Online submission to SAHRA and by email: jlavin@sahra.org.za and phine@sahra.org.za

Dear Ms. Lavin and Mr. Hine

**PHASE 1 ARCHAEOLOGICAL IMPACT ASSESSMENT FOR FARM BESTWOOD RD 459 IN KATHU,
GAMAGARA MUNICIPALITY, NORTHERN CAPE PROVINCE**

Dear Ms Lavin and Mr Hine,

As per previous correspondence, please find attached the Phase 1 Archaeological Impact Assessment report compiled by Dr. David Morris (Archaeology Department, McGregor Museum, Kimberley) which is being submitted in response to your initial 2008 written request for a Phase 1 Archaeological Impact Assessment to be undertaken, as well as your letter dated 9 January 2014.

Both the AIA as well as the desktop Paleontological assessment which was submitted to your Unit on 31 January 2014 will inform your decision (with recommendations) for the above development.

It should be noted that it became apparent that although the temporary sewage pipeline is still under assessment by your Unit, during Dr Morris' 23 January 2014 site visit, the temporary sewerage pipeline had in fact already been constructed.

J&G were under the impression from the Developer (SA House: Marius Vivier) that this pipeline had not been constructed at the time of writing the letter to you, however it is apparent that during Dr. Morris' 23 January 2014 site visit, the temporary sewerage pipeline had in fact already been constructed. J&G have now been informed by the Developer (SA House: Marius Vivier) that the pipeline has now been uncoupled and removed and this was confirmed at a site visit by J&G on 5 February 2014.

Yours faithfully

Tamara Drake (Ms.)
