RDP- is 40% and is more or less 9% that of Africa's contribution to road developments. He showed a slide to enhance his explanation of the traffic density in Gauteng: what roads they have at this stage. A slide was shown and he referred to the year 1987 to 1997 – a period of 10 years' time.

He also mentioned that the traffic almost doubled in those 10 years. A certain growth plan is needed. Development will take place and we cannot stop it. Life for all has to improve. A strategic road network is needed. He referred to a 6% annual growth in traffic, and called it a high road order. He mentioned the population growth. He said we talk of Gauteng Province but it is actually is Gauteng City, as it is almost a city area.

The slide presentation was used to emphasize the contributions that had been put into their planning and how to manage the whole network. He called it a strategic development: it is changing and bending all the time as they carry on. He referred to the inter government charter of developments. He also referred to a planned provincial road system which means more roads and also more responsibilities. The finalized plan of the future road network should be reviewed, he added, in order to provide certainty on which land will be reserved for and protected for a road network. He added that, that is the reason for all to attend this meeting.

He referred to the common design standards of urban road development. Once the network reviewed is completed, then they will be able to define under whose jurisdiction each section of the road will fall municipalities and so. Gautrans is looking at a third order network as well, while right in the beginning they only looked at first and second order roads.

He referred to a slide showing how the system works. Most super systems churned for the Gauteng city growth network was a grit pattern. Their function was according to specification. The green ones are the freeway network and the red ones the K Roads. Then there is the third order road network and the 4th indicates the streets.

They came up with a sixth order road, which is for non-motorised transport. He referred to the horse owners here, the cyclists, people walking and running and so. One of the constraints obviously, designing this network is that there are mountain ranges and different areas that constrain one to have a perfect, direct connection to consisting roads.

The Government's decisions on the framework were limited to the highest categories. The freeways have 12km spaces and the second order 5km spaces and that gives you the complete network. The K Routes have 3km spaces. He indicated to the current map with the integrated network and the certain procedures which they have to follow. The current overview shows what is going on at their network presently.

The total network is 60,000 km, 800km freeways: 32% of the 2500km and the K Road 2,300 km 65% of 4700km. That does not refer necessarily to a dual carriage way. It could be just one line in a direction. A certain part of it could already be implemented, not necessarily the whole of it. The streets road networking is mentioned and could be protected by a GTIA: Gauteng Transport Super Structure Act (2001)

Eric spoke about the non-motorised transport and public transport. Also about assessing the social and political impact on these mentioned roads and to re-assess the technical assumptions forming the basis of the development of the SRA.

The Gauteng Province needs a balanced road network and it must also be affordable. He mentioned the processes in developments that influence the review process, the relevant growth and strength of the hand fess. It all depends on where the development takes place. He referred to the compact, urban form that flows to the economy, communities and so on.

There were many environmental issues involved, which had to be addressed. He referred to the slide showing the Gauteng Public Transport Network. The latter is also part of the process. He indicated to the darker lines on the map which refer to the public transport network at this stage. He also referred to the Gauteng roads freight corridor – also on the slide.

He mentioned that they had to do an environmental review of the whole network. The environmental sensitive areas and issues got mentioned here and added that Gautrans is aware of these.

Eric then talked about the classification of the roads and mentioned that Gautrans has a new classification system. The analysis studies of the corridors also got mentioned. Where more developments are taking place, the corridors are planned together with the road's development.

Gautrans planned the network of roads in one component of the Provincial Road System. He explained that they have quite a number of processes taking place at the same time. He talked about the review casting and mentioned the problems they had by 'driving the whole thing', with the Roads Department. The role players were mentioned: All involved e.g. the Town Planners, Transport, Engineers, GDACE and the GDARD, the Department of Economic Development as well as the National Department.

Eric stated that the start of the review was to look at the roads only: class 1, 2 and 3. Gautrans added the third class and they made an in depth study of class three. The land use integration is of immense importance. This is also the reason why they appointed Town Planners, Engineers, etc. and also looked at the design standards. The environmental issues had also been looked into and of course into the affordability of the developments.

The outcome of the review: Gautrans invented a class integrated function network according to travel demand, possible reclassification and a review of the appropriate corresponding standards and an indication of the strategic corridors in the province. Also the preferred third mode transport per corridor, the integration of transport and of the related responsibilities.

He showed a slide with the network map of class 1 to class 3 which referred to their functional road classified network. He added that at that time something went wrong. The Department of Economic Development, although they were part of the team, did not recognise Gautrans network as part of their special development framework. So Gautrans had to do a review to align with the Department of Economic Development's view.

Eric indicated on a map to the area of discussion. He said that their, (attendants to the meeting), road goes right around at one side (apparently faint on map). He added that if one looks at the whole network it does make 100% sense, because it all depends on development. Where ever development takes place, people must be able to travel. This new road is not for anyone specific, but to serve everybody. Some people do not find it necessary to travel a lot, but some have to go to work

and travel. Some have to travel almost as far as 40km to get to work. So this road under discussion is for everybody.

LG: Thanked Eric for his time and his presentation. She suggested that the questions the attendants would like to ask, could be asked afterwards. She asked the attendants not to be rude to Eric as he is only an employee of Gautrans. He is also involved in this strategic planning of the road and was willing to come and give background details of the road's development.

Lizelle also mentioned too that now after the elections, new MEC's had been appointed, so it was not possible to know who the appropriated MEC to this project would be.

Lizelle wanted to discuss the alternatives that Bokamoso Environmental has on the table, the purpose of the meeting, the purpose of the road K56, the road linking system and other scientific issues. She will elaborate on that later on she said. She asked for assistance of the attendants in order to compile the map she referred to. That will also be discussed later on.

Lizelle mentioned the 200meter corridor investigated.....

Road K56

The Design and Construction of Erling Road between Road K46 and Road K56, and Road K56 between Road K46 and Main Road

PUBLIC MEETING

27 May 2014

Venue: GRACE POINT CHURCH

Contact Details:
Bokamoso Landscape Architects & Environmental Consultants
Tel.: 012 346 3810
Fax: 086 570 5659
Email: lizelleg@mweb.co.za
www.bokamoso.net

Responsible EAP: Ms Lizelle Gregory & Ms Mientjie Coetzee
Public Participation Co-Ordinator: Ms Juanita de Beer

Road K56

The Design and Construction of Erling Road between Road K46 and Road K56 and Road K56 between Road K46 and Main Road

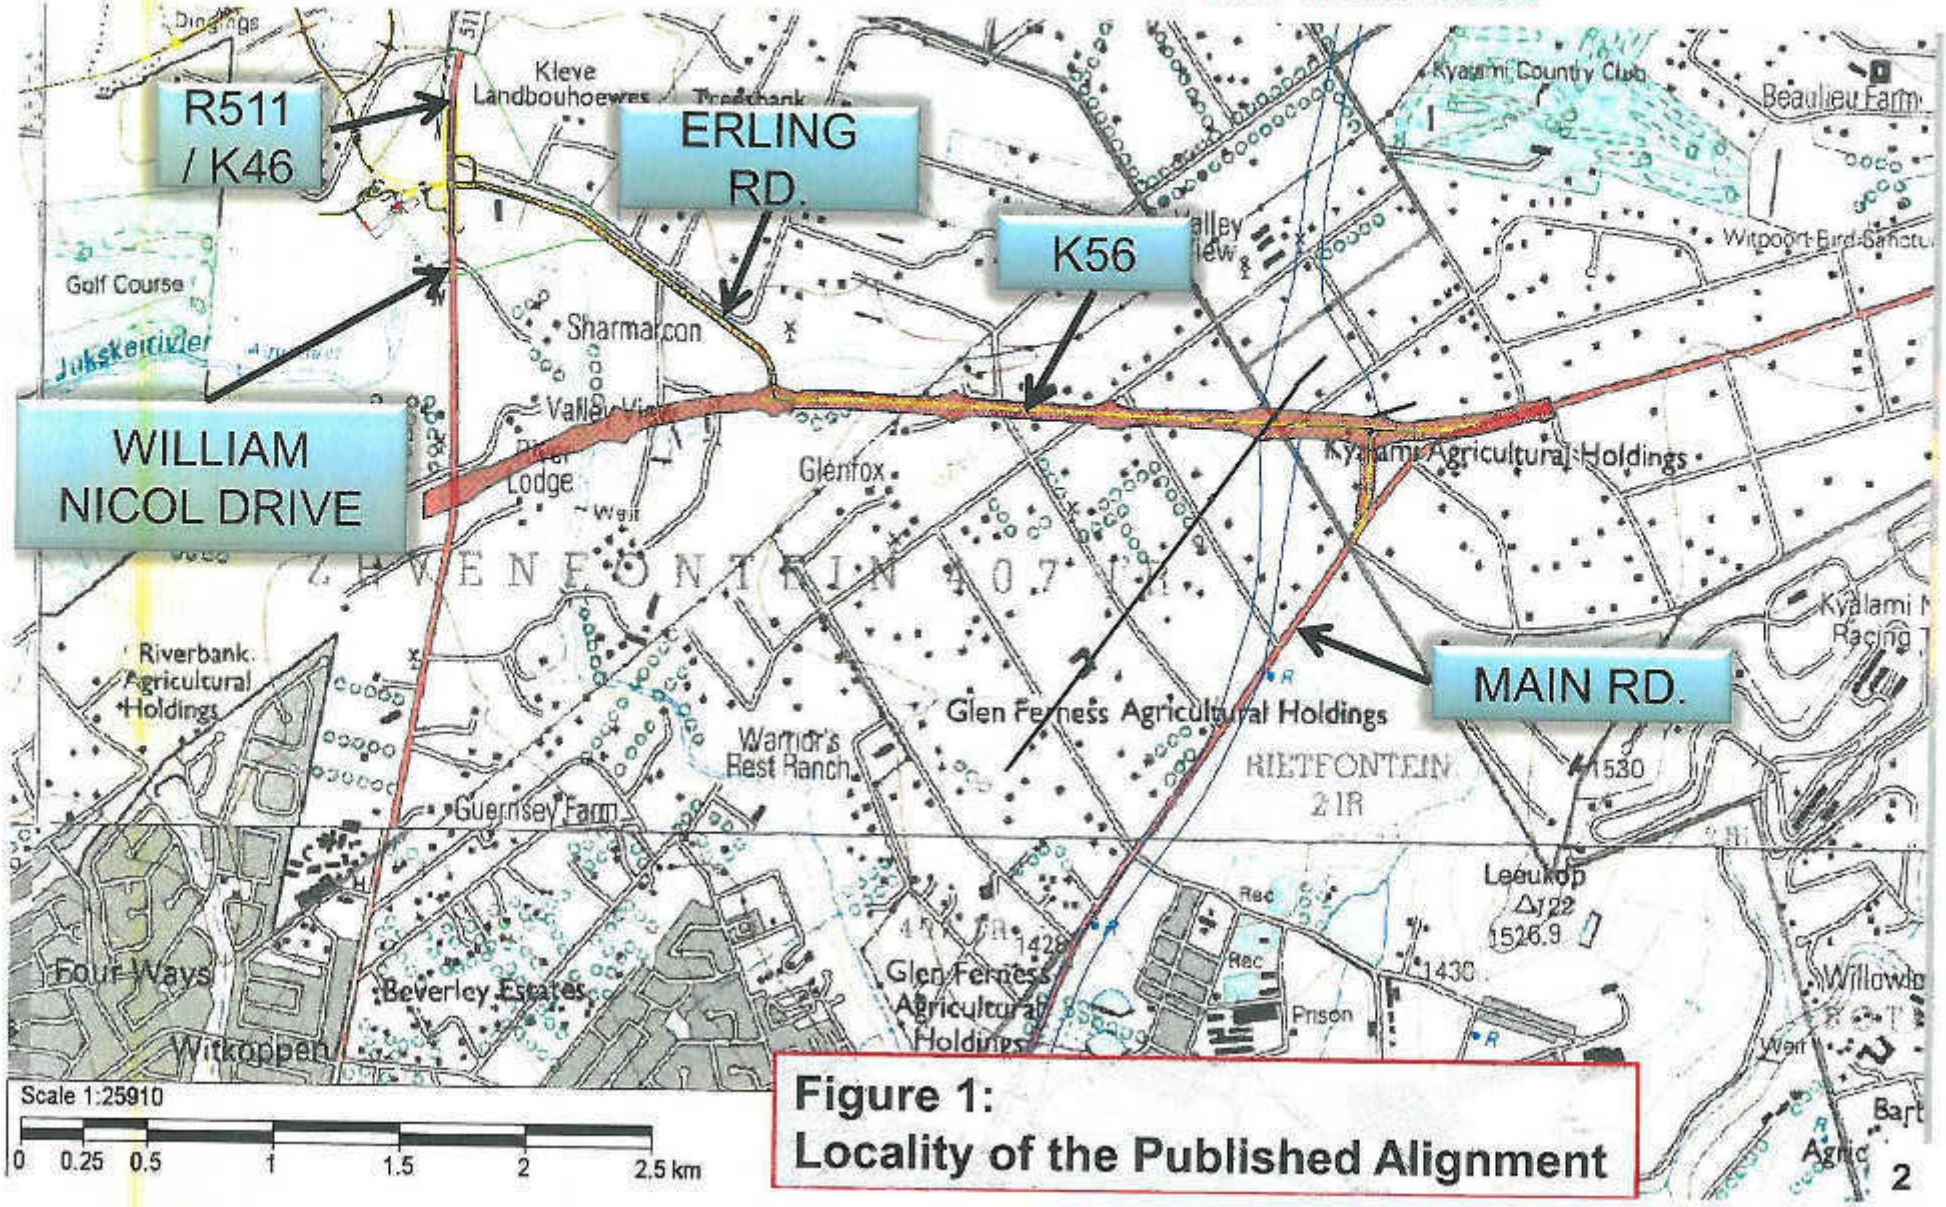

Figure 1:
Locality of the Published Alignment

Rules of the Meeting

- Please hold Questions until after the Presentation
- Please write your details in the supplied attendance registers
- During Questions & Answers Phase of the Meeting - please state your name, surname and interest clearly into the microphone.

Project Team

- **Bokamoso Environmental Consultants**
  Lizelle Gregory – EAP
  Mientjie Coetzee - EAP
  Juanita de Beer – Public Participation Co-ordinator

- **WSP SA Civil and Structural Engineers**
  Francois van Rensburg

- **Applicant**
  Gauteng *Department of Roads and Transport*

Agenda

1. Welcoming / Introduction
2. Purpose of the Meeting
3. Background Regarding EIA Process
4. Presentation by Mr. Eric Coetzee (GDRT): Background of Gauteng Provincial Road Network
5. Discussion of Alternatives: - Scoping Phase (L. Gregory)
   - EIA Phase (F. van Rensburg)
6. Preliminary Sensitive Issues
7. The Way Forward
8. Questions, Comments & Issues

Purpose of Meeting

Purpose of Road K56 within the larger Gauteng Road Network System

Discussion of Alternatives

To present a Preliminary Site Specific Issues Map mainly compiled to reflect Social Impact on site specific basis (community to supply inputs)

Project Background

Role of the Road within the Larger Gauteng Road Network System:

- On the Gauteng Road Network Maps since the early 1970's;
- Revised network – Strategic Review (2010)

Description of the involved section of the Road:

- At this stage only a line within a 200m corridor and will be refined during the EIA process;
- Alignment alternatives being investigated and added;
- Various ecological, hydrological, hydrological and socio-economical issues;
- Alternatives were discussed and compared (preliminary comparison) in the Scoping Report, which was available for 40 days for public comment.

Way Forward

- EIA Process
- Community to assist with the compilation of map which identifies all activities/land uses on the various properties. Known cultural & historical, ecological & other aspects must also be identified. Want to compile a sensitivity map & overlays with alternatives superimposed across the study area.

Planned Programme

- 27 May 2014: Public Meeting
- June 2014: Forum Meeting to discuss Draft EIAR
- June 2014: Final EIAR available for comment
- July/August: Submission of Final EIA

Dear Chris de Villiers,

Thank you for your response, we have noted your comments on our Issues and Comments Register.

Please note that the Final EIA Report will be available from Friday, 14 December 2015 until 25 January 2016 at the Grace Point Church or on our website: www.bokamoso.net

Kind Regards/Vriendelike Groete

Subject: RE: K56

Dear Lizelle,

Trust you are all well?

As you know, we are very badly affected by the K56 and as you know we are very keen to obtain closure on this matter. Will the road happen? When? It is extremely upsetting to not know what is going to happen – we cant plan our lives or do anything with our property while this sword just hangs over us. We do not mind what happens either way – but we really do deserve an answer, one way or another.

Please can you assist us with reliable, up to date information as to how, at this stage, we are to be affected by the K56?

Many thanks for your patience.

Regards,

Chris de Villiers

Hi there

Why did I receive this from another resident and not from you?

I understood we were to be kept updated during this process and it does not look as if this is happening.

Regards, Jassy

Subject: K 56

Dear George and Lizelle,

I am the landowner of 25 MacInnes Road (Holding 25 Glenferness Agricultural Holdings) – and I have sent you copies of my title deeds already so you can see exactly where this property lies (your numbering does not include all our formal legal numbering – so you might wish to change this accordingly).

This communication is to formally register myself (Julie Patricia Hannah) as an interested and affected party in the proposed alignment of the K56 in that the current alignment destroys most of the buildings on my property – and there seems to be a problem in that there is unlikely to be compensation for this unconstitutional

removal of our property, should the road be constructed along its current proposed route.

The following is a list of the people who are also to be registered as interested and affected parties. These people are to be registered in their own right and to be contacted at the postal and e-mail address noted below:

Julie Patricia Hannah – landowner – Holding 25 Glenferness Agricultural Holdings (25 MacInnes Road)
Christopher John de Villiers (spouse of Julie Patricia Hannah – co-landowner)
Devin Ross (son of Julie Patricia Hannah) – residing with JP Hannah and CJ de Villiers
Althea Wade (sister-in-law to CJ de Villiers and single parent) – residing with JP Hannah and CJ de Villiers
Audrey Wainright – single mother with two dependent sons – cousin to JP Hannah, living in one of the cottages at 25 MacInnes Road
Janet Wainright – widowed single mother with two dependent daughters – cousin to JP Hannah – living in a cottage on 25 MacInnes Road
Stefano and Megan Piller with two dependents – tenants at 25 MacInnes Road Glenferness
Iris Lamberts – single, tenant at 25 MacInnes Road Glenferness
Julia Moagi – employee at 25 MacInnes Road Glenferness
Aaron Moyo – employee (maintenance manager) – at 25 MacInnes Road Glenferness

All of the above have the following contact address for this registration and for further individual communication:

PO Box 529 WITS 2050; e-mail – chrisdev@cjconsultants.co.za

Please confirm that all of these people and their families have been registered as interested and (directly) affected parties by the alignment of the K56.

Many thanks and regards,

Julie Patricia Hannah

SCOPING REPORT FOR DESIGN AND CONSTRUCTION OF ERLING ROAD BETWEEN K46 AND K56 AND THE K56 BETWEEN K46 AND MAIN ROAD (R71) (GAUT 002/11-12/E0255)

Your report dated 26 June 2013 refers.

Description of the project:

The proposed application is for the design and construction of Erling road between K46 and K56 and the K56 between K46 and Main Road (R71), including all access roads.

Guidelines, by-laws, Precinct Plans and policies:

The Report takes into account all relevant policies, by-laws and strategies. The proposed activity lies within Region A Sub-Area 8 of the RSDF. The entire sub area falls outside the Urban Development Boundary. It comprises mainly of environmentally sensitive areas, natural open spaces, agricultural holdings and farm portions. This means that no further township establishments can be supported on any erven within Sub Area 8. The entire sub area falls within the Greater Kyalami Conservancy (GEKCO) area.

According to the RSDF, development applications in this sub area are to be assessed in accordance with the Witpoort Development Framework 2020 (2008), which should be read in conjunction with the Growth Management Strategy (GMS), which identifies this area as a Peri Urban Management Area. Unless the availability of infrastructure and other bulk services can be confirmed by the relevant MOEs and core departments, applications for densification, land use intensification and /or other uses will not be will

not be supported. The Development Objective 1 for the area is to "*protect environmental qualities and amonities in the sub area*"

Description of alternatives (route alignment):

- **Alternative 1:** to the north of the proposed K56 alignment.
- **Alternative 2:** to the south of the proposed K56 alignment.
- **Alternative 3:** along the alignment of Zinnia and Caracal from Main Road linking to the K46

Alternative 3 as supplied by a member of the public makes sense as this alignment will have the least impact on the environment. This alternative should be investigated further and included in the EIA report.

Description and assessment of the identified environmental issues:

In terms of the City's Bioregional Plan and Wetland Audit the site falls within a critical biodiversity area.

The proposed activity is traversing the wetlands and riparian zones in the area. Degraded or pristine, a watercourse or a wetland is a sensitive ecosystem and irrespective of its transformed state it must still be protected from development. It is the view of this Department that the proposed activity must contribute towards the improvement of the ecosystem instead of posing further degradation of the receiving environment.

This Department understands the need and desirability of the proposed road; however the concept of sustainable development is of priority therefore the specialist studies that will form part of the EIA phase should adequately address issues of concern such as loss of biodiversity; topographical change and loss of sensitive habitats.

Evaluation and presentation of mitigation measures:

Mitigation measures emanating from the specialist studies should also be included in the EMP.

Public participation:

The Public Participation process was undertaken in accordance with NEMA EIA Regulations 2010 as presented. A number of objections/concerns were received and should be addressed in the EIA.

Recommendations:

1. The proposed alignment is likely to pose adverse detrimental effects on the receiving environment. Therefore, thorough assessment of all identified alternatives and mitigation measures must be conducted including the alternative supplied by Mr. Mackenzie, a member of the public.
2. The design of a storm water management system should be based on sustainable urban drainage systems (SUDS) and water sensitive Urban Design approaches (WSUDS) which enhance natural drainage. The Stormwater Management Plan must be based as far as possible on robust low maintenance structures and measures. The Stormwater Management Plan be subject to the approval of the Environment, Infrastructure & Services Department and the JRA.

3. A Socio-Economic Impact Assessment should be included in the EIA to assess the impacts of the proposed road on the equine industry.
4. The specialist studies that will form part of the EIA phase should adequately address issues of concern e.g. loss of biodiversity; topographical change; loss of sensitive habitats etc. The recommendations should also be included in the EMP.

Should you have any queries please do not hesitate to contact Etienne Allers on the numbers indicated above.

Yours faithfully

pp MWatshitanga.

Hello

I have been asked to forward to you and Alex Partridge the following comments on the proposed K56.

I am basically against the road. Here are the reasons why:

- The road is in fact proposed to be built in the area, that is currently a large open area. It would in fact, rather be beneficial to the area.
- The proposed road will create noise, pollution and alleviate the traffic problems that are already in the area [illegible]
- [illegible] at a time when the Main and William Nicol and the [illegible] traffic congestion, and the K56 would
- The road will, and [illegible] would be [illegible] EVERYONE [illegible] and [illegible] away [illegible] and [illegible] Africa. Because EVERYONE [illegible] and [illegible] All [illegible]
- The area is [illegible] sanctuary, [illegible] South Africa, which [illegible] is [illegible] the area. What [illegible]?

I appreciate all [illegible] that [illegible] have made, along [illegible] the [illegible], and [illegible] and [illegible] to [illegible] take.

I am [illegible]

Many [illegible],
Greg Nolan

Subject: K56 Video and equestrian presentation

Hi Juanita

Please see below the points from my presentation on the K56. I covered it very briefly and did not make all the points below as many had already been covered by the previous speakers.

Kind regards

Kristin

THE UNIQUE AREA OF KYALAMI – AN EQUESTRIAN COMMUNITY

The Greater Kyalami Conservancy is completely opposed to the construction of the K56 as it will destroy wetlands, wildlife corridors and the highly endangered Egoli Graninte Grasslands. It will have knock-on effects of further infrastructure for development, the equestrian land use will no longer be viable and very quickly the fabric of the Kyalami community will be destroyed.

The K56 road was introduced in 1972 as a roads planner was drawing lines on a map to accommodate traffic through the province. At the time, Johannesburg and Pretoria had lots of open space, or "vacant land" as it was seen between the cities. This was the era of apartheid and environmental laws such as NEMA did not exist. Nothing was thought of building through wetlands and grasslands – their true value had not yet been identified.

Move forward to 2012 – 40 years later. These vacant lands are now homes, schools, churches, highly endangered grasslands and some of the few remaining wetlands in Gauteng that have not already been destroyed. This is valuable habitat and provides wildlife corridors for otters, hedgehogs, porcupine, genet, bullfrogs, jackal and a host of birds – which is unusual to find so near to the urban environment.

The cities of the world and specifically Southern Africa are expected to grow rapidly; and we have always thought of "development" or the construction of houses, shopping centres and roads as a given – a fait accompli. We have lost numerous species of wildlife, birds and vegetation types – gone forever to this belief. At some point, humanity must stop and re-think our decisions. We must instead look to development that supports human life and nature - for the two are bound together.

The Growth and Development Strategy 2040 of the City of Johannesburg states…"Environmental sustainability is often viewed as an afterthought, but should, in essence, drive the City's developmental and growth agenda. Changing the mindset of both external stakeholders and those who operate from within the City is essential, if the City is to realise its vision for environmental sustainability…"

The Gauteng Land Transport Framework (GLTF) which is the overriding document for provincial roads such as the K56 states - “Private transport in the form of cars has the capability to increasingly transform cities into places of congestion and pollution. The dilemma lies in the fact that the private car has become an expensive necessity for peripheral livelihoods and an easily accessible luxury for the middle-class, whilst being one of the major contributing factors to environmental degradation.”

MMC of Transport for the City of Johannesburg, Clr. Rehana Moosajee held a lecture with Mr. Gil Penalosa – an internationally recognized expert on using non-motorised transport to improve quality of life and solve traffic congestion. Mr. Penalosa stated “to build roads to alleviate traffic congestion is like loosening your belt to curb obesity” - it does not solve the problem. The City of Johannesburg and Gauteng are looking to public transport and non-motorised transport as the only solution to the high levels of traffic, high dependence on fuel and the resulting pollution and environmental destruction.

In the Kyalami area, the Greater Kyalami Conservancy (GEKCO) and the Residents Associations have been developing the GREEN NEIGHBOURHOOD PROJECT. A GREEN NEIGHBOURHOOD is an internationally recognized community drive for sustainability. It promotes recycling and energy efficiency, public transport and healthy living through cooperation within the community. The Kyalami GREEN NEIGHBOURHOOD PROJECT is lobbying for cycling lanes to be incorporated on the current William Nicol upgrade, is holding workshops to educate residents on the state of water in the country and the need to protect our water resources. It also seeks to uplift our neighbour, Diepsloot through clean up days and tree planting initiatives.

The Kyalami community (including the suburbs of Glenferness, Sun Valley, Kyalami A.H., Beaulieu, Saddlebrook, Treesbank and Bridle Park) is a passionate community that shares an appreciation for nature and open space and is held together by the equestrian culture of the area. The equestrian industry is worth well over a billion rand, provides employment for thousands of people, and in many cases provides housing for employees and their families. Horse riding is far more than a hobby, it has developed over thousands of years and the equestrian training in the area has produced Olympic standard athletes, has provided rehabilitation for people with physical and intellectual disabilities, and at risk youth. The interaction between humans and horses is well documented and recognized as a healing practice.

The open space required by the equestrian community currently sustains the wetlands, endangered Egoli Granite Grasslands, and endangered species. With education and cooperation this sustainability can be enhanced. This area offers outdoor recreation activites such as mountain biking, trail running and birding in an area with few public parks and is a green lung for the City of Johannesburg.

Please see the video below on the unique area, Kyalami – an equestrian community.

Hi Lizelle
I hope this finds you well!
As you know, Cedarwood is in the direct path of the K56. I was wondering if you wuld be able to come and visit us on-site, so that we can get a clearer idea of the alignment of the road. We seem to have such conflicting reports of exactly how we will be affected. I need to be able to give all our stakeholders (Board of Directors, parents, staff etc) a clearer picture of the impact etc.

It would also be lovely for you to come and see the school in context to the road development.

I just wish that a decision would be made so that we can all plan ahead!

Warm regards
Jayne

Jayne

It is unfortunately not possible for us to come and visit you on-site due to budget constraints. However, we have uploaded the map presented by WSP on the Public Meeting which clearly indicates the Alignment Alternatives overlayed on an aerial map. I will sent you a link to the Dropbox Folder.

Please Note: please discard the black alternative – it will not be proposed as an alternative in the EIA Report.

Thank you so much – the map is much clearer than what we saw at the public meeting, and we can see exactly where we are in the process.
We would definitely prefer the purple route!
Kind regards

Jayne Eurelle

Jayne

It is unfortunately not possible for us to come and visit you on-site due to budget constraints. However, we have uploaded the map presented by WSP on the Public Meeting which clearly indicates the Alignment Alternatives overlayed on an aerial map. I will sent you a link to the Dropbox Folder.

Please Note: please discard the black alternative – it will not be proposed as an alternative in the EIA Report.

Hi Lizelle
I hope this finds you well!

As you know, Cedarwood is in the direct path of the K56. I was wondering if you wuld be able to come and visit us on-site, so that we can get a clearer idea of the alignment of the road. We seem to have such conflicting reports of exactly how we will be affected. I need to be able to give all our stakeholders (Board of Directors, parents, staff etc) a clearer picture of the impact etc.
It would also be lovely for you to come and see the school in context to the road development.

I just wish that a decision would be made so that we can all plan ahead!

Warm regards
Jayne

Subject: Re: chrisdev@cjconsultants.co.za

Hi Lizelle,
I attented the meeting of 7 March 2012 and found it most informative.Thank you!
There are a few points that I would like to put on record.
1 As previously stated we run a Pre-school on our property of some 90 children with a staff of thirteen. As we fall in the 200m band I see a major problem for the viability of the school especially during the noisy contruction phase and then there is also the safety factor. Once the road is completed we will be affected by the noise. I do not see the school surviving all this and therefor the jobs and the education of the children are in jeopardy.
2. Next door to us is Cedarwood Remedial School. There is a severe shortage of remedial schools in Gauteng and the road runs right through the middle of their school.
I know for a fact that they have spent millions of rands on this school but I assume they will make there own representation.
3. It is naive to think that Glenferness will survive in its current form if this road stays on its allignment as it is because we will be cut off from the rest of the country living and I foresee our area going the way of Sunninghill.
4 I do undersatand that an east/west connection is necessary but please lookseriously at Mr. Mckenzies suggestions especially the upgrading of Zinnia Road past Summit College and straight through to the William Nicol. Also the widening of Lonehill Boulevarde as there is place for it. The widening of William Nicol through to the Krugersdorp highway will also alleviate a lot of pressure not only for Steyn City but also for Dainfern and Diepsloot. If Mckenzies suggestions are accepted no one will be inconvenienced by the road upgrade. The upgrading of Kyalami Main from the Krugersdorp highway into a four or six lane road will also be better than the PWV 9, I know this is not part of your current mandate, but it will make the area more public transport friendly.
5 I heard last night that the GECKO conservancy is not to receive any infrastucture upgrade for the next 10 years. Do we fall in the conservancy and if so is this not a fatal flaw in the planning?
Please acknowledge by return e-mail that you have received this e-mail.

Thanks
Christian Smith

Hi Lizelle,

The K56 cuts through my property at 115 Dunmaglass rd, Glenferness.

We have a Pre-School on the property. If we should have to close down we leave 90 children stranded and 11 staff members without a job.

We also have support staff living on the property who will have neither a job or accomodation.

Living on the property are the following

Christian Smith ID 5303255096086

Brenda Smith 5401060083081

Mimi Kobo 6007110415089

Allan Mtonga Passport MW147929 a registered assylum seeker.

Subject: COMMENT ON THE K56 DRAFT EIA - Your recommendation of non-development referes

Hi Lizelle

RE: COMMENT ON THE K56 DRAFT EIA

We are writing to you as resident owners in the Glenferness area. (Although I am on the "GRA committee", attempting to affect changes to bring a more balanced approach, this letter does not come from the GRA.)

We wish to question your statement – with specific emphasis on the highlighted text.

"**Proposed compromise to be considered by government:**
- That the access road to the equestrian facilities be improved as part of the K56 road project, even if this is implemented at a later stage by GDRT/ the local authority. Apparently it is difficult to reach the premises of the Gauteng Horse Society and the community made certain proposals regarding the improvement of the accessibility of these facilities that can be considered during the upgrading of the K56;
- That safe and attractive pedestrian and equestrian links be provided where possible to link the area to the south of the proposed road to the larger node.
- The GDARD, GDRT and the City of Johannesburg acknowledge the importance of this node in all their future planning documents and that this area be identified and protected an irreplaceable socio-economic node; and
- The various authorities must acknowledge the valuable socio-economical function of this node and must assist with the on-going protection and maintenance of this node and any future development within this node must take the equestrian facilities
- ***The only development that should take place within this area should be the upgrading of the existing municipal services and infrastructure and residential and other land-uses that are not in conflict with the existing functioning of the equestrian***

node.

We refute that GECKO or the Glenferness Residents Association represent us with any accuracy and wish to counter their arguments here today.
Our own surveys, which are **all on video for your reference** , have invited owners along using a random sampling method, yet ensuring we include the "naysayers", actually encouraging them to come.
Nonetheless, to achieve more accuracy, a more formalised approach would be necessary.

Out of 3,479,372.60 sqms privately owned properties (not including Eskom and such), we spoke in person to owners of 644 989.33 sqms and our results were as follows:
Surveyed percentage: 18.54%
Firmly against development and the K56: 14.53% of the 18.54%, or 0.0269% of the total.
Firmly for development and the K56 as well as rezoning: 81.56% of the 18.54%, or 14.83% of the total.

We also include a summary of the discussions and comments for your reference. We tabled anti (left hand side column) as well as pro (right hand side column) arguments. Most favoured the right hand side columns as per the above percentages.

We formally request that if GECKO would purport to be representative of the community, that they carry out professionally designed surveys and that these are carried out using random sampling.
Their earlier surveys are equally fatally flawed in that they cannot possibly be considered valid due to coercion and selective participation.
Until such a time, we do not recognise their representation.
Please adjust the EIA accordingly.

THE NET EFFECTS:
Some have indicated that the act of ignoring the road networks proposed by Gautrans, ever available for public record, represents a firm lack of planning on the part of the equestrian fraternity.
They now wish to negate the interests of their fellow property owners who will suffer the consequences of this; which is a fantastic lack of value as there is very little proven demand for 1 hectare stands in the area.
Indeed, we would have to more than double the population here if any demand were to be realised.
Besides the fact that this will be aggravated by the proximity of major roads, should the bordering properties be denied the prospect of commercial or other rezoning possibilities.

LACK OF IMPARTIALITY IN THE GRA AND GECKO:
We attempted to ask GECKO to include in their survey a question asking what the current family densities per hectare were, and they chose to leave it as an opinion-based question, rather than a fact-based question.
Hence we question the validity of the "Surveys" that they carry out.
They are also seldom accommodating of viewpoints that are not their own, which does not bode well for adequate, unbiased representation.

I included herewith an email that was sent out to the community by the Glenferness Resident's Association Portoflio Manager of "Development and Roads". This is an appointment that I opposed due to a conflict, since the K58 at the time passed across Mr Bush's Property. Further, he is

today unaware still that this has changed and is firmly committed to GECKO who equally do not seem to be abreast of the latest information.

Please note the vociferous nature of his email and the fact that he sent this email out to most of the community prior to some “developers” presenting to the community on the very evening the email was sent out. (Tuesday this week).
The remaining GRA committee members are attempting to get to the truth of the roads issue.
This is included merely as an example for yourself, since you seem to think that GECKO represents most of the residents and we formally wish to differ here. As you can see from this email, there has been much coercion and this is recognised in the report by yourself.

UNCONSTITUTED FORUMS:
Please also note that at the time of writing this email, the GRA is still not constituted and hence, some of us in the community deny that there is a fair and just representation of our thoughts in the GRA either. Mr Bush has sent a letter conferring unequivocal “support” to GECKO, a notion we equally do not agree with.

We therefore formally request that your recommendation of non-development in the area is NOT submitted as per the draft EIA, since there is no scientific basis for this recommendation – it is a matter of opinion.
We await your expedient reply.

Many thanks

Best regards,

Melany Cottrill

Hello Lizelle and Janita

I would like to register my concern about the proposed construction of the R56 highway which is intended to go directly through my children's school – Cedarwood School.

You may recall that in this construction Cedarwood is a high volume school with only a handful of other schools (R2 -3) in Gauteng which are structured and organised to deal with children with learning disabilities and special needs. And there are no other schools of this nature in the immediate area. My son Caleb has ADHD and a processing disorder which requires a focused and small teaching environment with experienced teachers who are trained to teach to his style. Cedarwood has these teachers together with speech and OT specialists who know the children's challenges and their needs and can teach them to their maximum potential. The environment is one of calm, empathy and setting is such that it is truly special. The hedges and classroom areas create an intimacy and a special learning environment which cannot be simply replicated by moving the school.

Please do not hesitate to contact me if you require any further information. You are welcome to visit the school, talk to the headmistress Jayne Earle, talk to the parents who are currently doing their part in negotiating the environmental impact assessment with you and provide direct feedback and taking the time to visit the school.

I look forward to your response. Kind regards - Connie

Dear Connie de Lange,

Thank you for your response. I have registered you as Interested and Affected Party Member. I have added all your issues and concerns in our Issues and Comments Register. At the moment we are in the beginning - Scoping Phase Assessment. In the past we had a Scoping Public Meeting – 7 March 2012 - for all the Interested and Affected Parties to tell everybody more about the Project. We held the meeting

because we need all the Interested and Affected Party Members and Comments to add all of it to our data basis.

The next step will be a n e Public Meeting, I will keep you updated regarding the K56 Project Process.

Hope this find's you well.

Kind Regards

Janita De Beer

Subject: Commentary on proposed K56 road construction

Hello Lizelle and Janita

I would like to register my severe protest to the proposed construction of the R56 highway which is intended to go directly through my child's school Cedarwood School.

You must not proceed with this construction. Cedarwood is a highly unique school with only a handful of other schools (2 -3) in Gauteng which are structured and organised to work with children with learning disabilities and special needs. And there are no other schools of this nature in the immediate area. My son Cameron has ADHD and a processing disorder which requires a focused small teaching environment with expert teachers who are trained to teach kids like him. Cedarwood has these teachers plus other speech and OT specialists who work with the children to push their development and try to catch them up to their mainstream peers. The ethos, environment and setting make this school equally special. The homely tone and classrooms create an intimacy and a special learning environment which cannot be simply replicated by moving the school.

Please do not hesitate to call me about the school and place it in your hands.
You might visit the school, talk to the headmistress, have a coffee, talk to the parents, prepare to
do my job properly by delegating the email impact, getting this direct feedback
and taking the time to visit the school.

I look forward to your response. Kind regards - Connie

> Subject: Concerns around proposed K56 road
>
>
>
> Hi Jim
>
>
>
> They are starting with the EIA process of the road.
>
> There was a public meeting on 7 March held by Lizelle Gregory of Bokamoso Environmental Consultants.
>
>
>
> These are the concerns and questions I raised after the meeting. There were no road engineers or representatives from the Deparment of Roads present at the meeting to answer these questions.
>
>
>
>
>

> These pertinent questions are:
>
>
>
> 1. Why is the road suddenly an urgent need when it was originally drafted in the 1970's as part of Apartheid era planning?
>
>
>
> 2. Who are the beneficiaries of this road as the residents in the area do not require or desire it?
>
> 3. What is the size of the road? How many carriage ways? Will there be access points along the road? What is the size of the road reserve? What provision is being made for storm water run-off and where will it be discharged? All of this is critical and relevant information. Unless it is provided, it will mean that not all relevant information was provided during the Public Participation process and render it fatally flawed.
>
>
>
> 4. What is the estimated usage of the road?
>
>
>
> 5. Has a traffic study been conducted for this road and the access roads (R511 and Main road)?
>
>
>
> 6. Why was this study not made available at the public meeting?
>
> 7. Where is the funding for this road coming from?
>
>
>
> 8. Why is this specific route proposed? Have other routes been considered?
>
>
>
> 9. Have the cumulative affects of the road been investigated?
>
>
>
> 10. Where will traffic come from and where will it go to?
>
>
>
> 11. Why are existing roads such as Kyalami Main road and R562 not upgraded to cater for the developments? The Kyalami Main road is currently stressed beyond capacity and the K56 will feed into these roads and will further overload these roads.
>
>
> 12. Expropriation of property – when was this done, and if it has not been done at what price will properties be expropropriated?
>
>
>
>

>
>
>
> I wish to highlight the major points of concern below:
>
> Wetlands / Bullfrog breeding grounds / Irreplaceable conservation sites
>
>
>
> The map below shows clearly the proposed road cutting directly through major wetlands and irreplaceable conservation sites marked on the C-plan.
>
>
>
>
>
>
>
> The City of Johannesburg Spokesman Gabu Tungwa said the council's Environmental Management Department would scrutinize development proposals and "will not support (those) on sensitive sites."
>
>
>
> The area is characterized by a course sandy soil which is highly transmissive. 60% of the water moves laterally through the soil. The building of a road will cut through the top 500mm – 1m of soil disturbing the water pattern.
>
>
>
> The section of wetland that will be affected by the road is shown in the picture below after a normal rainstorm. It indicates just how much the reedbeds naturally attenuate the flood run off. The reed beds are fragmites – indigenous and rare in terms of how extensive they are in this wetland system.
>
>
>
>
>
> Further to the damage that would be done to the wetlands themselves, they also provide breeding grounds for the African Bullfrog. It is the last remaining sustainable breeding place on earth for the Giant African Bullfrog who with the hedgehog and white tail mouse are on the International Red Data endangered list – all which are found in this area. The wetlands also act as a breeding and feeding ground for water birds, mammals, tortoises, and insects. Other species regularly spotted in the immediate vicinity are jackal, hare, genet, slender mongoose, grass owls, etc.
>
>
>
>
>
> Loss of Equestrian industry
>
>
>
> Kyalami/Glenferness forms part of the GECKO conservancy. This area also has one of the

largest and most viable equestrian industries in the world providing thousands of jobs directly as well as indirectly (downstream in the feed and tack industries, for example).
>
> Results of the March 2008 Equine Survey of the Greater Kyalami Area undertaken by GEKCO shows that the total capital investment invested in this area is close to R800million.
>
>
>
> Any road development of this nature in this area will decimate the horse industry.
>
>
>
> This is how the area will be impacted;
>
> • As home owners who bought specifically in this area to ride their horses move away, more and more development will be allowed and every horse owner is potentially at risk of either giving up horse riding or moving much further afield to accommodate their sport.
>
>
>
> • horse riders who dare to continue to ride near the roads risk harm and even death to themselves and their horses with this road that will have high traffic volumes at high speed.
>
>
>
> • As riders give up riding massive job losses will be on the cards for horse grooms, those who erect stables, horse arenas, horse riding instructors, riding yards, feed merchants, saddlery shops as well as the many vet surgeries in the area.
>
>
>
> • the Lipizzaner center would have to move
>
>
>
> • This would obviously be a severe threat to the viability of the Gauteng Horse Society in Kyalami which holds approximately 100 shows a year with approximately 3200 members
>
>
>
>
>
>
>
> Loss of sustainable jobs – construction jobs are temporary
>
>
>
> It is estimated that the equestrian industry in Kyalami employs approximately 1600 horse grooms, many of whom live on the premises. It is therefore estimated that these jobs sustain +-6400 dependants as per a survey taken in 2008 These horse grooms are only qualified to work with horses and in many instances have no other training.
>
>
>
>

>
> Loss of Cedarwood School
>
>
>
> Cedarwood School is a school that was given to the University of Johannesburg. This school also provides for children with special needs, which is a unique aspect of the school. It is directly in the line of the proposed road and would be demolished.
>
>
>
>
>
> Outdated road planning from Apartheid era
>
>
>
> The K56 was designed in the early 1970's during the Apartheid era, and is dependent on private transport. This was during a time when finances were spent to upgrade wealthy white areas rather than cater for townships and the K56 was part of a "strategic" road network meaning it was to be used by police and military vehicles to get quickly to the West Rand and Soweto.
>
>
>
> This plan has not been reconsidered or updated for current conditions. At the time the road was drafted wetlands were not protected and it declared the area "vacant land" with no mention of environmental factors at all.
>
>
>
>
>
> Lack of maintenance of existing infrastructure – further exacerbation of traffic congestion rather than creating public transport corridors
>
>
>
> Currently road maintenance on William Nichol, Main road, and the R55 is not being done. This is a cause of major congestion. William Nichol is currently being upgraded, however funding for the R55 and Main road has not been allocated. The building of the K56 would add to a road infrastructure that is not maintained, increasing the burden of maintenance. Upgrading and maintaining existing roads first is the most logical approach.
>
>
>
>
>
> K56 not in line with Jo'burg Growth and Development Strategy (GDS 2040)
>
>
>
> The GDS 2040 states that our current situation of traffic congestion is a result of urban sprawl and reliance on private vehicles, and that building new roads will not alleviate traffic congestion. "Continued urban sprawl has also created conditions for more intensive private car use." "The existing system based on the dominance of private cars is unsustainable. More people, means more cars and more congestion ultimately negatively affecting the quality of life of residents."

GDS 2040.
>
>
>
>
>
> Increased traffic and pollution in a relatively rural area
>
>
>
> The surrounding roads are inadequate to sustain more traffic as most are not tarred. This is sufficient for the current rural and equestrian nature of the suburb. It is not at all sufficient for feeding onto a main road and the consequent traffic and pollution in the suburb will be unbearable for the residents.
>
>
>
>
>
> Loss of Green Lung contributes to heating and climate change
>
>
>
> The GDS 2040 recognizes that climate change has already begun and we need immediate interventions to curtail it. Increased built areas increase the heating which reduces rainfall and accelerates climate change. The heat island effect is best curtailed through greening. The green lung which is the Kyalami area is absolutely vital to retain for the urban environment to remain livable.
>
>
>
>
>
> Shortsighted approach of “development at all costs”
>
>
>
> The K56 is a road financed by two luxury developments to provide for their own needs at the cost of the environment and the needs of existing landowners.
>
>
>
> Development has been given priority over the environment for the last 100 years or so. We are now realizing our shortsighted approach is quickly destroying our planet. Once a road has been built and virgins land plowed there is no going back. I urge the consultants and the decision makers to take this responsibility to heart. Any action taken now will affect us for the next hundred years. Let us ensure our actions allow life to continue.

Subject: Concerns regarding the proposed construction of the K56.

Dear Lizelle,

Further to the first scoping meeting of the 7th March, as residents who are directly affected by the construction of the K56 , we would like to register the following concerns.
Firstly, as this divides our existing property into two sections and our water and electricity is on the opposite side of the road to the existing residence it is of great concern to us as to how these services will continue to be supplied to both sections of this property
Secondly, consent has been obtained from council to use the property as a place of instruction and I am running a pre-school which currently has
40 pupils enrolled. As this establishment is imperative to the early childhood development of the se children it is necessary for us to be able to carry on supplying this service to the community for a full school calendar year at a time. It will be very difficult for parents to relocate their children to new schools mid-year and will be detrimental to the development of such young children. We are therefore obliged to give a school calendar year notice period to all families enrolled in this school and therefore insist that the same consideration be given to us a registered education institution.

Yours faithfully,
Patrick and Adele Power
22 McInnes Road Glenferness,

Dear Lizelle

Can you kindly send me all the information regarding all the proposed road works in and around the Glenferness area as I believe you are the EIA consultant.

I have been "designated" by our congregation, Gracepoint Methodist Church (about 3000 members), to register our interest as we would really like the roads to be upgraded.

I believe there is a meeting on 9 February that I would really like to attend!

Looking forward in hearing from you!

Many thanks

Kind regards

Subject: Feedback on the K56 developement

Hi Lizelle, Juanita and Mientjie

Please find attached digital copies of the documents I presented to you at the public meeting on the 10th of October 2012.

I have logged these documents both in my own personal capacity as well as part of Just Environment Action.

And please consider the following points on the Executive Summary of the Specialist Report:

1. We must consider every aspect of the environment instead of focusing on a single species. It is the sensitivity of the ecosystem as a whole which needs to be preserved; any loss of biodiversity (flora or fauna) would lead to the ultimate degradation of the area and possible collapse of a functioning ecosystem.
2. Fragmentation of natural ecosystems is a major conservation problem with resulted biodiversity loss. In the Conservancy's case, it would be ecological murder to fragment such an pristine corridor, especially since there is already a lack of corridor zones in the area (and we are working to solve this problem). This pristine green area is also a haven and direct channel for wildlife movement to the Jukskei river which is a highly sensitive area. We believe the size of the current portion of veld at Helderfontein (including the damaged areas) is part of the reason for the health of the relatively intact areas.
3. There will also be increased noise pollution (traffic noise). We have all those animal species because they feel the area is safe, if there is high vehicle traffic and noise pollution this will change.
4. The Egoli Granite Grassland is a very sensitive biome (see Bredenkamp Brown and Pfab attached). The road will not only bring a significant increase in cars, it will also bring increased foot traffic into the area. Right now because of the mounds along the edges and the fact that Erling Road is a cul-de-sac, there is not much traffic in the area or through the veld. The entire piece of land will be MUCH more exposed if the road is constructed.

5. Despite the recommendation “Proper planning of infrastructure, which avoids unnecessary barriers in migratory corridors, should be conducted during the pre-construction phase” I’m not convinced that there is any safe way to introduce roads of this nature without producing “unnecessary barriers in migratory corridors”. Main roads are always associated with increased road deaths of both domestic and wild animals. Particularly as the proposed roads would break up the existing natural area into three and so disturb existing migratory routes.
6. The report requests that construction be considerate. I have observed the development of roads in Gauteng for the past 3 months and I do not see any construction that has been considerate. About 18 months ago I spoke to the head of landscaping at Century Properties as I wanted to know if I could release into Helderfontein a chameleon I had rescued from my garden. His comment was that he felt it was unwise as during the construction of the houses in the area there would be significant disturbance and he doubted whether any of the wildlife would survive. I believe he knows his industry.

I was also interested to know how far along Erling Road the interchange is considered to go – it seems to me that they’re working quite far along the road?

Please send the details of the Specialist Report as soon as you have copies to distribute. I’m sure we will have more to contribute at that stage too.

Lastly, I quote again from the attached paper “The system is quite stable and fairly predictable without much change caused by normal droughts or grazing. However, if overgrazed or disturbed to such an extent that degradation proceeds beyond a threshold, then recovery is very slow, due to reduced nutrient cycling and decreased nutrient availability and the vegetation may change to another domain of attraction.” “ Due to the granitically derived shallow nutrient poor soils this systems is very sensitive and intolerant to frequent impacts such as heavy grazing, ploughing, trampling and general domestic activities.” This means road making would be a massive impact on this system. “Degradation occurs easily resulting in a change from the climax (high species richness) vegetation to an anthropogenic Hyparrhenia hirta (low species richness) dominated vegetation type.”

And “Egoli Granite Grassland is extremely poorly conserved, with only 0.02 % (26 ha) of the vegetation type currently protected” “Any viable remnant patch of original Egoli Granite Grassland must therefore be protected from transforming land uses.”

Thank you.
Jacque

Please don't print this e-mail unless you really need to

Dear Residents,

Re the proposed alignment of the K56:

1. It is my opinion that everyone in Glenferness will be affected in one way or another – many negative or even to some extent some positive (ie properties located near a road).

2. **In order for you to have a voice, you are reminded that you must be registered as an interested and affected party. This is a simple process – you simply have to list ALL the people on your property who will be impacted – residents, employers and employees. Provide full names and contact details for each individual – and send the e-mail to the following address:** lizelleg@mweb.co.za.

3. Please copy me into the mail that you send when you register so I can ensure that you are on the list. There are often glitches and mistakes that cannot be rectified after the fact.

4. Registration deadline – 31 January 2012.

5. We are holding a very important meeting on this issue on 09 February in the Ebenezer Church hall (see separate e-mail notice). This meeting is important as the GRA Committee will be seeking a mandate on the resident's wishes regarding this road.

6. The GRA strategy at this stage is to acknowledge the need in this area for upgraded roads, but we do not agree with the alignment for two important reasons: a) the road will bisect Glenferness and destroy the equestrian and natural environment lifestyles that we have all invested in (refer to the GRA Management Plan that documents these aspects) and b) the current alignment destroys important wetlands which have been identified by various audits as being important in the greater scheme of riverine aspects, including the breeding habitats of bull frogs.

7. Point a) will also impact in many ways on jobs that have been created in this area in the equestrian industry.

8. There is huge external support for the protection of the wetlands by re-routing the K56 along a different path. And this is the point that requires input – what different path or route would we as residents support?

9. We are hoping to have some of the experts on the alternative routes at the meeting to assist with our deliberations.

It is thus very important that you register as per above – and we urge you to attend the meeting.

Subject: Objection to the K56 draft EIA report for review

Beverley, here is the comprehensive list of objections, to the K56 through Glen Ferness, you requested; will you send to Ms Gregory? Keith

Bokamoso **<lizelleg@mweb.co.za>**

Attention: Ms Lizelle Gregory

I would like to register my strong objections to the proposed K56 road development for the following reasons:

Impacts on Equestrian area

Equestrians rejected the suggestion of underpasses at the Equestrian Focus group meeting held in Glenferness as horses will not use underpasses and get frightened with heavy traffic. The suggestions put forward do not protect the unique equestrian community and industry and will cut Glenferness off from the rest of Kyalami. Also, an underpass was suggested for the movement of wildlife across Main road when it was upgraded about 10 years ago. However when it came to construction the budget did not allow it to be constructed. The Waterfall Equestrian estate installed an underpass for horses but this has never been used as horses refuse to utilise it.

The report states that the social impacts on this equestrian area could be seen as a fatal flaw. If they could be seen as such then surely further investigation is required? It is either a fatal flaw or it is not.

Upgrade of R55 is priority

Available budget should go for upgrading the R55 which already has Environmental approval and the support of land owners. The construction of the K56 without this upgrade will

exacerbate an already severe traffic issue on the intersection of the R55 and Main road. Suggestions have been put forward formally by Malcolm Mackenzie as to alternatives to the K56 construction; the City of Joburg and GDARD have requested that these be investigated in the EIA, however the EIA fails to investigate this sufficiently. The CSIR is running a traffic modelling of these suggestions which must be considered.

Comparison of costs:

Upgrade to R55 to dual lane is estimated at R60 million per kilometre. This is compared with the K56 which is estimated at a minimum of R90 million per kilometre including expropriation. This amount is a low estimate and may not include the cost of bridges and underpasses required. These would increase the budget substantially.

Flawed motivation for road:

The motivation for the road is that it is an east-west link road designed in the 1970's and was prioritised in the Strategic Roads Review in 2010. GEKCO has pointed out repeatedly that the review in 2010 prioritised different sections of the K56. However the EIA has not amended the report accordingly. This is misleading and a false representation of the facts.

The traffic modelling report which is promoting the K56 was compiled by WSP who is also contracted by Century Properties for a number of developments on the K56 route. They require this link for the proposed Riversands and Helderfontein commercial developments and have used the construction of the K56 as motivation for obtaining approvals. This creates a bias towards their client and the independence of the traffic modelling report could be in question. The modelling study was contracted by both Steyn City and Century Properties rather than the Gauteng Department of Roads and Transport.

Fatal flaw in continuation of K route

The K56 cannot be constructed as an east-west link as designed as there is a fatal flaw west of William Nicol (R511) and the report states the K56 will end at William Nicol. (One of the two priority sections mentioned in the 2010 report is the section where the fatal flaw has been identified). A developer approached province (see **attached traffic report for the Wisken development)** to develop the section east of the R55 and due to problems has decided to upgrade existing roads in this area. As a result, the K56 is effectively no longer a K route but an east west link between William Nicol (R511) and R55. There is an existing road which already serves this purpose which has recently been opened for the proposed Riversands development

(Zinnia road). The Mackenzie alternative has identified this as the best alternative to the K56 and residents are in support of this provided the road remains a single lane road with traffic calming measures as it passes through an equestrian residential area and crosses biodiversity corridors. **The road can be upgraded to the City of Joburg standard for *Complete Streets*. Both the City of Joburg and GDARD requested that this alternative be investigated in the EIA, however no investigation is evident in the report.**

Prioritise integrated transport in line with *Integrated Transport Master Plan 2025* (ITMP25)

It is clear the motivation for this road is not the Province but private interest and funds could be better spent on the following improvements to improve traffic flow, public transport and non-motorised transport in the Fourways area. Cycling is becoming a preferred form of transport in both Diepsloot and Olievenhoutbosch due to affordability. William Nicol drive from Diepsloot to Fourways is considered the busiest section of road in the province for cycling. (NMT= Non motorised transport, i.e. cycling and walking)

1. Upgrade R55 (EIA approved for portion, some portions already complete) from N14 to link with Shakespeare drive. Include NMT infrastructure as many Olievenhoutbosch pedestrians and cyclists currently use this route.

2. Complete William Nicol (K46) upgrade to N14 - Install cycle lanes and BRT along William Nicol to Diepsloot. Retrofit cycle lanes from Steyn City to Fourways with a long term view to link to Braamfontein.

3. Upgrade N14 (budget approved as announced by MEC Vadi)

4. Upgrade Main road to Witkoppen - Include NMT infrastructure to also link into Braamfontein spruit

5. Upgrade Witkoppen with BRT and NMT – this becomes a complete street and east west public transport link

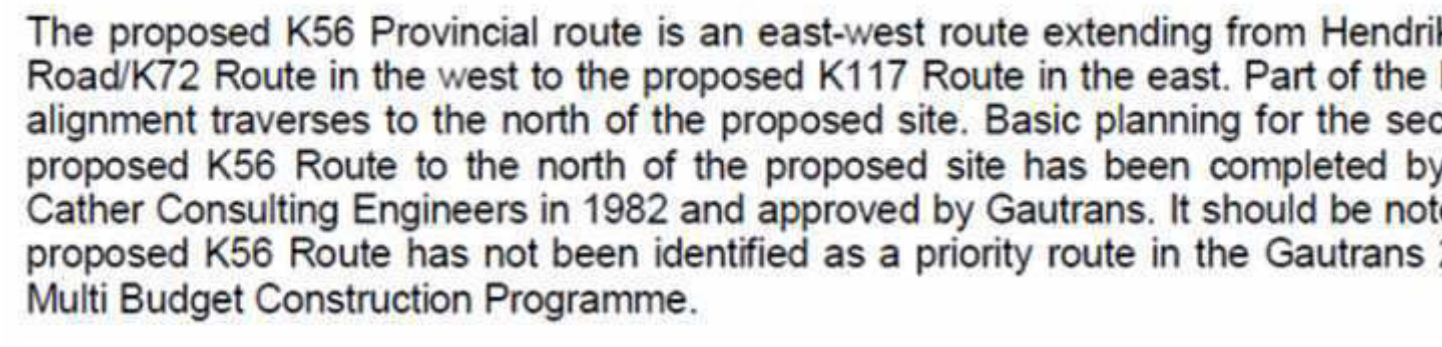
6. Upgrade Summit road (R562) to dual lane from Diepsloot to N1 and include NMT to Midrand

Failure to consider the Environmental Management Framework:

The Environmental Management Framework has been gazetted which promotes the Mackenzie alternative. The draft EIA fails to recognise the EMF and consider the suggestions despite it being a gazetted policy document and requests made by City of Joburg and GDARD to do so.

the proposed K56 Route has not been identified as a priority route in this report by a respected traffic engineer. This contradicts WSP's claim that it is a priority.

It does state that Main road (P71) is a priority for upgrading.



The proposed K56 Provincial route is an east-west route extending from Hendri
Road/K72 Route in the west to the proposed K117 Route in the east. Part of the
alignment traverses to the north of the proposed site. Basic planning for the sec
proposed K56 Route to the north of the proposed site has been completed by
Cather Consulting Engineers in 1982 and approved by Gautrans. It should be not
proposed K56 Route has not been identified as a priority route in the Gautrans

Good afternoon

It is with dismay that I read about the proposed K56 development. I am the Headmistress of Cedarwood School. We are situated on Erf 113 and 115, Glenferness Agricultural Holdings in Dunmaglass Rd, and are directly affected by this.

I would like to register the school, and indeed all 220 pupils and 65 staff members as affected persons! Do you require details of all these people, or can the school collectively register under the name of Cedarwood School.

I look forward to hearing from you.

Kind regards
Jayne Eurelle

Dear Jayne,

I suggest that you list all the students by name as well as the parents, teachers and staff – as well as the school in name. In our past experience, generally, developers and their consultants will take the interpretation of any given set of information that best suits their own purposes – so if you register as a school, in my own opinion, they will take this as ONE party and state so in their report. It is worth going the full and complete route.

Hi Lizelle

I am an equine veterinarian and have been practising for over 15 years now. The greatest density of my patients is in the Kyalami area with me caring for probably around 200 horses here. The rest of my client base is in Chartwell, Nooitgedacht, Muldersdrif, Ruimsig and Laezonia. The reason for my practice being economically viable is that most of my clients are concentrated in the relatively small Kyalami area. Like most other equine vets I travel from stable to stable rather than the horses getting transported to me. It is obviously much more complicated and costly to hitch a horsebox to a suitable towing vehicle, load the (often reluctant) horse who for safety reasons has to travel with a groom in the trailer (which is strictly speaking illegal) and transport it to the veterinary clinic than putting the dog on the backseat of the car and taking it to the vet. Many horse owners do not own a horsebox or a towing vehicle and would have to pay a transport company. The inconvenience and increased substantial risk to the often very valuable horse is why horse owners are reluctant to travel their animal to the vet. With the current traffic situation it takes me depending on the time of day between 30 and 90 minutes to drive from here to Chartwell (a mere 15km). In that time I see between two and eight patients within the Kyalami area because travel time is negligible. Clients cannot actually reimburse me properly for travel time as it makes their veterinary costs excessive. My practice therefore relies on the short travel time and distance which I charge for to balance out the loss made for the further away calls. Without the high density of horses in the Kyalami area my practice would have to close because it is no longer economically viable. I employ one veterinary assistant (with a disability) who would also lose her job.

Apart from mine there are seven equine practices that are located in and around Kyalami and service this community. The greater majority of those practices operate in exactly the same way. My practice is the smallest with the fewest employees. Northrand Animal Clinic has 5 equine vets, 2 small animal vets, 1 equine veterinary nurse, 5 office staff, 5 grooms/veterinary assistants, 1 gardener and 3 ladies employed for cleaning. Crowthorne Veterinary Clinic employs 2 equine vets and 1 small animal vet to my knowledge. I do not know how much support staff there is (telephone 011 468 1519). Chartwell Equine Clinic has 1 equine vet and employs locums. Support staff unknown to me (tel 011 468 4602, 076 732 7730). Fourways Equine Hospital has to my knowledge 4 vets (tel 011 468 3393, 082 459 0129) and a large number of office and support staff. Blue Hills Veterinary Clinic has 1 equine and 1(?) small animal vet (tel 011 318 2340/1, 082 610 3571). Glen Austin Equine Clinic is located in Blue Hills and employs 2 equine vets (tel 011 702 1514, 082 326 7357). Witbos Veterinary Clinic employs 3 equine vets, 1 equine veterinary nurse and 1 (?) small animal vet and a substantial number of office and stable staff (tel 011 702 1806/8, 082 521 6877).

The impact that the destruction of Kyalami has on all these practices can be imagined and the ripple effect (loss of employment of staff contributing to unemployment problems and families ending up living below the breadline) will be massive since these people are highly skilled at what they do but completely unskilled at anything else.

If you have any further questions, please do not hesitate to contact me.
Yours sincerely,
Dr Karen Böhme

Hi Lizelle

I am an equine veterinarian and have been practising for over 15 years now. The greatest density of my patients is in the Kyalami area with me caring for probably around 200 horses here. The rest of my client base is in Chartwell, Nooitgedacht, Muldersdrif, Ruimsig and Laezonia. The reason for my practice being economically viable is that most of my clients are concentrated in the relatively small Kyalami area. Like most other equine vets I travel from stable to stable rather than the horses getting transported to me. It is obviously much more complicated and costly to hitch a horsebox to a suitable towing vehicle, load the (often reluctant) horse who for safety reasons has to travel with a groom in the trailer (which is strictly speaking illegal) and transport it to the veterinary clinic than putting the dog on the backseat of the car and taking it to the vet. Many horse owners do not own a horsebox or a towing vehicle and would have to pay a transport company. The inconvenience and increased substantial risk to the often very valuable horse is why horse owners are reluctant to travel their animal to the vet. With the current traffic situation it takes me depending on the time of day between 30 and 90 minutes to drive from here to Chartwell (a mere 15km). In that time I see between two and eight patients within the Kyalami area because travel time is negligible. Clients cannot actually reimburse me properly for travel time as it makes their veterinary costs excessive. My practice therefore relies on the short travel time and distance which I charge for to balance out the loss made for the further away calls. Without the high density of horses in the Kyalami area my practice would have to close because it is no longer economically viable. I employ one veterinary assistant (with a disability) who would also lose her job.

Apart from mine there are seven equine practices that are located in and around Kyalami and service this community. The greater majority of those practices operate in exactly the same way. My practice is the smallest with the fewest employees. Northrand Animal Clinic has 5 equine vets, 2 small animal vets, 1 equine veterinary nurse, 5 office staff, 5 grooms/veterinary assistants, 1 gardener and 3 ladies employed for cleaning. Crowthorne Veterinary Clinic employs 2 equine vets and 1 small animal vet to my knowledge. I do not know how much support staff there is (telephone 011 468 1519). Chartwell Equine Clinic has 1 equine vet and employs locums. Support staff unknown to me (tel 011 468 4602, 076 732 7730). Fourways Equine Hospital has to my knowledge 4 vets (tel 011 468 3393, 082 459 0129) and a large number of office and support staff. Blue Hills Veterinary Clinic has 1 equine and 1(?) small animal vet (tel 011 318 2340/1, 082 610 3571). Glen Austin Equine Clinic is located in Blue Hills and employs 2 equine vets (tel 011 702 1514, 082 326 7357). Witbos Veterinary Clinic employs 3 equine vets, 1 equine veterinary nurse and 1 (?) small animal vet and a substantial number of office and stable staff (tel 011 702 1806/8, 082 521 6877).

The impact that the destruction of Kyalami has on all these practices can be imagined and the ripple effect (loss of employment of staff contributing to unemployment problems and families ending up living below the breadline) will be massive since these people are highly skilled at what they do but completely unskilled at anything else.

If you have any further questions, please do not hesitate to contact me.
Yours sincerely,
Dr Karen Böhme

Dear Lizelle
I attended the meeting last night as a Glenferness resident.
I have to compliment you on your excellent presentation. You also handled the meeting incredibly well and managed to keep your cool with some hot heads around.

I am one of the so called “dissidents” from Glenferness as I live on a road that is already accommodating 2 schools, and a large nursery!!! You can just imagine the traffic I have to put up with and I have to say that in my situation here the area is anything but a” quiet rural” area??

I look forward to your findings and input in the future.

Kind regards
June Massey

Dear Interested and Affected Party Member,

We are currently still collecting and categorising the Issues and Concerns received. We are also planning a follow-up Scoping Public Meeting and we will inform you as soon as we were able to fix a suitable meeting date with the other parties required for purpose of such meeting.

The long weekends and holidays are currently making it extremely difficult to identify dates and suitable to all the key role players. We can however guarantee that you will be informed of all actions taken meetings and reports associated with the Application.

Hope this finds you well.

Kind Regards

Juanita De Beer

Highly Confidential – Without Prejudice

Dear Ms de Beer,

Glenferness – K56

With reference to the Glenferness K56 *et el.*, realignment, design and construction project.

Please advise at what stage this project is currently at in terms of EIA, R.O.D. etc., and what the projected timeline is expected to be for these milestones.

As our property is currently the subject of purchase from Eskom for the purpose of their Kyalami Strengthening Project, I would be most grateful if you were to treat my query with a degree of expediency.

If you would prefer to converse with me, rather than reduce anything to writing, I may be contacted on either 083 453 1792 or 044 384 1428.

Many thanks,
Baden Hall.

To whom it may concern

We are deeply concerned about the traffic congestion along R55 and corner of Main road specifically, plus the traffic that "rat runs" through Beaulieu, and of traffic blockages in and around Beaulieu. We need new roads that compliment the Beaulieu suburb and surrounding suburbs, that are planned in accordance with local resident needs.

Attachments: DUST PROBLEM IN JUPITER AVE CROWTHORNE SEPT 2010.doc

---

From: Jan Engelbrecht [mailto:engelbridge@mweb.co.za]
Sent: 10 March 2012 12:20 PM
To: 'Lizelle Gregory'
Cc: 'Chris de Villiers'
Subject: RE:ISSUES RE K56

Dear Lizelle
I hereby list the following issue re K56:
Increased traffic will arrive at the Crowthorne shops/R55 [k71]/K56 [Main road] traffic jam which will add to current traffic problems in Crowthorne namely

- Increased rat running [see attached photos]
- Even higher traffic both in numbers and axle load on streets designed for light residential traffic causing further collapse of these streets see in particular Mercury and the tarred portion of Jupiter both of which are already packing up.
- The untarred portions are causing a lot of dust as it is [see attached photos taken in Jupiter showing both dust **and** traffic!]

The solution, would be to include in this contract, as a minimum, the portion of the K56 between the T junction at the R55 and the Plant Park Nursery [ie at the corner of Whisken/ Walton/ Neptune]

Dear Lizelle,

Apologies for hassling you so soon in the New Year – hope you all had a wonderful festive season and that 2015 is a good year for you all.

Towards the end of last year I was asking about progress on the K56 as we really need to be making plans for our future. I was told that something would be out by 12 December 2014. Do you have anything for us at this stage?

Regards and best wishes,

Chris de Villiers

Subject: K 56

Dear George and Lizelle,

I am the landowner of 25 MacInnes Road (Holding 25 Glenferness Agricultural Holdings) – and I have sent you copies of my title deeds already so you can see exactly where this property lies (your numbering does not include all our formal legal numbering – so you might wish to change this accordingly).

This communication is to formally register myself (Julie Patricia Hannah) as an interested and affected party in the proposed alignment of the K56 in that the current alignment destroys most of the buildings on my property – and there seems to be a problem in that there is unlikely to be compensation for this unconstitutional removal of our property, should the road be constructed along its current proposed route.

The following is a list of the people who are also to be registered as interested and affected parties. These people are to be registered in their own right and to be contacted at the postal and e-mail address noted below:

Julie Patricia Hannah – landowner – Holding 25 Glenferness Agricultural Holdings (25 MacInnes Road)
Christopher John de Villiers (spouse of Julie Patricia Hannah – co-landowner)
Devin Ross (son of Julie Patricia Hannah) – residing with JP Hannah and CJ de Villiers
Althea Wade (sister-in-law to CJ de Villiers and single parent) – residing with JP Hannah and CJ de Villiers
Audrey Wainright – single mother with two dependent sons – cousin to JP Hannah, living in one of the cottages at 25 MacInnes Road
Janet Wainright – widowed single mother with two dependent daughters – cousin to JP Hannah – living in a cottage on 25 MacInnes Road
Stefano and Megan Piller with two dependents – tenants at 25 MacInnes Road Glenferness
Iris Lamberts – single, tenant at 25 MacInnes Road Glenferness

Julia Moagi – employee at 25 MacInnes Road Glenferness
Aaron Moyo – employee (maintenance manager) – at 25 MacInnes Road Glenferness

All of the above have the following contact address for this registration and for further individual communication:

PO Box 529 WITS 2050; e-mail – chrisdev@cjconsultants.co.za

Please confirm that all of these people and their families have been registered as interested and (directly) affected parties by the alignment of the K56.

Many thanks and regards,

Julie Patricia Hannah

Hi Lizelle

Please see attached the Community Development plan developed by the community - a cooperation between the Residents' associations and the GEKCO conservancy. We met with CoJ Development planning on Tuesday to present the plan.

I have also attached a survey conducted by the conservancy of residents and a brief description of the Green Neighbourhood project which is currently being launched as an initiative to educate residents and encourage sustainable practices.

Please do not hesitate to contact me with any queries or if you require more information.

Kind regards

Subject: K56 - Draft EIA Report - Errata Review Invitation Notice

Dear Interested and Affected Party

Attached please find the errata and updated notice regarding the above mentioned project.

After receiving numerous amounts of queries regarding the timeframe allowed for comments on the Draft EIA report due to the school holidays currently in progress, Bokamoso considered the request for an extension of time.

Please note in terms of the 2010 as well as in the 2014 NEMA Regulation, Public Participation is only forbidden during the December holidays from the 15th of December until the 2nd of January. Nowhere else in the Regulations are any mention made about other school holidays.

With this being said it was however decided that Bokamoso will grant an extension of time by allowing and adding an additional 10 days for the review period.

Kindly note the review period is from **23 June 2015 – Monday, 3 August 2015**.

I trust the above is in order.

Please do not hesitate to contact me should you have any questions in this regard.

Kind Regards/Vriendelike Groete

Juanita De Beer

Subject: FW: K56 - Draft EIA Report - Review Invitation Notice

Dear Janita

Please could you respond to the request below for a 30 day extension to review and comment on the Draft EIA for the proposed K56? A minimum of 60 days should be granted to I&APs who have followed this process for the past three years and have a 2500 page report to consider. Please could you also correct the reference to this as a 'Final Scoping Report' and reissue the notice correctly?

I would also like further detail on the proposed underpasses and any detail you have on the proposed design so their suitability from an equestrian perspective can be evaluated. This should have been presented to the equestrian focus groups so they could comment on and evaluate the proposal put forward. In your report, it is not clear how an underpass for a broad road such as Zinnia road will accommodate horses.

Kind regards

Dear Janita and Lizelle

I hope you are well. Thank you for forwarding the Draft EIA report and giving a comprehensive view of the issues found in this area.

As GEKCO has been requesting a copy of the specialist reports since 2013, please may we request an additional 30 days to comment. The report is quite extensive and as we are entering three weeks of school holidays, many residents will not have an opportunity to read the report and respond. Thank you and I look forward to your consideration.

I would also like to request any further detail you are able to provide on the underpasses you are proposing. Are the roads also planned to run under the K56 (i.e. Zinnia road in the case of the Zinnia road underpass?)

Kind regards

Genevieve Tredoux

Bokamoso *Landscape Architects and Environmental Consultants*

To whom it may concern,

I, Neil Mayston, being the owner of Ptn 2 of 18 McInnes Rd Glenferness A.H. Midrand, am writing to register my interest in the proposed K56 & K58 roadways in Glenferness.

Aside from myself, I have tenants staying at the property and staff working on the property, all of whom would be affected should I not be able to continue to use the property in its current state. Furthermore, I have approved building plans for further development which Im reluctant to further considering the new proposals. I want to be kept informed with the process and any meetings that are scheduled to discuss the proposals.

The full list of affected persons is:

Neil Mayston
Russell Goddard
Christine Goddard
Alexander Goddard
Cristin Goddard
Anthony Mayston
Albert Nyirende
Priscillar Ndlovu

Kindly let me know that my interest has been recorded by return email.

Yours sincerely
Neil Mayston

Sent: 11 April 2012 10:54 AM
To: Lizelle Bokamoso
Subject: Fw: K56 - Objections

Dear Lizelle

ENVIRONMENTAL IMPACT SCOPING PROCESS FOR PROPOSED K56 THROUGH KYALAMI & GLENFERNESS

I want to object most strongly to the above mentioned road.

1. There is no sense in taking a road right through this one and only equestrian area in the country. In aid of what does this need to be done?
   Why aren't Main Road as well as William Nicol rather improved? That would make far more sense to upgrade the existing roads rather than building a new road right through the centre of this agricultural area.
2. Why aren't the R55 from Olievenhoutbosch to Crowthorne not upgraded as well as Main Road from Crowthorne to Witkoppen? Both these roads carry an enormous amount of traffic and shoud be double carriage ways all the way. There is always a bottle neck at Crowthorne where the road is in a particularly bad state. Upgrading of these roads should be done as a matter of urgency and the K56 dumped.
3. Why is the R562 not upgraded to help with the traffic?
4. Who is paying for this proposed road and why not for existing roads to be improved?
5. Who is going to use this road? I'm sure that none of the people living on plots in the area have any need for such a road or any desire to have it going right through the middle of this agricultural and equistrian area.
6. This proposed road cuts right through wetlands, Gecko conservation area and bullfrog breeding grounds. There are also other small wild animals that will disappear if there is anymore construction in the area.
7. What happens to all the jobs that will be lost if horse breeders and horse riders disappear from the area?
8. The Lippizaner Centre will have to move if the road is built. This is totally unacceptable!
9. This is not development, this is destruction of a very unique and precious area that should be kept intact for all those who are horse lovers and horse breeders and this should also be done to prevent job losses.
10. We here in this area do not need nor desire to have a road cutting through our land because some shortsighted construction company wants it built for their own selfish purposes instead of taking into consideration what's best for the whole community. We are sick and tired of these greedy, non-caring people who only think of their own pockets without any consideration for nature, the environment or their fellow humans!!!

Yours sincerely

Ronél Brink.

Subject: K56 - Please read and respond
Importance: High

Hi Lizelle

Kindly give me a moment of your time to read and respond to this email, it is urgent.

I attended the last public meeting a few weeks back at Grace Point Church to gather as much information as possible regarding the K56 road between William Nicol and Main Road.

My participation at that meeting was unique in that I am NOT a land owner, but rather considering an investment in Helderfontein Estate. The property that I am considering is on the northern edge of the estate bordering the northern boundary and overlooking the Jukskei River, a stand that is unique in its position, but also vulnerable to the proposed K56.

ANY realignment of this road would give me some piece of mind for my future plans in Helderfontein. Everybody that I have spoken to, is of the opinion that the proposed alignment is UNLIKELY to happen, but I would like to have a little more reassurance in this regard.

The general consensus is that Erling Road is the most likely option, considering it has the benefit of the bridge and infrastructure from Steyn City.

I have spoken to Francois Van Rensburg as well, but after speaking to him, I get the impression that the proposed route will go ahead, and that any realignment is unlikely. This was also my feeling after the meeting.

Is there any way that you could shed some more light on this issue for me as I have urgent decisions to make regarding this property, and I don't have the luxury of waiting for final reports to be released.

I have 24 hours to make a final decision on this property, please help with a response as soon as possible, or contact me on 083 251 0819.

ANY ADVISE WOULD BE GREATLY APPRECIATED.

Thanks & Regards

Melany

While on the one side I do appreciate you sharing this with me, I rather would not be copied in this correspondence between residents and the internal infighting.

Also note, that because of our position on this project, I am obliged to include this in the EIA process if this is shared with me as I would not like to s it at some stage having to answer questions in a review process and say that I have not been aware of these comments while someone can then provide correspondence that I was indeed copied in this.

I suggest that this rather be shared with the EIA consu tant (Bokamoso) than with myself.

Kind regards,

Francois Van Rensburg

Dear Joe, thank you for your comments and thoughts:

On 20/07/15 16:41, Joe Holmes wrote:

> Good day All,
>
> By way of introduction, I am the owner of 165 Dumaglass Road and have been resident in the area for over twenty years. I would like to make some comments regarding the proposed new roads affecting the greater Glenferness area, which I feel should be considered in the contemplation of the issue which confronts us all as interested parties.
>
> At stake in broad terms is the destruction or survival of the homogeneity of Glenferness, and its neighbour Kyalami.

I agree that Greater Kyalami survival is at stake!

> Our objective then is the preservation of this country-styled identity in the greatest degree possible,

Agreed and I refer to it collectively as rural and equestrian; this is how we differentiate our Greater Kyalami area from others.

> whilst also understanding that inevitably there will be some fissuring of our suburbs.

The enhancement of existing road infrastructure, as an alternative to building new K56, K58 and a '4 lane Chattan', will prevent the fissuring.

> The very important thing then is to accurately understand the positions of the various players in this dilemma to reduce this to a minimum.
> We also need to clearly define the three major portions of the negotiations we are engaged in, being
>
> A) Those points we are absolutely not prepared to make any concessions on

B) Those points we may possible consider concessions on
C) Those points which we will offer one by one as concessions when pressured to do so in order to achieve our overall objective

These points needs to be comprehensively discussed and identified, so as to be clearly understood by the GRA and to ensure that **all participants are acting in unison**. Always bear in mind that our opponents are skilled, wily and practised negotiators accustomed to manipulating their way through a complex administrative system.

Agreed.

Glenferness is under some considerable pressure to have various roads pass through it, positioned as it is geographically straddling a lot of potential lines of communication, and as a result **various developers have their own agendas lying at the fore when presenting these new roads**. This necessarily implies then too that they have substantial financial stakes involved, and important facet to consider when we deliberate on our approach to them by way of response.

Agreed.

The K56/Zinnia in its various forms as mentioned below by Keith should be examined carefully, as it is actually the hinge-pin and crux of the entire current impasse we are faced with, and in it lies either our salvation or downfall.

Building the K56 is different to upgrading Zinnia. There are already meetings taking place with JRA discussing the upgrading of Caracal & Zinnia to improve traffic flow and to better and more safely accommodate pedestrians, equestrians & cyclists.

Between this proposed road, and the Zinnia alternative as previously suggested by Malcolm Mackenzie while making viable alternative suggestions *there however exists the tacit recognition by us the residents of this area* that in fact a road of some sort or kind is required to service the through-flow of traffic. This in turn suggests very strongly that either one or another of the options will at some time be approved and constructed, and irrespective of which one it is, the negative impacts will to some sort of well-considered ameliorating factors can and will be devastating. In some respects this tacit recognition will have given significant impetus to the proposers of the K56 to be given the go-ahead, so we need to be very mindful of how to proceed then.

The R55 upgrade to 4 lanes has been approved for its entire length, Caracal & Zinnia will soon exist as a contiguous piece of road; we just need some adjustments to make it good for all users. The GEKCO & RAs submission to the CSIR proposes a strategy obviating any need for the K56 & K58.

I think we need to consider first the perspective of the issue from the eyes of the various developers, like Stem City and Century Properties for instance, because it will lead us to, and points us at, where and more importantly *how* we need to proceed. They have already invested an enormous amount of capital into their various projects, and consequently ***need the traversing*** of Glenferness/Greater Kyalami very badly. This also then means that they will make a very determined effort to achieve this object, irrespective of the downstream effects it may wreak on Glenferness and Greater Kyalami. But so this need for the traversing of our area is also their Achilles Heel, and we need to be very aware of it when

formulating our considered response, because they will also be prepared to pay quite well in order to achieve their objectives.

You've hit the nail on the head! There is, however, a difference between needs and wants.

Also on the cards, at the suggestion of Century, is the proposed Chattan Boulevard, a grandiose (and expensive for us) entrance to their development lying beyond our suburban boundary. Again, a roughshod plan that would see Glenferness trampled in order that they make even more profits for their development machine using their accumulated financial muscle and a very successful business model in this geographic jewel.

We will fight this Chattan proposal all the way!

My suggestion then to be put to them as a counter-proposal is to insist that they

If or when the proposed through-road referred to as K56/Zinnia is passed for construction ---

1) Build several significant state-of-the-art underpasses and or overpasses between Glenferness and Kyalami over the K56/Zinnia road to enable the free continuation of dedicated routes for the vehicle, pedestrian, cycling and equestrian passage currently enjoyed by residents, or to an even higher standard. We should aim very high in this regard.

This could work for vehicles, cyclists and pedestrians but not for equestrians.

2) Such accesses should in no way allow bleed-off traffic to or from this version of the K56/Zinnia into Glenferness/Kyalami but should rather maintain the isolation of the bordered areas from the roadway passing through the area without any form of off or on-ramp
3) They should build extensive equestrian/cycling trails alongside the current roads in Glenferness and greater Kyalami to complete a sophisticated network of dedicated trails for the use of residents.

We have suggested that the Joburg 'Complete Streets' strategy be adopted for Glen Ferness; the roads designed to be shared by all!

4) They should upgrade the intersection of this K56 and Main,

I don't think the K56 is needed

5) together with increasing the width of the bridge over the Jukskei to accommodate the increased traffic flows thus allowed

4 lanes on Main has been approved from Lone Hill to Leeukop.

6) They should relinquish and remove from all plans and charts any reference to Chattan Boulevard and sign a memorandum of understanding with the GRA that Chattan Boulevard would be permanently deleted from any future planning proposals.

Absolutely and we should collectively agree to keeping Greater Kyalami rural and equestrian!

7) All or any current access routes between Glenferness and Helderfontein should be permanently sealed off.

There are questions in the Greater Kyalami survey covering road closures or controlled access.

8) They should build substantial walls flanking this new access road from where Zinnia currently joins Main (M71) down to as far as Helderfontein so as to minimise the impact of traffic noise on the surrounding residents.
9) They should purchase land for, and have formally declared, dedicated wetland reserve(s) to allow preservation of the bullfrogs and associated fauna and flora, which currently enjoy an very tenuous existence under the very unsuitable sanctuary of disparate pockets of privately owned and haphazardly managed land.

I defer to more knowledgeable GEKCO members when discussing the protection of fauna and flora.

By coercing them into establishing a formally protected area, which I suggest should be administered by a body like Gecko or other similar resident-driven group rather than by either the City or the developers a major conservation objective could be achieved that will provide inviolate protecton for many diverse species for the foreseeable long-term future. This in itself would be a great achievement, and is something that is quite within the massive budgets involved in the larger developments going on around us.

By upgrading the access options to Helderfontein development and re-routing it via the K56/Zinnia option and hence over Jukskei from Lonehill environs the need for devastating Chattan and its properties is completely nullified. The increase in travelling time and distance by going the slightly longer way around would be paltry. If Chattan Boulevard is ever constructed then Glenferness as a suburb is effectively destroyed.

We must all defend Glen Ferness against a '4 lane Chattan and the K56 & 58. Please submit your objection to the K56 draft EIA.

Our best line of defence is then to provide an acceptable alternative

We've proposed a viable alternative.

to them and make them invest as much in the sophistication of the design as we can force them to agree to under dress so as to minimise its negative effect on our lifestyle and property values. They need to pass through or buy, they have the cash resources available to make this as low impact as we can make them agree to. However, if we fail to present an acceptable alternate we run the very real risk of simply marking time for some lengthy period of time, and then losing both the battle and the war to our enormous cost. There will always be casualties in any conflict – our focus should be on minimising ours as far as possible while allowing the enemy to think they have won ground while in fact they have been conceding the important terrain to us.

Thank you then for reading this submission of my thoughts,

Thank you for taking the trouble to communicate your thoughts.
I hope you've been able to express your thoughts in responding to the survey?
I'll share your thoughts with my connections.

Keith

Kind regards
Joe

Subject: K56 draft EIA report for review

Attention: Ms Lizelle Gregory

I would like to register my objections to the proposed K56 road development:

1. By cutting diagonally across and splitting Glen Ferness, the K56 will irreparably harm the equine industries of Glen Ferness and Greater Kyalami.
2. This road will traverse and severely damage the many wet lands in Glen Ferness and Helderfontein.
3. The K56 can not be classified as a provincial K road as it has no possible further passage east or west.
4. As a stand alone short piece of road development it will bring more traffic to the junction of the R55 and the M71, which already becomes grid locked at peak traffic times.

Yours faithfully, Keith Bush

Thank you Juanita.

Would you please add one further comment?

I've done some research and I've confirmed that Egoli Granite Grassland has been gazetted as a threatened ecosystem. I would like that included in the comments as follows:

A previous EIA of the area recorded the north east part of the site (through which the proposed route for the K56 would travel) as being Egoli Granite Grassland (please see attached document with copy of a portion of that report's vegetative survey).

Egoli Granite Grassland is one of the ecosystems on the National List of Threatened Ecosystems which was government gazetted in December 2011.

Thank you.

Subject: K56 Draft Scoping Report - my comments

Hi Lizelle

Thank you so much for including my contributions in your Draft Scoping Report.

My only comment on the report is that I do not understand how the report can state "It is anticipated that the proposed section of the K56 is predominantly negative in the short and medium term, but turns neutral and even positive in the long term when the proposed route will pass through irreplaceable ecological sites.

The dictionary definition of irreplaceable = impossible to replace if lost or damaged.

If irreplaceable sites are destroyed, which would happen if a road is built through them, then the long term affect can only be termed as negative. The sites will not exist anymore. Even if the road does not

destroy the entire site, they will be fragmented into pieces too small to maintain the level of biodiversity and the ecological community that currently exists.

Neither will the sense of place in the area remain and the human community that currently exists. These will be destroyed forever.

I strongly suggest that you consider the environment and the social-economic factors as being evidence enough to motivate looking at alternate options, including the no-go option.

There is a always a better way and I'm sure with the wealth of talent on your team, you can find it.

Thank you.
Jacque

To whom it may concern,

Please register KEROA (Kyalami and Environs Resident's and Owner's Association) as an Interested and Affected Party in the K56, as a portion of the K56 runs through Kyalami and the access roads/intersections and routing directly affects Kyalami residents.

We would like to be informed of all matters, meetings and developments regarding the K56. Please address all communications to the following committee members:

Shari de Nobrega (chair): info@kyalamicountry.co.za
Jon Paul (vice-chair): jon@yebo.co.za
Lorraine Sinclaire (secretary) lorrainemsinclaire@yahoo.com

Please acknowledge receipt of this email and acknowledge KEROA's registration as an Interested and Affected Party.

Yours Truly,
Shari de Nobrega

Communication is scares at this stage due to the fact that we struggle to get the official information out of the Provincial Department who's administration system is not what it used to be. Please stick with the process and you will soon find that information flow will be more regular.

Hi Francois

Soos bespreek, ons soek asseblief ‘n kaart wat hopelik tot by die enkel standplaas se “detail” kan gaan, met die aangeduide paaie soos julle dit tans het.

Ons het ‘n muur wat 2.2m wyd is en 1.3m hoog.
Anders kan ons groter dit kry en dan pas ons dit erens anders.

Ek het ook gehoor standplase aan die kante van die nuwe paaie sal herzonedering kan kry vir “commercial” – het ek reg gehoor?

Dankie baie,

Best regards,

Subject: K56 road developments

Hi Lizelle/Juanita
I hope this finds you well. I was just wondering if there are any developments on the K56 road EIAS? Is there going to be a public meeting anytime soon? Everything has gone very quiet lately!!!
Looking forward to hearing from you,
Kind regards
Jayne

Subject: RE: K56 Road

Mr Thomas

As indicated previously, the planning is to build K56. With the construction of this road, the existing Main Rd, from the south of K56, will have to be re-aligned to provide connectivity with K56. The obvious way to do this is to use the already expropriated land for the future PWV9 interchange ramp. This portion will be built with the construction of K56.

In terms of the area to be used, the planning is currently restricted to build the roads within the road reserves as identified in the Preliminary Designs.

Hi Francois,

We spend the day at gautrance a few days ago only to find out that the attached piece was paid out for in 1986. We did not know about it as we bought the property in 2005 from a deceased estate and the title deeds do not make any mention of any road which is amazing and a law suite on it own.

Can you confirm what your plans are with regards to what you plan on developing and what you plan on leaving. Attached is the highlighted piece that has been paid out for with the PWV 9 and not the K56. Are you planning to build this access road now or only when the PWV9 goes ahead?

Regards

I think it is also necessary that you take a look at the sketch in Dropbox "EXPROPRIATIONS_01.jpg".

This sketch, although not 100% positioned on the aerial photo, gives an indication of properties affected by a previous proclamation done for the PWV9 interchange. The areas indicated by the red lines have, according to the Provincial Government, already been acquired a number of years ago. I am awaiting documentation in this instance and will up-load it as soon as we receive such.

Subject: K56 Road

Hi Francois,

Thank you for the drop box

I own 73 main Rd. I have attached the google image of our property. We are currently running a nursery from the property and are trying to see how we are going to proceed in the future. The questions I have are:

1. Will you be building t he full dual carriage rd? (rumors are that only a single road will be built to start) The planning is for the full dual carriageway. Current instruction from the client is the design and construction for a 4 lane, dual carriageway.
2. Will the bend part of the current main rd be closed off? If so will we have the opportunity to buy the old rd reserve in front of our property to continue operating our business? The bed will be changed as per the attached sketch. There will probably be an opportunity to app ly from the Provincial

Government to acquire road reserve that they will no longer need.

3. Its not the actual k56 that affects us but the access rd/off ramp. Will this be built at the same time as the k56? Main Rd will have to be re-aligned to still form a link to the south. Refer to the attached sketch.
4. Have the valuations on the properties been done? No valuations have been done to date. Valuators will only be appointed when the EIA has been concluded and a positive RoD received on the preferred alignment.
5. Will they buy our entire property or just the portion been taken? General practice is to take only what is needed. Should the remainder of the property not be functional, a case may be motivated to the Province to take the balance also.
6. When do you hope to start breaking ground? Currently the programme is to conclude the EIA by end 2013, construction to commence shortly thereafter when the land acquisition has been concluded.

If you are unable to answer any of the questions above if you can point me in the direction of someone that can that would be very helpful.

Regards

Dear Lizelle and Juanita

I have had no response to my mail dated 25 November. Please advise where you are in the EIA process for the K56. You were expecting the report to be prepared towards the end of last year, but as yet we have not had any feedback. Malcolm Mackenzie also requested feedback a few weeks ago to no response.

We have also requested the specialist reports a number of times and have had no response from you. Kindly keep the Interested Parties informed so we may participate equitably in this process.

Please also be aware of the Gauteng Environmental Management Framework launched by GDARD in November of last year identifying the Kyalami / Glenferness area as a 'Special Control Zone' and include this report and its policy advice in your study as it may influence your recommendations.

Kind regards

Kristin Kallesen

Subject: Social impact survey

Dear Lizelle

Please see attached information gathered which can feed into your social impact study. We asked the riding yards how many of their riders came from within the area and how many from the outside. This is not a complete list of riding yards – many of the smaller yards have not responded and there is no data from the Kyalami Equestrian Park which is the largest eventing venue in the area.

Please advise where you are in this process. I am aware that a number of developers are also canvassing residents to motivate for the road construction. We are planning a public meeting and town planning session on Saturday 11 October and would like to invite you or a member of your team to

attend. We will be covering issues such as the K56 and would like to give feedback to the residents as to the current status and hear their views on all the issues raised. If you are able to attend, I would be happy to give you a few minutes to speak about the current status of the EIA process.

Kind regards

Kristin Kallesen

Goeie Dag Bianca

Hoop die weer is nog warm in Pta, hier in Jhb raak dit al koud.

Joni hier van die plaaslike koerant, Fourways Review ☺

Wil asb. net die volgende by jou uitvind: Kan jy my asb. 'n rowwe idea gee waneer die EIA sal beskikbaar gemaak word en hoekom dit al vier maande agterstallig is? Ek verstaan die goed vat baie tyd en navorsing, maar die mense hardloop uit tyd uit in Greater Kyalami want die development gaan eenvoudig net aan… Not to mention hoe Diepsloot besig is om te groei nie.

Kommentaar sal baie waardeer word, dankie.

Groete

Subject: Re: Minutes of the Meeting - K56 - 7 March 2012

Hi Lizelle,

I was not at the meeting but I am an interested and affected party. I would like to make some points.

1. Clearly this road has to be built, but it will only serve its purpose if it is built in its entirety. Anything less defeats its purpose.
2. I understand that people object to the road traversing their area. The acid test has to be whether they purchased their properties after it was proclaimed and put onto the map in the 1970's. Anyone who purchased their properties after this date(and I suspect that this will be the overwhelming majority) did so with the full knowledge that this was a proposed road in their area. The fact that this road was on the books would have been factored into the price that they paid for their properties. To now come along after the fact and claim all manner of rights to the alignment of the road holds no water. A simple test would be to say to those who want the road realigned onto someone else's property, this action will undoubtedly increase the value of their property, those benefiting from improved value must logically then pay the increase in value of their property to the owners of the property that would be affected by any realignment(I cannot see them accepting this, therefore how can they realistically expect those affected by any realignment to be any more accepting than they were) . Those property owners who have owned the property prior to the proclamation of the roads must be treated as a special case as they do have a legitimate case for compensation for loss of value. However I suspect that they will be very few and far between.
3. There is potentially a silver lining for property owners whose properties are affected by the road, that is the council typically looks favourably on applications for commercial rights along a corridor next to such roads to act as a buffer between busy roads and residential areas. This would undoubtedly increase the value of these properties as it has done with many of the properties along the Gautrain route.
4. The only legitimate gripe residents may have that bought their properties after the proclamation of these roads could be over environmental issues where rare and endangered species habitats could be destroyed.

I hope that this these points offer a more balanced perspective to what has clearly become an emotional issue.

Regards

Chris Symons - CEO

Chris / Andrea / Lizelle

I was away overseas and was not able to register for the Interested and affected parties in time. Nevertheless, I would still like to register, if possible, as follows:

Neil Allan Roberts 083 326 8045
Donné Roberts 083 556 7190
Dean Roberts (5yr old son)
Shannon Roberts (1yr old daughter)
Robson Nkwenya (Groom) 084 873 4344

Please confirm registration. I will be at the Resident's meeting tonight.

Subject: FW: Next communication re K56 alignment

Dear Residents,

Re the proposed alignment of the K56:

1. It is my opinion that everyone in Glenferness will be affected in one way or another – many negative or even to some extent some positive (ie properties located near a road).
2. In order for you to have a voice, you are reminded that you must be registered as an interested and affected party. This is a simple process – you simply have to list ALL the people on your property who will be impacted – residents, employers and employees. Provide full names and contact details for each individual – and send the e-mail to the following address: lizelleg@mweb.co.za.
3. Please copy me into the mail that you send when you register so I can ensure that you are on the list. There are often glitches and mistakes that cannot be rectified after the fact.
4. Registration deadline – 31 January 2012.
5. We are holding a very important meeting on this issue on 09 February in the Ebenezer Church hall (see separate e-mail notice). This meeting is important as the GRA Committee will be seeking a mandate on the resident's wishes regarding this road.
6. The GRA strategy at this stage is to acknowledge the need in this area for upgraded roads, but we do not agree with the alignment for two important reasons: a) the road will bisect Glenferness and destroy the equestrian and natural environment lifestyles that we have all invested in (refer to the GRA Management Plan that documents these aspects) and b) the current alignment destroys important wetlands which have been identified by various audits as being important in the greater scheme of riverine aspects, including the breeding habitats of bull frogs.
7. Point a) will also impact in many ways on jobs that have been created in this area in the equestrian industry.
8. There is huge external support for the protection of the wetlands by re-routing the K56 along a different path. And this is the point that requires input – what different path or route would we as residents support?
9. We are hoping to have some of the experts on the alternative routes at the meeting to assist with our deliberations.

It is thus very important that you register as per above – and we urge you to attend the meeting.

Hi there,

Glenferness becoming like Grand Central Station !

- With Escom already destroying our lovely rural area with even more hideous Power lines,
- Vodacom & MTN erecting Tree Towers
- And every Church imaginable wanting to build in the area
- Not to mention greedy developers wanting their pieces.
- we already offer the speeding taxis hurtling thru our area endangering animals & children, using Glenferness as a short cut
- and all the on going saga of unnecessary roads causing further destruction of wetlands & tranquility

As an interested & hugely affected party I wish to strongly oppose the construction of unnecessary roads
And register:
Myself – Jennifer Smith jenny@horsetrading.co.za 076 1555507
My mom Joan Smith – same contact details

Tenant – Jock Wellington – jockwell@mweb.co.za - 082 870 1227

Gardener - Emanuel
Gardener - Steve Shaba
Domestic worker - Josephine
All thru my contact details please

Thank you

Subject: Objection to proposed K56 road

Dear Lizelle,

Please note that I feel that the proposed road is unnecessary. I was present at the public participation meeting held in Glenferness. The proposed road only serves the interests of the construction parties involved. Funds offered up by the construction companies would serve the greater community if it was used to upgrade existing roads. There are insufficient funds to maintain existing roads, which are in desperate need of funds for maintenance .

I am sure you are aware of the importance of maintaining existing employment in today's economic environment, the equestrian industry in the area needs to be considered. The industry has provided jobs for thousands of people & will continue to do so for decades to come, as long as the industry isn't destroyed by the construction industry.

The proposed road also would cut through a sensitive wetland, and as you know, this is a breeding site for the HIGHLY endangered African Bullfrog.

The Gauteng Government is trying to discourage private transport into the CBD. The proposed road would encourage further urban 'spreading', which goes against the City's objectives.

Yours Faithfully

DR. Peter Mckendry

Subject: FW: Objection to the K56 draft EIA report for review
Attachments: Annexure I4(1) - Traffic report.pdf

From: Beverley [mailto:bb@asd.co.za]
Sent: 28 July 2015 12:25 PM
To: 'Lizelle Gregory'
Subject: Re: Objection to the K56 draft EIA report for review

Attention: Ms Lizelle Gregory

I would like to register my strong objections to the proposed K56 road development for the following reasons:

Impacts on Equestrian area
Equestrians rejected the suggestion of underpasses at the Equestrian Focus group meeting held in Glenferness as horses will not use underpasses and get frightened with heavy traffic. The suggestions put forward do not protect the unique equestrian community and industry and will cut Glenferness off from the rest of Kyalami. Also, an underpass was suggested for the movement of wildlife across Main road when it was upgraded about 10 years ago. However when it came to construction the budget did not allow it to be constructed. The Waterfall Equestrian estate installed an underpass for horses but this has never been used as horses refuse to utilise it.

The report states that the social impacts on this equestrian area could be seen as a fatal flaw. If they could be seen as such then surely further investigation is required? It is either a fatal flaw or it is not.

Upgrade of R55 is priority
Available budget should go for upgrading the R55 which already has Environmental approval and the support of land owners. The construction of the K56 without this upgrade will exacerbate an already severe traffic issue on the intersection of the R55 and Main road. Suggestions have been put forward formally by Malcolm Mackenzie as t o alternatives to the K56 construction; the City of Joburg and GDARD have requested that these be investigated in the EIA, however the EIA fails to investigate this sufficiently. The CSIR is running a traffic modelling of these suggestions which must be considered.

Comparison of costs:
Upgrade to R55 to dual lane is estimated at R60 million per kilometre. This is compared with the K56 which is estimated at a minimum of R90 million per kilometre including expropriation. This amount is a low estimate and may not include the cost of bridges and underpasses required. These would increase the budget substantially.

Flawed motivation for road:

The motivation for the road is that it is an east-west link road designed in the 1970's and was prioritised in the Strategic Roads Review in 2010. GEKCO has pointed out repeatedly that the review in 2010 prioritised different sections of the K56. However the EIA has not amended the report accordingly. This is misleading and a false representation of the facts.

The traffic modelling report which is promoting the K56 was compiled by WSP who is also contracted by Century Properties for a number of developments on the K56 route. They require this link for the proposed Riversands and Helderfontein commercial developments and have used the construction of the K56 as motivation for obtaining approvals. This creates a bias towards their client and the independence of the traffic modelling report could be in question. The modelling study was contracted by both Steyn City and Century Properties rather than the Gauteng Department of Roads and Transport.

Fatal flaw in continuation of K route

The K56 cannot be constructed as an east-west link as designed as there is a fatal flaw west of William Nicol (R511) and the report states the K56 will end at William Nicol. (One of the two priority sections mentioned in the 2010 report is the section where the fatal flaw has been identified). A developer approached province (see **attached traffic report for the Wisken development)** to develop the section east of the R55 and due to problems has decided to upgrade existing roads in this area. As a result, the K56 is effectively no longer a K route but an east west link between William Nicol (R511) and R55. There is an existing road which already serves this purpose which has recently been opened for the proposed Riversands development (Zinnia road). The Mackenzie alternative has identified this as the best alternative to the K56 and residents are in support of this provided the road remains a single lane road with traffic calming measures as it passes through an equestrian residential area and crosses biodiversity corridors. **The road can be upgraded to the City of Joburg standard for *Complete Streets*. Both the City of Joburg and GDARD requested that this alternative be investigated in the EIA, however no investigation is evident in the report.**

Prioritise integrated transport in line with *Integrated Transport Master Plan 2025* (ITMP25)

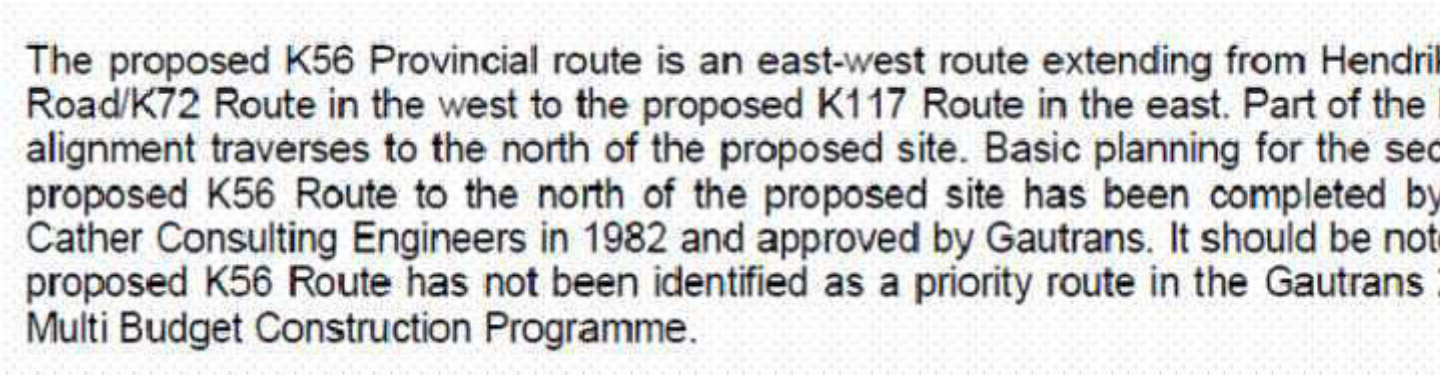
It is clear the motivation for this road is not the Province but private interest and funds could be better spent on the following improvements to improve traffic flow, public transport and non-motorised transport in the Fourways area. Cycling is becoming a preferred form of transport in both Diepsloot and Olievenhoutbosch due to affordability. William Nicol drive from Diepsloot to Fourways is considered the busiest section of road in the province for cycling. (NMT= Non motorised transport, i.e. cycling and walking)

1. Upgrade R55 (EIA approved for portion, some portions already complete) from N14 to link with Shakespeare drive. Include NMT infrastructure as many Olievenhoutbosch pedestrians and cyclists currently use this route.
2. Complete William Nicol (K46) upgrade to N14 - Install cycle lanes and BRT along William Nicol to Diepsloot. Retrofit cycle lanes from Steyn City to Fourways with a long term view to link to Braamfontein.
3. Upgrade N14 (budget approved as announced by MEC Vadi)
4. Upgrade Main road to Witkoppen - Include NMT infrastructure to also link into Braamfontein spruit
5. Upgrade Witkoppen with BRT and NMT – this becomes a complete street and east west public transport link
6. Upgrade Summit road (R562) to dual lane from Diepsloot to N1 and include NMT to Midrand

Failure to consider the Environmental Management Framework:
The Environmental Management Framework has been gazetted which promotes the Mackenzie alternative. The draft EIA fails to recognise the EMF and consider the suggestions despite it being a gazetted policy document and requests made by City of Joburg and GDARD to do so.

the proposed K56 Route has not been identified as a priority route in this report by a respected traffic engineer. This contradicts WSP's claim that it is a priority.

It does state that Main road (P71) is a priority for upgrading.



The proposed K56 Provincial route is an east-west route extending from Hendri
Road/K72 Route in the west to the proposed K117 Route in the east. Part of the
alignment traverses to the north of the proposed site. Basic planning for the sec
proposed K56 Route to the north of the proposed site has been completed by
Cather Consulting Engineers in 1982 and approved by Gautrans. It should be not
proposed K56 Route has not been identified as a priority route in the Gautrans

To: 'Lizelle Gregory'
Subject: Re: Objection to the K56 draft EIA report for review

Attention: Ms Lizelle Gregory

I would like to register my strong objections to the proposed K56 road development for the following reasons:

Impacts on Equestrian area

Equestrians rejected the suggestion of underpasses at the Equestrian Focus group meeting held in Glenferness as horses will not use underpasses and get frightened with heavy traffic. The suggestions put forward do not protect the unique equestrian community and industry and will cut Glenferness off from the rest of Kyalami. Also, an underpass was suggested for the movement of wildlife across Main road when it was upgraded about 10 years ago. However when it came to construction the budget did not allow it to be constructed. The Waterfall Equestrian estate installed an underpass for horses but this has never been used as horses refuse to utilise it.

The report states that the social impacts on this equestrian area could be seen as a fatal flaw. If they could be seen as such then surely further investigation is required? It is either a fatal flaw or it is not.

Upgrade of R55 is priority

Available budget should go for upgrading the R55 which already has Environmental approval and the support of land owners. The construction of the K56 without this upgrade will exacerbate an already severe traffic issue on the intersection of the R55 and Main road. Suggestions have been put forward formally by Malcolm Mackenzie as to alternatives to the K56 construction; the City of Joburg and GDARD have requested that these be investigated in the EIA, however the EIA fails to investigate this sufficiently. The CSIR is running a traffic modelling of these suggestions which must be considered.

Comparison of costs:
Upgrade to R55 to dual lane is estimated at R60 million per kilometre. This is compared with the K56 which is estimated at a minimum of R90 million per kilometre including expropriation. This amount is a low estimate and may not include the cost of bridges and underpasses required. These would increase the budget substantially.

Flawed motivation for road:
The motivation for the road is that it is an east-west link road designed in the 1970's and was prioritised in the Strategic Roads Review in 2010. GEKCO has pointed out repeatedly that the review in 2010 prioritised different sections of the K56. However the EIA has not amended the report accordingly. This is misleading and a false representation of the facts.

The traffic modelling report which is promoting the K56 was compiled by WSP who is also contracted by Century Properties for a number of developments on the K56 route. They require this link for the proposed Riversands and Helderfontein commercial developments and have used the construction of the K56 as motivation for obtaining approvals. This creates a bias towards their client and the independence of the traffic modelling report could be in question. The modelling study was contracted by both Steyn City and Century Properties rather than the Gauteng Department of Roads and Transport.

Fatal flaw in continuation of K route
The K56 cannot be constructed as an east-west link as designed as there is a fatal flaw west of William Nicol (R511) and the report states the K56 will end at William Nicol. (One of the two priority sections mentioned in the 2010 report is the section where the fatal flaw has been identified). A developer approached province (see **attached traffic report for the Wisken development)** to develop the section east of the R55 and due to problems has decided to upgrade existing roads in this area. As a result, the K56 is effectively no longer a K route but an east-west link between William Nicol (R511) and R55. There is an existing road which already serves this purpose which has recently been opened for the proposed Riversands development (Zinnia road). The Mackenzie alternative has identified this as the best alternative to the K56 and residents are in support of this provided the road remains a single lane road with traffic calming measures as it passes through an equestrian residential area and crosses biodiversity corridors. **The road can be upgraded to the City of Joburg standard for *Complete Streets*. Both the City of Joburg and GDARD requested that this alternative be investigated in the EIA, however no investigation is evident in the report.**

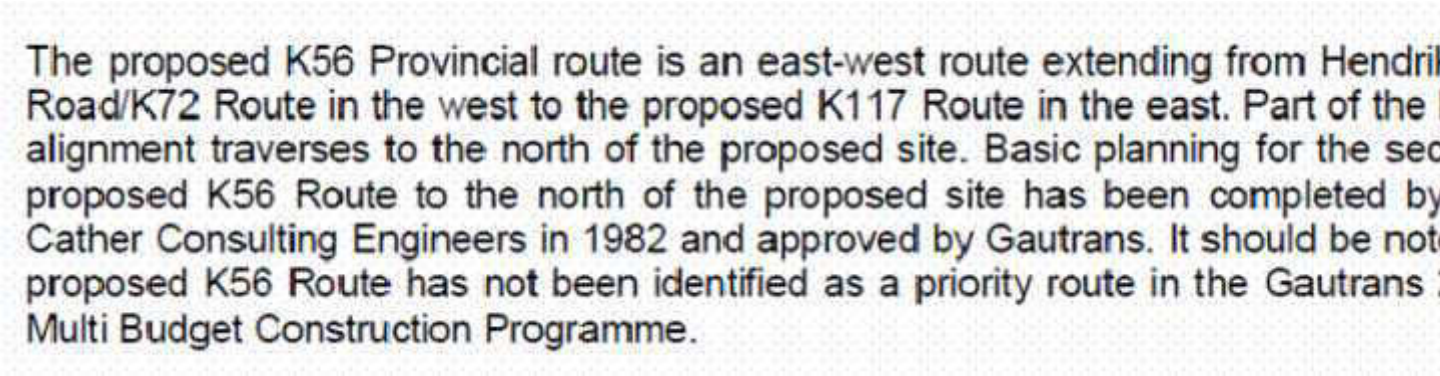
Prioritise integrated transport in line with *Integrated Transport Master Plan 2025* (ITMP25)
It is clear the motivation for this road is not the Province but private interest and funds could be better spent on the following improvements to improve traffic flow, public transport and non-motorised transport in the Fourways area. Cycling is becoming a preferred form of transport in both Diepsloot and Olievenhoutbosch due to affordability. William Nicol drive from Diepsloot to Fourways is considered the busiest section of road in the province for cycling. (NMT= Non motorised transport, i.e. cycling and walking)

1. Upgrade R55 (EIA approved for portion, some portions already complete) from N14 to link with Shakespeare drive. Include NMT infrastructure as many Olievenhoutbosch pedestrians and cyclists currently use this route.
2. Complete William Nicol (K46) upgrade to N14 - Install cycle lanes and BRT along William Nicol to Diepsloot. Retrofit cycle lanes from Steyn City to Fourways with a long term view to link to Braamfontein.
3. Upgrade N14 (budget approved as announced by MEC Vadi)
4. Upgrade Main road to Witkoppen - Include NMT infrastructure to also link into Braamfontein spruit
5. Upgrade Witkoppen with BRT and NMT – this becomes a complete street and east west public transport link
6. Upgrade Summit road (R562) to dual lane from Diepsloot to N1 and include NMT to Midrand

Failure to consider the Environmental Management Framework:
The Environmental Management Framework has been gazetted which promotes the Mackenzie alternative. The draft EIA fails to recognise the EMF and consider the suggestions despite it being a gazetted policy document and requests made by City of Joburg and GDARD to do so.

the proposed K56 Route has not been identified as a priority route in this report by a respected traffic engineer. This contradicts WSP's claim that it is a priority.

It does state that Main road (P71) is a priority for upgrading.



The proposed K56 Provincial route is an east-west route extending from Hendri
Road/K72 Route in the west to the proposed K117 Route in the east. Part of the
alignment traverses to the north of the proposed site. Basic planning for the sec
proposed K56 Route to the north of the proposed site has been completed by
Cather Consulting Engineers in 1982 and approved by Gautrans. It should be not
proposed K56 Route has not been identified as a priority route in the Gautrans
Multi Budget Construction Programme.

Dear Sir/Madam

Portion 21 Glenferness AH (title deed) on 207 Macleans Road, Glenferness AH (as indicated on acct 0911159000151051)

The following people that lives on this specific property between 13 to 27 years:

Pieter Schalk Els
Alena van Schalkwyk
Josphat Moyo
Tiffiness Phiri (Ettina)
William Mannely Mabasse

Andrew John Arnold
Valerie Ann Arnold
Rory Arnold
Tristan Arnold

Are all registering as interested and affected persons.

Others also affected by this are the dogs, cats, cows, many peacocks, bird varieties, plovers, cuckoos, chickens, geese, ducks and wild life.

I hereby also state categorically and definitely that when I bought this property in 1984 and until now (January 2012) no road servitude was registered against this title deed as well as no expropriation done against this property. Up to date I also have never been contacted regarding this matter.

Sent: 27 October 2012 01:13 PM
To: 'Lizelle Gregory'
Subject: plot 73 Main road/k56

Dear Ms. Gregory,

Ref; E A P K56. Plot 73 Main Road.

The current plan shows a new road linking Main Road and the k56 going straight through plot 73.

Plot 73 has been developed into a prime visitor centre in Gauteng and is the largest Orchid and Bonsai centre in South Africa.

Planning is complete for a large Butterfly Farm. The enclosed section (1200m2) will house butterflies from all over the world and the open section (250m2) will be constructed on the "BUTTERFLY ROUTE" to facilitate and promote the indigenous butterflies which are under threat.

This Centre will be one of the **prime** tourist attractions in Gauteng (and not the R5.00 per day tourist).

The **Educational Centre** will be one of **excellence, e**specially those students in Science, Biology and Tourism.

I would respectfully request you re-consider the alignment of the on-ramp joining Main Road and the K56 for the following reasons.

a. The cost of duplicating that section of road will be expensive-more so as both roads are only temporary until the PWV9 is constructed.
b. Traffic flow on both the K56 and Main road will be more smoother without the re-aligned "on ramp"
c. Damage to plot 73, the Butterfly route, and the Giant African frog enclave would be minimal.
d. The employment of 18 people would be secured.

There is no doubt – especially since Mr. Francois van Rensburg delivered his very informative and well researched background and need for the K56 on the 10th October 2012, - that the K56 must go ahead.

Our centre fits in well with the lifestyle of the surrounding area.

I would venture to add that Main road between Chatten and Cedar road has had a major transformation since our centre opened. Of course I do not take credit for all the improvements but like to think our concept has had an influence. The following major beneficial changes have taken place ;

a. The rather shabby Fryslan Nursery (opposite Leawkop Prison)has been taken over by Ludwicks Roses and you can see the first class upgrade taking place.
b. The Palm nursery (cnr Zinnia) has been bought out by Eskom and we are expecting them to clean up that eyesore.
c. Our own Centre has improved enormously and we receive daily complements and with the coming of the Butterfly and Educational Centre we envisage a further major (green)improvement to the area.
d. Opposite our centre, construction is almost complete on a premium KOI Centre which will open next year.
e. The Nursery on the corner Main and Cedar roads has been taken over by HUAERS Family Nursery and the wonderful upgrades and changes they have made is very pleasing indeed.
f. The "Country Pub" (cnr Cedar) has had a major up grade since the new owners have taken over –in my opinion not good enough yet-but I am working on it.

I ask you to re-consider the alignment of this section of road and show everyone that you are part of the solution.
By these changes not only the current residents of the area will gain but should also be a major attraction for the future residents of Helderfontein and Crowthorne.

Please feel free to contact me should you require any more information.

Cc: mdonde@iafrica.com; 'Chris de Villiers (Glenferness)'
Subject: Proposed alignment of K56 road

Dear Lizelle,

I have a number of serious objections to the proposed route for the K56.

The proposal:

1. Ignores the road and urban developments which have occurred over the past 50 years.

2. Does not consider the equine commercial and employment establishments in the area and the very severe damage which will result.

3. Makes a mockery of the stated policies and plans of local, provincial & national government.

4. Makes a mockery of the stated changes in policy and plans by national government regarding public transport and multi lane highways.

5. Serves the benefit of greedy property developers at the expense of existing residents.

6. Does not consider well thought out alternatives which will also cater for the needs of the greedy developers.

7. In particular does not recognise the inevitable expansion of Main, Nicol, Zinnia & Maple roads.

8. Is superficial in content.

9. Is out of context with the established infrastructure of Kyalami, Glen Ferness and surrounds.

10. Is flying a kite for a generally unnecessary road development.

Yours sincerely, Keith Bush

Subject: FW: Proposed K56 road to damage Kyalami wetland

From: BridgetC [mailto:bridgetc@ewt.org.za]
Sent: 18 April 2012 11:14 AM
To: 'Lizelle Gregory'
Cc: 'Judith Taylor'; chair@justenvironmental.co.za
Subject: RE: Proposed K56 road to damage Kyalami wetland

Hi Lizelle

Thanks for your prompt response and for the update on the process. Based on the information available at present, my issues are as follow:

- The necessity of this road is in question. To risk damaging a sensitive ecosystem and the breeding grounds of an important wetland species (African Bullfrog) the motivation for this road must be totally sound. From what I understand, it is not. What alternatives are being proposed?
- The upgrading the Crowthorne - Krugersdorp motorway should be listed and assessed as an alternative.
- The impact of this road on the integrity of the wetland area is my main concern. The development benefits do not seem to outweigh the ecological losses in this case.
- Taken from the GDARD website: *"Environmentalists, government officials and communities from around Soweto gathered at Dorothy Nyembe Education Centre in Dobsonville to listen to MEC Nandi Mayathula-Khoza raise awareness and outline measures on how to preserve and protect wetlands. The event was a partnership between the Gauteng Department of Agriculture and Rural Development [GDARD] and other partners such as City Parks and the City of Joburg to celebrate Wetland's Day. During her address in Soweto, MEC Nandi Mayathula-Khoza said unity is critical in curbing the destruction of the estimated 35-60% of the country's wetlands. "Let us conserve and manage our wetlands as they are vital in reducing the severity of draughts and floods. Wetlands purify water and provide a habitat for many different plants and animals valuable to the community'," Mayathula-Khoza urged."* Wetland conservation is one of the main priorities for provincial government and must be considered very seriously

Dear Bridget Corrigan,

Thank you for your response,

I will register you as Interested and Affected Party Member. I will keep you updated regarding the proposed K56 Project. So far, we've held a Scoping Public Meeting in the past 7 March 2012. The meeting was in connection of all the Interested and Affected Parties attending the meeting and we've received all their Issues and Concerns regarding the proposed K56 Project. I am still busy with the Minutes of the Meeting and the next step is filing all the issues and concerns on the data basis. There will be a next Public Meeting in the future, will keep you updated.

It will be kind if you can please send me all your Issues and Concerns, if you have any.

Hope this finds you well.

Kind Regards

Juanita De Beer

Hi Lizelle

We have recently been made aware of the EIA for the proposed construction of a road in Kyalami that is planned to go through a wetland area and bullfrog breeding area. Will you please register me as an I&AP and let me know where the project is in the EIA process.

Kind Regards

Bridget Corrigan

Address 48 Duncan Road, Glenferness.

Names - Michael Byerley
Ray Byerley

Manfred Paulsen
Kerry Paulsen

We at 48 Duncan Road Glenferness, are affected and interested parties regarding the proposed road through our suburb, and register now as such.

This is a travesty! We have horses, my son in law works as a farrier and his work will be greatly affected. This last bit of countryside will be seriously compromised, and is really unnecessary considering the fact that for a much lesser cost, alternatives can be arranged.

Yours sincerely,
RayByerley

Please don't print this e-mail unless you really need to

Dear Residents,

Re the proposed alignment of the K56:

1. It is my opinion that everyone in Glenferness will be affected in one way or another – many negative or even to some extent some positive (ie properties located near a road).
2. **In order for you to have a voice, you are reminded that you must be registered as an interested and affected party. This is a simple process – you simply have to list ALL the people on your property who will be impacted – residents, employers and employees. Provide**

full names and contact details for each individual – and send the e-mail to the following address: lizelleg@mweb.co.za.

3. Please copy me into the mail that you send when you register so I can ensure that you are on the list. There are often glitches and mistakes that cannot be rectified after the fact.
4. Registration deadline – 31 January 2012.
5. We are holding a very important meeting on this issue on 09 February in the Ebenezer Church hall (see separate e-mail notice). This meeting is important as the GRA Committee will be seeking a mandate on the resident's wishes regarding this road.
6. The GRA strategy at this stage is to acknowledge the need in this area for upgraded roads, but we do not agree with the alignment for two important reasons: a) the road will bisect Glenferness and destroy the equestrian and natural environment lifestyles that we have all invested in (refer to the GRA Management Plan that documents these aspects) and b) the current alignment destroys important wetlands which have been identified by various audits as being important in the greater scheme of riverine aspects, including the breeding habitats of bull frogs.
7. Point a) will also impact in many ways on jobs that have been created in this area in the equestrian industry.
8. There is huge external support for the protection of the wetlands by re-routing the K56 along a different path. And this is the point that requires input – what different path or route would we as residents support?
9. We are hoping to have some of the experts on the alternative routes at the meeting to assist with our deliberations.

It is thus very important that you register as per above – and we urge you to attend the meeting.

Subject: Request for documentation from public meeting K56

Hello Lizelle

After the public meeting on 7 March, I sent a request for information which I have not yet received. Please see the list of requested documents below.
Further, at the meeting it was requested by Cllr. Deppe that a second public participation meeting be held with the engineers and head of department in attendance. As there were no representatives of the roads department or engineers present, some of the questions were not answered at the meeting. Please advise when this is to be scheduled.

Kind regards

Hello Lizelle

Thank you for the public meeting yesterday to discuss the K56.

Please can you forward your power point presentation (received) and the relevant documentation discussed at the meeting including:

Strategic Road Review produced by VKE Engineers – still required
Contact details for GLS in Stellenbosh – as I understand they will have the master plan for services required for the developments in the area – still required
A map of the proposed road with the CPlan overlaid designating irreplaceable sites - received as part of presentation
Current map showing the proposed road and Urban Development Boundary – still required
Scoping document for the proposed road – if available

If it is more convenient I would be happy to collect a CD from your offices.

Kind regards

Kristin Kallesen

Dear Lizelle

I trust you are well.

With respect to the roads proposed in Glenferness and the surrounding areas, we would very much like a discussion with the Engineers selected for intended work to see how this will affect the Church.

We look forward to your reply.

SCOPING REPORT FOR DESIGN AND CONSTRUCTION OF ERLING ROAD BETWEEN K46 AND K56 AND THE K56 BETWEEN K46 AND MAIN ROAD (R71) (GAUT 002/11-12/E0255)

Your report dated 26 June 2013 refers.

Description of the project:

The proposed application is for the design and construction of Erling road between K46 and K56 and the K56 between K46 and Main Road (R71), including all access roads.

Guidelines, by-laws, Precinct Plans and policies:

The Report takes into account all relevant policies, by-laws and strategies. The proposed activity lies within Region A Sub-Area 8 of the RSDF. The entire sub area falls outside the Urban Development Boundary. It comprises mainly of environmentally sensitive areas, natural open spaces, agricultural holdings and farm portions. This means that no further township establishments can be supported on any erven within Sub Area 8. The entire sub area falls within the Greater Kyalami Conservancy (GEKCO) area.

According to the RSDF, development applications in this sub area are to be assessed in accordance with the Witpoort Development Framework 2020 (2008), which should be read in conjunction with the Growth Management Strategy (GMS), which identifies this area as a Peri Urban Management Area. Unless the availability of infrastructure and other bulk services can be confirmed by the relevant MOEs and core departments, applications for densification, land use intensification and /or other uses will not be will

not be supported. The Development Objective 1 for the area is to "*protect environmental qualities and amonities in the sub area*"

Description of alternatives (route alignment):

- **Alternative 1:** to the north of the proposed K56 alignment.
- **Alternative 2:** to the south of the proposed K56 alignment.
- **Alternative 3:** along the alignment of Zinnia and Caracal from Main Road linking to the K46

Alternative 3 as supplied by a member of the public makes sense as this alignment will have the least impact on the environment. This alternative should be investigated further and included in the EIA report.

Description and assessment of the identified environmental issues:

In terms of the City's Bioregional Plan and Wetland Audit the site falls within a critical biodiversity area.

The proposed activity is traversing the wetlands and riparian zones in the area. Degraded or pristine, a watercourse or a wetland is a sensitive ecosystem and irrespective of its transformed state it must still be protected from development. It is the view of this Department that the proposed activity must contribute towards the improvement of the ecosystem instead of posing further degradation of the receiving environment.

This Department understands the need and desirability of the proposed road; however the concept of sustainable development is of priority therefore the specialist studies that will form part of the EIA phase should adequately address issues of concern such as loss of biodiversity; topographical change and loss of sensitive habitats.

Evaluation and presentation of mitigation measures:

Mitigation measures emanating from the specialist studies should also be included in the EMP.

Public participation:

The Public Participation process was undertaken in accordance with NEMA EIA Regulations 2010 as presented. A number of objections/concerns were received and should be addressed in the EIA.

Recommendations:

1. The proposed alignment is likely to pose adverse detrimental effects on the receiving environment. Therefore, thorough assessment of all identified alternatives and mitigation measures must be conducted including the alternative supplied by Mr. Mackenzie, a member of the public.
2. The design of a storm water management system should be based on sustainable urban drainage systems (SUDS) and water sensitive Urban Design approaches (WSUDS) which enhance natural drainage. The Stormwater Management Plan must be based as far as possible on robust low maintenance structures and measures. The Stormwater Management Plan be subject to the approval of the Environment, Infrastructure & Services Department and the JRA.

3. A Socio-Economic Impact Assessment should be included in the EIA to assess the impacts of the proposed road on the equine industry.
4. The specialist studies that will form part of the EIA phase should adequately address issues of concern e.g. loss of biodiversity; topographical change; loss of sensitive habitats etc. The recommendations should also be included in the EMP.

Should you have any queries please do not hesitate to contact Etienne Allers on the numbers indicated above.

Yours faithfully

pp MWatshitanga.

Sent: 23 January 2012 01:33 PM
To: 'George Gericke'; Julie Hannah
Cc: lizelleg@mweb.co.za; 'Chris de Villiers'
Subject: K 56

Dear George and Lizelle,

I am the landowner of 25 MacInnes Road (Holding 25 Glenferness Agricultural Holdings) – and I have sent you copies of my title deeds already so you can see exactly where this property lies (your numbering does not include all our formal legal numbering – so you might wish to change this accordingly).

This communication is to formally register myself (Julie Patricia Hannah) as an interested and affected party in the proposed alignment of the K56 in that the current alignment destroys most of the buildings on my property – and there seems to be a problem in that there is unlikely to be compensation for this unconstitutional

removal of our property, should the road be constructed along its current proposed route.

The following is a list of the people who are also to be registered as interested and affected parties. These people are to be registered in their own right and to be contacted at the postal and e-mail address noted below:

Julie Patricia Hannah – landowner – Holding 25 Glenferness Agricultural Holdings (25 MacInnes Road)
Christopher John de Villiers (spouse of Julie Patricia Hannah – co-landowner)
Devin Ross (son of Julie Patricia Hannah) – residing with JP Hannah and CJ de Villiers
Althea Wade (sister-in-law to CJ de Villiers and single parent) – residing with JP Hannah and CJ de Villiers
Audrey Wainright – single mother with two dependent sons – cousin to JP Hannah, living in one of the cottages at 25 MacInnes Road
Janet Wainright – widowed single mother with two dependent daughters – cousin to JP Hannah – living in a cottage on 25 MacInnes Road
Stefano and Megan Piller with two dependents – tenants at 25 MacInnes Road Glenferness
Iris Lamberts – single, tenant at 25 MacInnes Road Glenferness
Julia Moagi – employee at 25 MacInnes Road Glenferness
Aaron Moyo – employee (maintenance manager) – at 25 MacInnes Road Glenferness

All of the above have the following contact address for this registration and for further individual communication:

PO Box 529 WITS 2050; e-mail – chrisdev@cjconsultants.co.za

Please confirm that all of these people and their families have been registered as interested and (directly) affected parties by the alignment of the K56.

Many thanks and regards,
